PosBuzz Shop App Manual

For shop owners, managers and cashiers

Edition of 7 November 2026

Contents

Welcome to PosBuzz

- How the manual is organised
- Signing in for the first time
- What you may see depends on your role
- Conventions used in this manual
- Using the app on a phone or tablet
- Before you start selling: a checklist for a new shop

Part 1 - Getting started, dashboard and settings

- Signing in and moving around
- Dashboard
- Account & Security
- Company Profile
- Branches
- Roles
- Users
- Support

Part 2 - Products and catalogue

- Products, variants and batches in plain words
- Products
- Product Details
- Add Product, Edit Product and Copy Product
- Categories
- Brands
- Tags
- Units
- Barcode Printing
- Product Audit
- Sales Stats

Part 3 - Inventory, vendors and purchase payments

- Payment Methods rows (used when adding stock and when paying a supplier)
- Vendor picker and quick vendor forms (used on Add Inventory and Edit Inventory)
- View Inventory
- Add Inventory (and Edit Inventory)
- Inventory Transfer
- Add Transfer
- Inventory Adjustment
- Add Adjustment
- Stock Overview
- Variant Stock Details
- Movement History
- Expiring Items
- Low Stock
- Vendors

Vendor Details
Purchase Payments
Make Payment

Part 4 - Selling: POS, sales, returns, quotations, dues and promotions

Express Sale (Point of Sale)
New Sale
View Sales
Sale page (Sale #number)
View Returns
Create Return
Return page (Return #number)
View Quotations
New Quotation
Quotation page (Quotation #number)
Due Payments
Make Payment (Make Payment - Sale #number)
Disc. & Promo

Part 5 - Online orders, delivery, customers, rewards, reports and printing

Online Orders
Delivery Partners
Delivery Partner page
Pending Deliveries
Sales Target
User Sales Stats
Business Report
Operational Costs
Customers
Customer history
Reward Points
Rewards
POS Layout
Printer Settings
Create or Edit Receipt Setting
Setting up receipt printing

Part 6 - Everyday problems and word list

Everyday problems
When you need help
Word list

Welcome to PosBuzz

PosBuzz is the point-of-sale system for your shop. With it you can:

- ring up sales at the till and print receipts,
- keep track of your products, stock, vendors and what you owe them,
- take returns, give quotations and collect money that customers still owe,
- manage online orders and the couriers who deliver them,
- reward loyal customers with points,
- see how the day and the month went, and
- give each member of staff only the screens they need.

This manual explains every screen of the Shop App, step by step. The PosBuzz team can open or download it from **User Manuals** in the Admin Panel and share it with your shop. You do not need to read it from start to finish. Use the **Contents** page to jump to the screen you need.

How the manual is organised

Part	What it covers
Part 1	Signing in, the layout, the dashboard, your account, company settings, roles, users, branches and support
Part 2	Products, categories, brands, tags, units, barcode labels, product audit and product sales statistics
Part 3	Stock: inventory, transfers, adjustments, stock overview, expiring and low stock, vendors and purchase payments
Part 4	Selling: Point of Sale, sales, returns, quotations, due payments and promotions
Part 5	Online orders, delivery partners, customers, reward points, reports, operational costs, printing
Part 6	Everyday problems and their fixes, and a short word list

Signing in for the first time

1. Open the address of your shop. It is your shop name followed by the PosBuzz domain, for example `myshop.posbuzz.xyz`. PosBuzz staff choose this address when they create your shop account, and your PosBuzz contact gives it to you. The first part of the address (your subdomain) is also printed on your PosBuzz billing invoice. If you do not know the address, ask your PosBuzz contact or the shop owner. Save it as a bookmark in your browser so you can open it quickly next time.
2. Enter the email and password you were given.
3. Press **Login**.

If you see a page saying your subscription is inactive, your shop's paid period has ended. Contact PosBuzz support to renew it. Nobody in your shop can sign in until it is renewed.

What you may see depends on your role

The shop owner decides what each person can do. Every person has a **role**, and every role has a list of **permissions**. The left-hand menu only shows the screens your role allows. If you cannot find a screen described in this manual, you probably do not have the permission for it. Ask the owner or a manager with the *Users & Roles* permission to change your role.

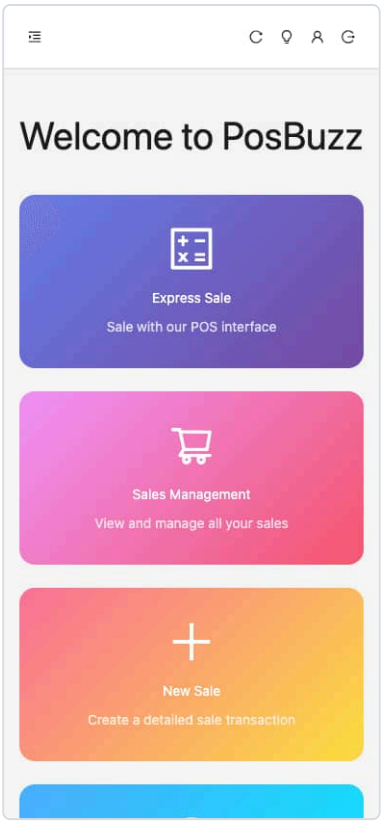

Your shop's **plan** also limits what is available. A feature that is not included in your plan does not appear for anyone in the shop.

Conventions used in this manual

- Names of buttons, fields, menu items and messages appear in **bold**, exactly as the app shows them.
- A menu path such as **Sales > View Sales** means: open **Sales** in the left menu, then click **View Sales**.
- Tables headed *Field* / *Required* / *Notes* list every box on a form. A red star in the app marks a required box.
- Tables headed *Message* / *What it means* / *What to do* list the messages the app shows when something needs your attention.
- A yellow note starting with **Good to know:** describes something that may surprise you.
- Amounts are in Bangladeshi taka. Dates and times use Bangladesh time (Asia/Dhaka). A business day runs from midnight to midnight in that time zone.

Using the app on a phone or tablet

The Shop App adjusts to the screen. On a phone the menu folds away: tap the menu button at the top left to open it, tap an item, and it closes again. Tables scroll sideways. Forms open as panels that fill the screen. The Point of Sale screen works on a tablet or computer best, because it shows many things at once.

The dashboard on a phone-sized screen.

You can also install the app from your browser's menu (for example **Add to Home screen** on a phone, or the install icon in the address bar on a computer) so that it opens like a normal app.

Before you start selling: a checklist for a new shop

Follow this order the first time. Each step points to the part of the manual that explains it.

1. Check your **Company Profile** (name, address, logo). *Part 1.*
2. Create your **Branches** if you have more than one place. *Part 1.*
3. Create **Roles** and **Users** for your staff. *Part 1.*
4. Add **Units**, **Categories**, **Brands** and **Tags**. *Part 2.*
5. Add your **Vendors**. *Part 3.*
6. Add your **Products**. *Part 2.*
7. Add your starting stock with **Add Inventory**. *Part 3.*
8. Add your **Customers** (or add them as you sell). *Part 5.*
9. Set up **Printer Settings** and the receipt printer. *Part 5.*
10. Make a test sale on the **Point of Sale** screen and check the receipt. *Part 4.*

Part 1 - Getting started, dashboard and settings

This part explains how to sign in, how to move around the app, and how to use the Dashboard and the screens in Settings. All money in the app is in taka (BDT) and is shown with two decimals. All dates and "today" follow Bangladesh time (Asia/Dhaka).

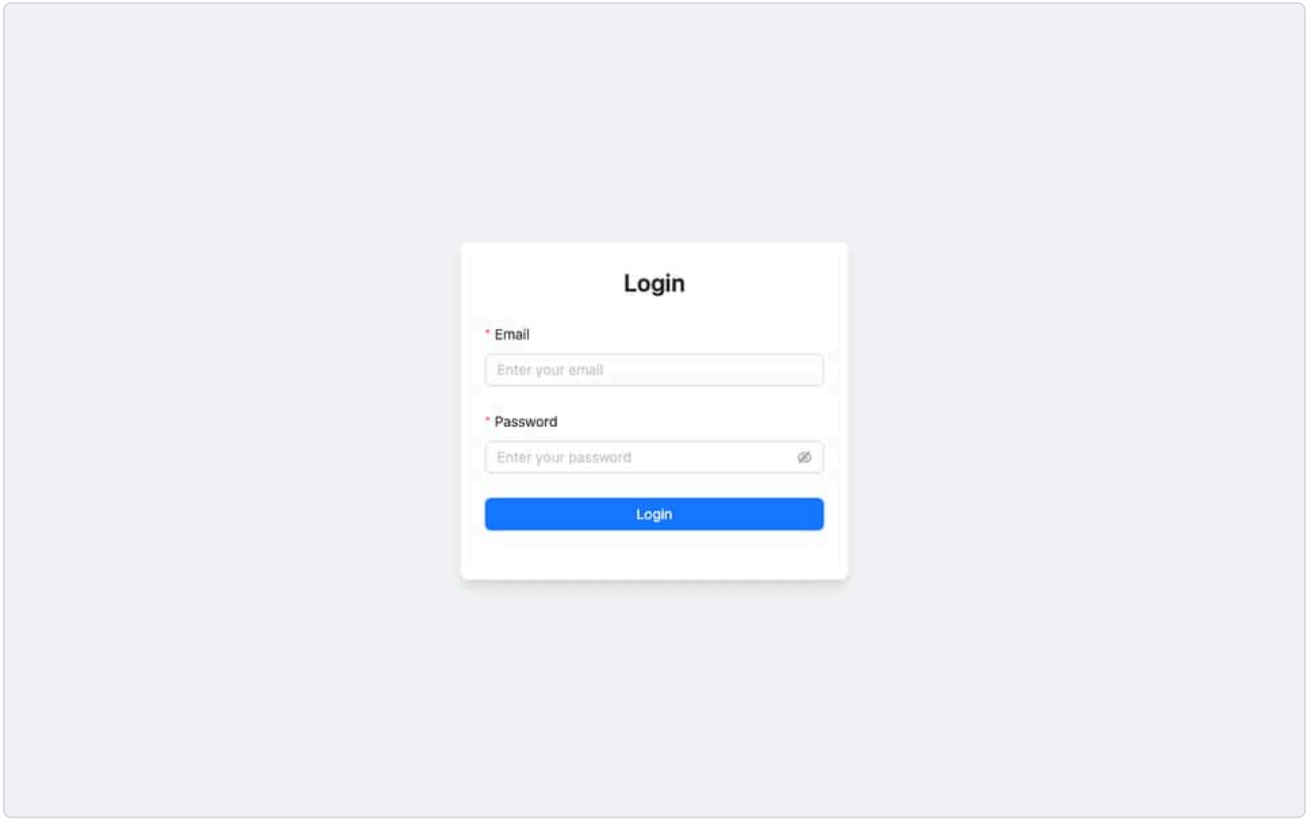

Signing in and moving around

What it is

PosBuzz is opened from your own shop address in a web browser (for example, yourshop.posbuzz.xyz). Every shop has its own address. You sign in there with your email and password.

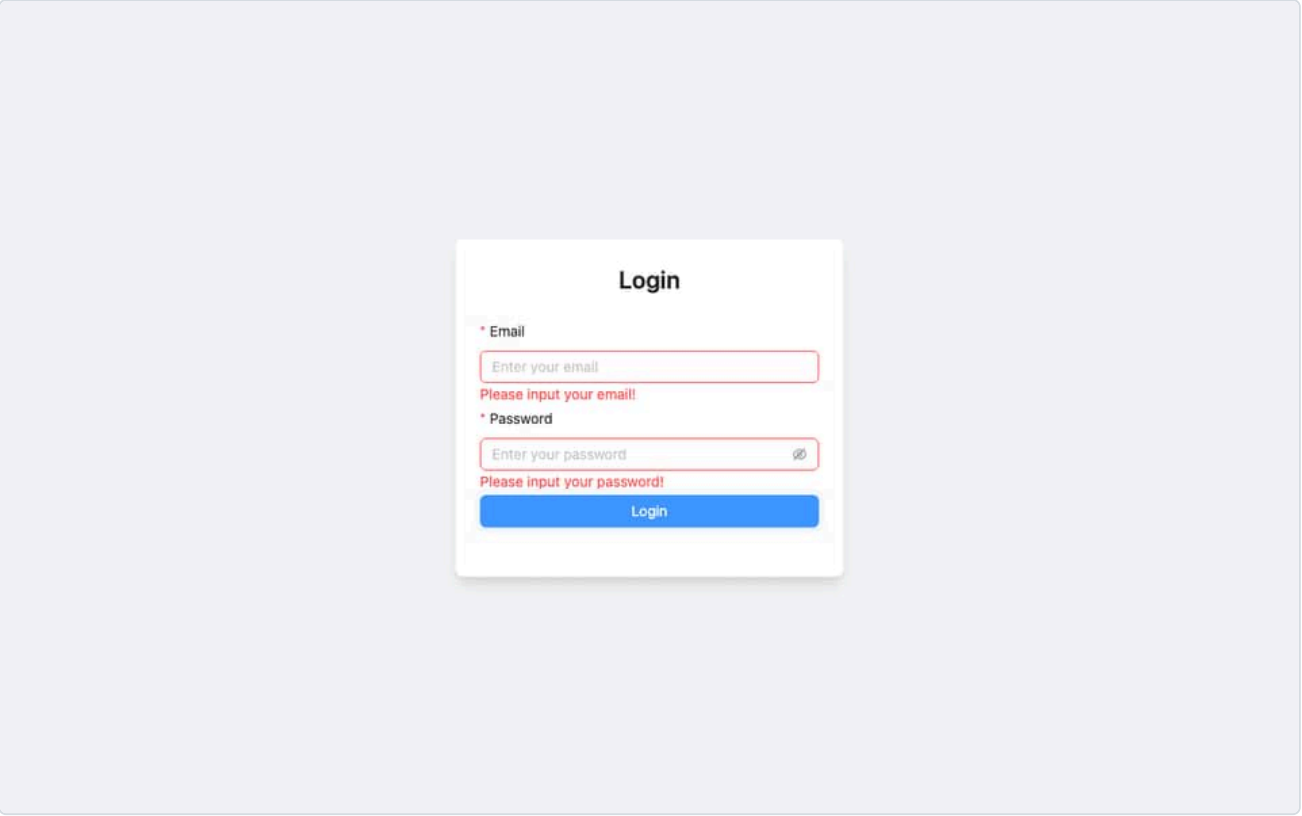

How to sign in

1. Open your shop address in the browser. If you are not signed in, the **Login** page opens by itself.
2. Type your email in the **Email** box.
3. Type your password in the **Password** box. Click the eye icon to show or hide the password.
4. Click **Login**, or press Enter.

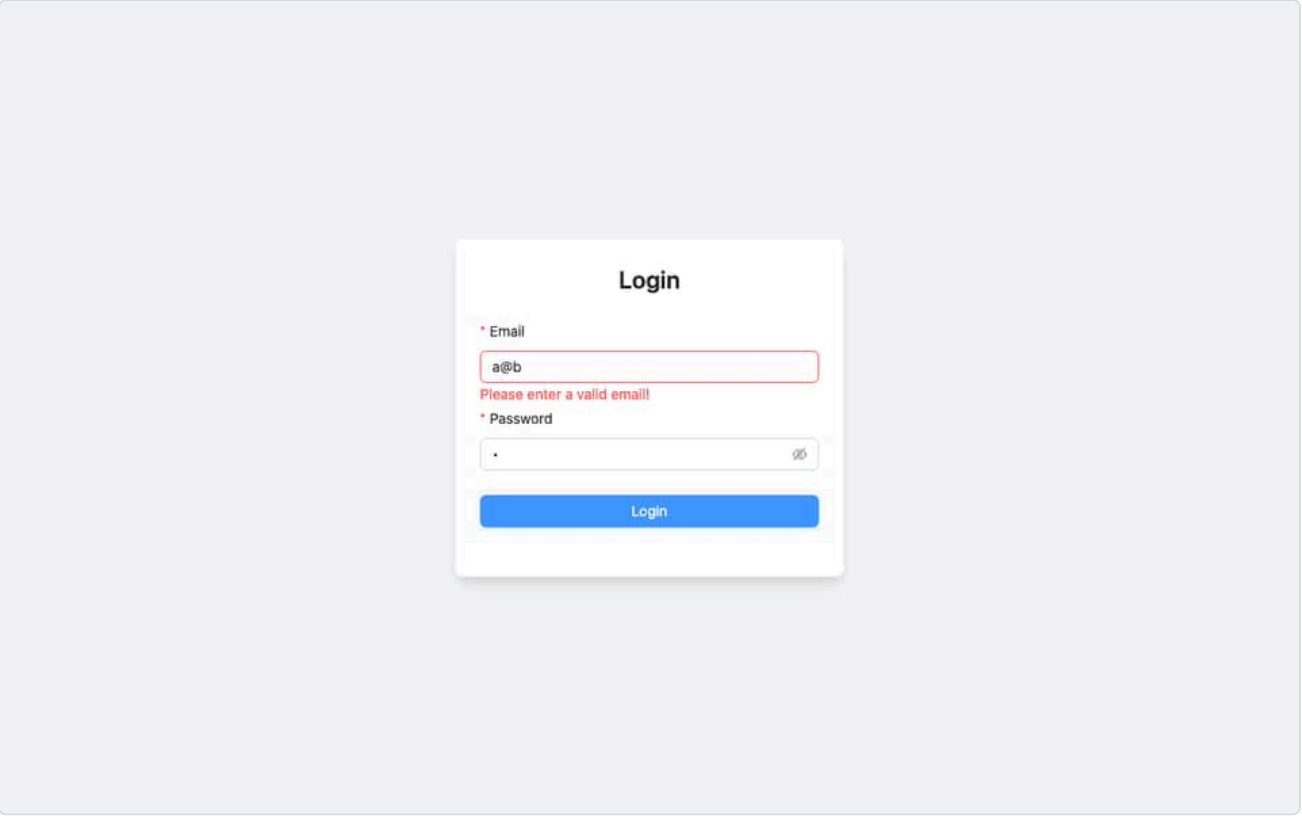

The Login page with both boxes empty.

If you press **Login** with a box empty, a red message shows under that box.

Pressing Login with both boxes empty shows two red messages.

If the email is not in email format, this message shows under the Email box.

An email such as "a@b" is refused with "Please enter a valid email!".

What happens next: The button shows a spinner while the app checks your details. A green message "Login successful" appears. You go to the page you first tried to open, or to the Dashboard if there was none.

Field	Required	Notes
Email	Yes	Placeholder "Enter your email". Starts empty.
Password	Yes	Placeholder "Enter your password". Starts empty. Has a show/hide eye icon.

Message	What it means	What to do
Please input your email!	The Email box is empty.	Type your email.
Please enter a valid email!	The text is not in email format.	Check for typing mistakes.
Please input your password!	The Password box is empty.	Type your password.
Login successful	You are signed in.	Nothing.
Invalid email or password	The email or the password is wrong. The app does not say which one.	Check both and try again.
Your subscription is not active. Please renew it or contact support to continue.	Your password was right, but the shop subscription has lapsed.	Renew the subscription or contact support.
Invalid credentials for this tenant	This account belongs to a different shop address.	Open the address of your own shop.
No valid subdomain found. Please access via tenant subdomain.	The address you opened is not a shop address.	Open your shop address.
Too many attempts. Please wait a minute and try again.	You tried to sign in too many times.	Wait one minute, then try again.
Can't reach the server. Check your connection and try again.	Your internet is off or weak.	Check your connection and try again.
Login failed	Sign-in failed and no reason was given.	Try again.

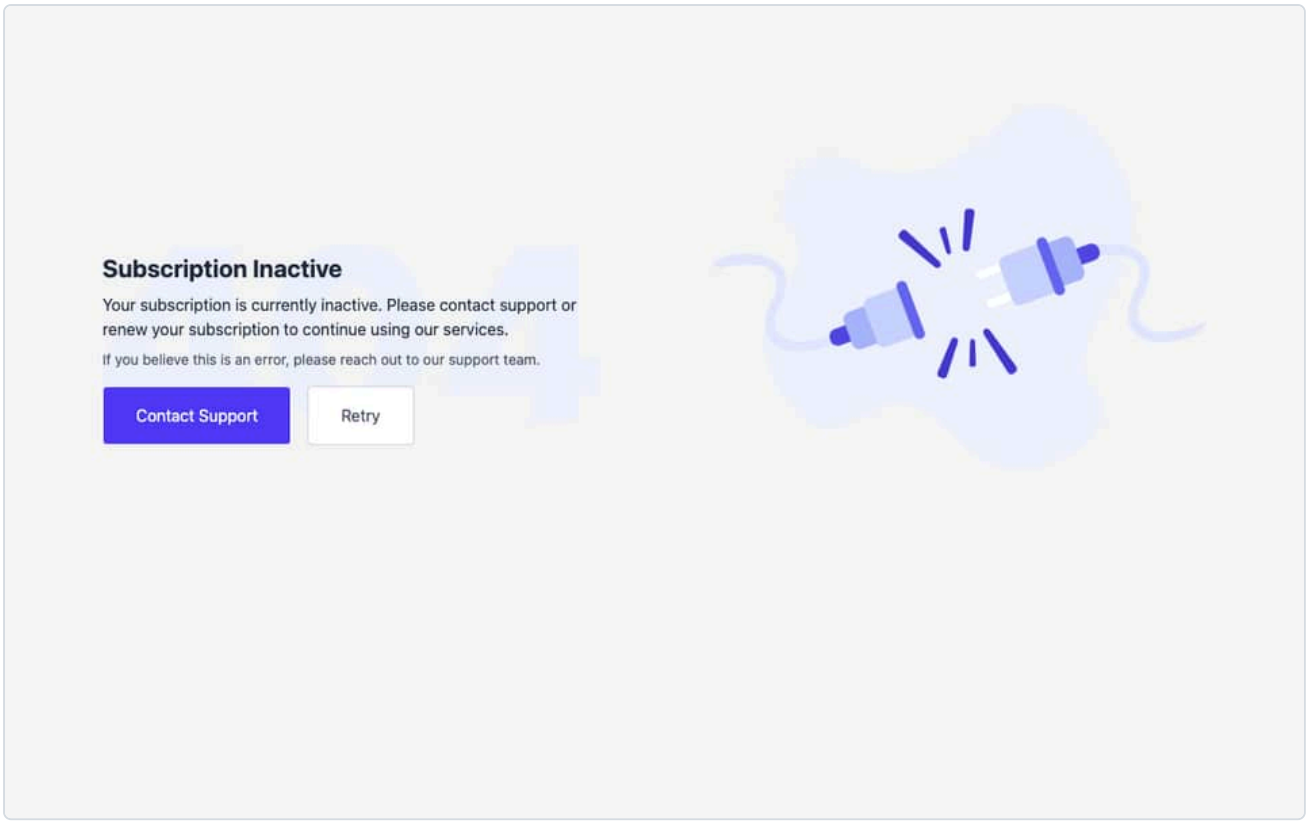

> **Good to know:** The messages for a wrong password, a lapsed subscription and too many attempts come from the server and could not be shown in a picture here, because sign-in is limited. You can try to sign in 5 times per minute. Your sign-in renews quietly while you work and stays valid for about 7 days of activity. If it cannot renew, the app sends you back to the Login page. If you are already signed in and open the Login page, you are sent to the Dashboard.

Subscription Inactive page

What it is: A page that tells you the shop subscription has lapsed.

Where to find it: It is not in the menu. It opens by itself when your shop address exists but the subscription is not active. No permission is needed.

What you see: The heading "Subscription Inactive", the text "Your subscription is currently inactive. Please contact support or renew your subscription to continue using our services.", the small text "If you believe this is an error, please reach out to our support team.", a **Contact Support** button (it opens an email to support@posbuzz.com), a **Retry** button, and two pictures. The pictures load from the internet.

The Subscription Inactive page, shown for a shop whose paid period has ended.

How to continue after renewing

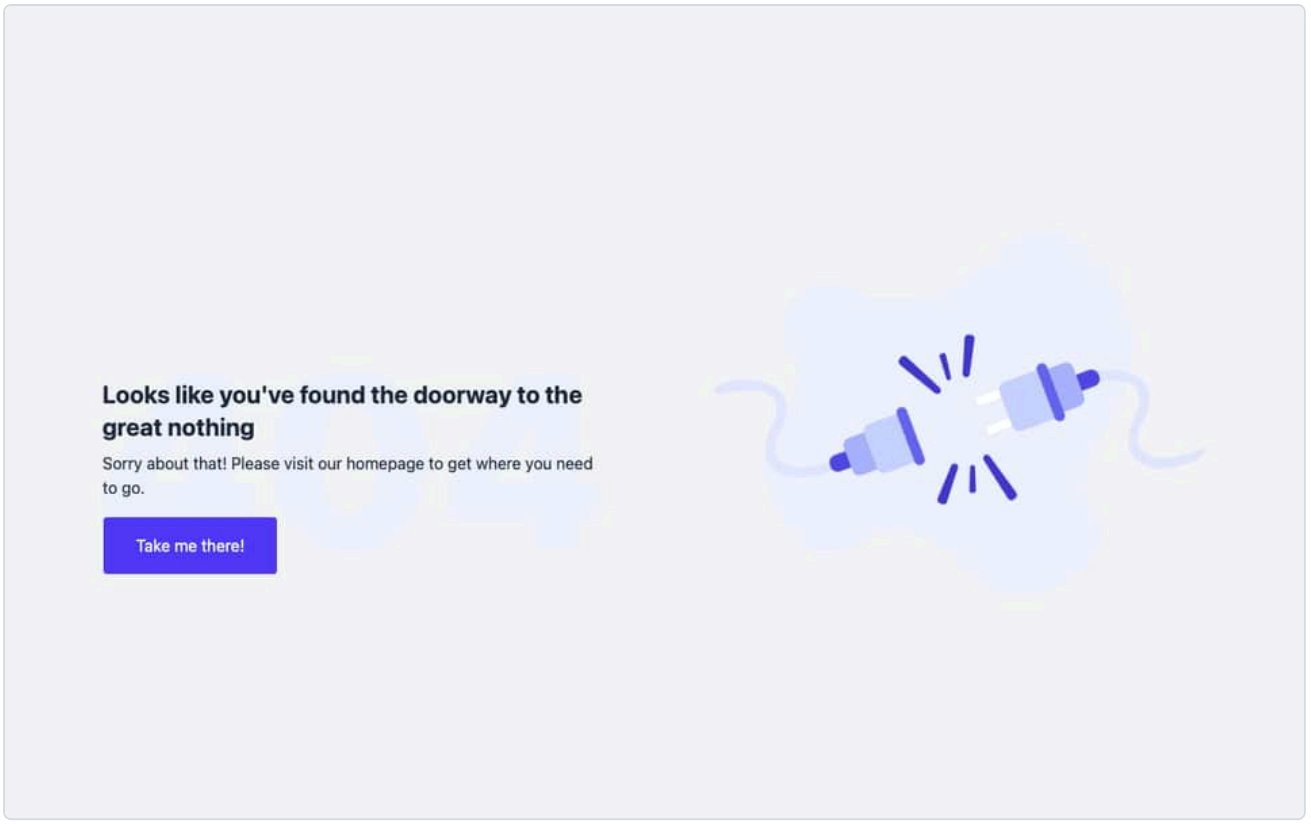

1. Renew the subscription or contact support.
2. Click **Retry**. The button shows "Checking..." and is disabled while the app checks.

What happens next: If the subscription is now active, you go to the Dashboard (if you are signed in) or the Login page. If it is still inactive, the page reloads. If the shop address does not exist, the "Page not found" page opens. If the subscription is active, this page sends you away by itself.

Page not found

What it is: A page shown when the address does not exist, or when the shop address itself is unknown.

What you see: The heading "Looks like you've found the doorway to the great nothing", the text "Sorry about that! Please visit our homepage to get where you need to go.", a **Take me there!** button and two pictures.

The Page not found page.

How to get back

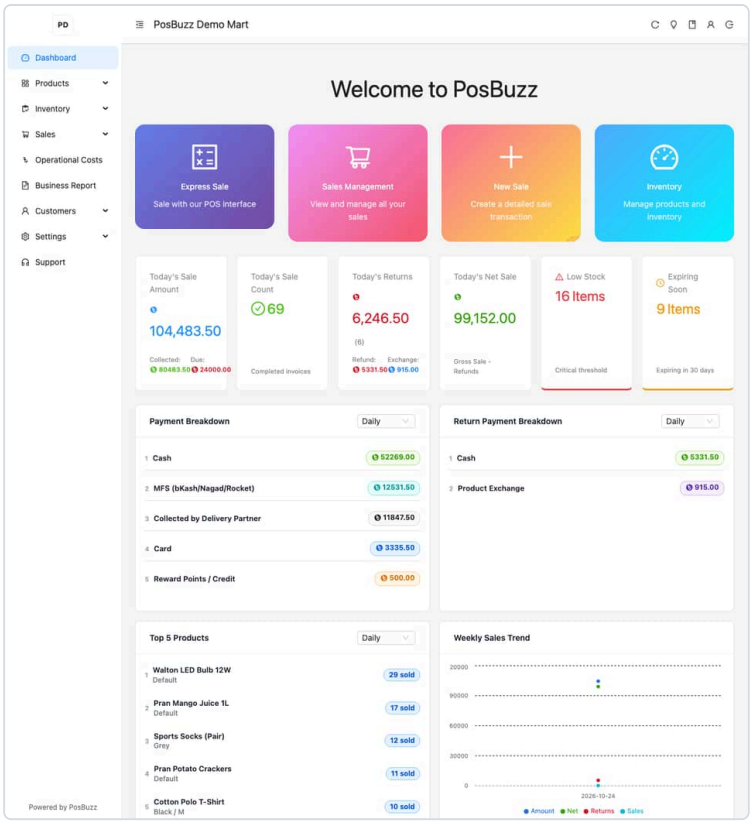

1. Click **Take me there!**

What happens next: The app reloads and opens the Dashboard (or the Login page if you are signed out).

The main screen layout

All pages except Login, Page not found, Subscription Inactive and the full-screen POS (Express Sale) share the same layout: a top bar, a menu on the left, and the page in the middle. Every page shows a trail of links at the top (for example Dashboard > Roles), then the page title. Action buttons are at the right.

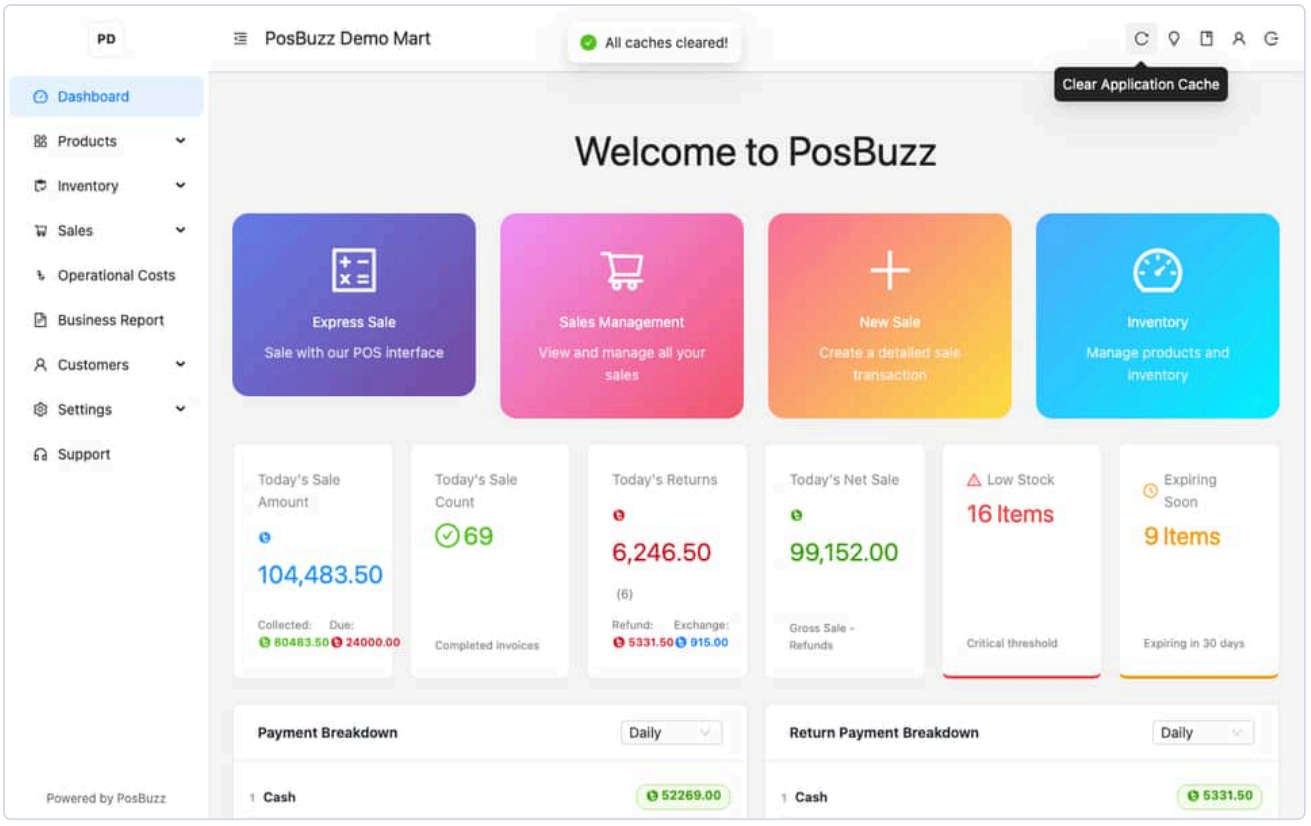

Top bar

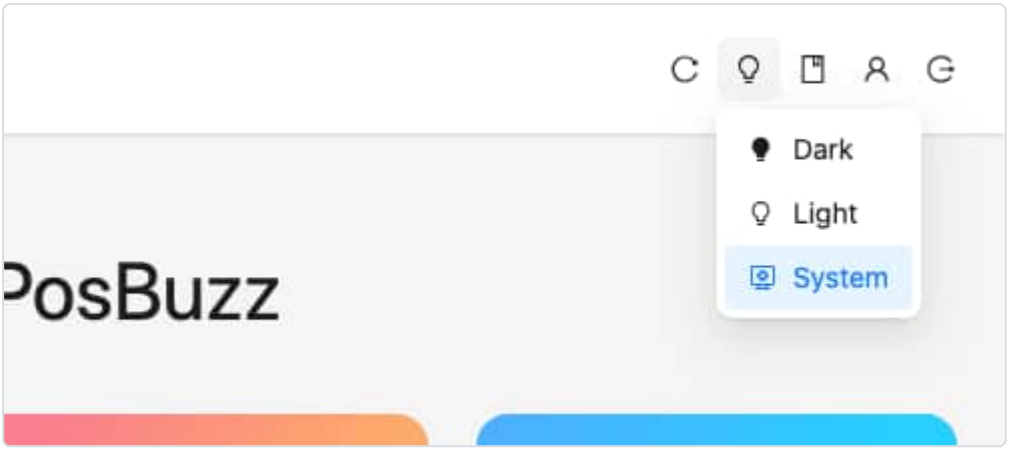

The Dashboard on a computer. The menu is on the left and the five icon buttons are at the top right.

The five icons at the top right, from left to right, are: refresh, light bulb, book, person and logout.

Item	What it does
Menu fold/unfold icon (top left)	Closes or opens the left menu. On screens narrower than 768 px the menu starts hidden. When opened, it covers the page. Tap outside it to close it.
Company name	Shows the name from your Company Profile. Only shown on screens 768 px wide or more.
Refresh icon (tooltip "Clear Application Cache")	Loads all screen data again. A green message "All caches cleared!" shows for 3 seconds. It does not sign you out and does not delete anything.
Light-bulb icon	Opens the theme menu: **Dark**, **Light**, **System**. The chosen one is highlighted. System follows your device. The choice is remembered on this device.
Person icon (tooltip "Account and Security")	Opens the Account & Security page. You need the Profile permission, or you land on the Dashboard.
Logout icon (tooltip "Logout")	Signs you out and returns to the Login page.

After the refresh icon is clicked, "All caches cleared!" shows at the top for 3 seconds. The tooltip "Clear Application Cache" shows under the icon.

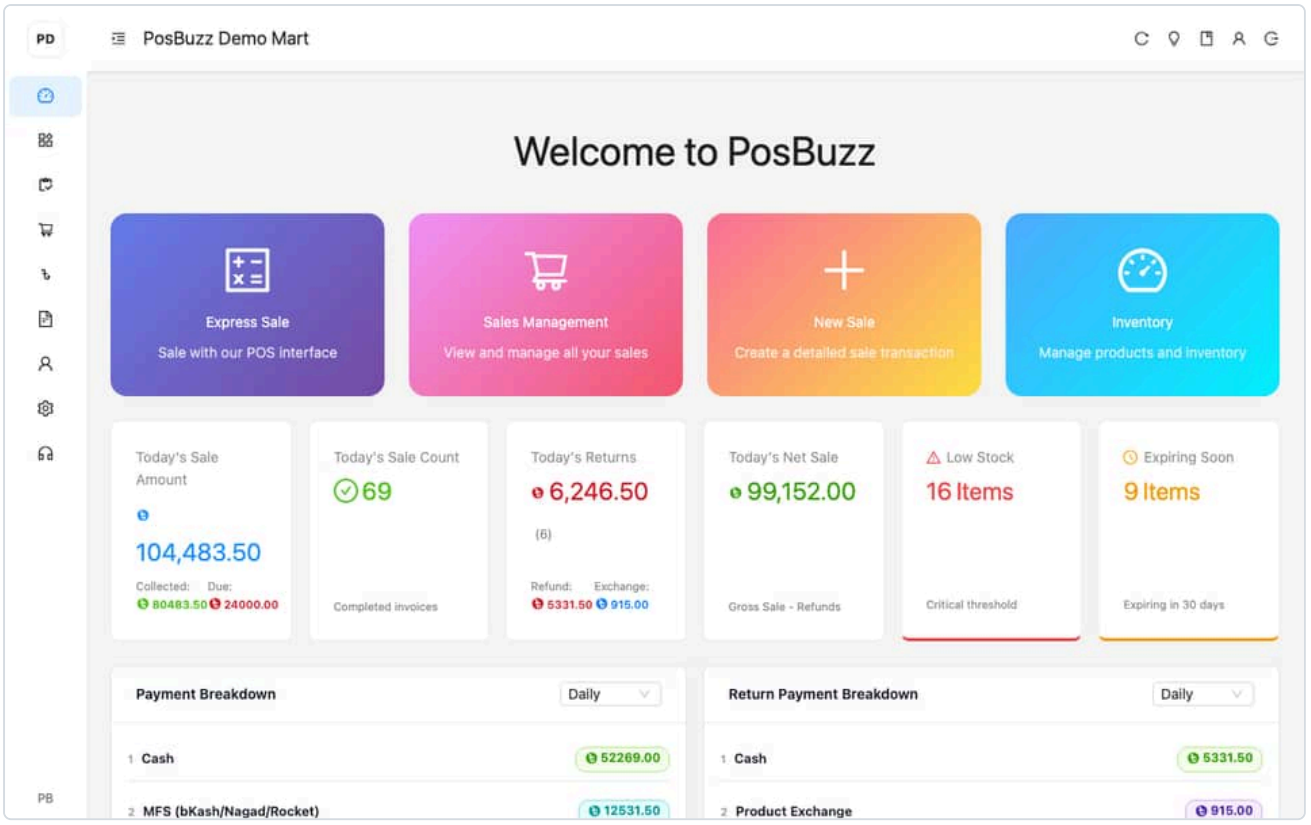

The theme menu with Dark, Light and System. The chosen one is highlighted.

> **Good to know:** The top bar has no branch switcher, no notification bell and no offline message. The app checks for a new version in the background every hour, when you come back to the browser tab, and when the internet returns. It never reloads the page by itself, so a sale is never interrupted. To use a new version, refresh the page yourself (press F5). If a page file is missing after an update, the app reloads once by itself.

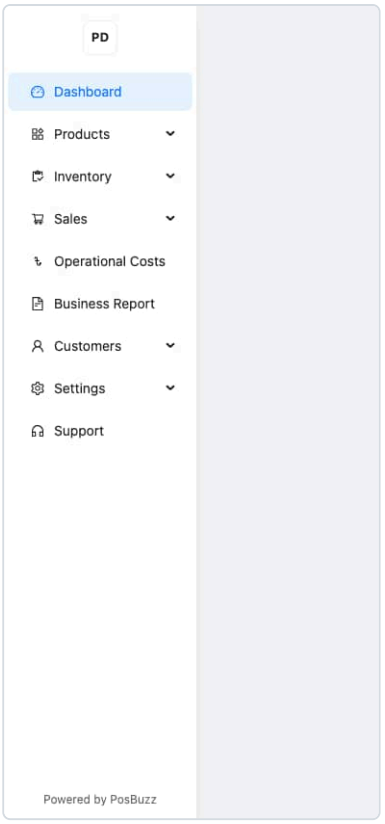

Left menu

- At the top is a small rounded square with your company icon, your logo, or initials such as "PB". Hover over it to see the company name.

- Menu groups open and close when clicked. The group of the page you are on opens by itself. A collapsed menu shows icons only.
- At the bottom you see "Powered by PosBuzz" ("PB" when the menu is collapsed).
- You only see the items your role allows. A group with no allowed items is hidden.

The menu folded to icons only. "PB" shows at the bottom.

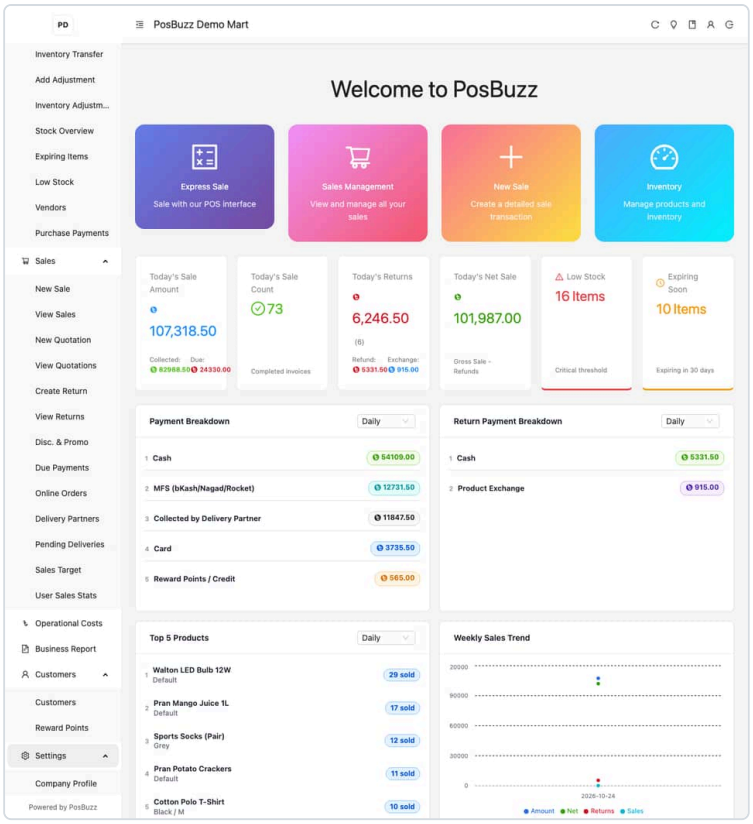

On a phone the menu opens over the page. Tap outside it to close it.

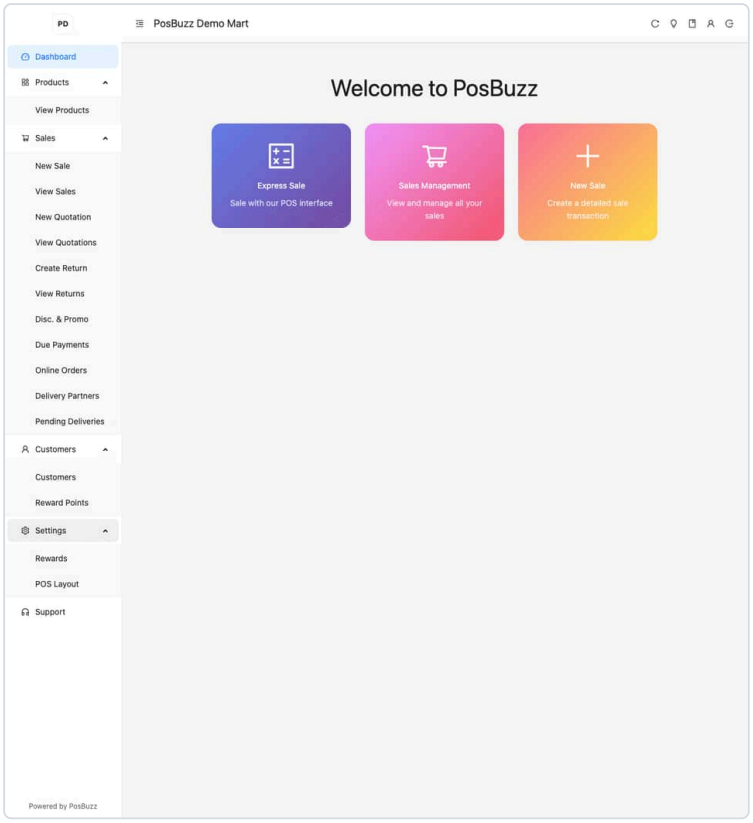

The full menu is:

Group	Items
Dashboard	Dashboard
Products	Add Product, View Products, Sales Stats, Product Audit, Categories, Brands, Tags, Units, Barcode Printing
Inventory	Add Inventory, View Inventory, Add Transfer, Inventory Transfer, Add Adjustment, Inventory Adjustment, Stock Overview, Expiring Items, Low Stock, Vendors, Purchase Payments
Sales	New Sale, View Sales, New Quotation, View Quotations, Create Return, View Returns, Disc. & Promo, Due Payments, Online Orders, Delivery Partners, Pending Deliveries, Sales Target, User Sales Stats
Operational Costs	(single item)
Business Report	(single item)
Customers	Customers, Reward Points
Settings	Company Profile, Branches, Printer Settings, Rewards, POS Layout, Roles, Users
Support	(single item)

The menu depends on the role. The shop owner (Admin role) sees every group. A Manager sees almost everything, but not Product Audit, Printer Settings, Roles or Users. A Cashier sees a short menu.

The menu of a user with the Manager role. Under Settings it shows Company Profile, Branches, Rewards and POS Layout.

The menu of a user with the Cashier role. The Dashboard shows only the three Sales shortcut cards, with no figures.

What happens when you are not allowed

- If you are not signed in, any page sends you to the Login page. A full-screen spinner shows while the app checks your sign-in.
- If you are signed in but your role does not include the permission for a page, you are sent to the Dashboard without any message. A small spinner shows while your profile loads.

Permissions

A role is a list of permissions. A menu item or page appears when you have any of the permissions listed for it. A role can only receive permissions that are included in the shop's plan.

Permission name	What it unlocks
Profile	The Account & Security page (change your password) and the person icon in the top bar.
Company Profile	Settings > Company Profile.
Users & Roles	Settings > Roles and Settings > Users. This is an admin-level permission.
Branches	Settings > Branches.
Add Product	Products > Add Product and Barcode Printing. With Edit Product it also unlocks Categories, Brands, Tags and Units.
View Product	Products > View Products (list and details).
Edit Product	The edit product page. Categories, Brands, Tags and Units.
Delete Product	Deleting products and some setup records.
Product Audit	Products > Product Audit.
Inventory	Inventory > Add Inventory, View Inventory, Stock Overview, Expiring Items, Low Stock and Purchase Payments. Vendors (together with the Vendors permission). The "Inventory" shortcut card on the Dashboard.
Inventory Transfer	Inventory > Add Transfer and Inventory Transfer.
Inventory Adjustment	Inventory > Add Adjustment and Inventory Adjustment.
Vendors	Inventory > Vendors.
Sales	Sales > New Sale, View Sales, Create Return, View Returns, Disc. & Promo, Due Payments, Online Orders, Delivery Partners and Pending Deliveries. Settings > Rewards and POS Layout. The full-screen POS (Express Sale). Three shortcut cards on the Dashboard.
Quotations	Sales > New Quotation and View Quotations.
Customers	Customers > Customers and Reward Points.

Permission name	What it unlocks
Receipt & Printer Settings	Settings > Printer Settings.
Support	The Support page.
Business Insights	The figures and charts on the Dashboard. Products > Sales Stats. Sales > Sales Target and User Sales Stats. Operational Costs. Business Report.

> **Good to know:** The Settings group in the menu shows for anyone who is allowed at least one of its pages. For example, a Cashier sees Settings with only Rewards and POS Layout. The Admin role always holds every permission that your shop's plan includes. Other roles hold only what was given to them.

Dashboard

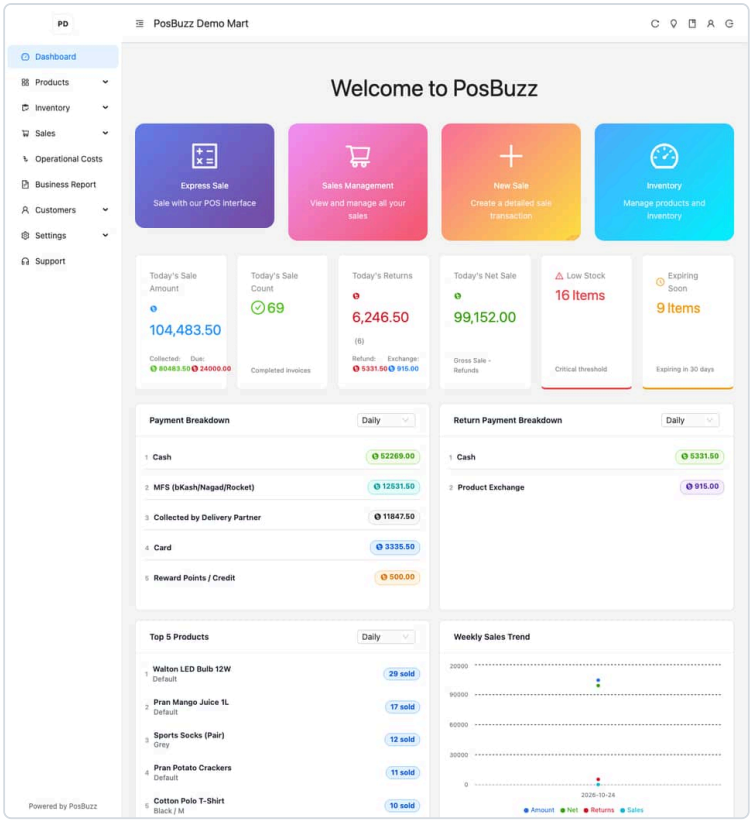

What it is

The first page you see after signing in. It gives quick links and today's business numbers.

Where to find it

Menu > **Dashboard** (the first item). Everyone who is signed in can open it. What you see on it depends on your permissions: the shortcut cards need Sales or Inventory, and the figures and charts need Business Insights.

What you see

The Dashboard on a computer, with shortcut cards, today's figures, the breakdown lists, Top 5 Products and the Weekly Sales Trend chart.

From top to bottom:

- The heading "Welcome to PosBuzz".
- Shortcut cards. Click a card to open that screen.

Card	Text on the card	Opens	Permission
Express Sale	Sale with our POS interface	The full-screen POS	Sales
Sales Management	View and manage all your sales	View Sales	Sales
New Sale	Create a detailed sale transaction	New Sale	Sales
Inventory	Manage products and inventory	View Inventory	Inventory

- With the Business Insights permission, a row of six cards:

Card	What it shows
Today's Sale Amount	The total of today's sales that are not cancelled. Below it, "Collected:" is the money actually received. If something is unpaid, a red "Due:" amount also shows.
Today's Sale Count	The number of sales today. Caption "Completed invoices".

Card	What it shows
Today's Returns	The total value of returns made today, with the number of returns in brackets. Below it, "Refund:" is the money-back part and "Exchange:" is the exchange part.
Today's Net Sale	Today's sales minus refunds. Caption "Gross Sale - Refunds". Exchanges are not taken off.
Low Stock	A number followed by "Items", with a warning icon and the caption "Critical threshold". Click it to open Low Stock. It counts items whose available stock (stock minus reserved stock) is at or below the alert quantity set for that item. Items with an alert quantity of 0 are never counted.
Expiring Soon	A number followed by "Items", with a clock icon and the caption "Expiring in 30 days". Click it to open Expiring Items. It counts stock batches that still have quantity and expire between today and 30 days ahead.

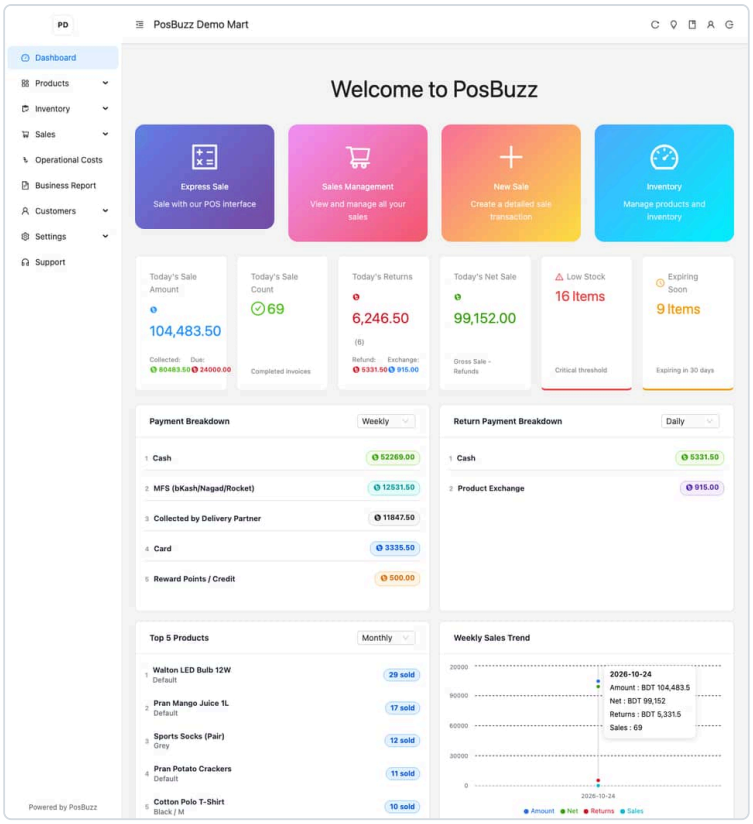

- Four cards in two rows. Each shows a small spinner while loading.

Card	What it shows	Empty text
Payment Breakdown	A numbered list of payment methods with the amount received in the chosen period, as coloured tags. Has a **Daily / Weekly / Monthly** dropdown (starts on Daily).	No payment method data
Return Payment Breakdown	Money paid out on returns, by payment method. Has a **Daily / Weekly / Monthly** dropdown (starts on Daily).	No return payment data
Top 5 Products	Up to five best sellers by quantity. The product name is shown with the variant name below it, and a tag such as "N sold". Has a **Daily / Weekly / Monthly** dropdown (starts on Daily).	No product data
Weekly Sales Trend	A line chart of this week with one point for each day that had sales or returns.	No trend data

The Weekly Sales Trend lines are: **Amount** (blue, total sales), **Net** (green dashed, sales minus refunds), **Returns** (red) and **Sales** (cyan, the number of sales). Hover over the chart to see the values. Money values start with "BDT".

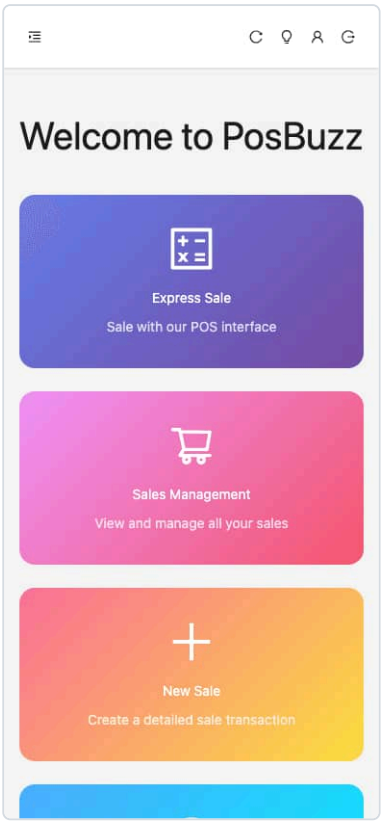

Payment method names you may see: Cash, Card, MFS (bKash/Nagad/Rocket), Reward Points / Credit, Product Exchange, Collected by Delivery Partner, Cheque, Bank Transfer and Mobile Money. A method not in this list is shown by its code written in plain words.

If loading fails, a red message appears above the cards with the error text, or "Failed to load dashboard data".

Hover over a point on the Weekly Sales Trend to see the day and the Amount, Net, Returns and Sales values. Here the Payment Breakdown is set to Weekly and Top 5 Products to Monthly.

On a phone the cards stack one under the other.

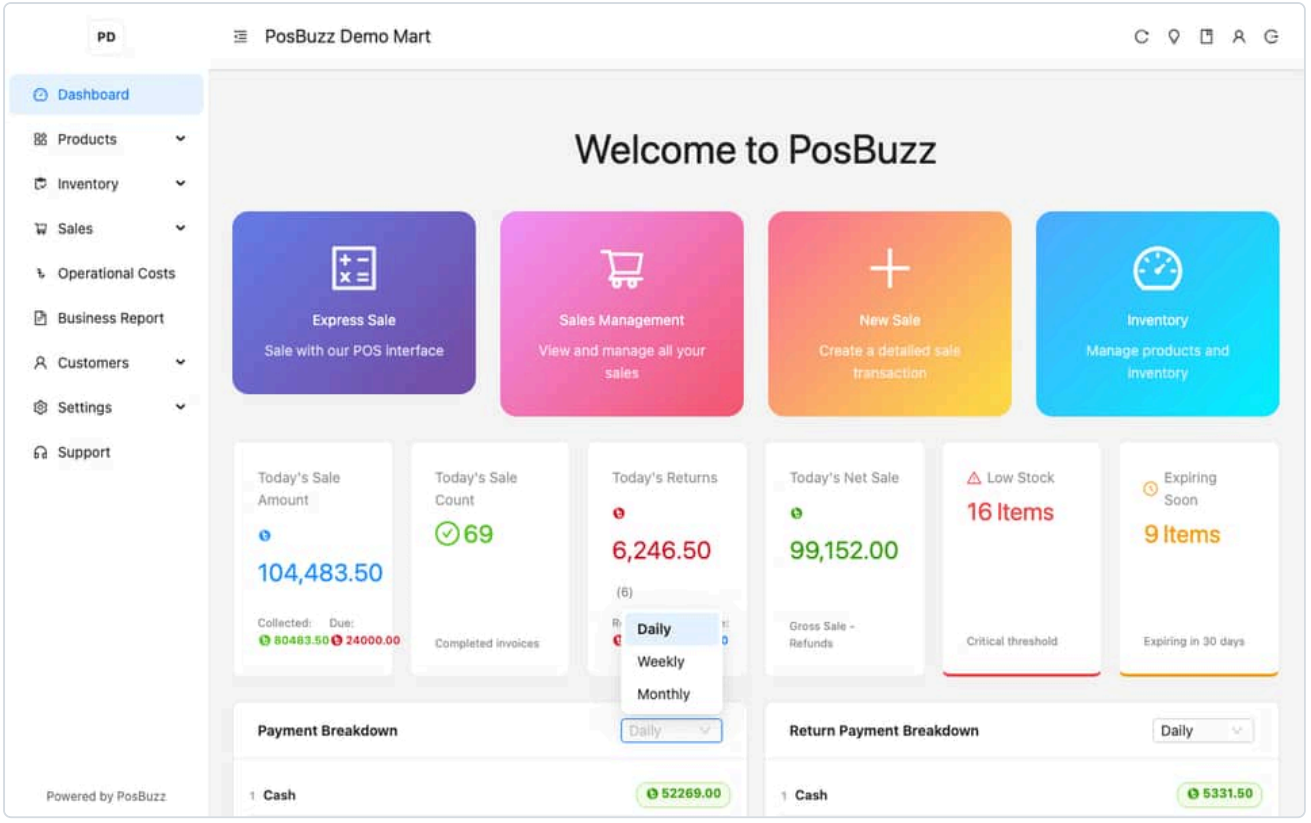

The Dashboard on a phone. The menu is hidden and the shortcut cards stack down the page.

How to open a screen from a shortcut card

1. Open the Dashboard.
2. Click the card you want (for example **New Sale**).

What happens next: The screen opens. If your role has no access to it, you are sent back to the Dashboard.

The Daily / Weekly / Monthly dropdown, opened.

How to change the period of a card

1. Find the card (Payment Breakdown, Return Payment Breakdown or Top 5 Products).
2. Click the dropdown at its top right.
3. Choose **Daily**, **Weekly** or **Monthly**.

What happens next: A small spinner shows in that card only and the figures are calculated again. The page does not jump.

How the figures are counted

- A day is today in Bangladesh time, from midnight to 23:59.
- A week runs from Saturday to Friday. A month is the calendar month, from the 1st to the last day.
- Cancelled and deleted sales are left out.
- A return is counted on the day it was made, not on the day of the original sale.
- Payment Breakdown counts payments received in the period (by payment date). The "Today" cards count sales dated today.
- The figures cover all branches together.

- The data is refreshed each time you open the page and when you press the refresh icon in the top bar.
- Without Business Insights, you see only the welcome heading and the shortcut cards.

> **Good to know:** A user with only Sales permission, such as a Cashier, sees the welcome heading and only the three Sales shortcut cards. A user without the Inventory permission does not see the Inventory card.

> **Good to know:** Money amounts on the cards are written with the taka sign, and the chart tooltip writes "BDT". If you have little data, the Weekly Sales Trend may show just one point, and its left-hand scale numbers may not look in order. Read the values from the tooltip instead.

> **Good to know:** The Low Stock number is counted for each branch and item together. When all branches are shown, the number can be higher than the number of different products that are low.

Account & Security

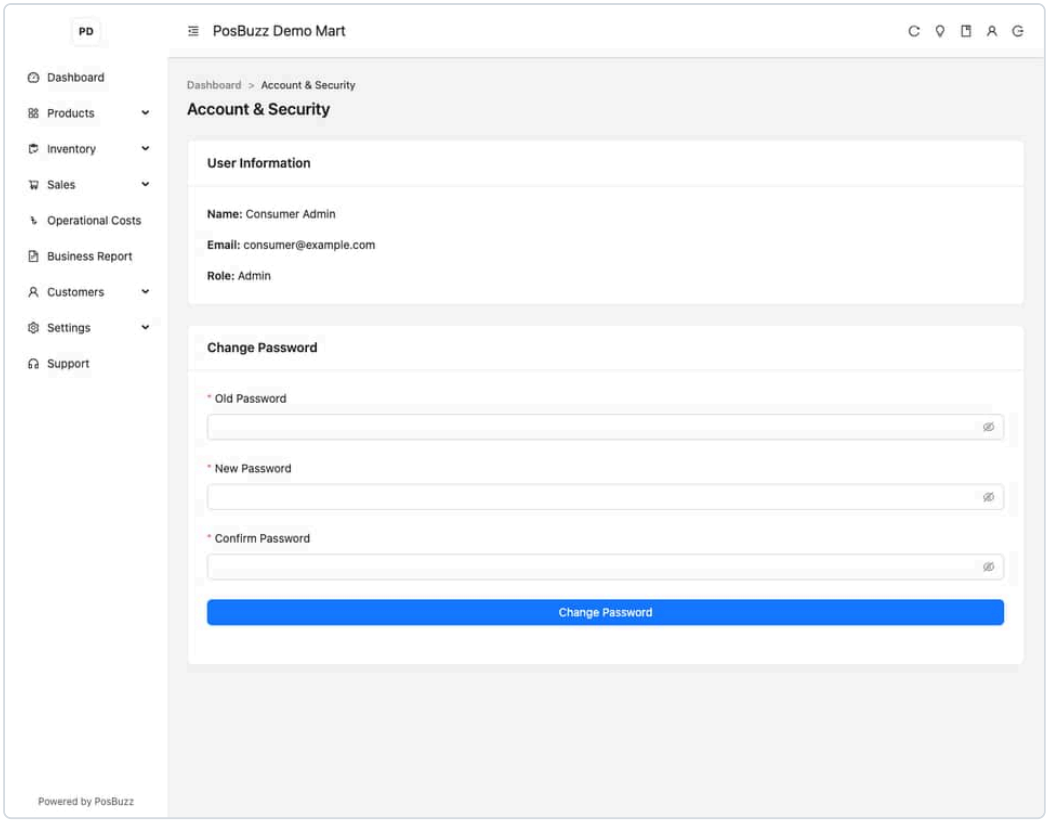

What it is

A page where you see your own sign-in details and change your own password.

Where to find it

Click the person icon in the top bar (tooltip "Account and Security"). It is not in the left menu. You need the Profile permission.

What you see

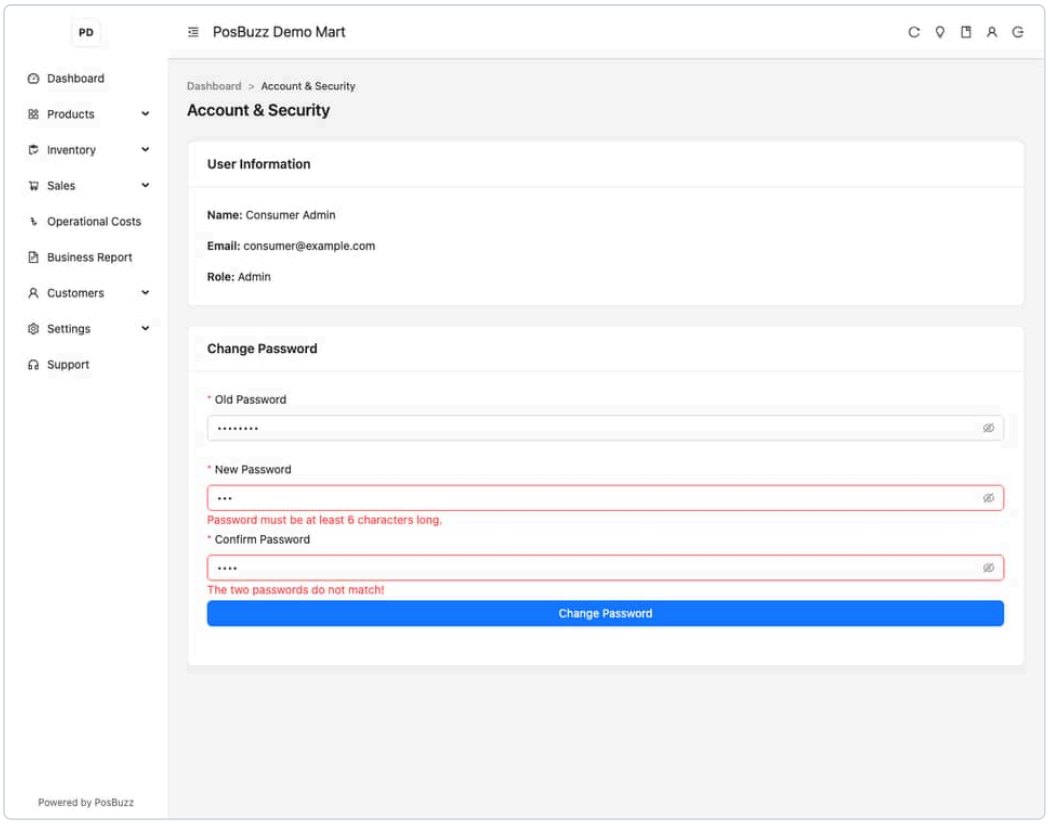

The Account & Security page with your details and the Change Password form.

- The trail "Dashboard > Account & Security".
- A card **User Information** with your Name, Email and Role. You cannot change these here.
- A card **Change Password** with three fields and a **Change Password** button. Each field has a show/hide eye icon and starts empty.

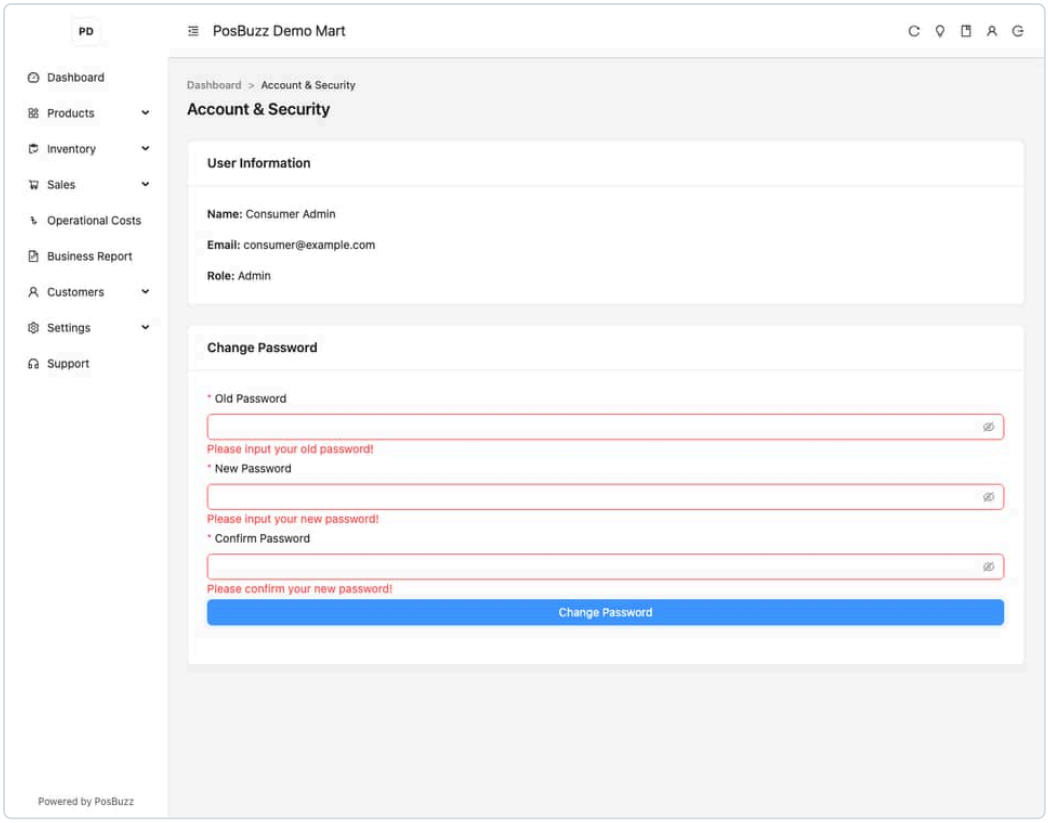

Field	Required	Notes
Old Password	Yes	Your current password.
New Password	Yes	At least 6 characters.
Confirm Password	Yes	Must be the same as New Password. It is checked again when you change New Password.

How to change your password

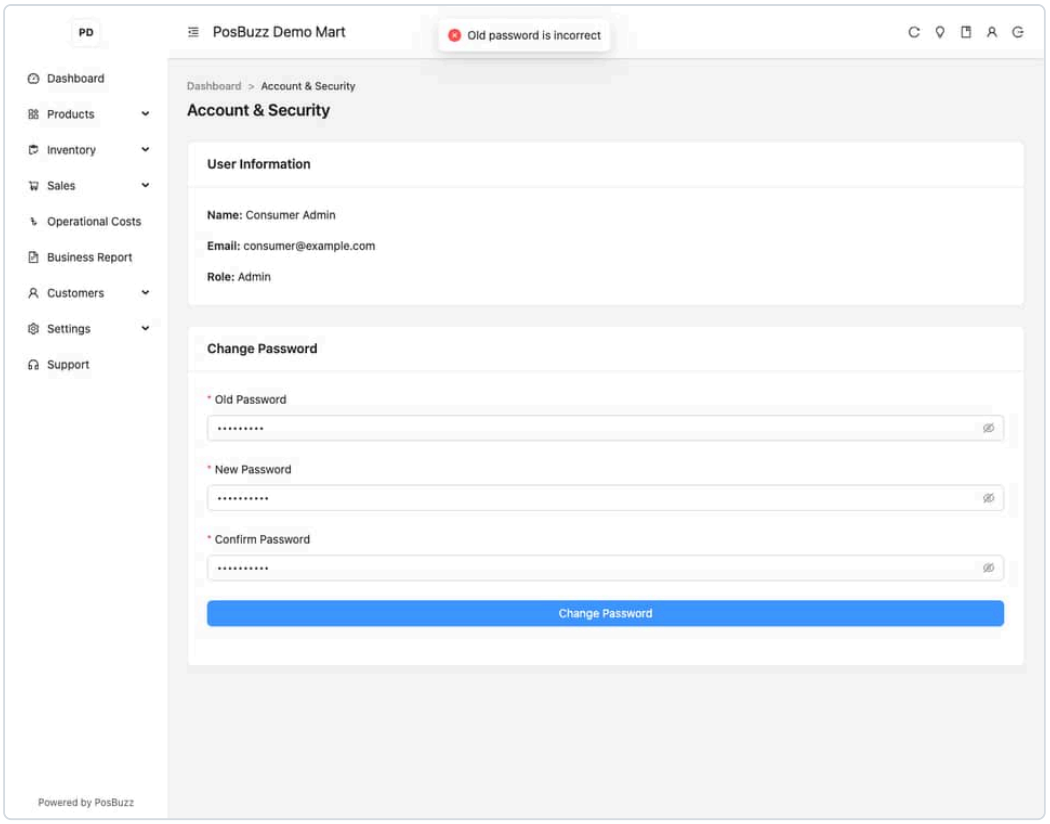

1. Click the person icon in the top bar.
2. Type your current password in **Old Password**.
3. Type the new password in **New Password**.
4. Type the same new password in **Confirm Password**.
5. Click **Change Password**.

A New Password with fewer than 6 characters, and a Confirm Password that is different, show red messages.

Pressing Change Password with empty boxes shows the "Please input..." messages.

A wrong Old Password gives the message "Old password is incorrect".

What happens next: A message "Password changed successfully!" appears and the three boxes are cleared. You stay signed in. No email is sent.

Message	What it means	What to do
Please input your old password!	Old Password is empty.	Type your current password.
Please input your new password!	New Password is empty.	Type a new password.
Password must be at least 6 characters long.	The new password is too short.	Use 6 or more characters.
Please confirm your new password!	Confirm Password is empty.	Type the new password again.
The two passwords do not match!	Confirm Password is different from New Password.	Type both again, exactly the same.
Password changed successfully!	The password is changed.	Nothing.
Old password is incorrect	The Old Password you typed is wrong.	Type your current password again.
An error occurred	The change failed and no reason was given.	Try again. If it keeps happening, contact support.

> **Good to know:** You can only change your own password here. To set a new password for another person, an admin edits that person in Settings > Users.

Company Profile

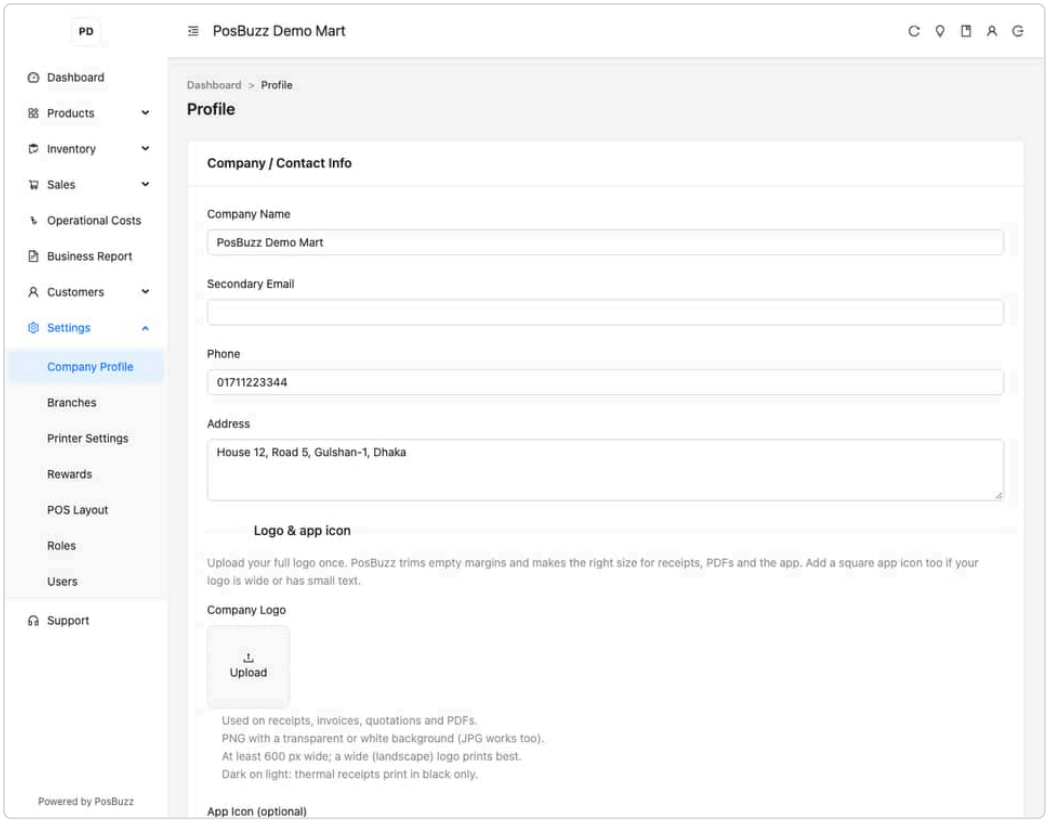

What it is

A page to change your shop's contact details and to upload the logo and app icon used in the app, on receipts and in PDFs.

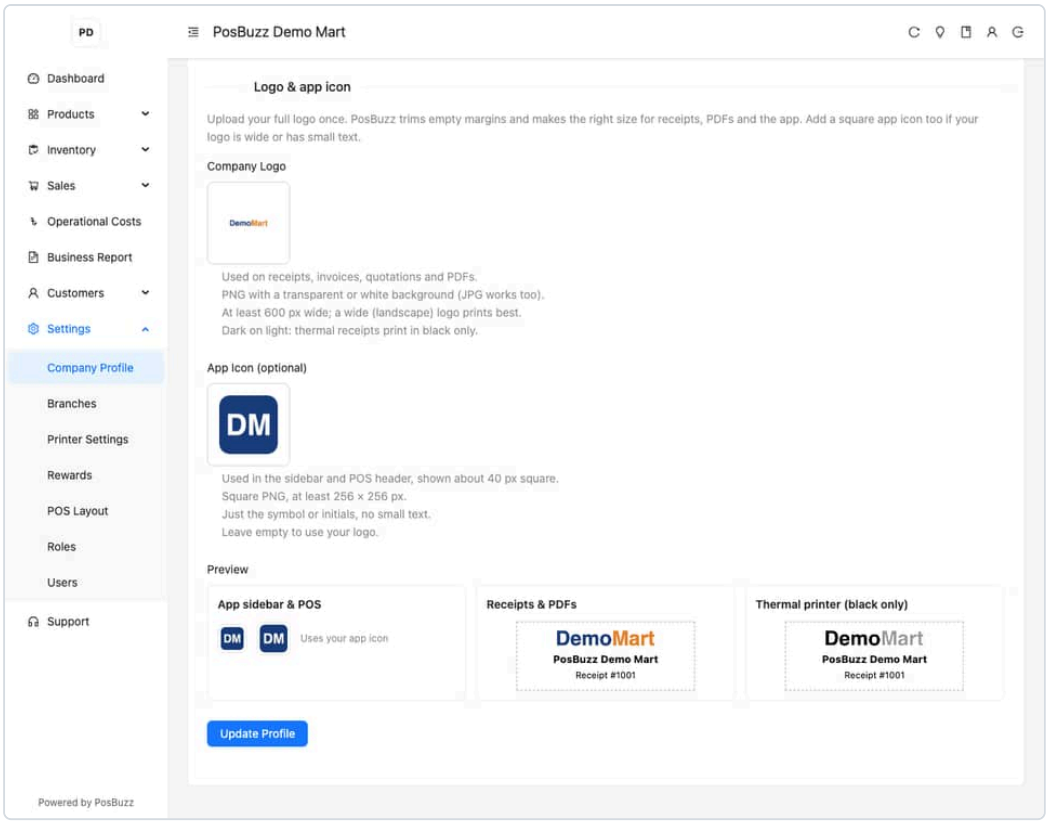

Where to find it

Menu > **Settings** > **Company Profile**. The page needs the Company Profile permission. The Settings group in the menu is only visible with the Users & Roles permission.

What you see

The Profile page with the company details and the start of the logo section.

The Company Logo and App Icon boxes with images chosen, and the three Preview tiles below them.

- The trail "Dashboard > Profile" and the title "Profile".
- A card **Company / Contact Info** with the fields below. The business sign-in email cannot be changed here.
- A divider **Logo & app icon** with the text: "Upload your full logo once. PosBuzz trims empty margins and makes the right size for receipts, PDFs and the app. Add a square app icon too if your logo is wide or has small text."
- Upload boxes for **Company Logo** and **App Icon (optional)**, a **Preview** area and an **Update Profile** button.

Field	Required	Notes
Company Name	No	Text. Filled in with the current name.
Secondary Email	No	If you fill it in, it must be a valid email.
Phone	No	Text. The format is not checked.
Address	No	A multi-line box (3 rows).
Company Logo	No	One image. Used on receipts, invoices, quotations and PDFs.
App Icon (optional)	No	One image. Used in the sidebar and POS header.

Help text next to the **Company Logo** box:

- Used on receipts, invoices, quotations and PDFs.
- PNG with a transparent or white background (JPG works too).
- At least 600 px wide; a wide (landscape) logo prints best.

- Dark on light: thermal receipts print in black only.

Help text next to the **App Icon (optional)** box:

- Used in the sidebar and POS header, shown about 40 px square.
- Square PNG, at least 256 × 256 px.
- Just the symbol or initials, no small text.
- Leave empty to use your logo.

Each box holds one image. While a file uploads, the box says "Uploading...". To remove an uploaded image, click the delete icon on its thumbnail.

Preview shows three tiles. They update at once when you pick an image or type the company name.

Tile	What it shows
App sidebar & POS	Two square samples (36 and 42 px). A note says "Uses your app icon" or "Uses your logo (no app icon yet)". If there is no image, the initials of the company name show.
Receipts & PDFs	A sample receipt with your logo, your company name (or "Your shop") and "Receipt #1001".
Thermal printer (black only)	The same sample receipt in black and white.

How to update the company details

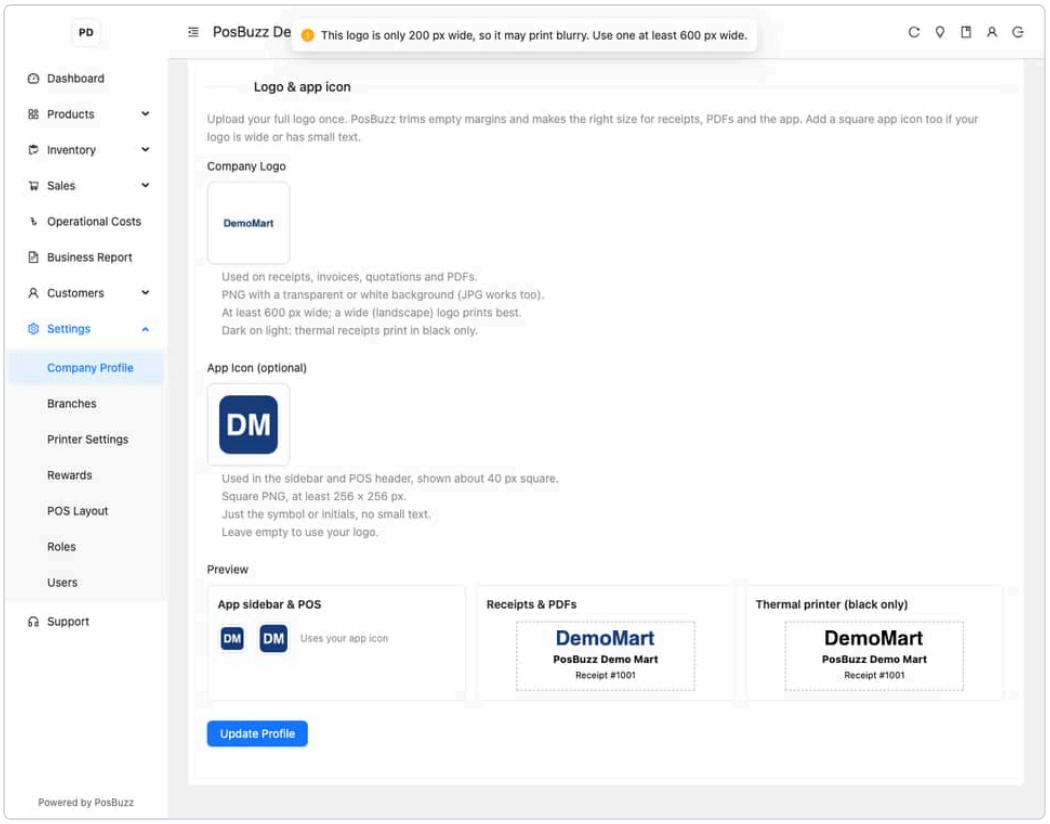

1. Open **Settings** > **Company Profile**.
2. Change **Company Name**, **Secondary Email**, **Phone** or **Address**.
3. Check the **Preview** tiles.
4. Click **Update Profile**.

What happens next: A message "Profile updated successfully!" appears. The page reloads so the new details show everywhere.

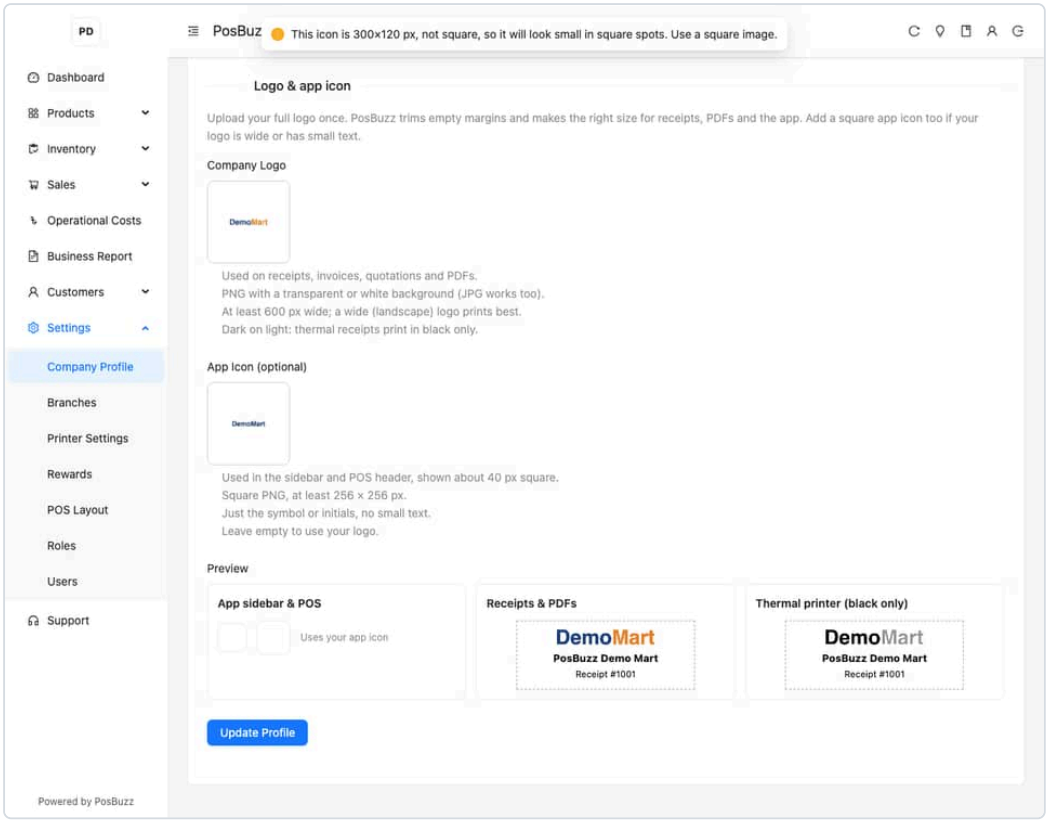

How to upload a logo or app icon

1. Open **Settings** > **Company Profile**.
2. In the **Company Logo** box (or the **App Icon (optional)** box), click and choose a JPG or PNG file under 10 MB.
3. Wait until "Uploading..." goes away and the thumbnail shows.
4. Look at the **Preview** tiles to see how it will look.
5. Click **Update Profile**.

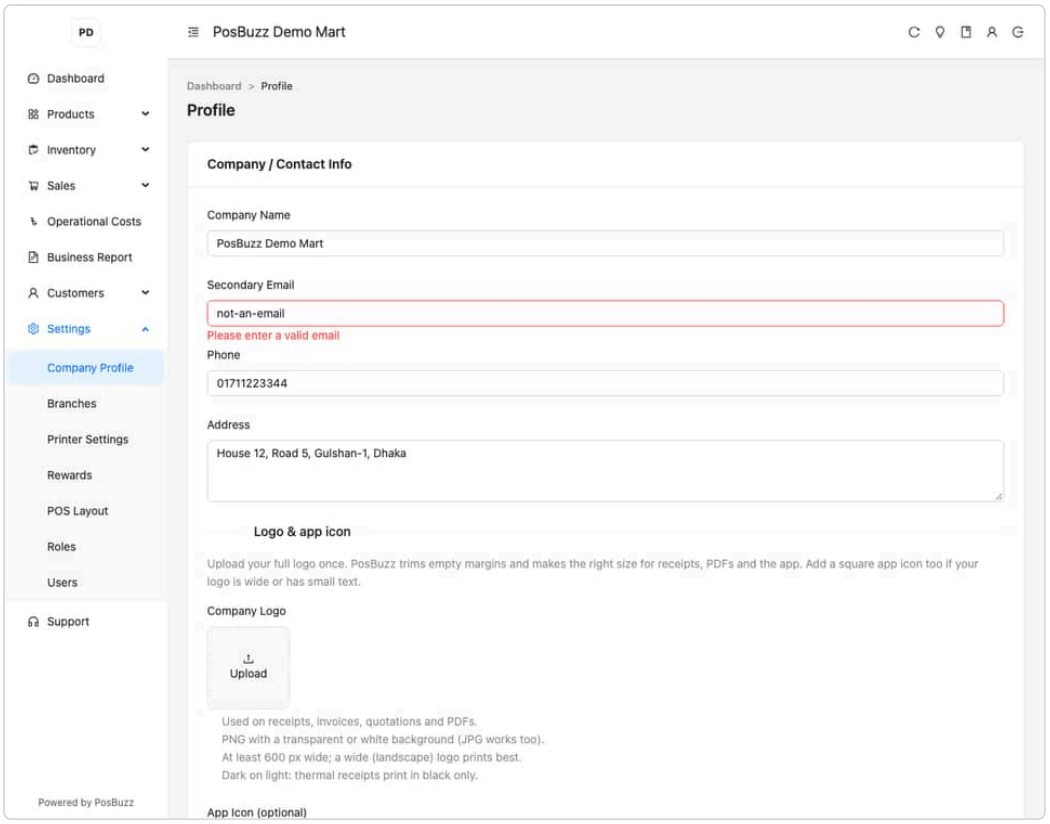

What happens next: The image is trimmed and resized for each use: square for the sidebar, and up to 600 px wide for receipts. If the App Icon is empty, your logo is used in the sidebar. If there is neither, the sidebar shows initials (the first letters of up to two words of the company name, or "PB").

An orange warning appears at the top when the logo is narrower than 300 px. The upload still goes ahead.

An orange warning appears when the icon is not square.

A Secondary Email that is not valid shows "Please enter a valid email". An empty upload box shows an Upload button.

> **Good to know:** When you choose an image, the Preview tiles update at once, but nothing is saved until you click **Update Profile**. If there is no image at all, the Preview shows the initials of your company name.

How to remove a logo or app icon

1. Open **Settings** > **Company Profile**.
2. Click the delete icon on the thumbnail.
3. Click **Update Profile**.

What happens next: The saved image is removed.

Message	What it means	What to do
Please enter a valid email	The Secondary Email is not in email format.	Correct the email.
You can only upload JPG/PNG file!	The file is not a JPG or PNG.	Choose a JPG or PNG file.
Image must be smaller than 10MB!	The file is too big.	Choose a smaller file.
(file name) upload failed.	The upload did not work.	Try again.
This logo is only N px wide, so it may print blurry. Use one at least 600 px wide.	The logo is narrower than 300 px. This is an orange warning for 8 seconds. The upload still goes ahead.	Use a wider logo if you want it sharp.

Message	What it means	What to do
This icon is W×H px, not square, so it will look small in square spots. Use a square image.	The icon is clearly not square. Orange warning. The upload still goes ahead.	Use a square image.
This icon is only W×H px and may look blurry. Use at least 256×256 px.	The icon is smaller than 128 px. Orange warning. The upload still goes ahead.	Use a larger icon.
Profile updated successfully!	The changes are saved.	Nothing.
An error occurred	Saving failed and no reason was given. The app may show the server's own message instead.	Try again.

Branches

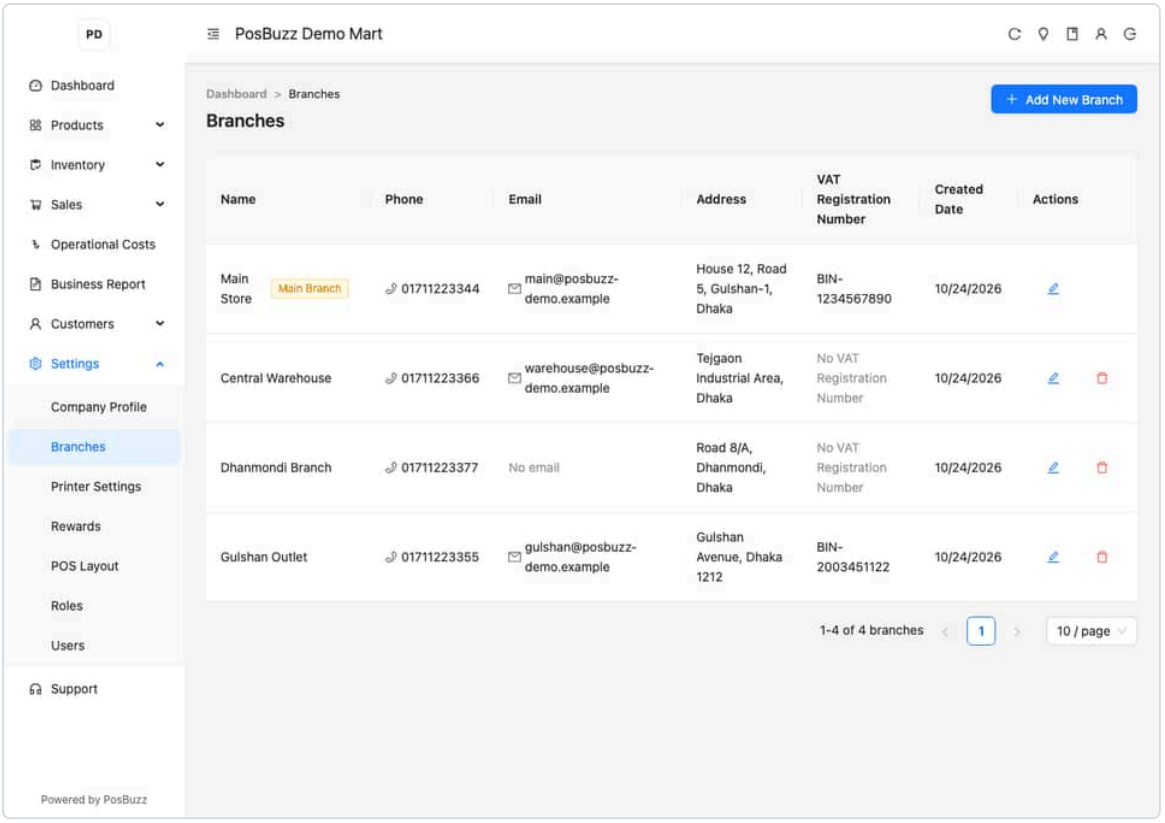

What it is

A page to manage your shop locations (outlets).

Where to find it

Menu > **Settings** > **Branches**. You need the Branches permission. The Settings group in the menu is only visible with the Users & Roles permission.

What you see

The Branches list. The main branch has a gold tag and no bin icon. A missing email or VAT number shows in grey.

- The trail "Dashboard > Branches", the title and the **Add New Branch** button.
- A table with these columns:

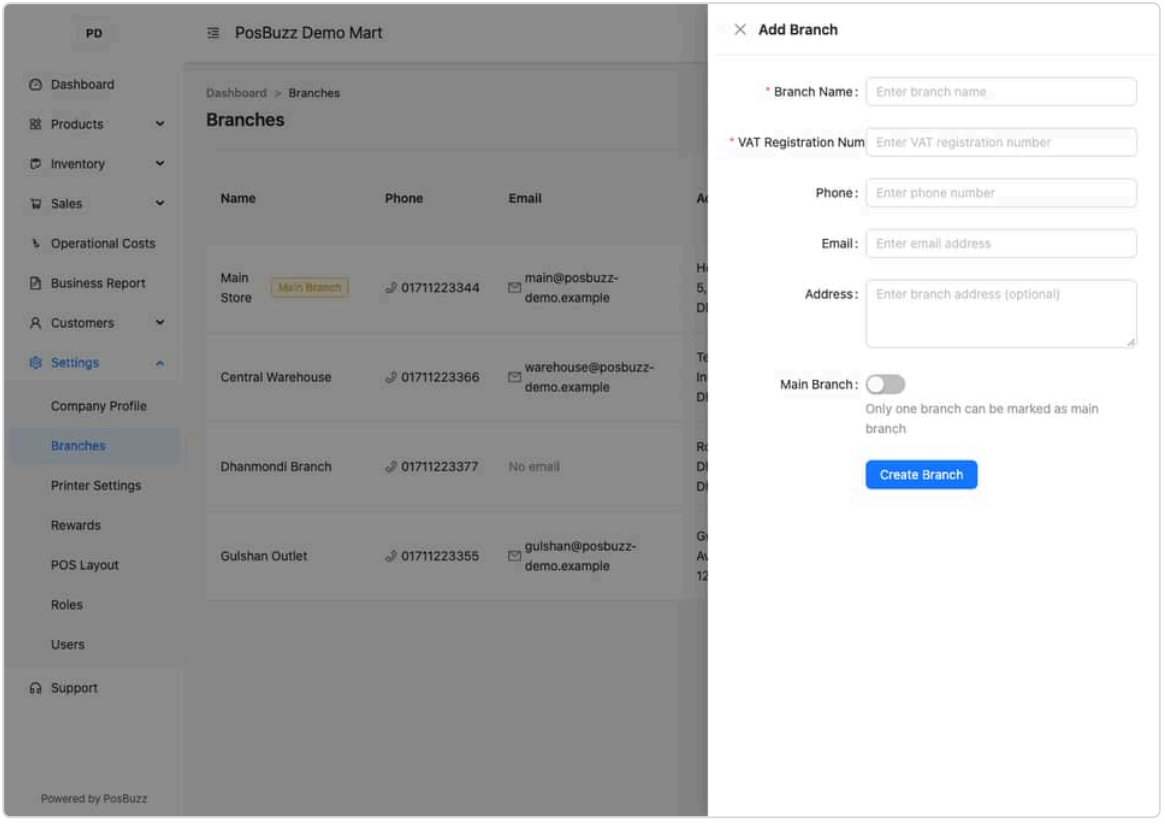

Column	What it shows
Name	The branch name. The main branch has a gold "Main Branch" tag.
Phone	The phone with a phone icon, or grey "No phone".
Email	The email with a mail icon, or grey "No email".
Address	The address, or grey "No address".
VAT Registration Number	The number, or grey "No VAT Registration Number".
Created Date	The date the branch was made, in your browser's date format.
Actions	A pencil icon (edit) and a red bin icon (delete). The main branch has no bin icon.

- The main branch is listed first.
- Below the table: "x-y of N branches", page buttons, a jump-to-page box and a page-size chooser.
- If loading fails: "Failed to load branches".

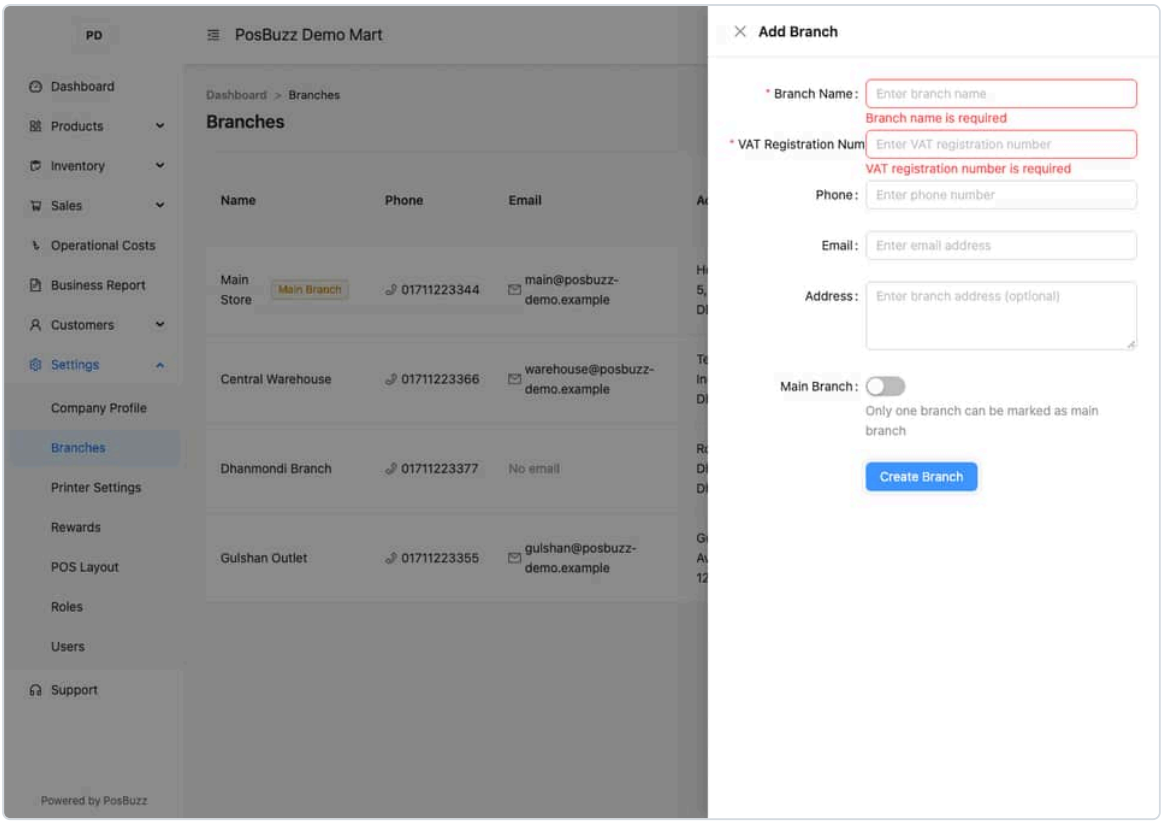

Form fields (drawer "Add Branch" or "Update Branch")

Field	Required	Notes
Branch Name	Yes	Placeholder "Enter branch name". Must be different from every other branch name in the shop.
VAT Registration Number	Yes	Placeholder "Enter VAT registration number". Printed on that branch's receipts.
Phone	No	Only digits, spaces and the signs - + ( ) are allowed.
Email	No	Must be a valid email.
Address	No	A multi-line box. Placeholder "Enter branch address (optional)".
Main Branch	No	A switch. Help text: "Only one branch can be marked as main branch".

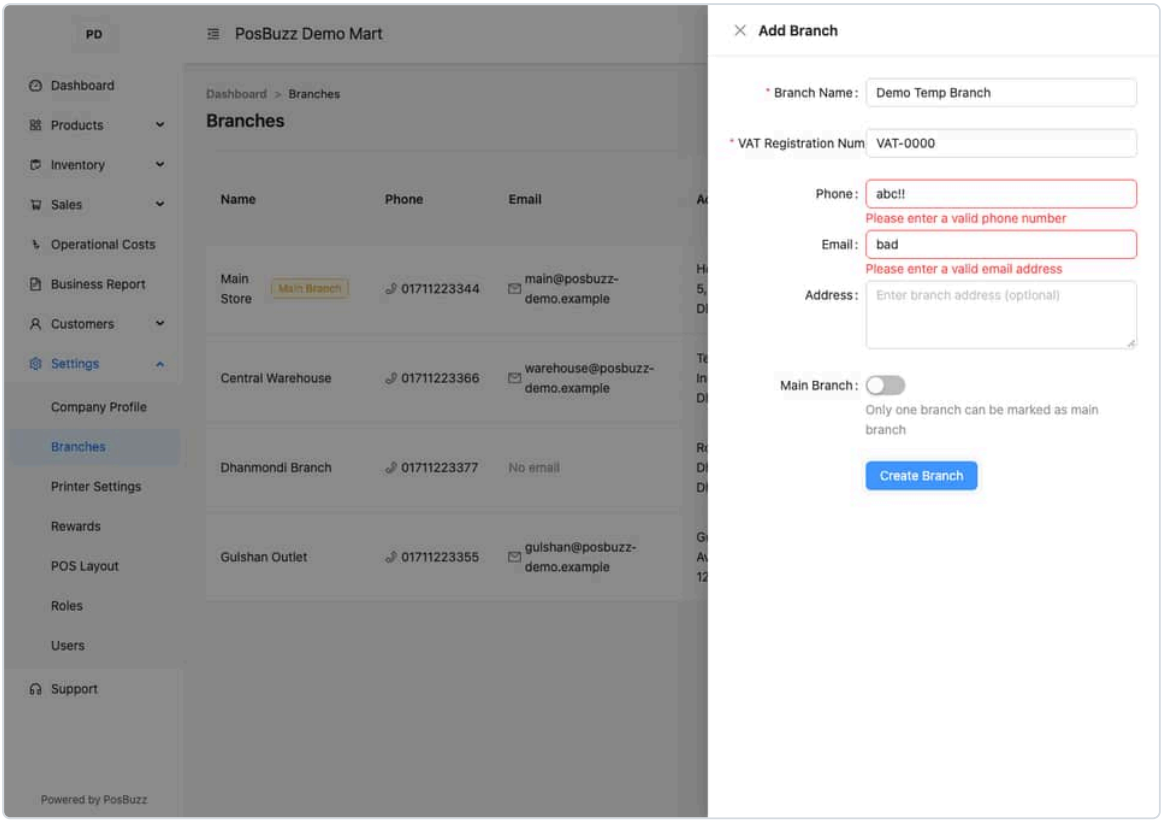

The button at the bottom is **Create Branch** when adding, and **Update Branch** when editing.

The Add Branch drawer.

Pressing Create Branch with the two required boxes empty.

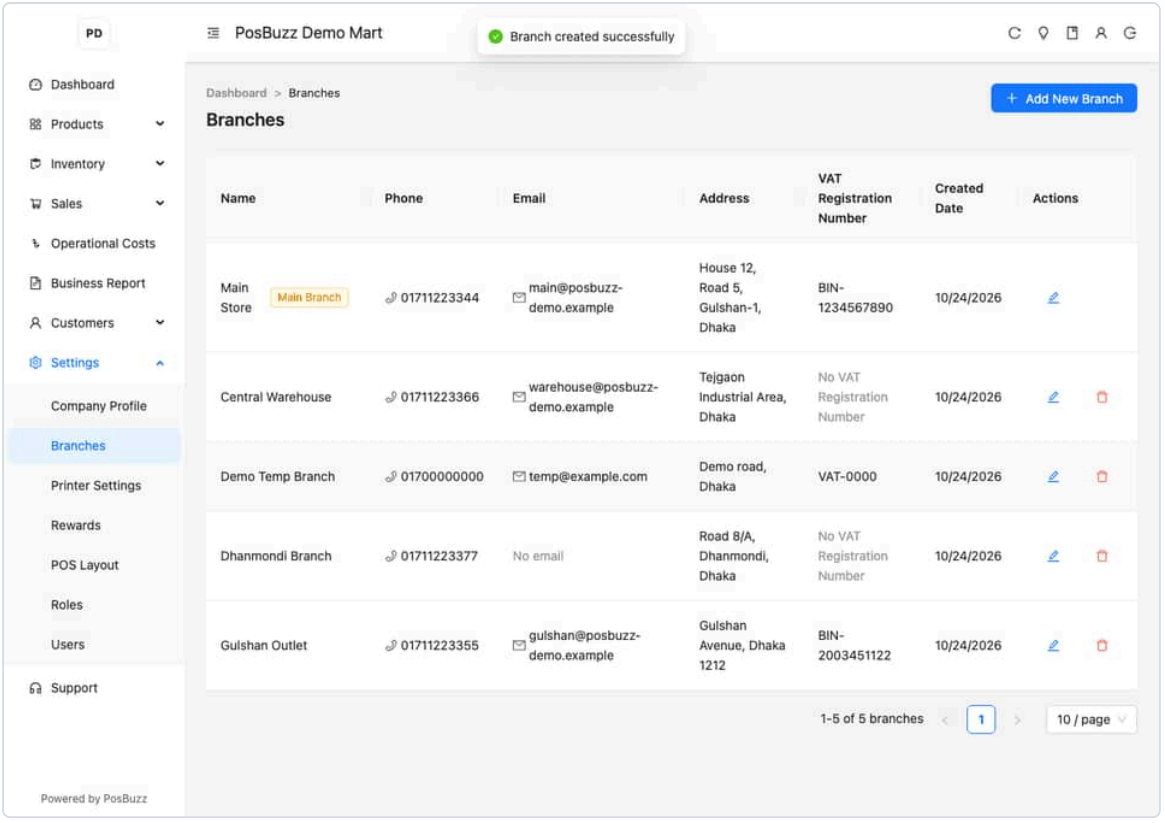

A phone with letters and an email that is not valid.

How to add a branch

1. Open **Settings** > **Branches**.

2. Click **Add New Branch**.
3. Fill in **Branch Name** and **VAT Registration Number**. Add the other fields if you wish.
4. Switch on **Main Branch** only if this should become the main branch.
5. Click **Create Branch**.

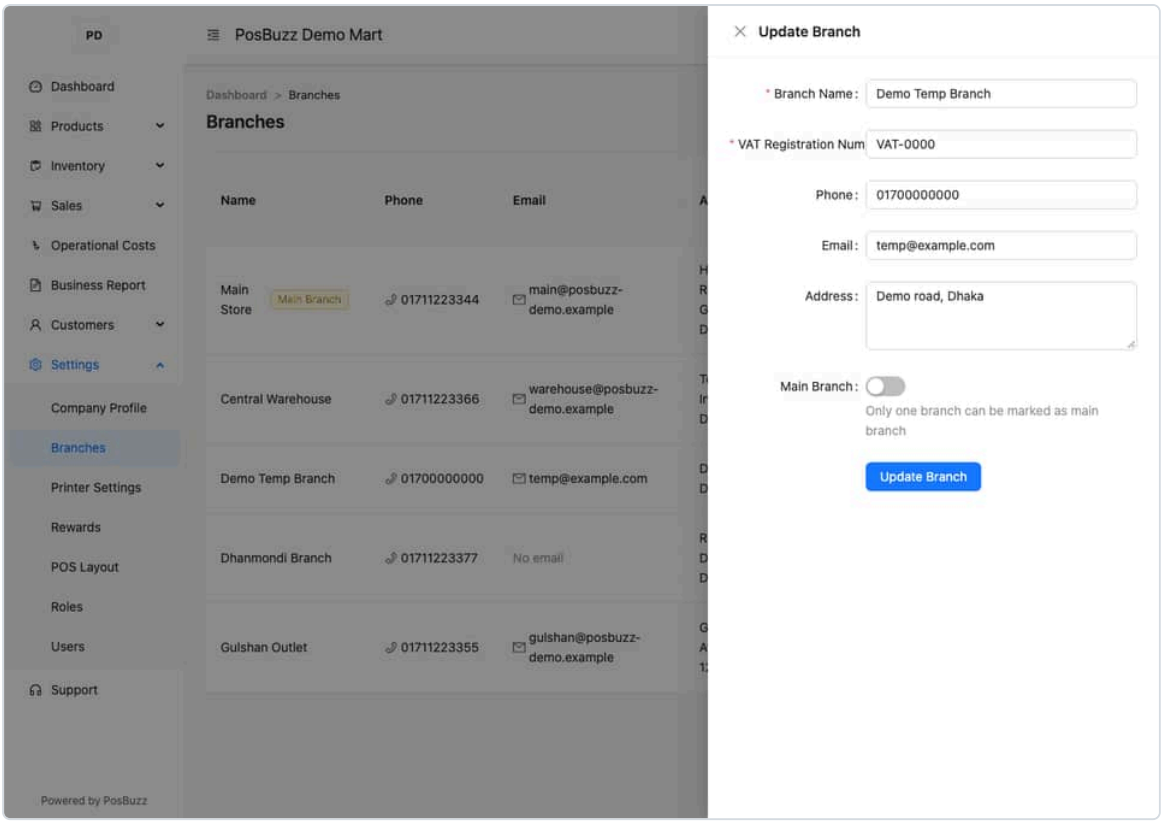

"Branch created successfully" shows and the new branch is in the list.

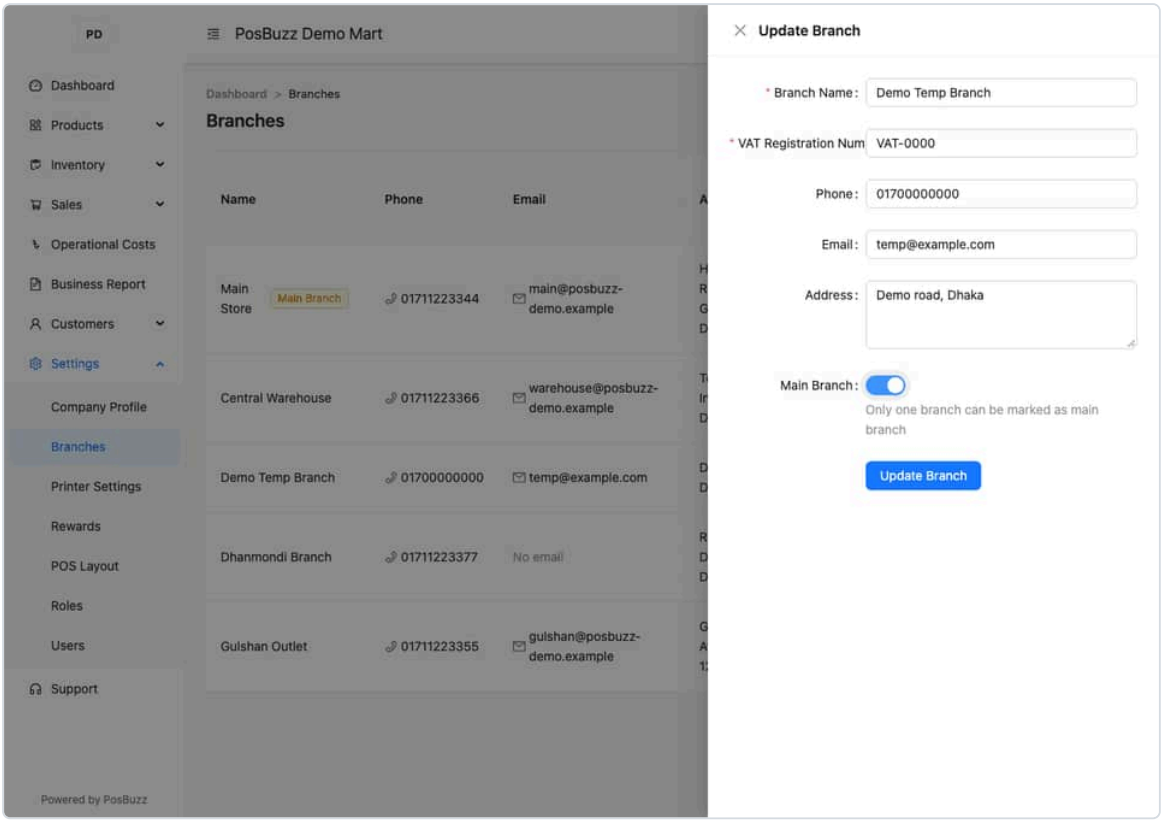

What happens next: A message "Branch created successfully" appears and the new branch shows in the list. New branches are given automatically to admin users.

How to edit a branch

1. Click the pencil icon on the branch row.
2. Change the fields in the **Update Branch** drawer.
3. Click **Update Branch**.

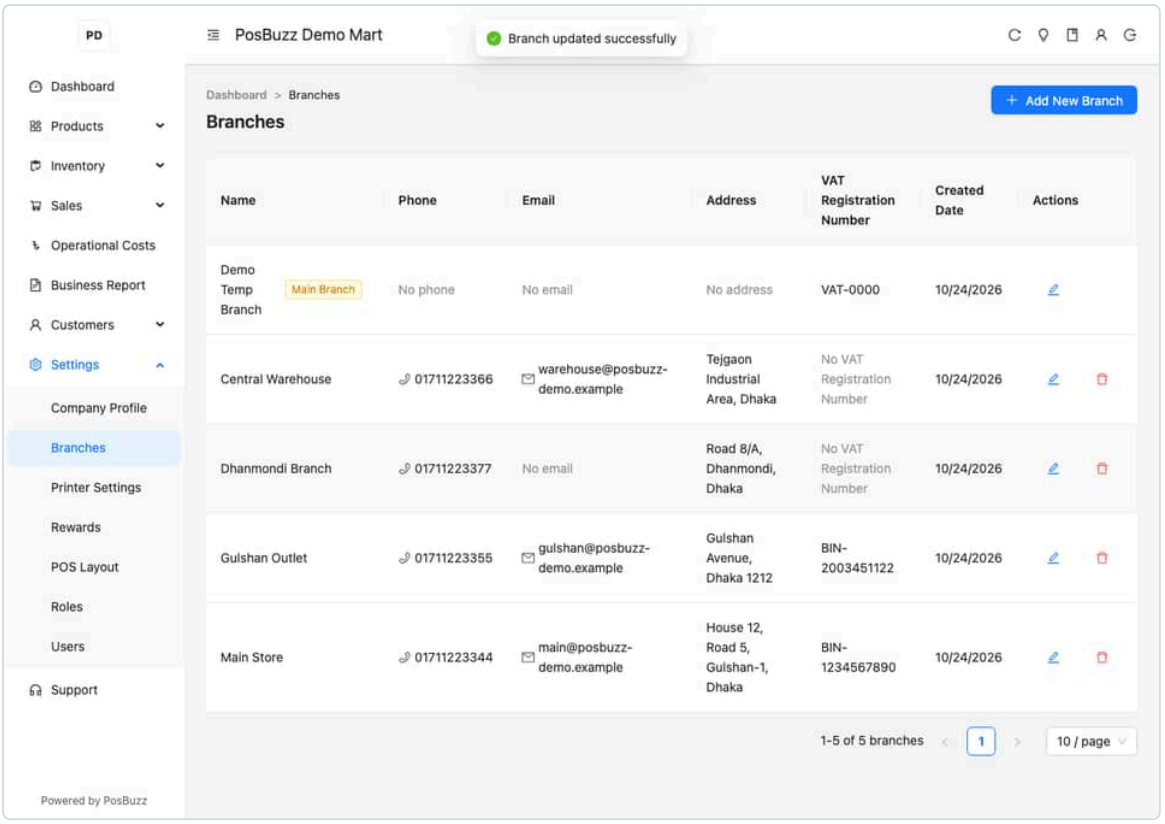

The Update Branch drawer.

The Main Branch switch turned on.

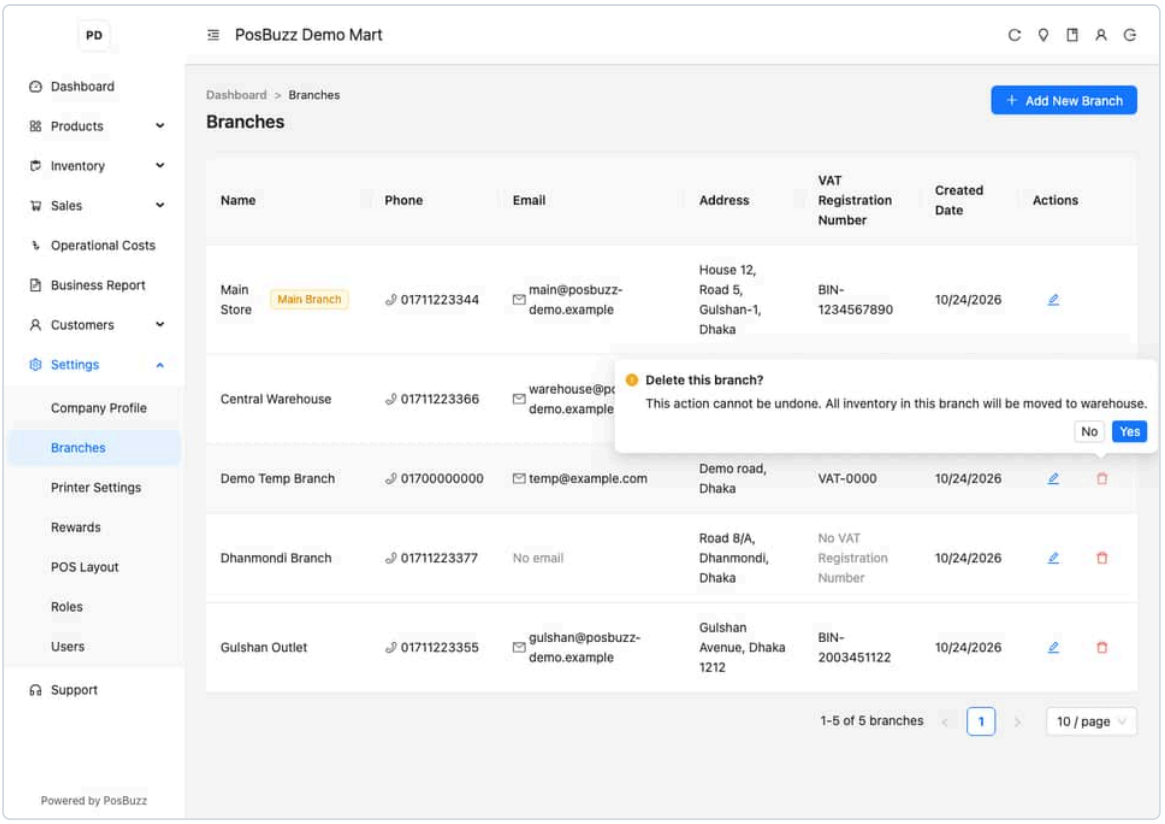

What happens next: A message "Branch updated successfully" appears. If you switch a branch to Main, the old main branch stops being main.

After saving, the chosen branch is listed first with the Main Branch tag, and the old main branch has a bin icon again.

How to delete a branch

1. Click the red bin icon on the branch row.
2. Read the question "Delete this branch?" and the note "This action cannot be undone. All inventory in this branch will be moved to warehouse."
3. Click **Yes** to delete, or **No** to cancel.

The question "Delete this branch?" with No and Yes.

What happens next: A message "Branch deleted successfully" appears and the row is removed.

Message	What it means	What to do
Branch name is required	Branch Name is empty.	Type a name.
VAT registration number is required	The VAT number is empty.	Type the number.
Please enter a valid phone number	Phone has a character that is not allowed.	Use digits, spaces and - + ( ) only.
Please enter a valid email address	The email is not in email format.	Correct it.
Branch created successfully	The branch was added.	Nothing.
Branch updated successfully	The branch was changed.	Nothing.
Branch deleted successfully	The branch was deleted.	Nothing.
Branch limit reached. This account can create up to N branch(es).	Your plan allows only N branches.	Delete a branch you do not need, or contact support about your plan.
Cannot delete the main branch	The main branch cannot be deleted.	Make another branch the main branch first, then delete this one.

Message	What it means	What to do
Cannot delete the last remaining branch	You must keep at least one branch.	Nothing.
This branch is still used by other records, so it can't be changed or deleted. Remove or reassign those first.	The branch already has sales or returns.	Keep the branch.
Failed to create branch / Failed to update branch / Failed to delete branch	The action failed and no reason was given.	Try again.
Failed to load branches	The list could not load.	Press the refresh icon in the top bar or reload the page.

> **Good to know:** The Branch Name box in the drawer cuts the label "VAT Registration Number" short. The box is still the VAT number box. When a branch has no phone, email or address, grey words "No phone", "No email" and "No address" show instead.

> **Good to know:** The first branch you create is always the main branch. The delete note says stock moves to the warehouse. This has not been checked, so look at your stock after deleting a branch.

Roles

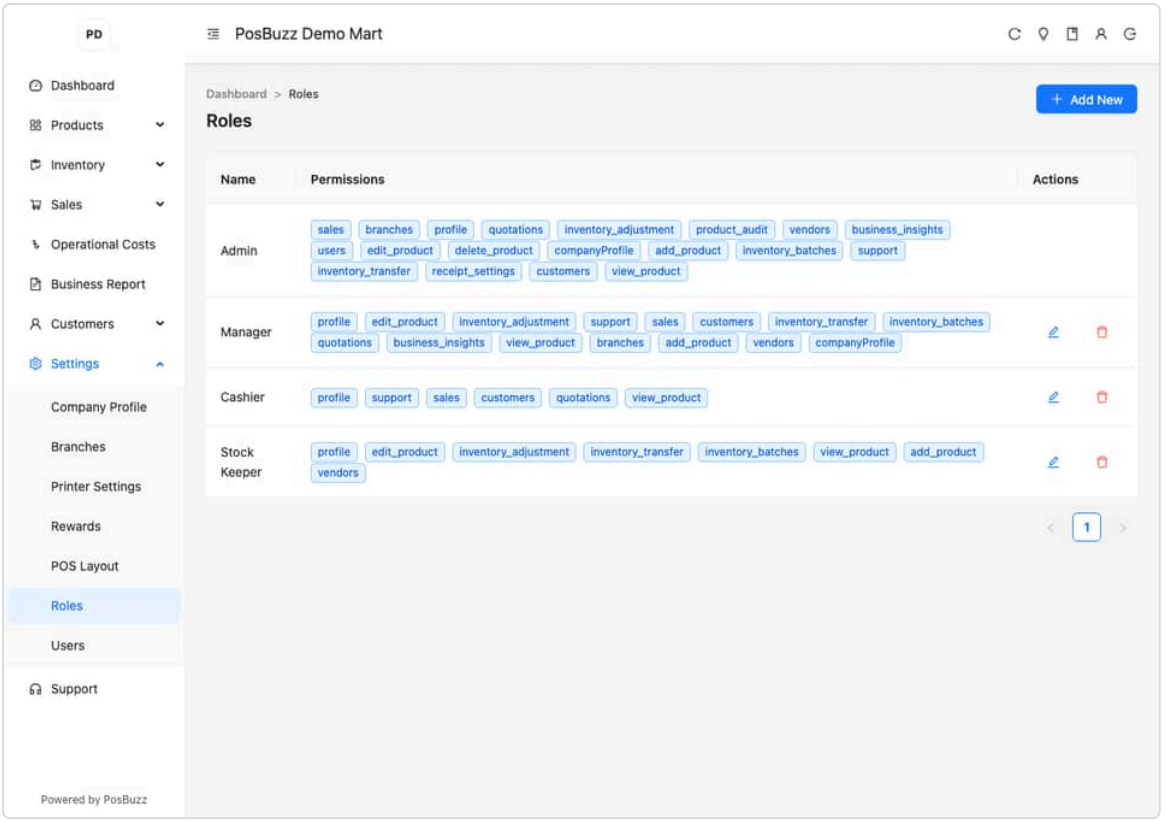

What it is

A page to create job roles (for example Cashier or Manager) and choose which screens each role can use.

Where to find it

Menu > **Settings** > **Roles**. You need the Users & Roles permission.

What you see

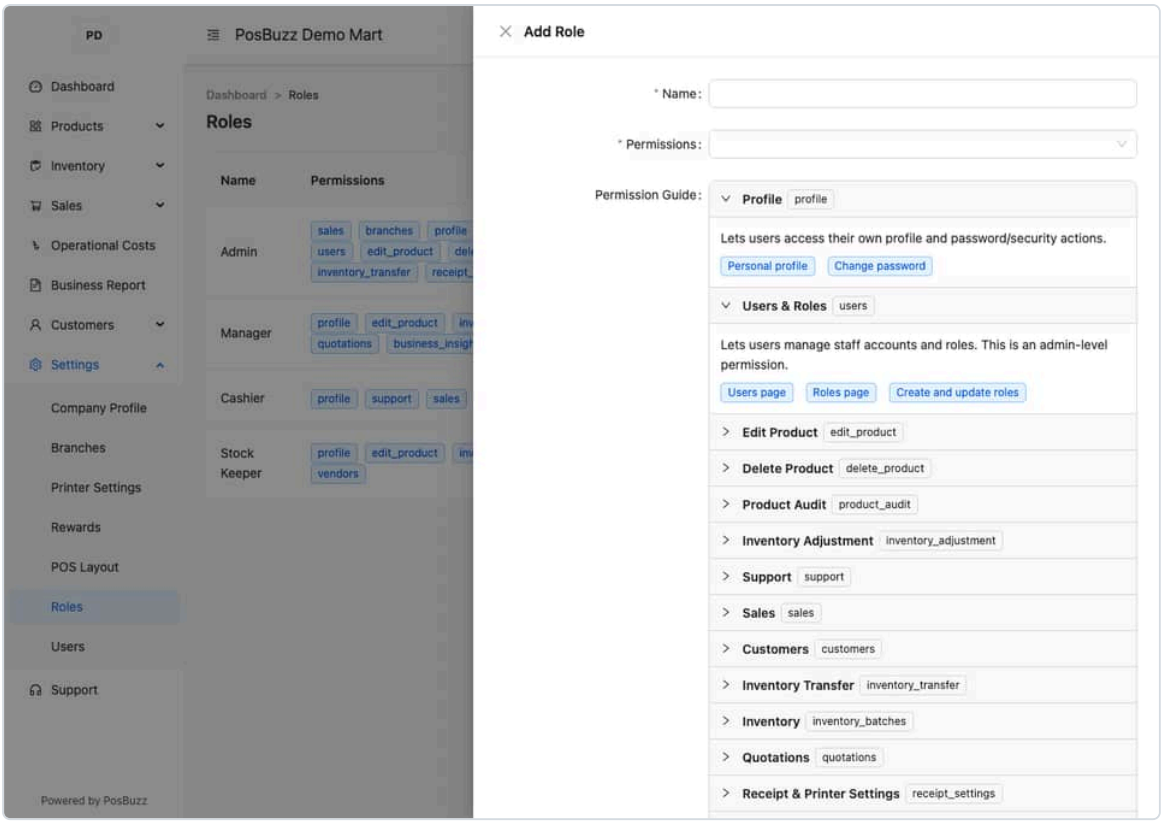

The Roles list. Each permission is a blue tag. The Admin role has no edit or delete icons.

- The trail "Dashboard > Roles", the title and the **Add New** button.
- A table with three columns: **Name**, **Permissions** (one blue tag per permission) and **Actions** (a pencil icon to edit and a red bin icon to delete).
- The tags show the short internal names (for example sales, view_product, business_insights) and not the friendly names used in the Permissions table in this manual.
- The role named "admin" (in any capital letters) has no actions. It cannot be edited or deleted.
- The list shows 10 roles per page. If loading fails: "Failed to load data".

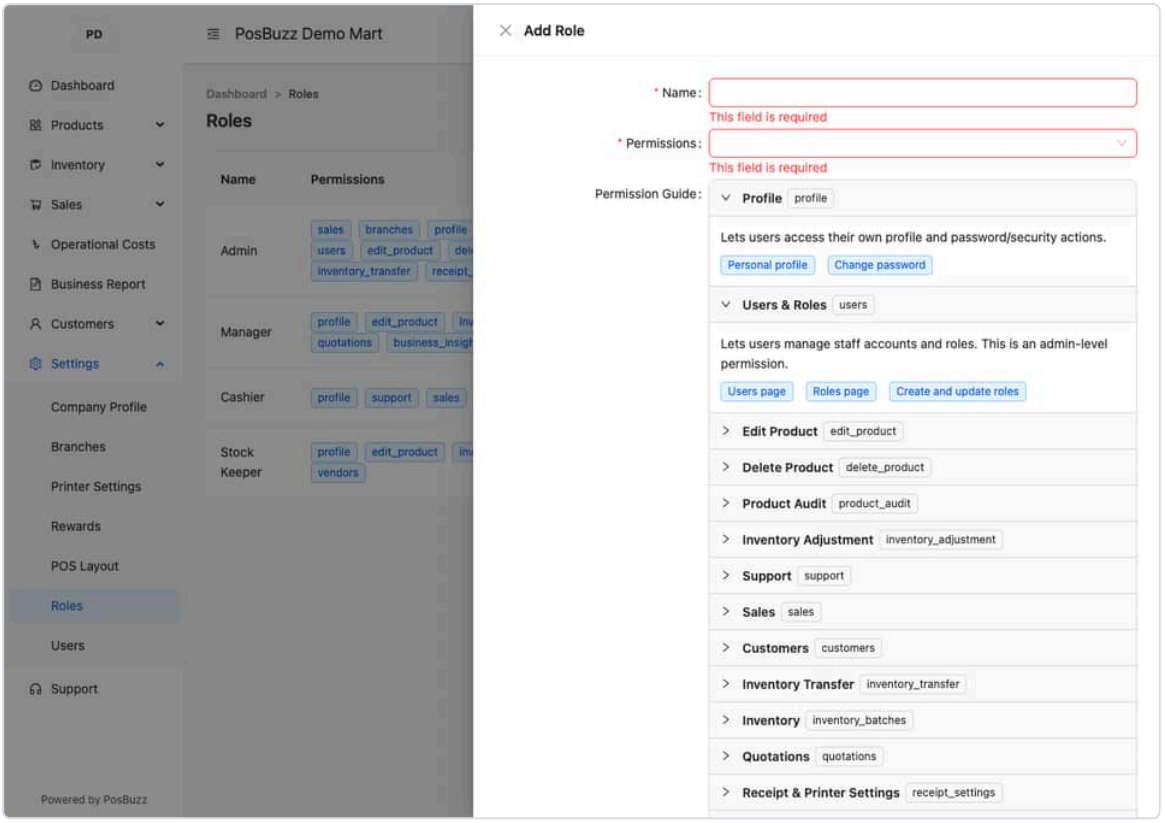

Form fields (drawer "Add Role" or "Update Role")

Field	Required	Notes
Name	Yes	Must be different from other role names in your shop.
Permissions	Yes	A multi-select box with search. Each choice shows its friendly title and a one-line explanation. You can search by title, internal name or explanation. Only permissions in your shop's plan are listed. A clear-all x clears the choices.
Permission Guide	(read only)	A collapsible list with one item per available permission, showing the title, the internal name, an explanation and blue tags of what it gives. The first two items start open. Before it loads it says "Permission guide will appear after permissions load."

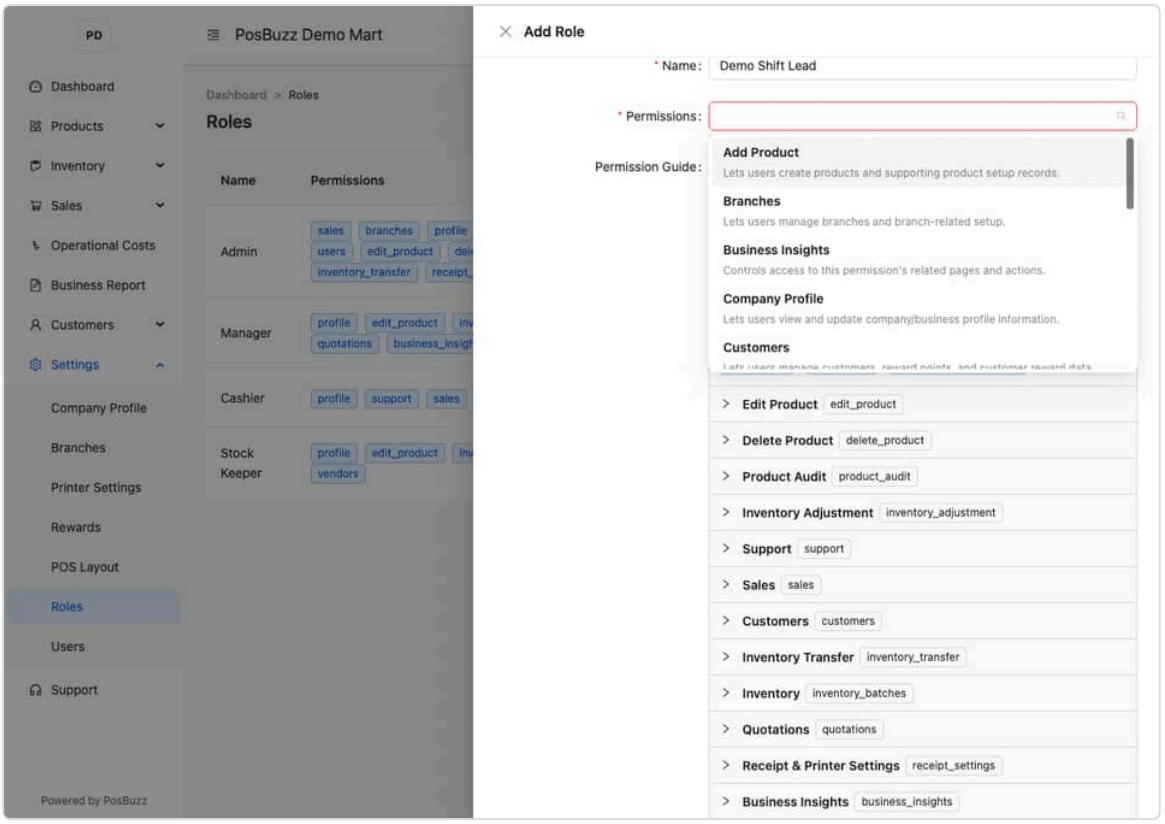

The button at the bottom is **Save**.

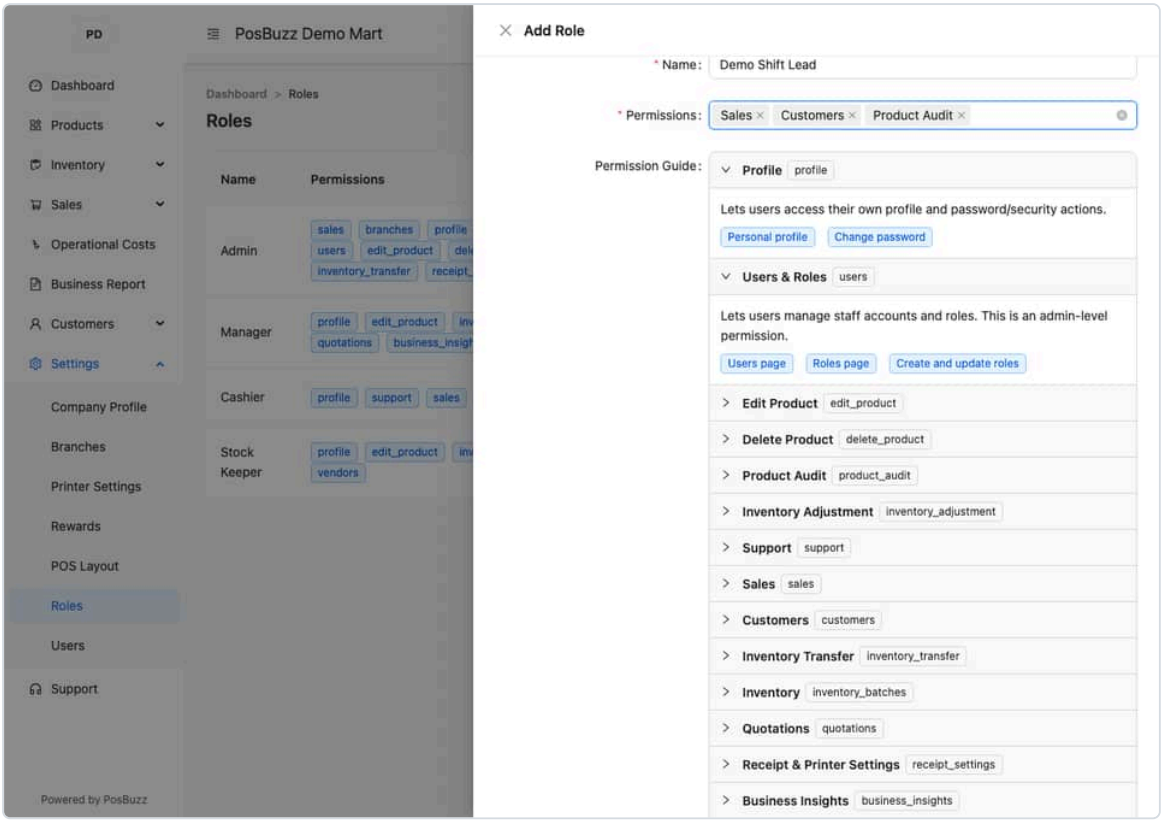

The Add Role drawer. The Permission Guide is below the two boxes.

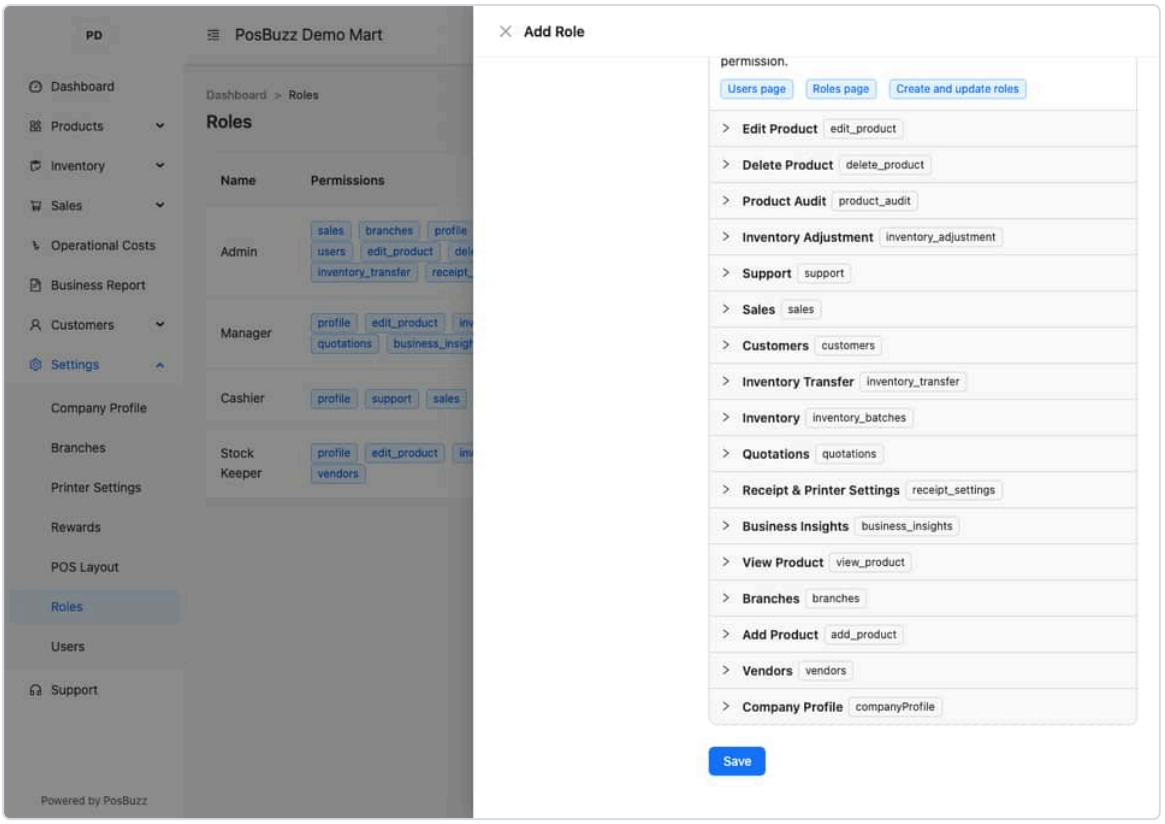

"This field is required" shows under both boxes.

Click Permissions to see the list. Each choice has its name and a one-line explanation. You can also type to search.

Three permissions chosen. The Permission Guide opens the first two items.

The lower part of the drawer, with the rest of the Permission Guide and the Save button.

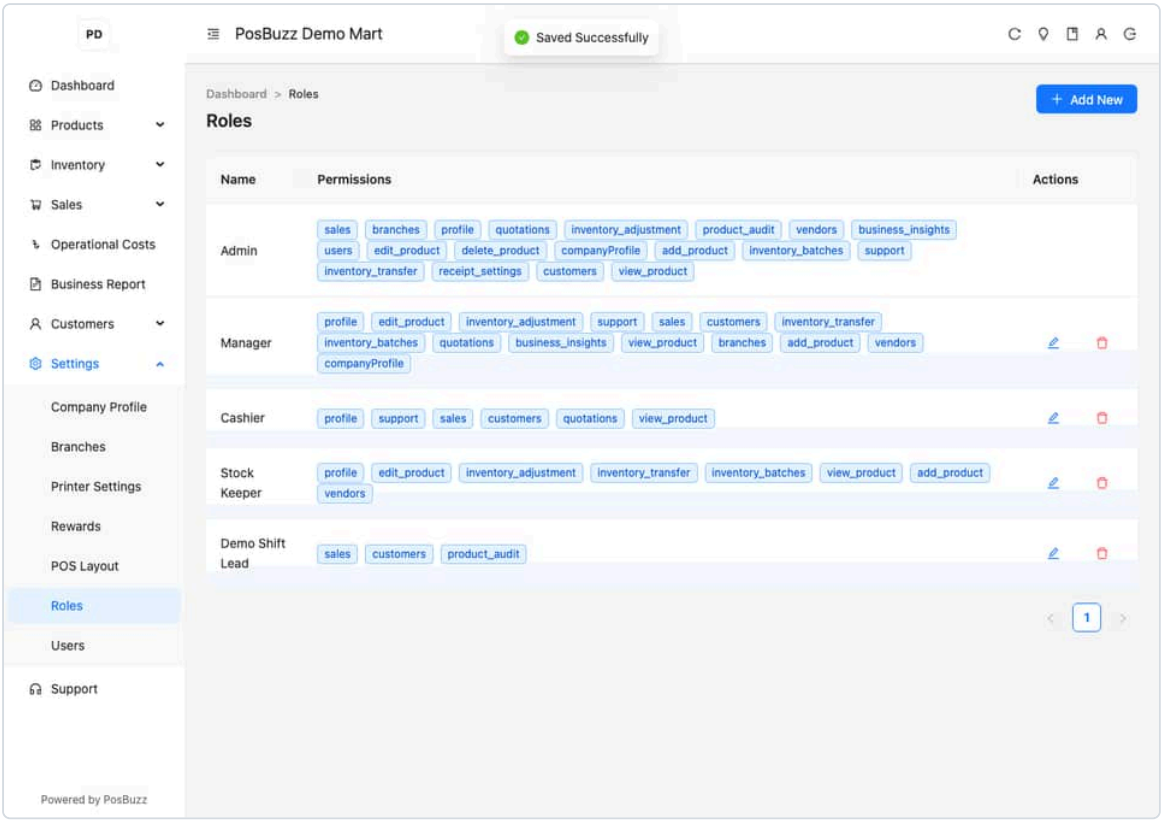

What each permission means in the guide:

Permission	Guide text
Profile	Lets users access their own profile and password/security actions.
Company Profile	Lets users view and update company/business profile information.
Users & Roles	Lets users manage staff accounts and roles. This is an admin-level permission.
Branches	Lets users manage branches and branch-related setup.
Add Product	Lets users create products and supporting product setup records.
View Product	Lets users view product catalog, product details, and product sales stats.
Edit Product	Lets users update product records and product setup data.
Delete Product	Lets users delete products and deletable product setup records.
Product Audit	Lets users review product audit/history records.
Inventory	Lets users manage stock batches, stock reports, vendors from inventory, and purchase payments.
Inventory Transfer	Lets users move inventory between branches or locations.
Inventory Adjustment	Lets users adjust stock counts for correction, loss, or reconciliation.
Vendors	Lets users create and manage vendor/supplier records.
Sales	Lets users run the POS sales workflow and related sales operations.

Permission	Guide text
Quotations	Lets users create, view, update, and convert quotations.
Customers	Lets users manage customers, reward points, and customer reward data.
Receipt & Printer Settings	Lets users configure receipt templates and printer/PDF receipt settings.
Support	Lets users raise support tickets with PosBuzz and follow the conversation.
Business Insights	Shows the generic text "Controls access to this permission's related pages and actions."

How to add a role

1. Open **Settings** > **Roles**.
2. Click **Add New**.
3. Type the role name in **Name**.
4. Click **Permissions** and choose each permission the role needs. You can type to search.
5. Check the **Permission Guide** if you are not sure what a permission does.
6. Click **Save**.

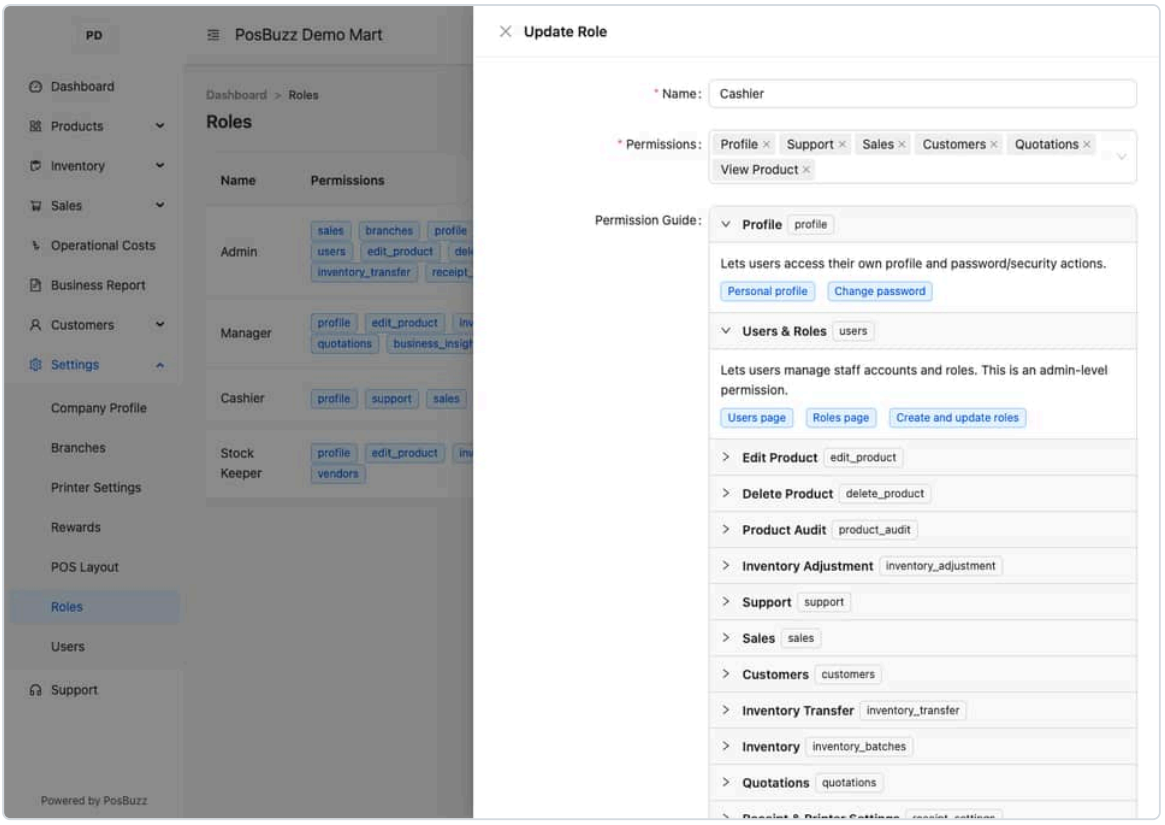

"Saved Successfully" shows and the new role is in the list.

What happens next: A message "Saved Successfully" appears, the drawer closes and the list refreshes.

How to edit a role

1. Click the pencil icon on the role row. The **Update Role** drawer opens with the current values.
2. Change the **Name** or the **Permissions**.
3. Click **Save**.

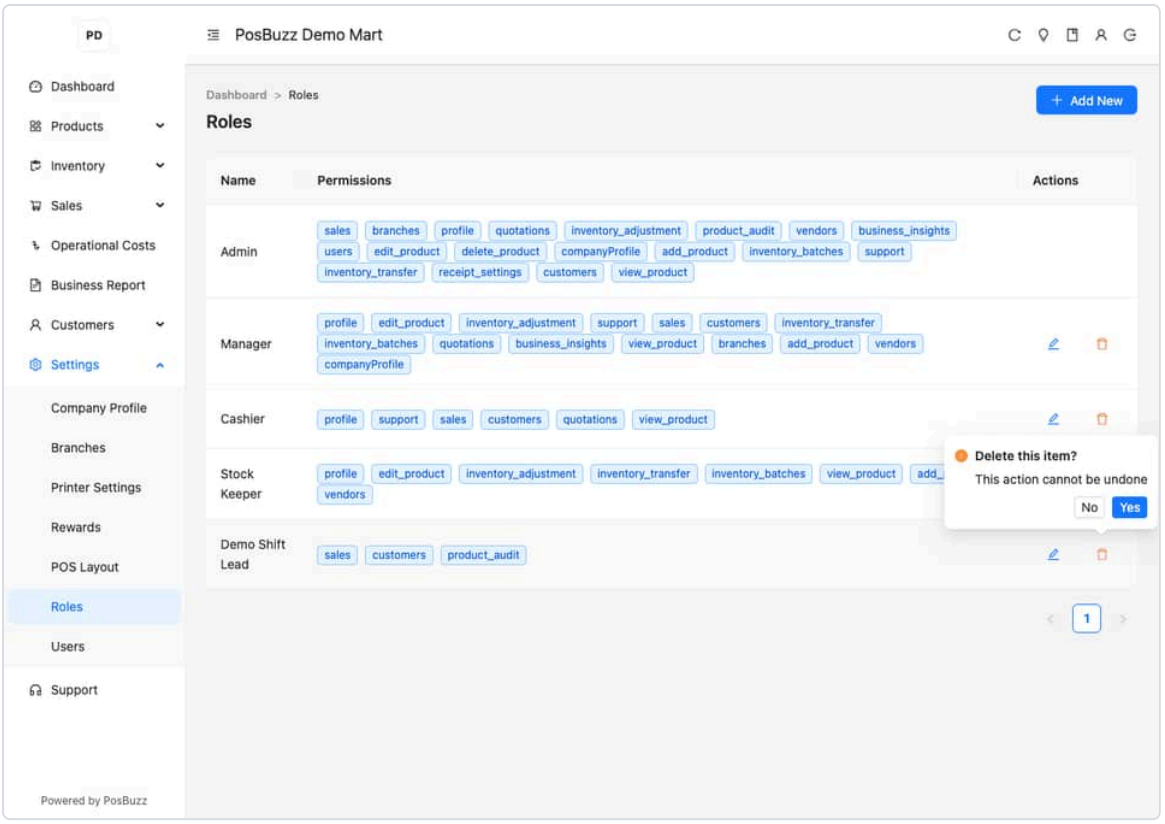

The Update Role drawer, filled with the current name and permissions (shown here for Cashier).

What happens next: A message "Updated Successfully" appears. The permissions you pick replace the old ones. People with this role get the new access the next time their profile loads. To be sure, ask them to log out and log in again.

How to delete a role

1. Click the red bin icon on the role row.
2. Read "Delete this item?" and "This action cannot be undone".
3. Click **Yes** to delete, or **No** to cancel.

The question "Delete this item?" with No and Yes.

What happens next: A message "Deleted Successfully" appears and the row is removed.

> **Good to know:** When we deleted a role that still had a person attached, the app said "Deleted Successfully" and that person no longer appeared in the Users list. The role's old message about records "still used" did not show. To be safe, move people to another role before you delete a role.

Message	What it means	What to do
This field is required	Name or Permissions is empty.	Fill it in.
Saved Successfully	The role was added.	Nothing.
Updated Successfully	The role was changed.	Nothing.
Deleted Successfully	The role was deleted.	Nothing.
A role with this name already exists.	Another role has the same name.	Choose a different name.
One or more permissions are not included in your plan	You chose a permission your plan does not have.	Remove it, or contact support about your plan.
This role is still used by other records, so it can't be changed or deleted. Remove or reassign those first.	The role is tied to other records. We did not see this message when a role had a person attached (see the note above).	If you see it, move those people to another role in Settings > Users first.
Something went wrong	The action failed and no reason was given.	Try again.
Failed to load data	The list could not load.	Reload the page.

> **Good to know:** A role cannot give anything outside your shop's plan.

Users

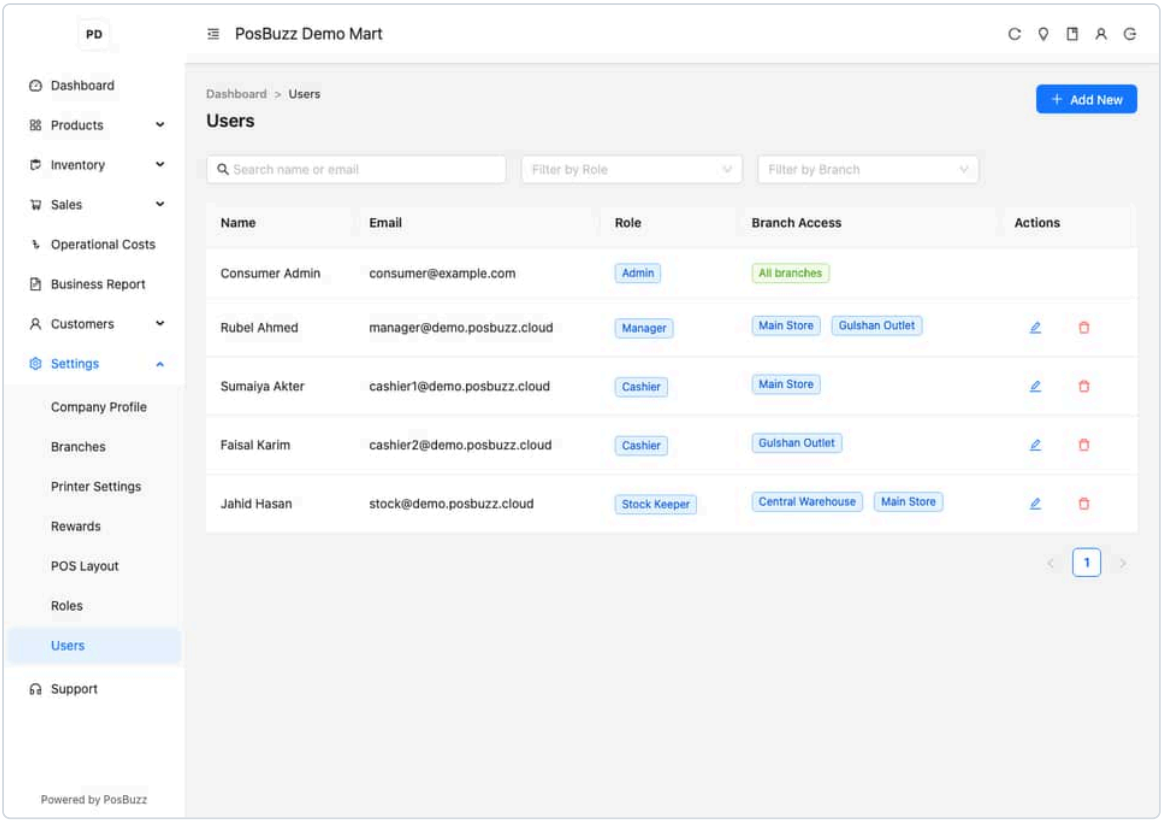

What it is

A page to create staff logins, give each person a role, and choose which branches they can work in.

Where to find it

Menu > **Settings** > **Users**. You need the Users & Roles permission.

What you see

The Users list with the search box, the two filters and the Branch Access column. The owner's account has no edit or delete icons.

- The trail "Dashboard > Users", the title and the **Add New** button.
- A search box (placeholder "Search name or email", with a magnifier icon and a clear button). The list updates about half a second after you stop typing.
- A dropdown **Filter by Role**.
- A dropdown **Filter by Branch**. Branch names carry the suffix "(Main)" or "(Warehouse)" where it applies.
- A table:

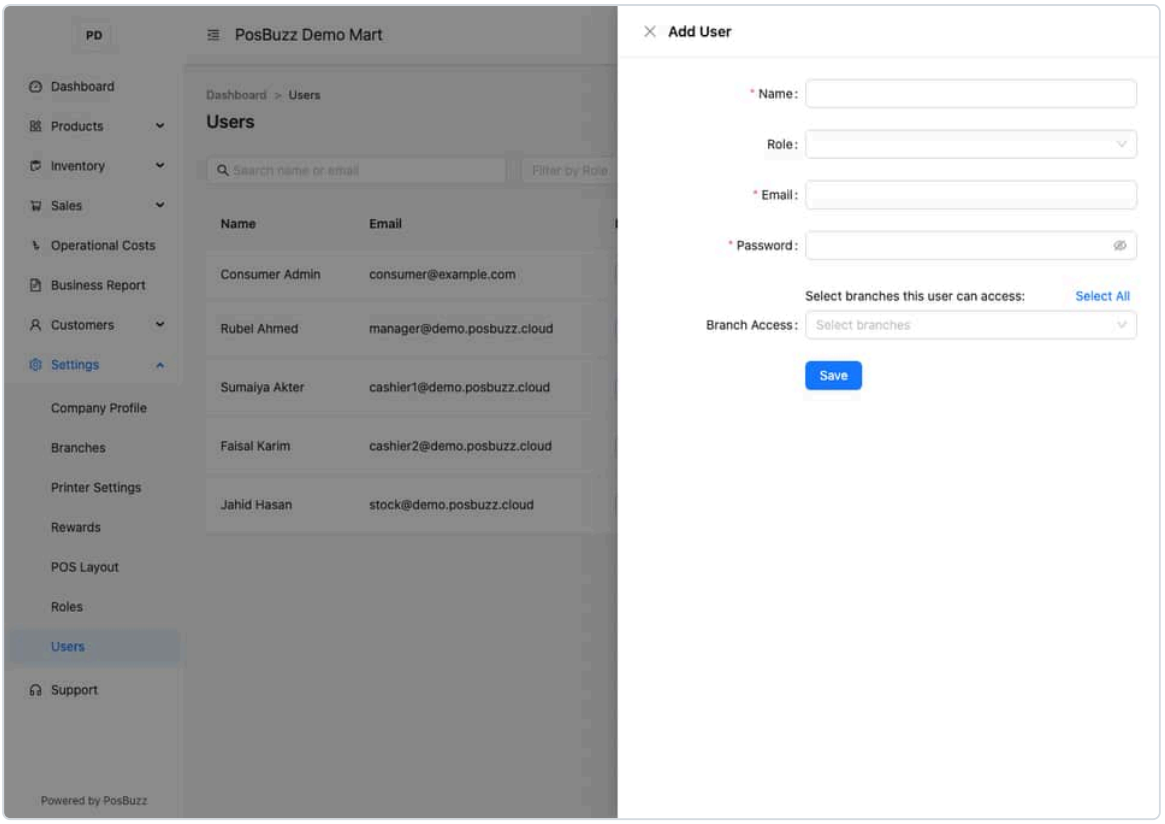

Column	What it shows
Name	The person's name.
Email	The sign-in email.
Role	The role as a blue tag.
Branch Access	A green "All branches" tag, a red "No access" tag, or one blue tag for each branch.
Actions	A pencil icon (edit) and a red bin icon (delete). The shop owner's own account (the one with the company email) has no actions.

- The list shows 10 users per page. If loading fails: "Failed to load data".

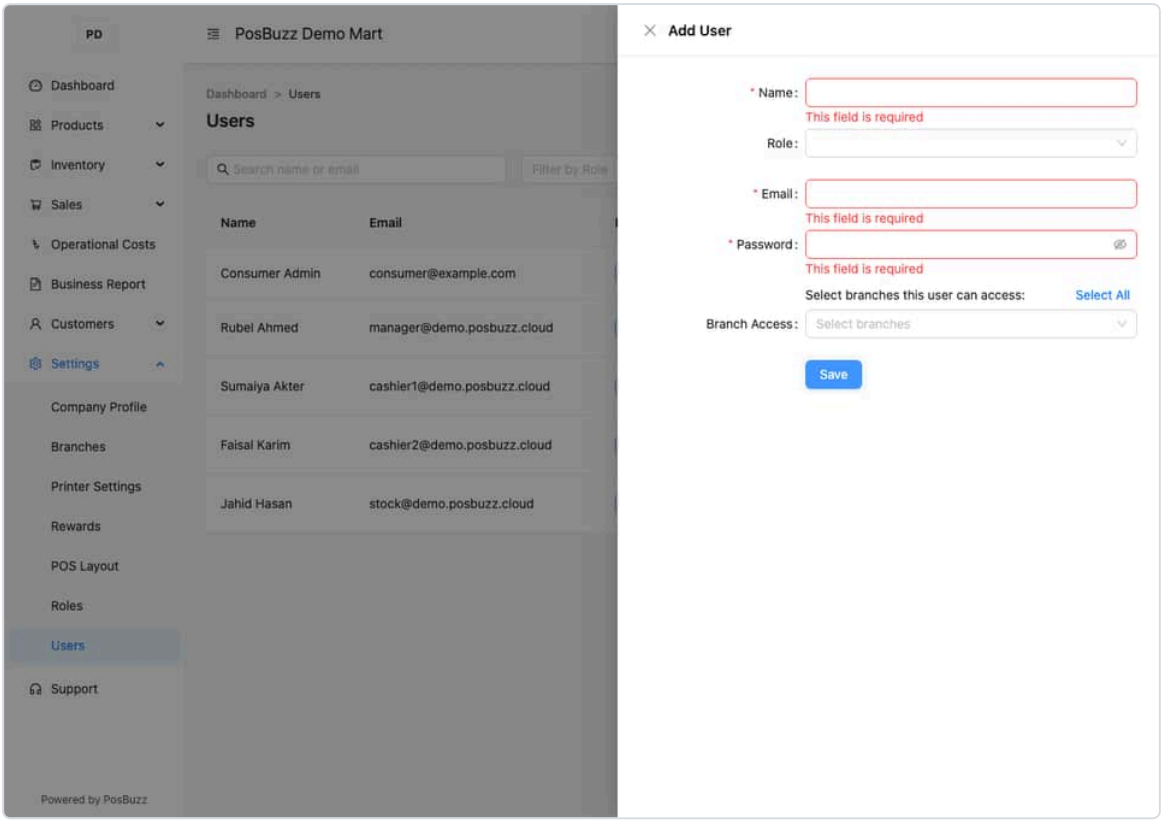

Form fields (drawer "Add User" or "Update User")

Field	Required	Notes
Name	Yes	The person's name.
Role	Yes	A dropdown of your roles, with a clear button. A role must be chosen when you add a user. Changing the role clears the branches you picked.
Email	Yes	Used to sign in. Must be different from every other user in the shop.
Password	Yes when adding. No when editing	When editing, leave it empty to keep the current password. No minimum length is checked here.
Branch Access	See notes	Placeholder "Select branches". Shown only when the chosen role's name does not contain the word "admin". Above it is the text "Select branches this user can access:" and a link-button **Select All** (it turns into **Deselect All**).

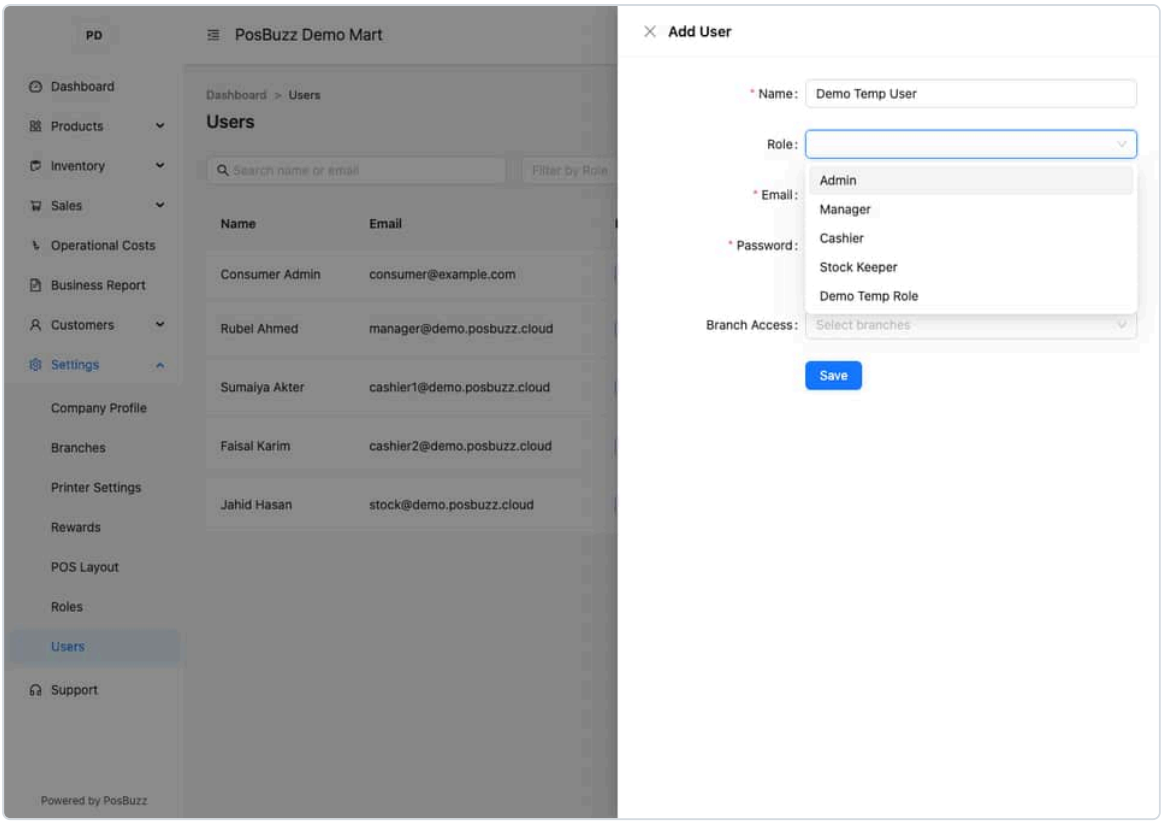

The button at the bottom is **Save**.

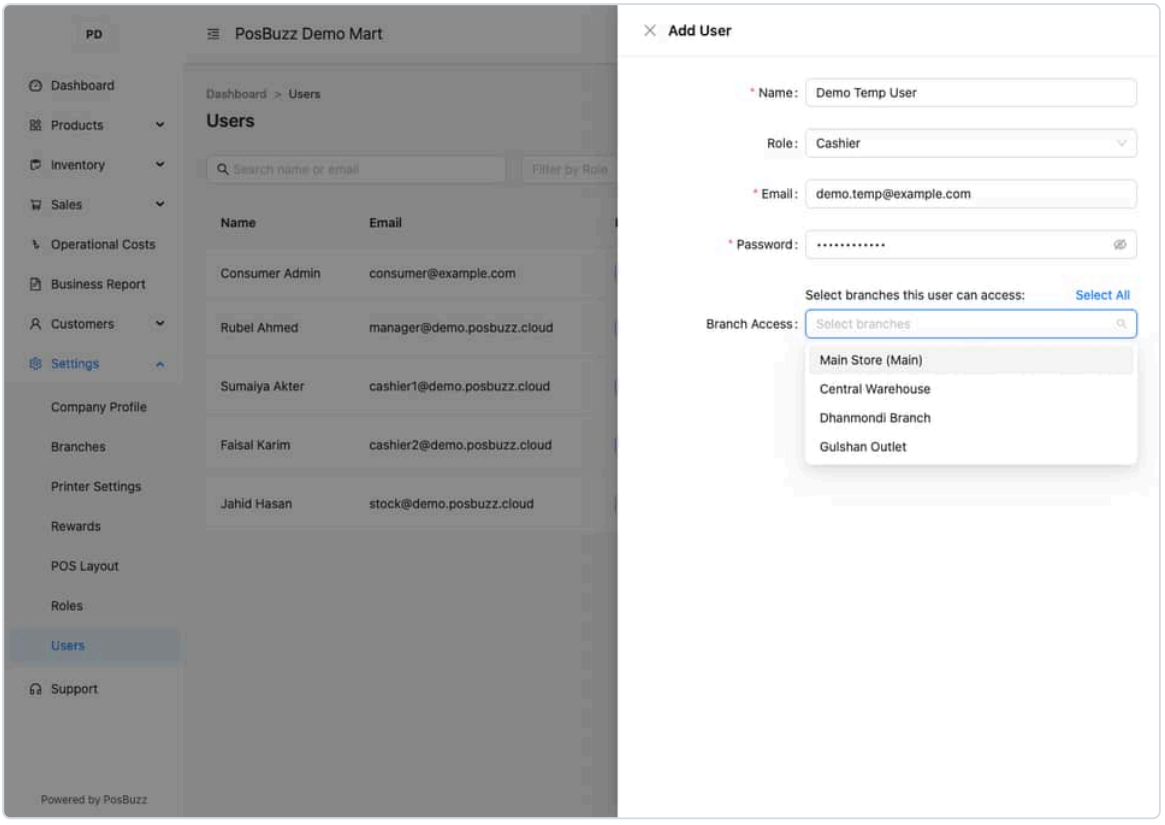

The Add User drawer.

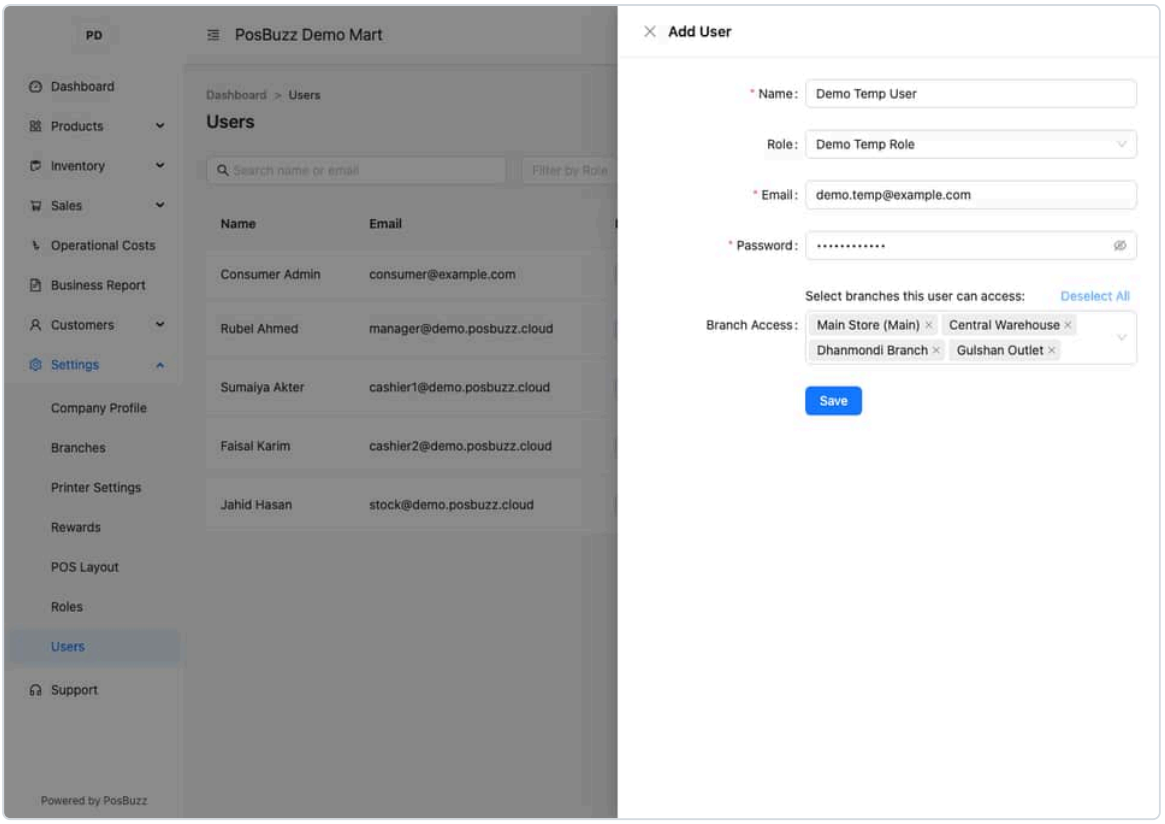

Pressing Save with the boxes empty. Name, Email and Password show "This field is required".

The Role dropdown lists the roles of your shop.

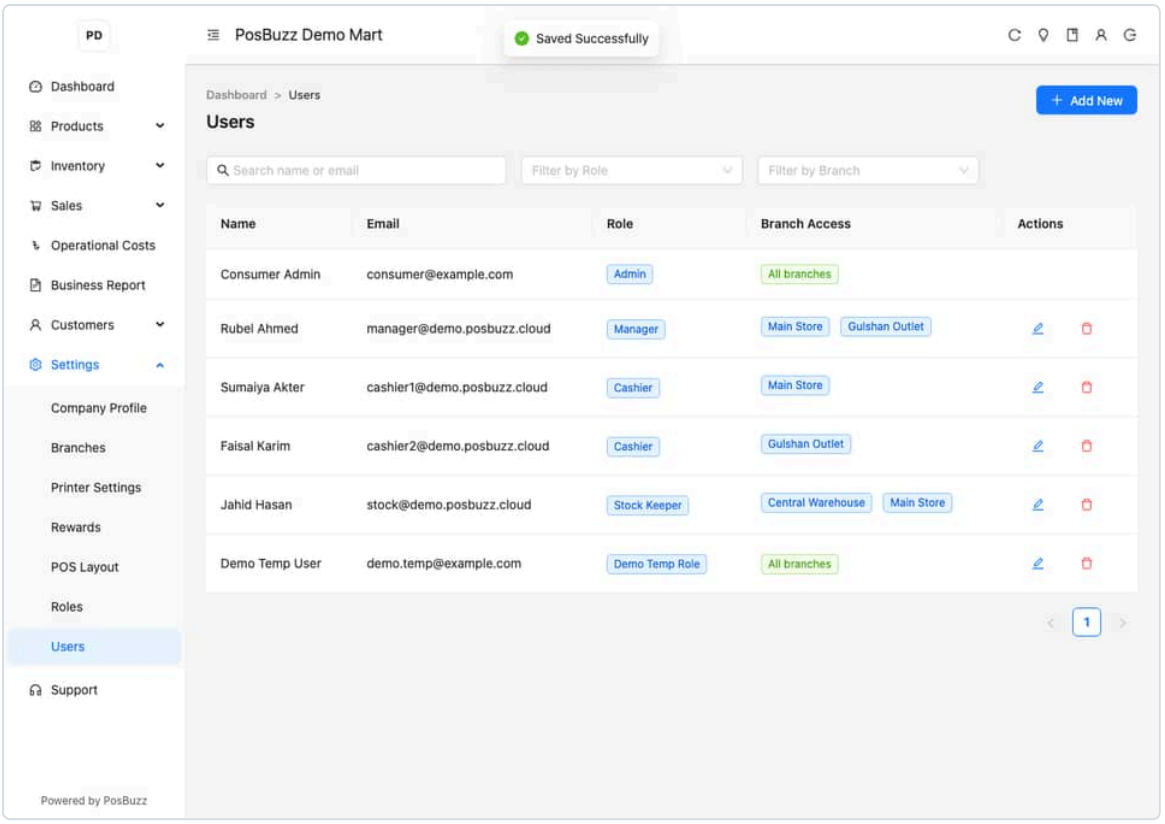

The Branch Access dropdown lists your branches.

A filled form after Select All. The link now reads Deselect All.

How to add a user

1. Open **Settings** > **Users**.
2. Click **Add New**.
3. Type the **Name**.
4. Choose a **Role**.
5. Type the **Email**.
6. Type a **Password**.
7. If the branch picker shows, click **Branch Access** and choose the branches, or click **Select All**.
8. Click **Save**.

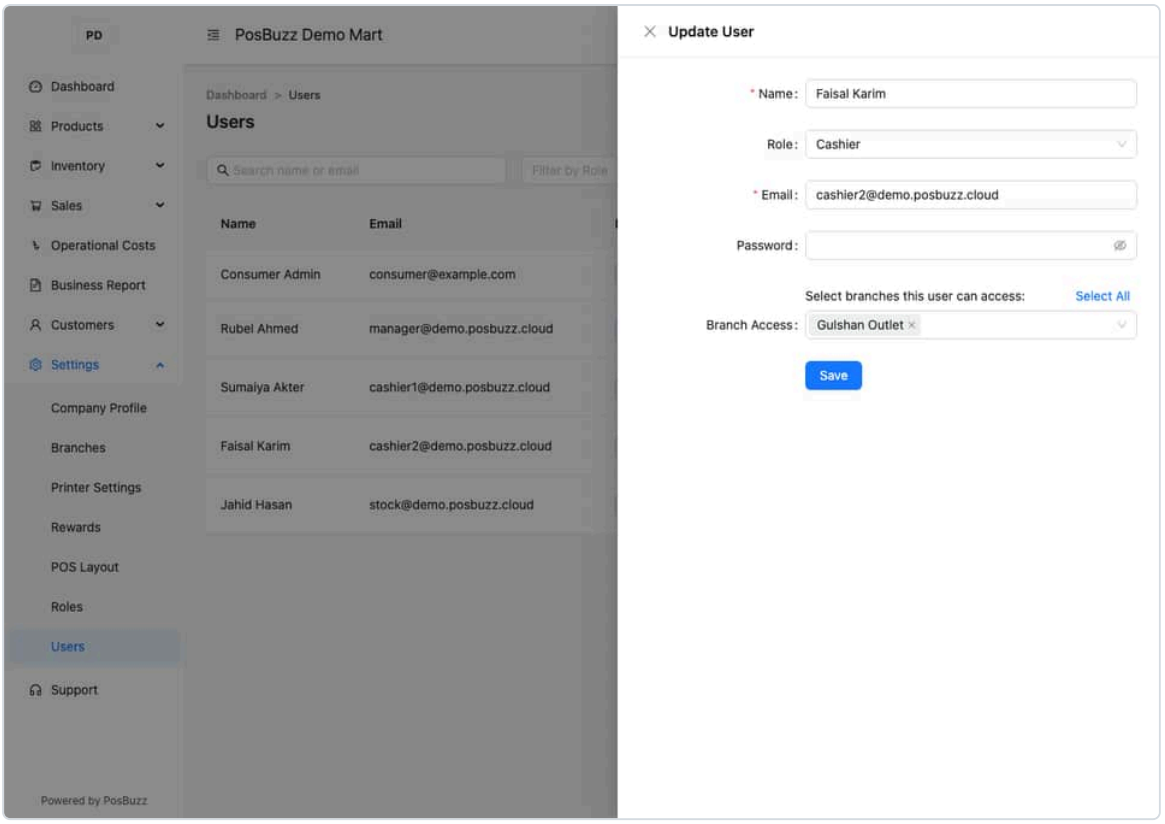

"Saved Successfully" shows and the new person is in the list.

What happens next: A message "Saved Successfully" appears. The new person can sign in at the shop address with this email and password.

How to edit a user

1. Click the pencil icon on the user row.
2. Change the fields you need.
3. Click **Save**.

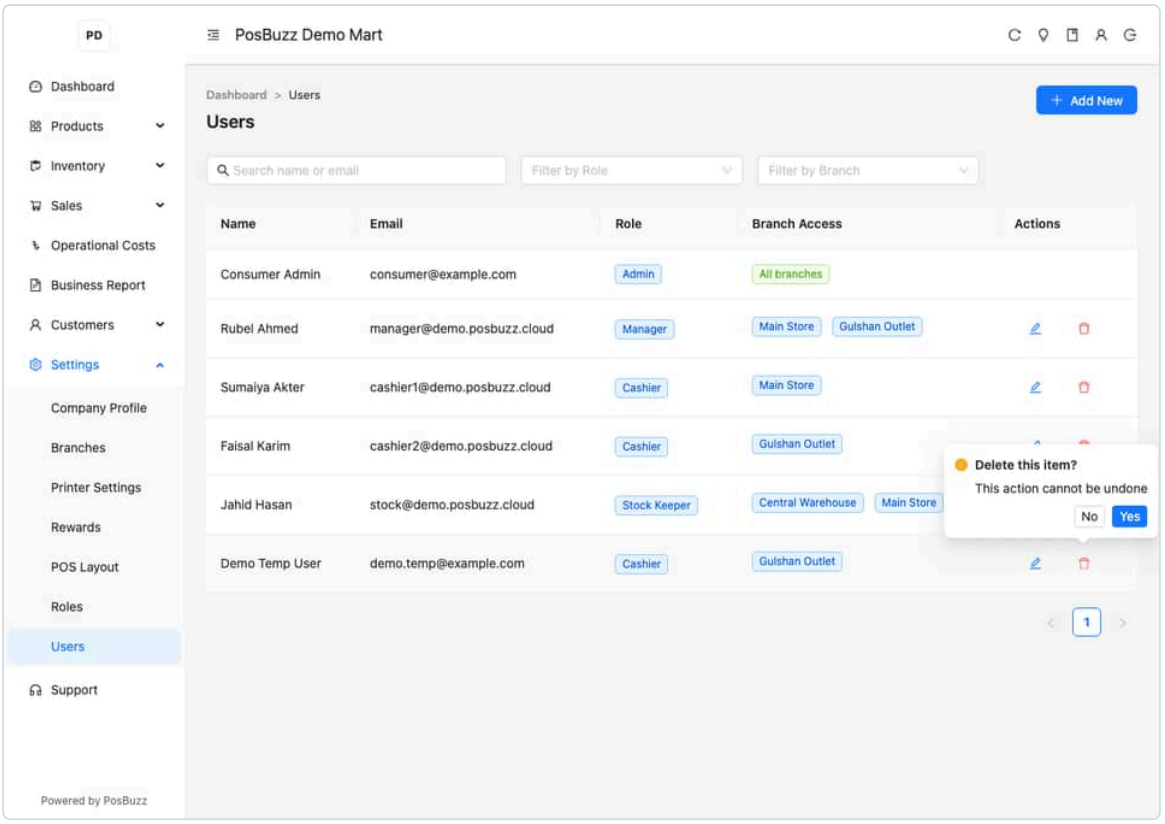

The Update User drawer. Password is empty. Leave it empty to keep the current password.

What happens next: A message "Updated Successfully" appears. If you typed a new password, that person's password is reset to it.

How to delete a user

1. Click the red bin icon on the user row.
2. Read "Delete this item?" and "This action cannot be undone".
3. Click **Yes** to delete, or **No** to cancel.

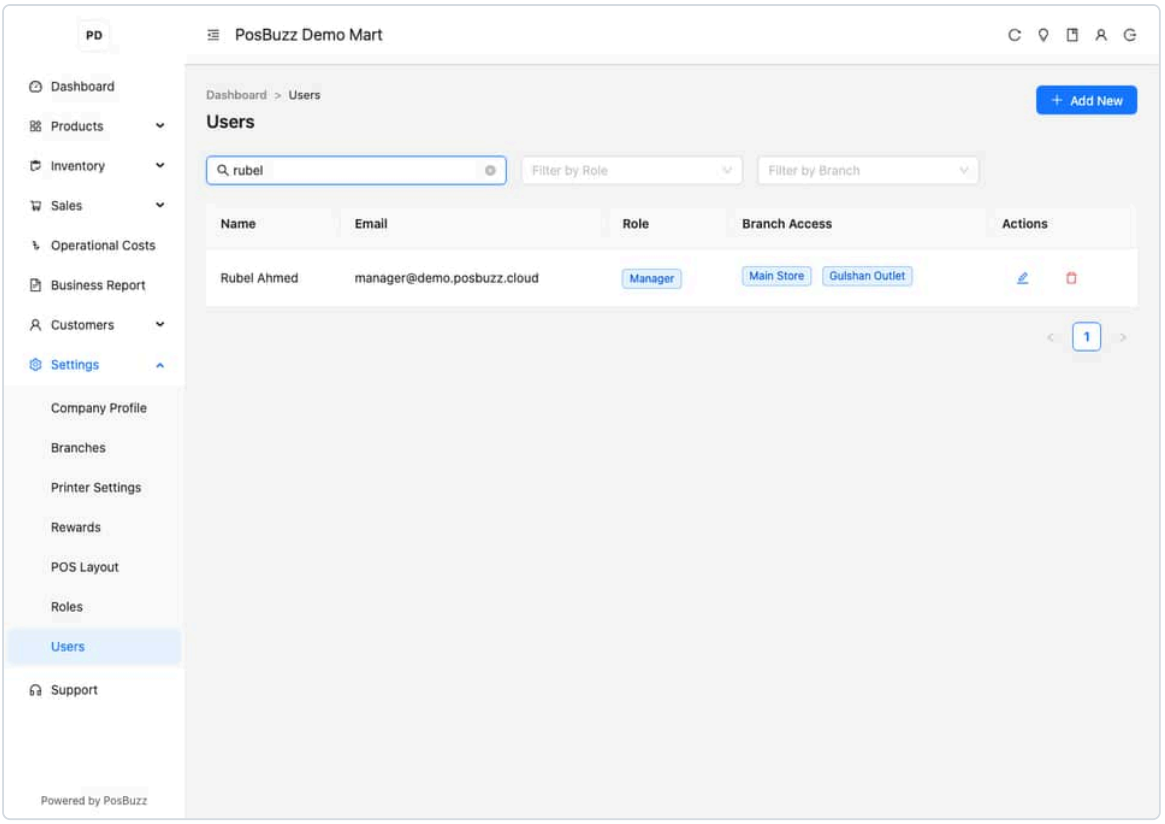

The question "Delete this item?" with No and Yes.

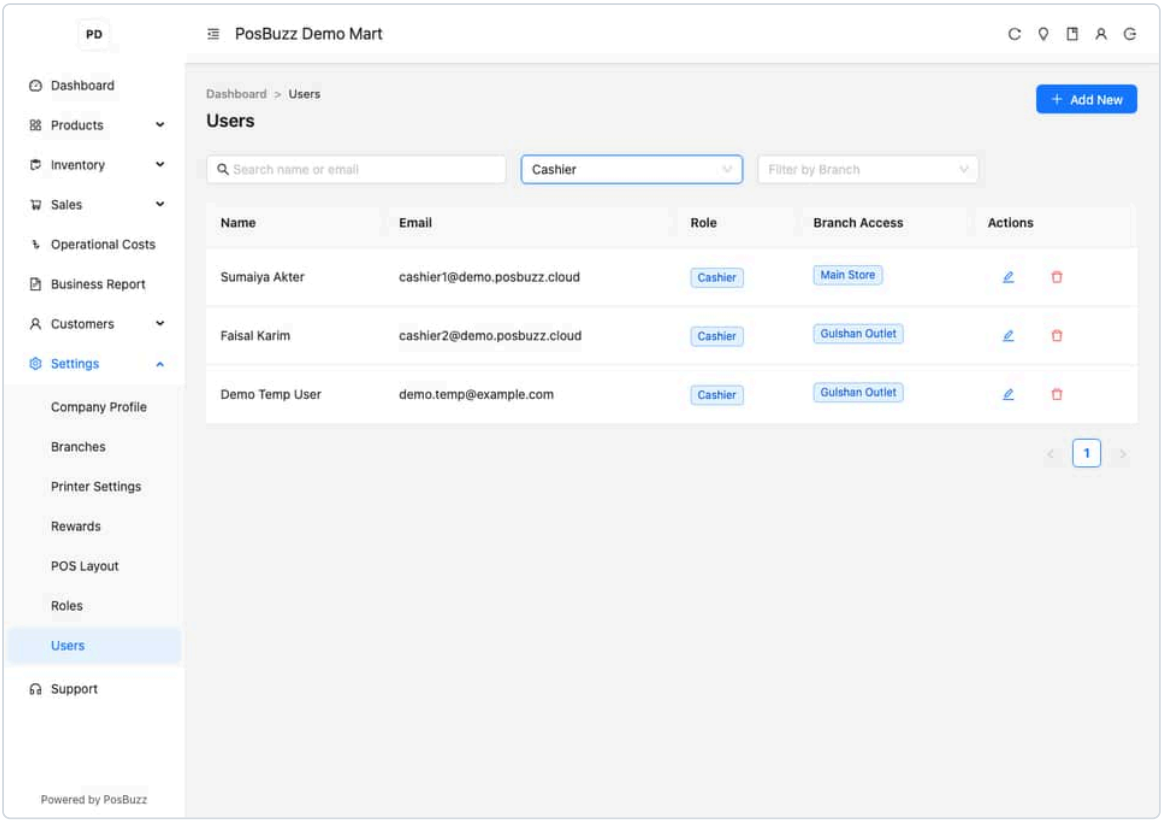

What happens next: A message "Deleted Successfully" appears. The person's login is removed. Their past sales stay, but are no longer linked to their name.

How to search and filter users

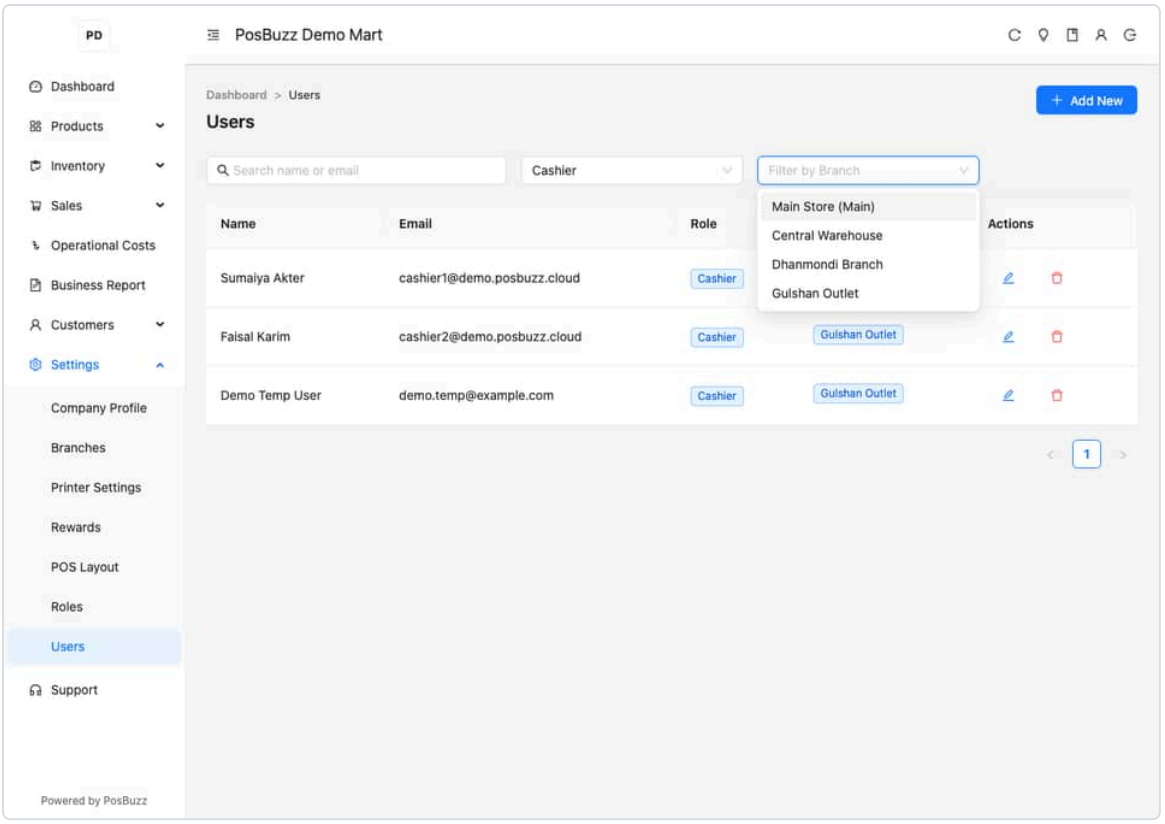

1. Type a name or email in **Search name or email**, or
2. Pick a role in **Filter by Role**, or
3. Pick a branch in **Filter by Branch**.

Searching for "rubel".

The table filtered to the Cashier role.

The Filter by Branch dropdown. The main branch has "(Main)" after its name.

What happens next: The table updates. Use the clear button on a box to remove that filter.

Message	What it means	What to do
This field is required	Name, Email or (when adding) Password is empty.	Fill it in.
Saved Successfully	The user was added.	Nothing.
Updated Successfully	The user was changed.	Nothing.
Deleted Successfully	The user was deleted.	Nothing.
A user with this email address already exists.	The email is already used in your shop.	Use a different email.
Role not found	The chosen role no longer exists.	Choose another role.
Branch not found	A chosen branch no longer exists.	Choose the branches again.
Something went wrong	The action failed and no reason was given.	Try again.
Failed to load data	The list could not load.	Reload the page.

> **Good to know:** A role whose name contains "admin" gives access to all branches automatically, including branches added later, so the branch picker is hidden. For any other role, a person with no branch ticked shows "No access" and cannot work in any branch.

Support

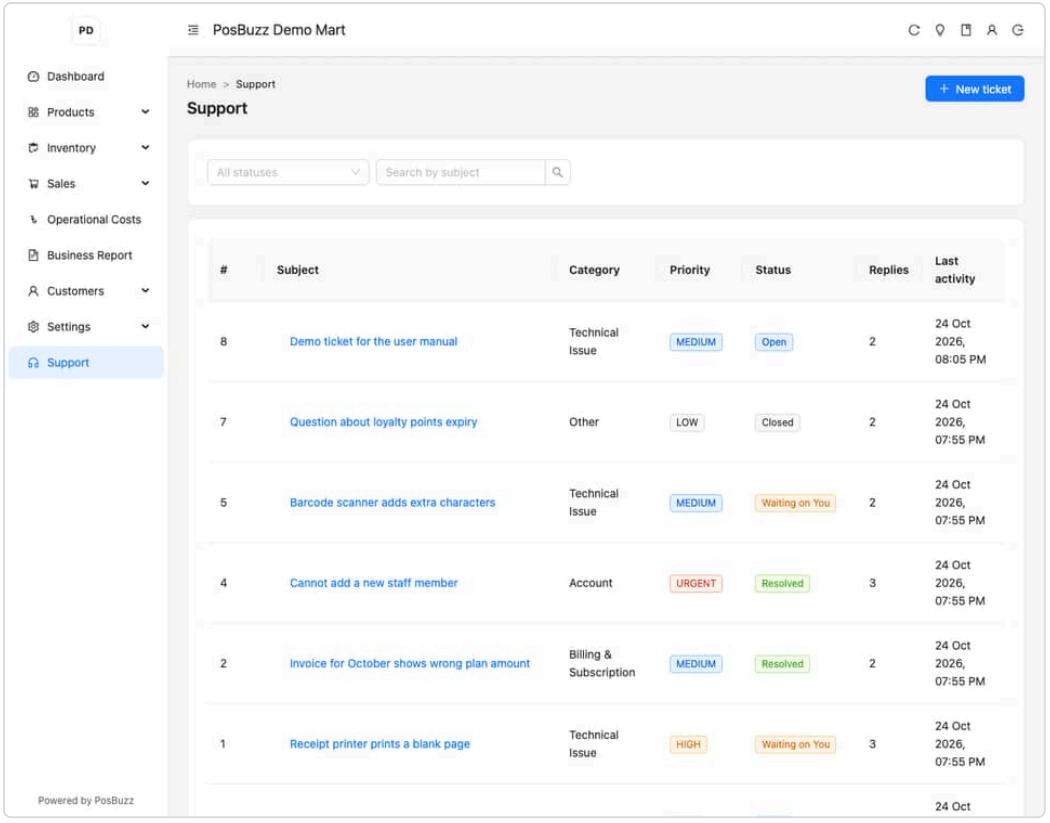

What it is

A page to send help requests (tickets) to PosBuzz support and follow the conversation.

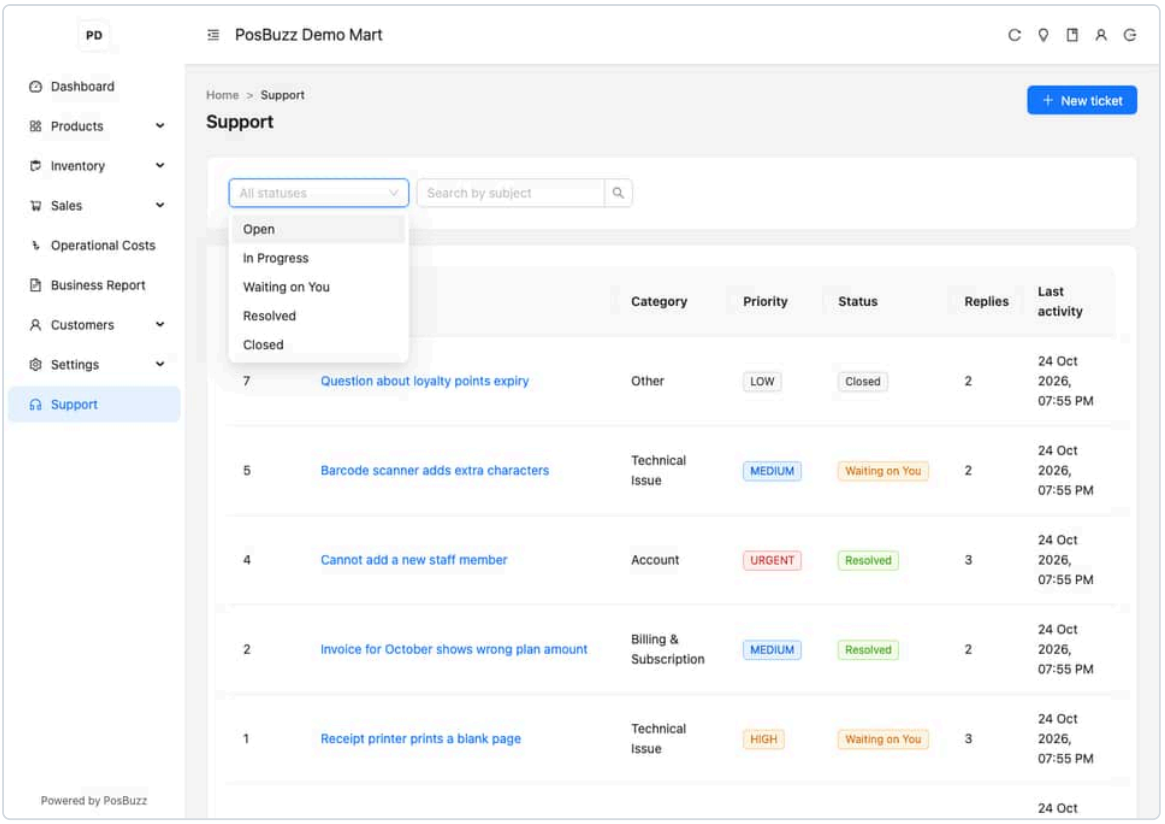

Where to find it

Menu > **Support** (the last item). You need the Support permission.

What you see

The Support page with the filters and a list of tickets.

The status dropdown with its choices.

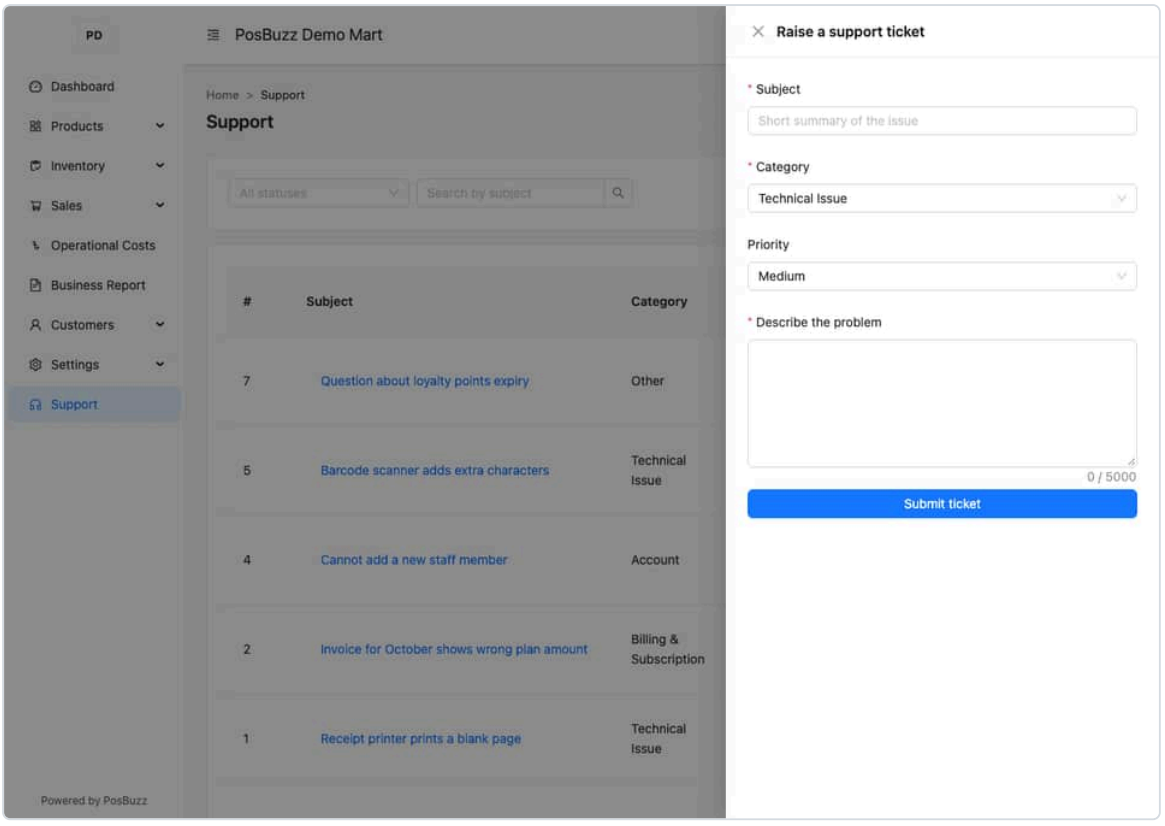

- The trail "Home > Support", the title and the **New ticket** button.
- A filter card with a status dropdown (placeholder "All statuses", with a clear button) and a search box (placeholder "Search by subject", with a clear button and a magnifier button).
- Status choices: **Open**, **In Progress**, **Waiting on You**, **Resolved**, **Closed**.
- Search runs when you press Enter or click the magnifier. It matches part of the subject and ignores capital letters.
- A table of your shop's tickets only. The newest activity is first, with 20 per page.

Column	What it shows
#	The ticket number.
Subject	A blue link. Click it to open the ticket.
Category	Billing & Subscription, Technical Issue, Feature Request, Account or Other.
Priority	A coloured tag: LOW, MEDIUM, HIGH or URGENT.
Status	A coloured tag: Open (blue), In Progress (gold), Waiting on You (orange), Resolved (green), Closed (grey).
Replies	The number of messages.
Last activity	The date and time, for example 24 Oct 2026, 03:15 PM.

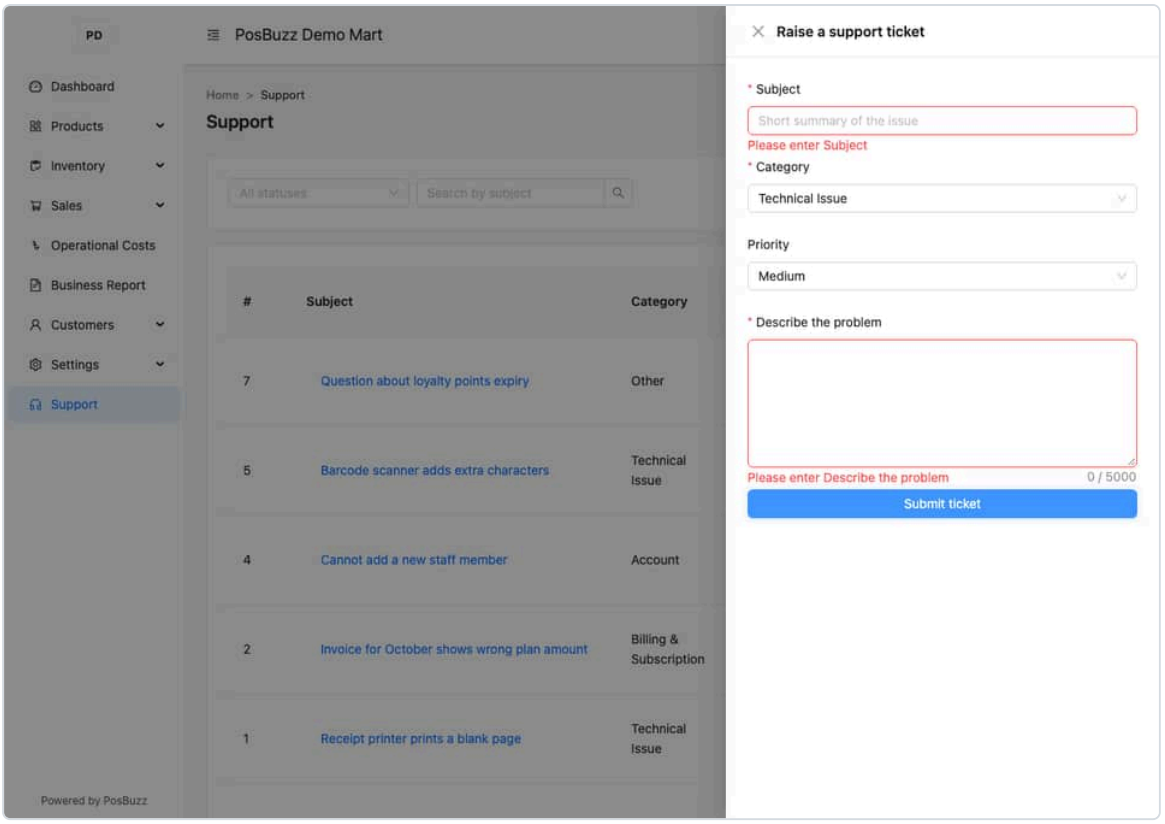

Form fields (drawer "Raise a support ticket")

Field	Required	Notes
Subject	Yes	Up to 150 characters. Placeholder "Short summary of the issue".
Category	Yes	Starts on Technical Issue. Choices: Billing & Subscription, Technical Issue, Feature Request, Account, Other.
Priority	No	Starts on Medium. Choices: Low, Medium, High, Urgent.
Describe the problem	Yes	A multi-line box (6 rows), up to 5000 characters, with a character counter.

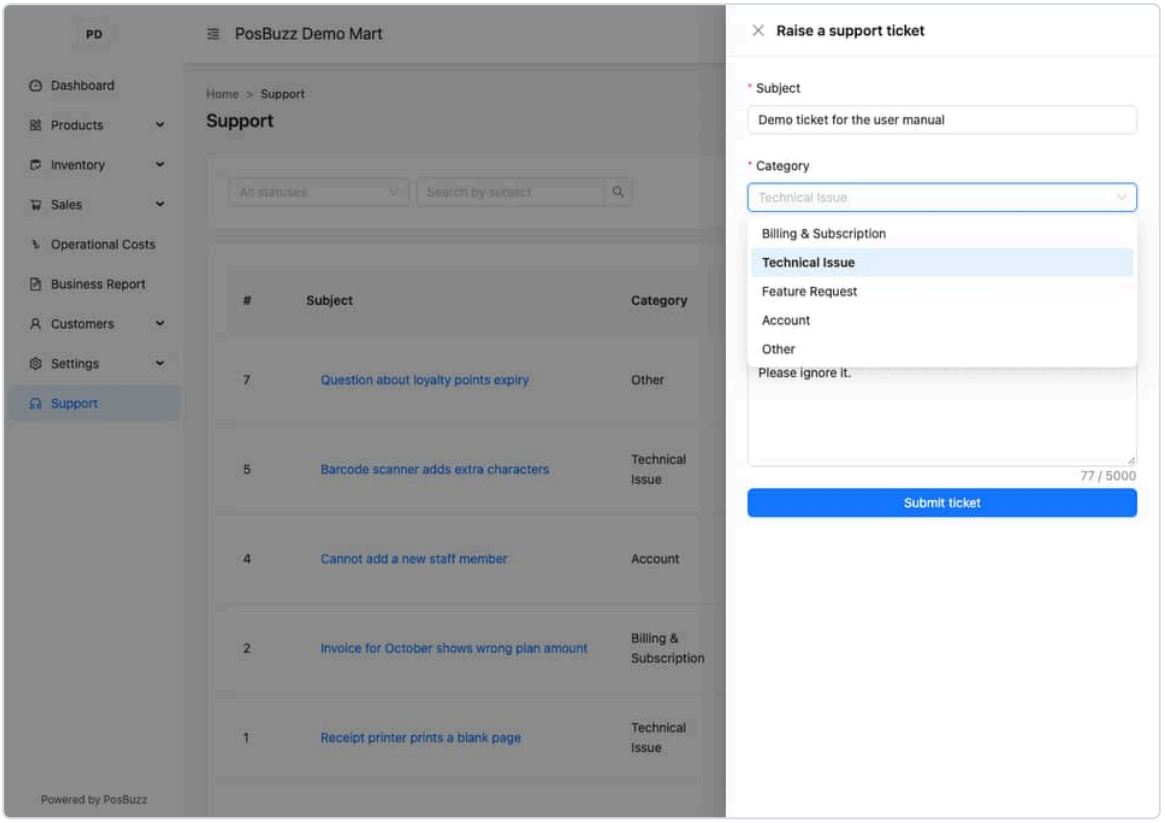

The button at the bottom is **Submit ticket**. It is full width.

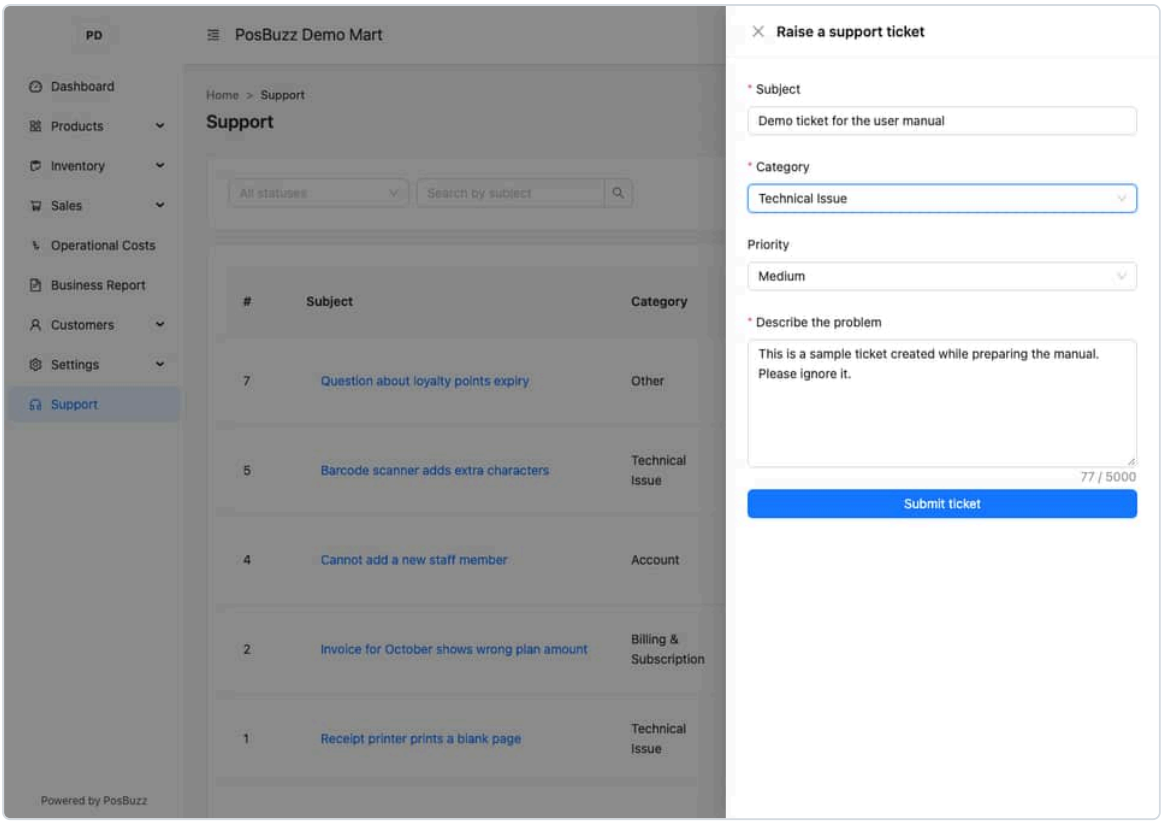

The Raise a support ticket drawer.

Pressing Submit ticket with the required boxes empty. The messages read "Please enter Subject" and "Please enter Describe the problem".

The Category dropdown.

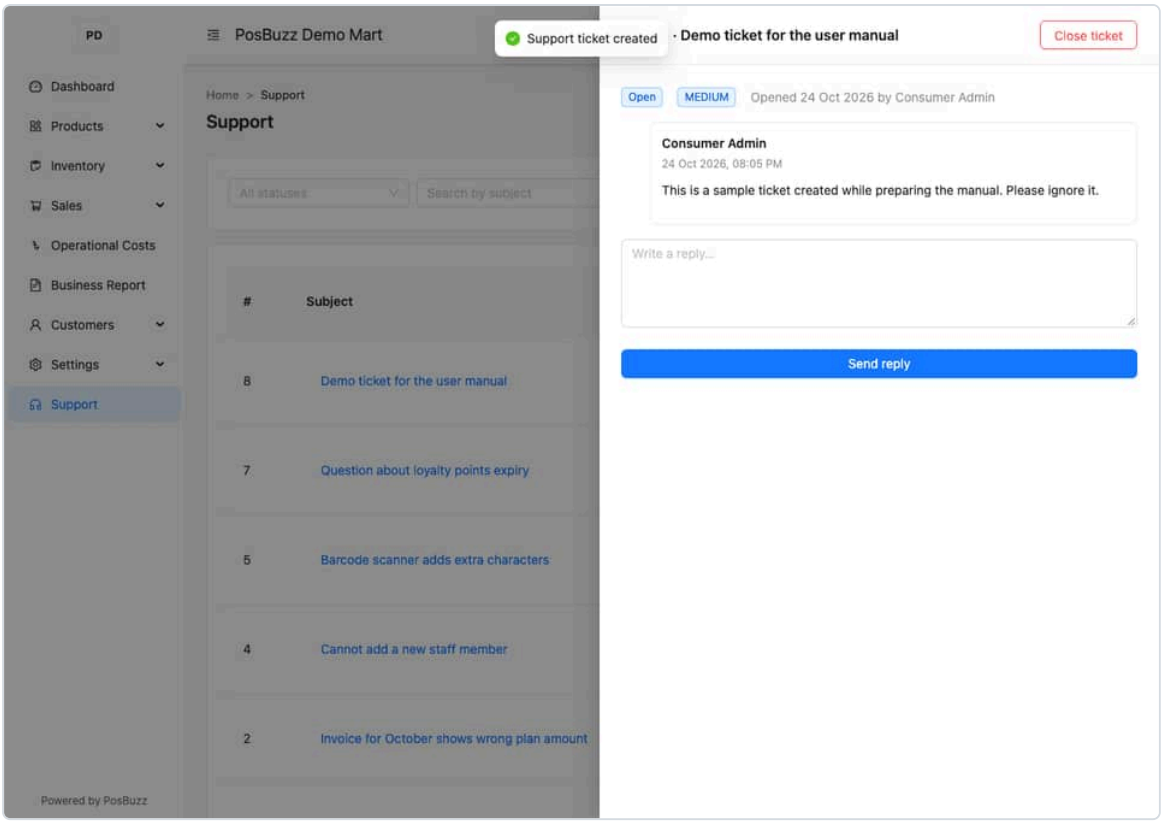

A filled form. The counter under the box shows how many of the 5000 characters are used.

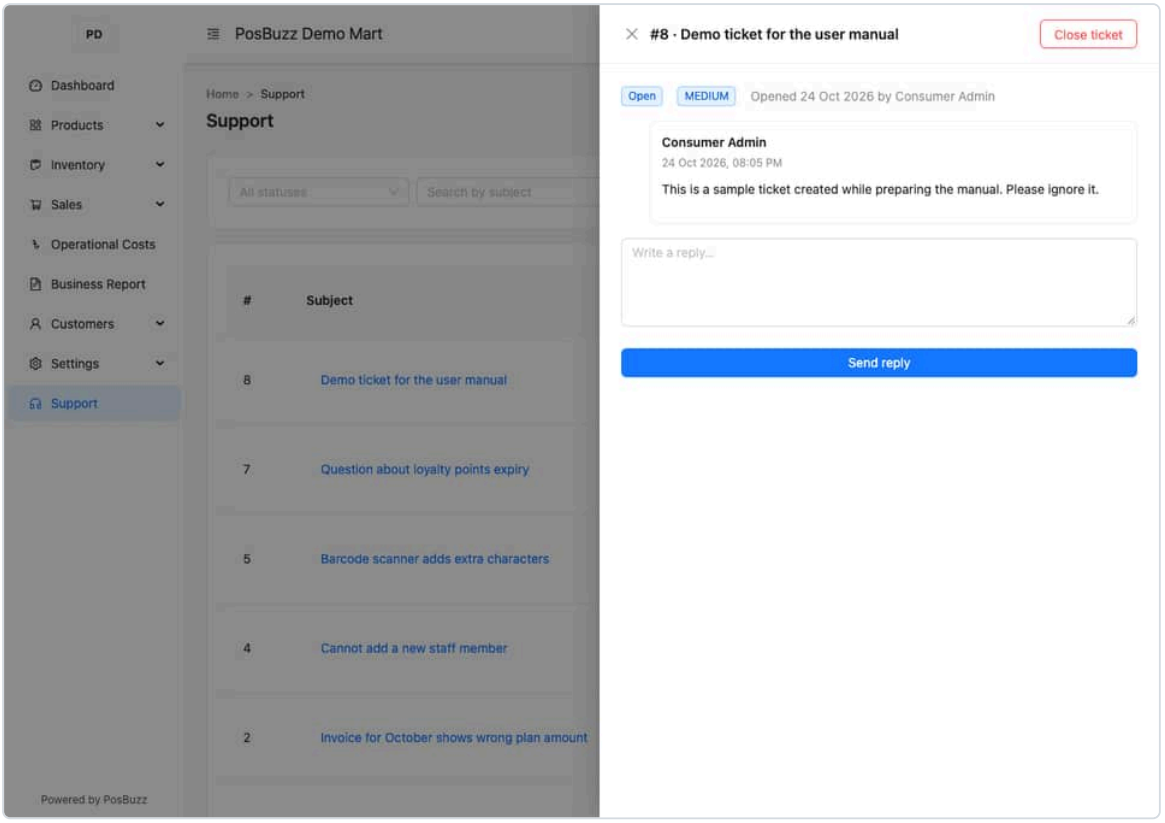

How to raise a ticket

1. Open **Support**.
2. Click **New ticket**.
3. Type the **Subject**.
4. Check the **Category** and choose another if needed.
5. Choose a **Priority** if you want to change it.
6. Describe the problem in **Describe the problem**.
7. Click **Submit ticket**.

What happens next: A message "Support ticket created" appears and the drawer closes. The new ticket's conversation opens by itself.

"Support ticket created" shows while the conversation opens.

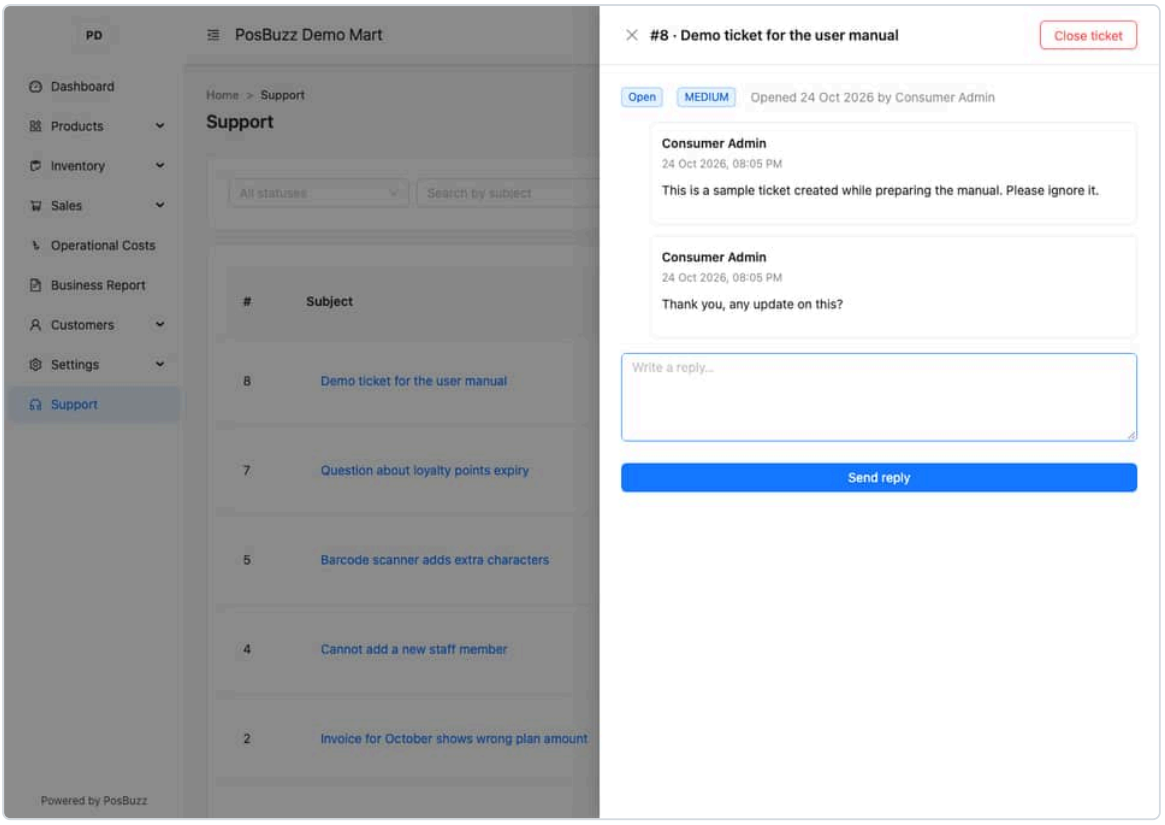

The ticket drawer: status and priority tags, your first message, the reply box and the Close ticket button.

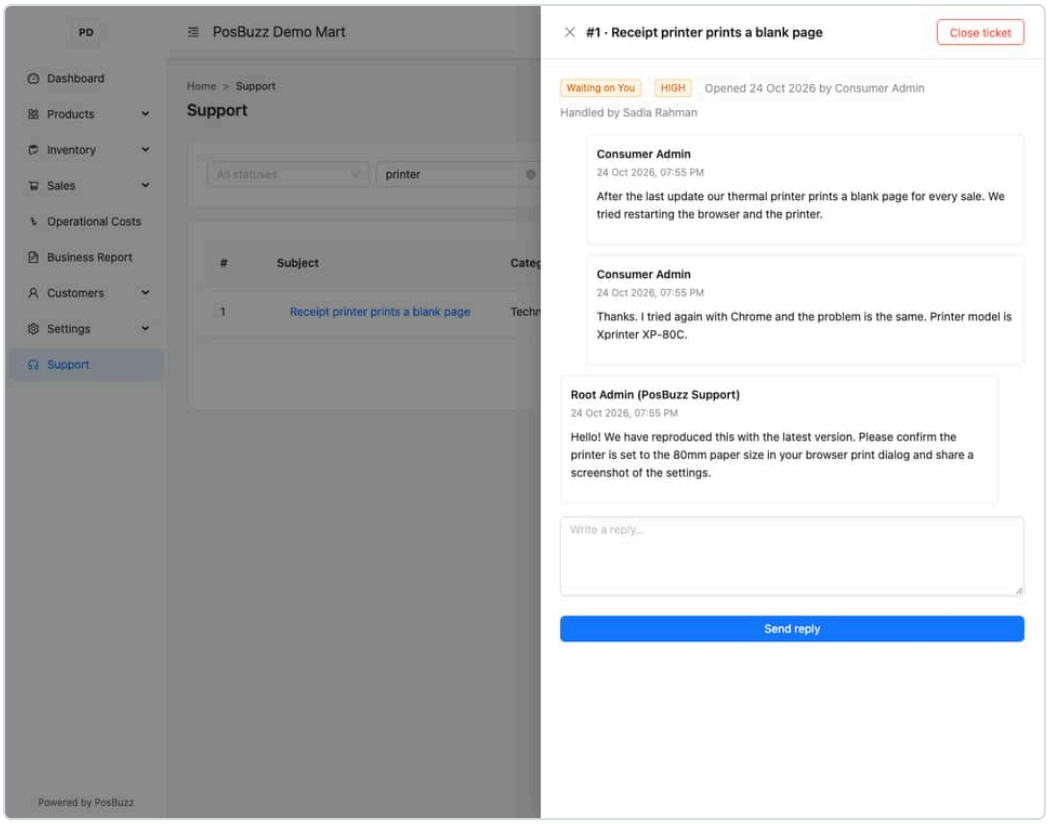

How to read a ticket and reply

1. Click the blue subject of a ticket. The ticket drawer opens, with the title "#(number) · (subject)".

2. Read the messages from top to bottom. Replies from support are on the left, headed "(name) (PosBuzz Support)". Your shop's messages are indented and headed with the staff name. Each shows a date, a time and the text. If there are none, it says "No messages".
3. Under the title you see the status tag, the priority tag, "Opened (date) by (name)", and "Handled by (name)" once support has given it to someone.
4. Type in the box that says "Write a reply…" (up to 5000 characters).
5. Click **Send reply**. The reply text is required.

Your reply is added to the conversation.

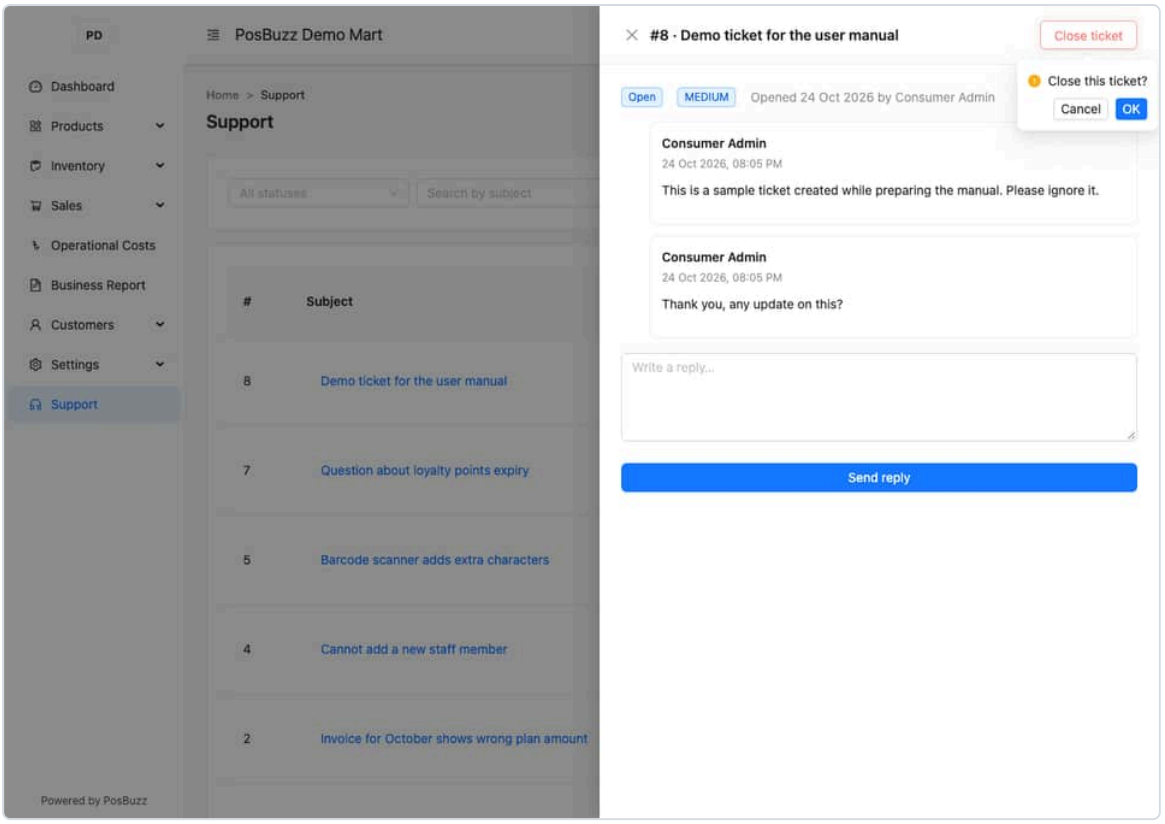

A ticket with a reply from PosBuzz support, headed "(name) (PosBuzz Support)". "Handled by" shows under the tags.

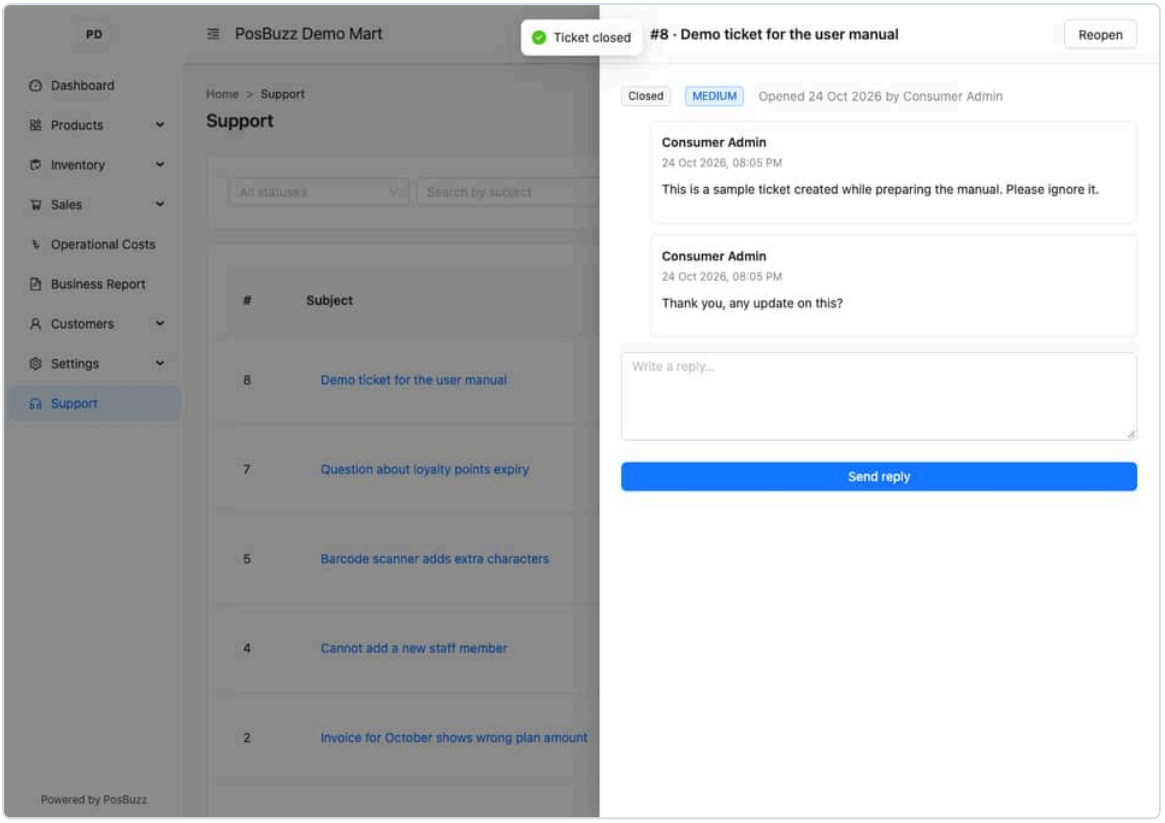

What happens next: The box clears and your message shows in the conversation. Your reply puts the ticket back to Open (or keeps it In Progress) and removes the closed state. Any user of the shop can reply to a ticket, even one they did not create.

How to close a ticket

1. Open the ticket.
2. Click the red **Close ticket** button at the top right.
3. When asked "Close this ticket?", click **OK** (or **Cancel** to stop).

The question "Close this ticket?" with Cancel and OK.

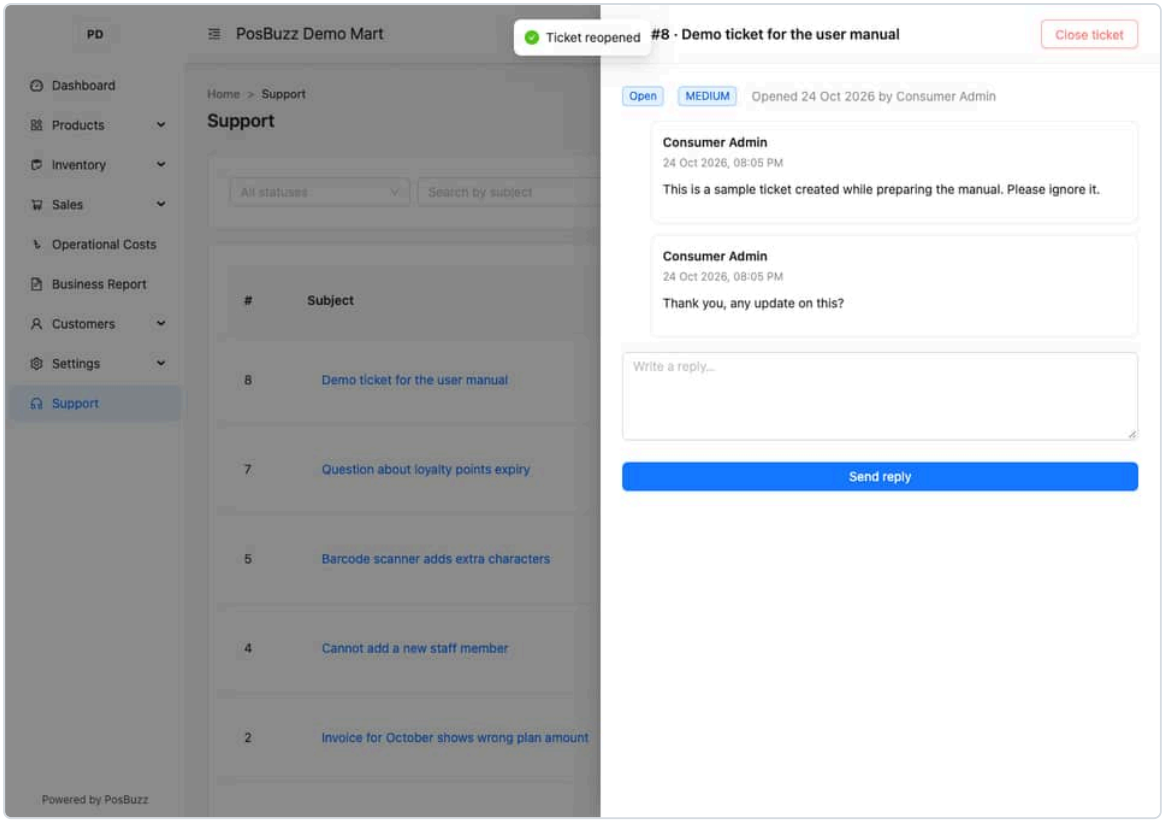

The status shows Closed and the button becomes Reopen.

What happens next: A message "Ticket closed" appears. Any user with the Support permission can close a ticket.

How to reopen a ticket

1. Open a ticket whose status is Resolved or Closed.
2. Click **Reopen** at the top right.

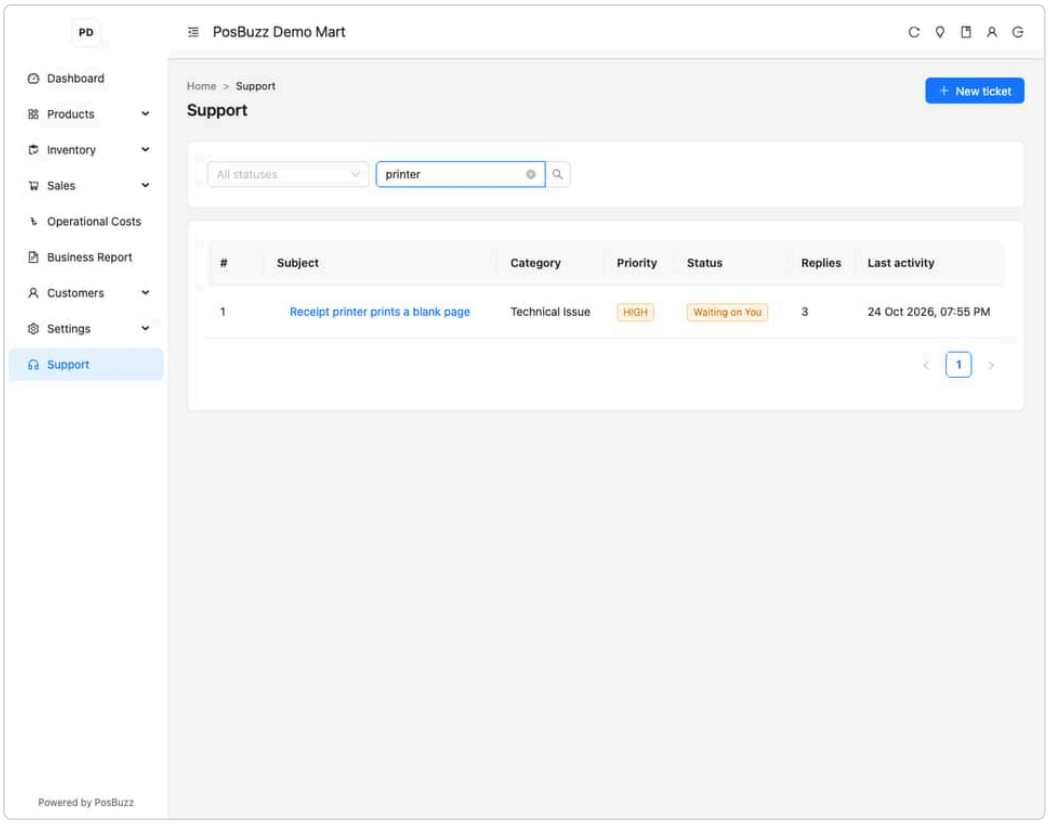

"Ticket reopened" shows and the status is Open again.

What happens next: A message "Ticket reopened" appears and the status becomes Open.

How to find a ticket

1. To filter, click the status dropdown and choose a status. Click the clear button to see all again.
2. To search, type part of the subject and press Enter or click the magnifier.

Searching for "printer".

What happens next: The table shows only the matching tickets.

Message	What it means	What to do
Support ticket created	The ticket was sent.	Nothing.
Could not create the ticket	The ticket could not be sent. The app may show the server's own message instead.	Try again.
Could not send the reply	The reply could not be sent. The app may show the server's own message instead.	Try again.
Ticket closed	The ticket is closed.	Nothing.
Ticket reopened	The ticket is open again.	Nothing.
Please enter Subject	The Subject box is empty.	Type a subject.
Please enter Describe the problem	The description box is empty.	Describe the problem.

> **Good to know:** Tickets cannot be deleted. Only PosBuzz support can set a ticket to In Progress, Waiting on You or Resolved. This screen does not send email notifications, so open the page again to see new replies.

Part 2 - Products and catalogue

This part explains everything in the **Products** group of the side menu. You use these screens to list what you sell, set prices, group items, print barcode stickers, check how stock moved, and see which items sell best.

Products, variants and batches in plain words

Three words come up all the time in this part.

- **Product.** The thing you sell, for example "T-shirt" or "Basmati Rice 5kg". A product has a name, an optional code, a category, a brand, tags and a tax rate.
- **Variant.** One version of a product. A T-shirt may have the variants Small, Medium and Large. Each variant has its own price, SKU (your stock code), barcode, units, image and stock. A product with only one version is called a **simple product**. Behind the scenes it still has one variant, which uses the product name.
- **Batch.** One delivery of stock for one variant in one branch. A batch has a quantity, a cost price, and optionally an expiry date, a vendor and a shelf location. You may have many batches of the same variant, bought at different prices or with different expiry dates.

Example: "T-shirt" is the product. "Large" is a variant. 20 pieces of "Large" bought from a vendor on one day for BDT 300 each is a batch.

Who can see what. Every screen needs a permission. If your user does not have it, the menu item is hidden. If you open the address by hand, the app sends you back to the Dashboard without a message. Ask your shop owner to change your permissions if you cannot see a screen you need. The Products menu group has these items:

Menu item	Permission needed
Add Product	Add products
View Products	View products
Sales Stats	Business insights
Product Audit	Product audit
Categories	Edit products or add products (either one)
Brands	Edit products or add products (either one)
Tags	Edit products or add products (either one)
Units	Edit products or add products (either one)
Barcode Printing	Add products

Hover over **View Products** to see the tip "All Products". Hover over **Sales Stats** to see the tip "Variant Sales Stats".

Messages. Short messages appear at the top of the screen. When the server gives a clear reason, the app shows it. Otherwise you see one of these general messages:

Message	What it means	What to do
Your session has expired. Please log in again.	You were logged out.	Log in again.
You don't have permission to do this.	Your user is not allowed this action.	Ask the owner for the permission.
That item could not be found. It may have been deleted.	Someone removed it.	Go back and refresh the list.
Too many attempts. Please wait a minute and try again.	You tried too often.	Wait one minute, then try again.
Can't reach the server. Check your connection and try again.	No internet.	Check your connection.
The request timed out. Please try again.	The server was too slow.	Try again.

Money is shown as "BDT 1,234.00". Dates on these screens look like "Oct 24, 2026".

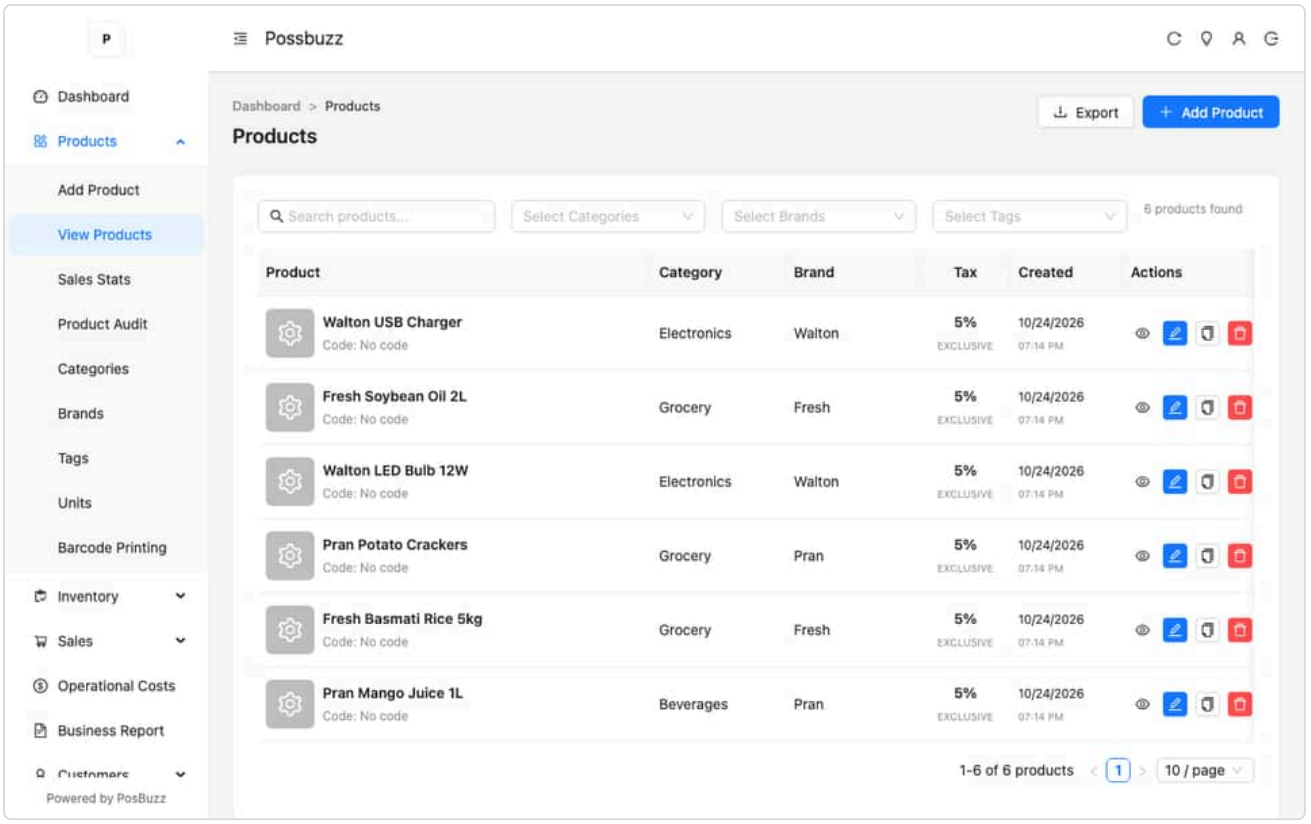

Products

What it is

The list of every product in your shop. You search, filter, view, edit, copy and delete products from here.

Where to find it

Menu: **Products > View Products**. You need the permission to view products. The buttons at the top right (**Export**, **Add Product**, and the product limit tag) show only if you also have the permission to add products.

The Products list with search, filters and row buttons.

What you see

Top right (only with the add products permission):

- **Product limit tag.** Shown only if your plan has a product limit. It reads like "48 / 50 products". It is blue normally and turns red when you reach the limit.
- **Export** button. It opens a list with one choice, **Export as PDF**.
- **Add Product** button. If your plan limit is reached, the button is greyed out. Hover over it to read: "Your {plan name} plan allows {max} products. Upgrade your plan to add more." If the plan has no name, it says "Your current plan allows ..." instead.

Filter row:

- A search box with the text **Search products...**. It has a small x to clear it. The list updates half a second after you stop typing.
- **Select Categories**. Pick one or more categories.
- **Select Brands**. Pick one or more brands.
- **Select Tags**. Pick one or more tags.
- A counter such as "6 products found".
- **Clear all filters**. This link shows only when a search or filter is active.

Active filters row. When a search or filter is on, a line starting "Active filters:" shows small chips: `Search: "text"`, `Category: name`, `Brand: name`, and a blue chip with a tag icon for each tag. Click the x on a chip to remove only that filter. Any filter change takes you back to page 1.

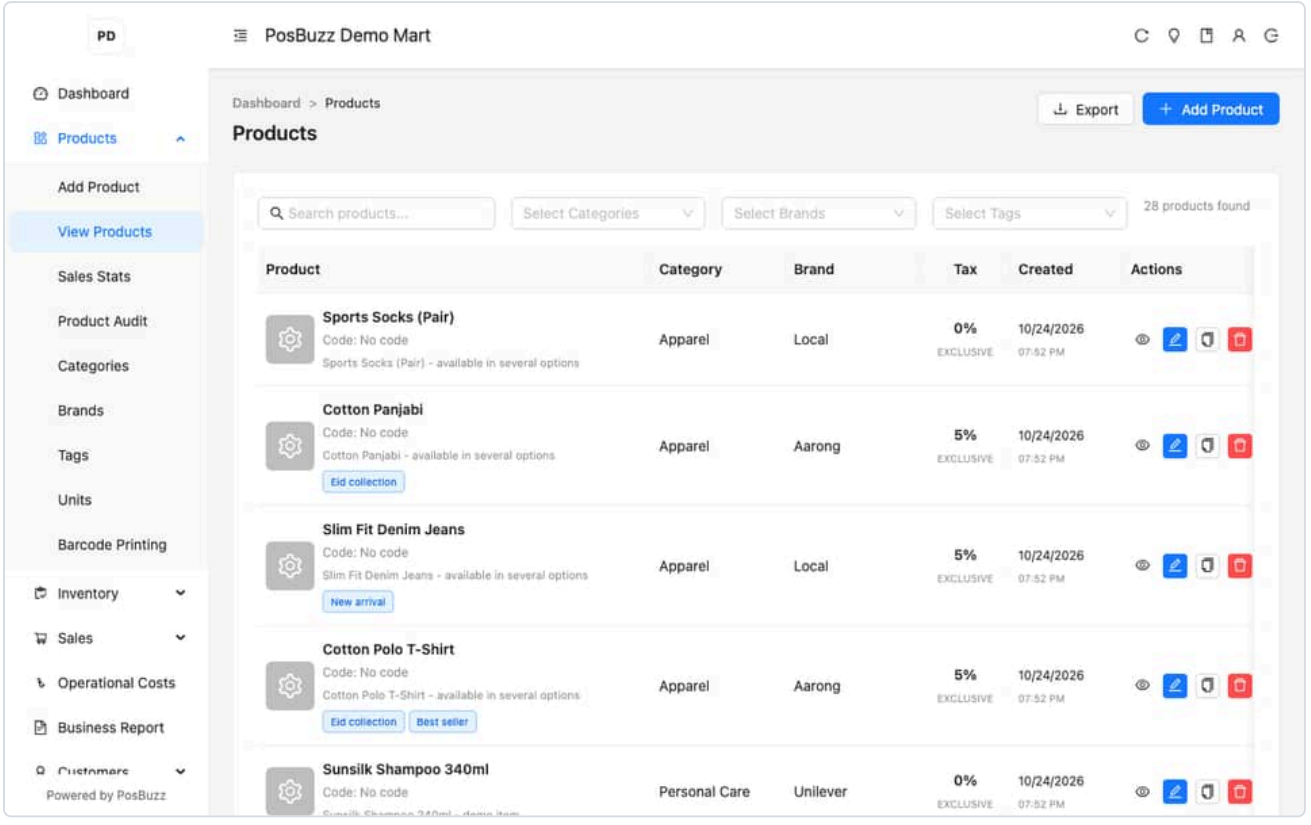

Table columns:

Column	What it shows
Product	A small picture (or a gear icon if there is no image), the name in bold, "Code: ..." (or "Code: No code"), the first 60 characters of the description, and up to 3 blue tag chips. If there are more tags, a "+N" chip shows the rest.
Category	The category name, or a grey "No category".
Brand	The brand name, or a grey "No brand".
Tax	The rate, such as "5%", with the tax method under it (Exclusive or Inclusive).
Created	The date and time the product was added.
Actions	Four small icon buttons, described below.

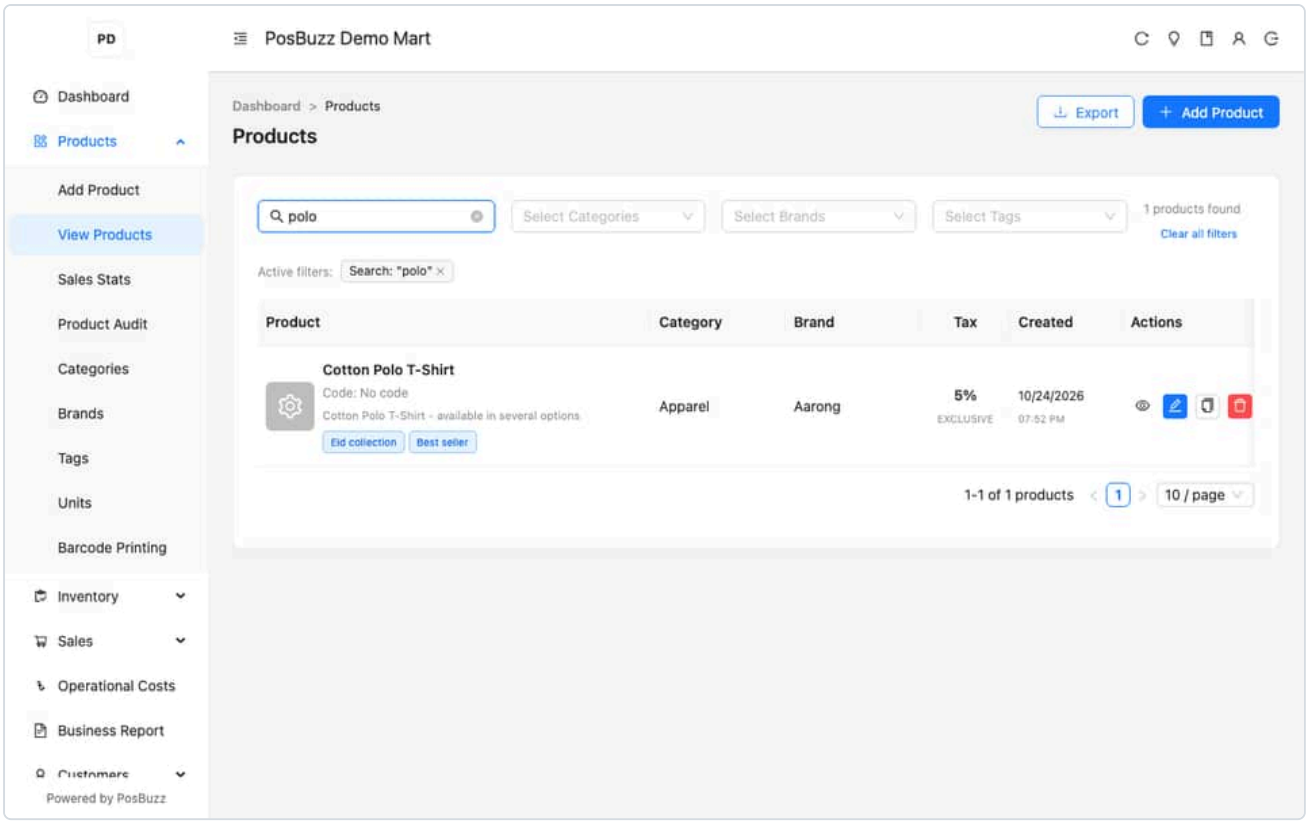

Row buttons. Hover over an icon to see its name.

Icon	Name	Who can use it
Eye	View Details	Everyone who can view products
Blue pencil	Edit Product	Edit products permission
Copy	Copy Product	Add products permission
Red bin	Delete Product	Delete products permission

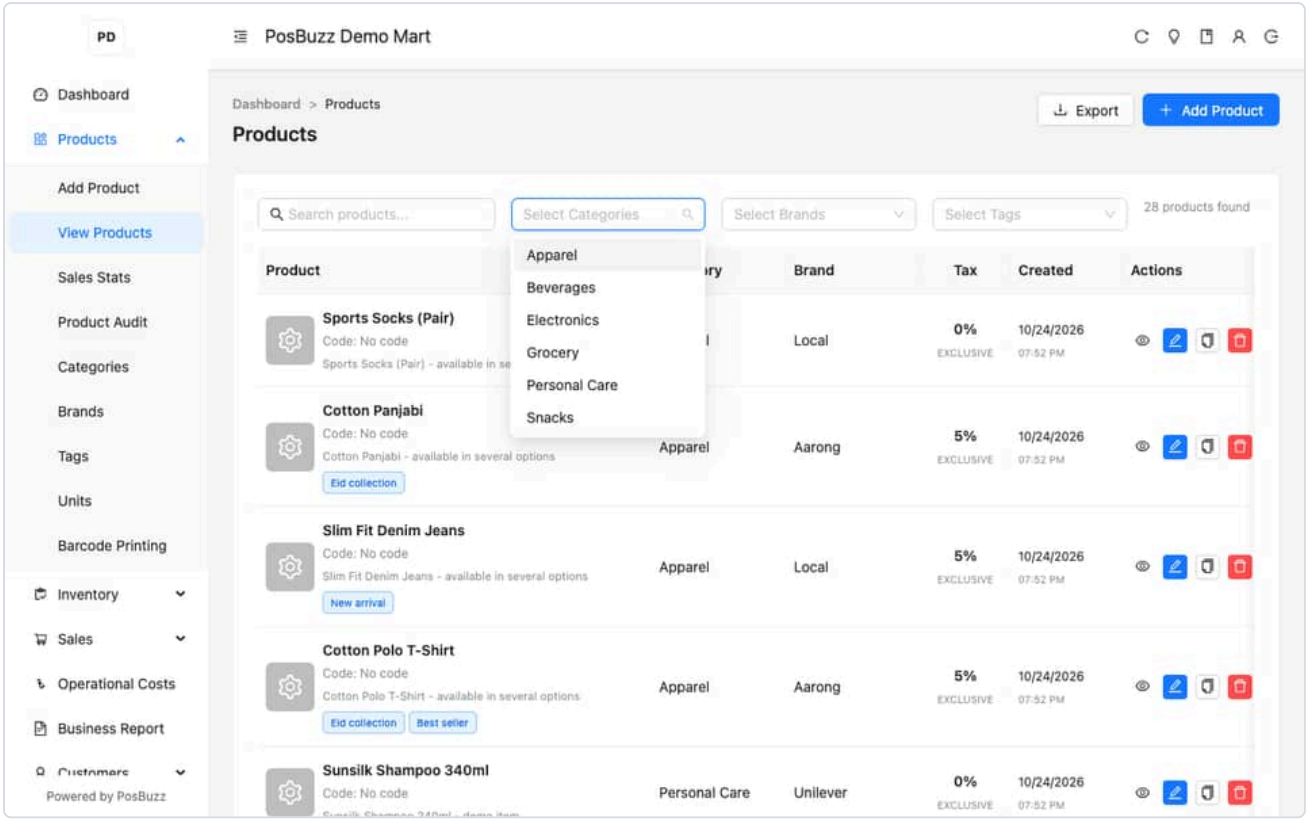

Bottom. The page shows "1-6 of 6 products", page buttons, a page size choice (10, 20, 50 or 100 per page; the default is 10) and a box to jump to a page.

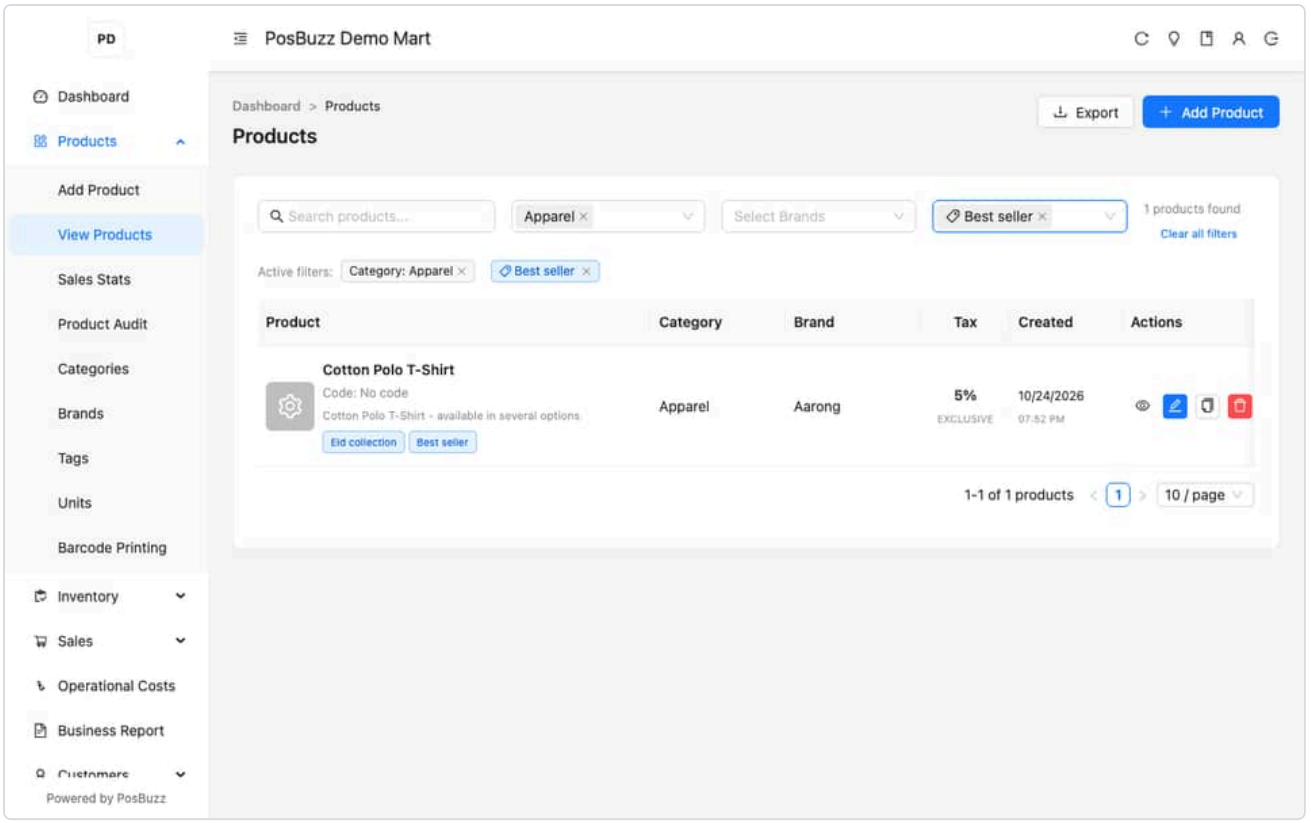

The Products list for PosBuzz Demo Mart, with tags under product names.

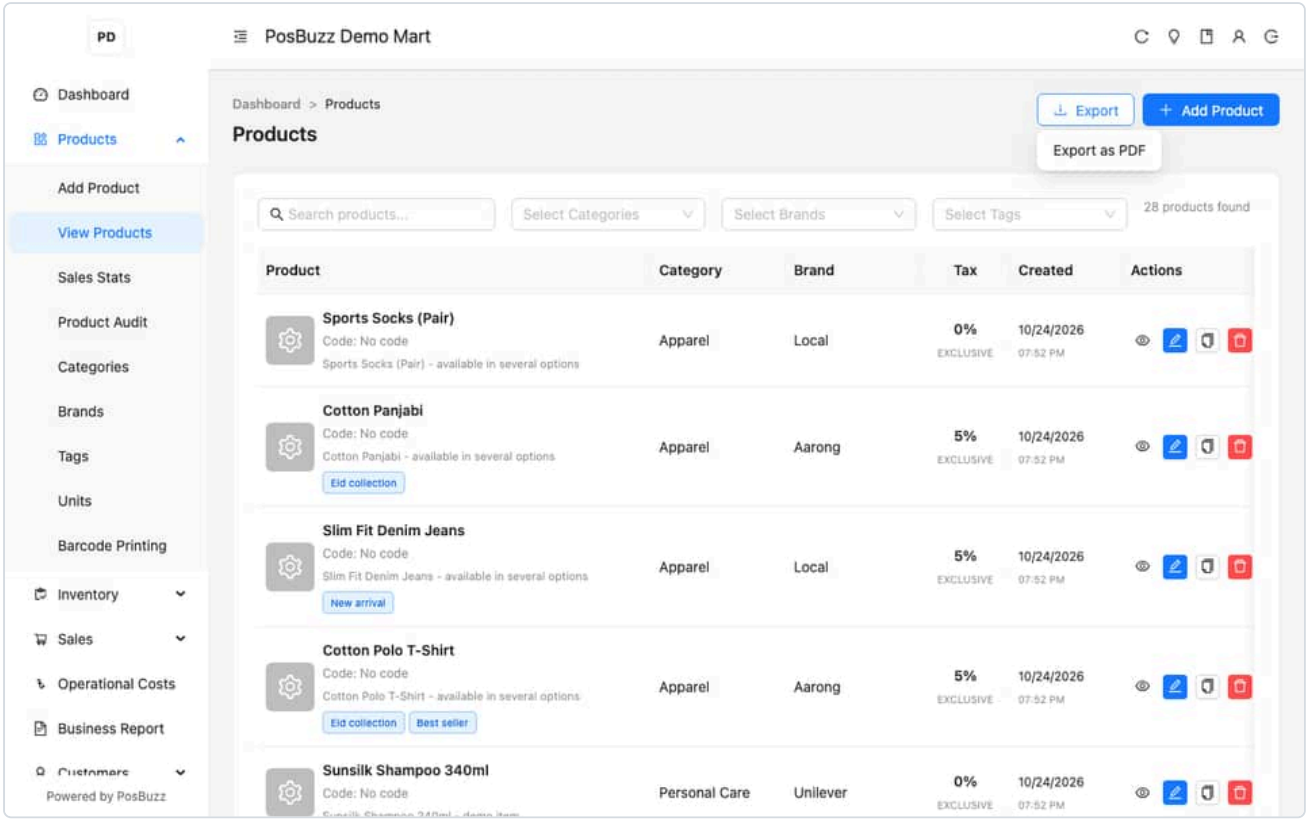

Searching for a word shows only matching products.

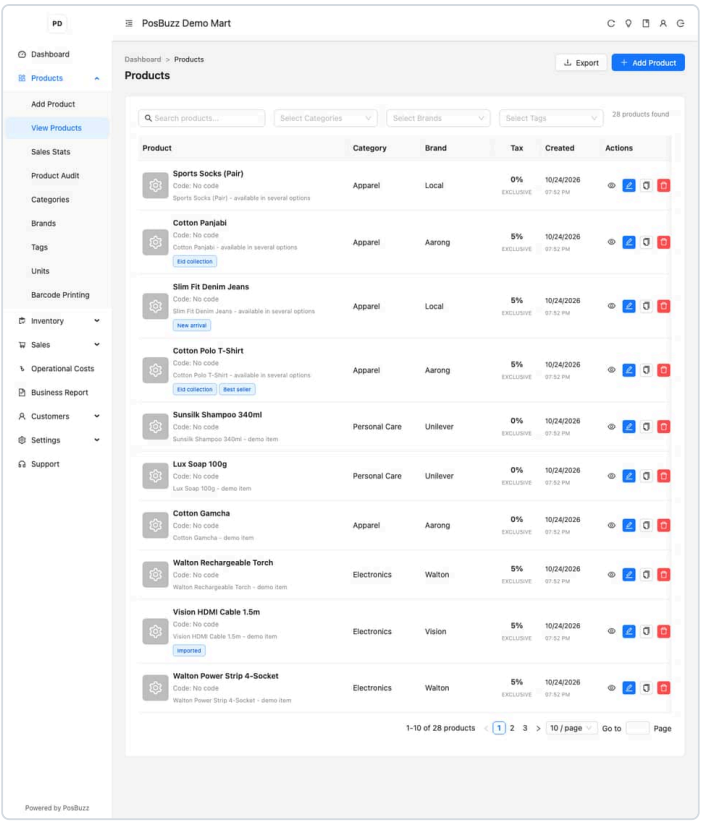

The Select Categories list, where you tick one or more categories.

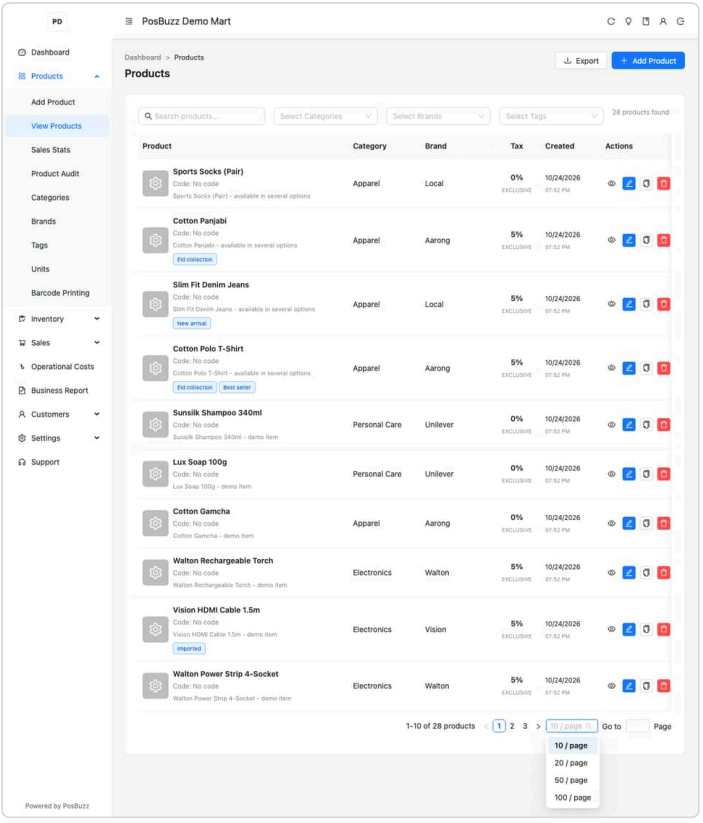

A category and a tag chosen, shown as chips under Active filters.

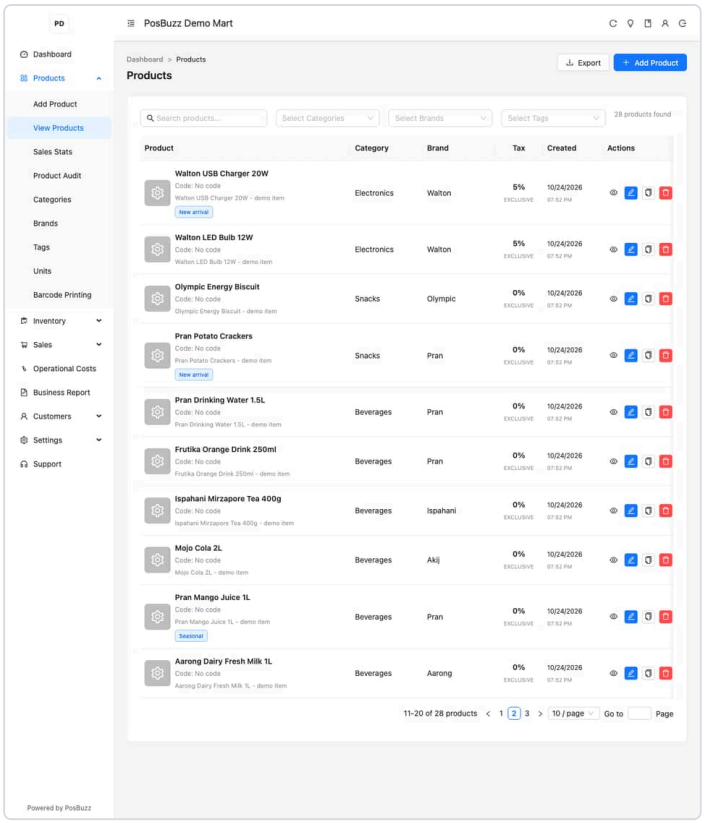

The Export button opens one choice, Export as PDF.

Page numbers, page size and the Go to box.

The page size list: 10, 20, 50 or 100 per page.

Page 2 of the list.

How to find a product

1. Type part of the name in **Search products...**, or
2. Open **Select Categories**, **Select Brands** or **Select Tags** and tick what you want.
3. To remove one filter, click the x on its chip. To remove all of them, click **Clear all filters**.

What happens next: The list shows only matching products and the counter updates.

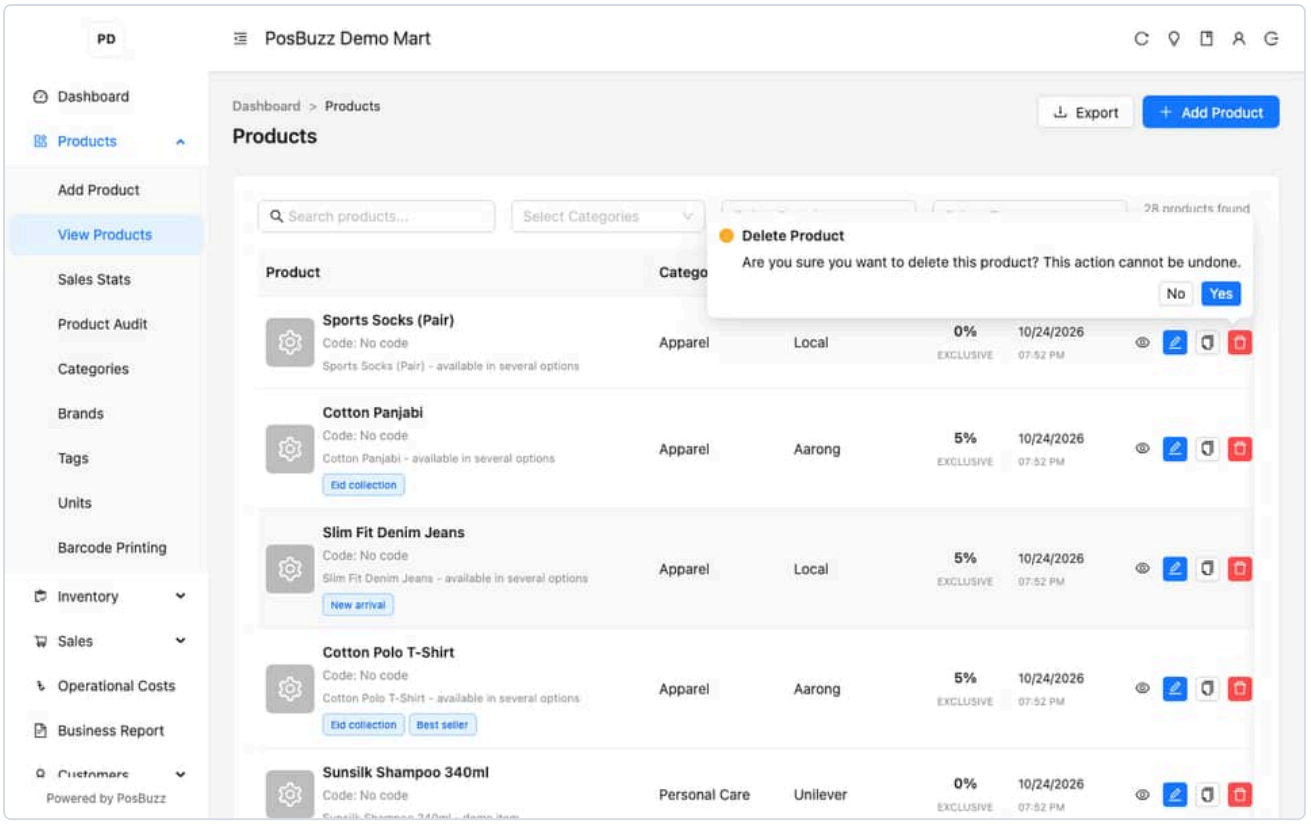

How to see all details of a product

1. Find the product in the list.
2. Click the eye icon (**View Details**).

What happens next: The Product Details screen opens (see the next section).

How to delete a product

1. Click the red bin icon (**Delete Product**).
2. In the small box that opens over the row, titled **Delete Product**, read "Are you sure you want to delete this product? This action cannot be undone."
3. Click **Yes**. Click **No** to keep the product.

The Delete Product question with No and Yes buttons.

What happens next: You see "Product deleted successfully". The product, all its variants and their stock records are removed, and the lists refresh.

> **Good to know:** A product that has already been sold (or returned or exchanged) cannot be deleted. You will see a message like "This product variant is still used by other records, so it can't be changed or deleted. Remove or reassign those first." The wording of the item name may differ.

How to export the list as a PDF

1. Click **Export**.
2. Click **Export as PDF**.

What happens next: A file named `products.pdf` downloads to your computer. If it fails you see "Failed to export the list".

How to copy a product

1. Click the copy icon (**Copy Product**) on the row.

What happens next: The Copy Product screen opens (see "Add Product, Edit Product and Copy Product" below).

How to edit a product

1. Click the blue pencil icon (**Edit Product**).

What happens next: The Edit Product screen opens.

Messages on this screen

Message	What it means	What to do
Product deleted successfully	The product was removed.	Nothing.
Failed to delete product	The product could not be removed and the server gave no reason.	Try again, or ask for help.
Failed to export the list	The PDF could not be made.	Try again.
Product limit reached: your {plan} plan allows {max} product(s) and you already have {used}. Upgrade your plan to add more products.	You cannot add more products on this plan.	Upgrade your plan or delete products you no longer sell.
This product variant is still used by other records, so it can't be changed or deleted. Remove or reassign those first.	The product has sales history.	Keep the product. You cannot delete it.

Product Details

What it is

One page that shows everything about a single product: pictures, prices, tags, basic facts, its variants and where its stock is held.

Where to find it

Open it from **Products > View Products** by clicking the eye icon on a row. You need the permission to view products. The header buttons need the matching edit, add and delete permissions.

What you see

The browser tab reads "Product Details - {product name}". The path at the top is Dashboard > Products > Details.

Header buttons (top right):

- **Edit Product** (blue). Needs the edit products permission.
- **Copy Product**. Needs the add products permission.
- **Delete** (red). Needs the delete products permission.

Left column, from top to bottom:

1. **Image card.** The default variant's picture. Click it to enlarge. If there is none, you see a picture icon and "No Image Available".

2. **Pricing Information** card. It uses the default variant (or the first one) and shows:
    - **Regular Price**.
    - **Wholesale Price** (only if set).
    - **Tax Configuration**, such as "5% (EXCLUSIVE)", with "Final price: BDT x" under it. For exclusive tax the final price is the regular price plus the tax. For inclusive tax it is the regular price itself.
    - **Warranty**, such as "12 months" (only if set).
    - **Alert Quantity**, such as "10 units" (only if above 0).
    - If the product has more than one variant: the bold line "Price Range Across Variants:" and "Regular Price Range: BDT min - BDT max".
    - A small table titled **Units** with **Sale Unit** and **Purchase Unit**. Each shows the unit name and, in grey, its code, or "N/A".
    - If the product has no variant: "No pricing information available".
3. **Tags** card. Blue tag chips, or "No tags assigned".

Right column:

- **Basic information card.** The product name, then small status badges:
    - "Has Variants (n)" in purple, or "Simple Product" in blue.
    - "n in stock" in green, or "Out of stock" in red. This adds up all variants and all branches.
    - "available/total serials available" (only if the product has serial numbers).
    - "n variant(s) low stock" in red. A variant counts as low when, in any one branch, its stock is at or below its Alert Quantity.
    - "Expiring Stock" in orange. Shown when any batch expires within 30 days or has already expired.
- **Details table:** Product Code (or "N/A"), Category (or "Uncategorized"), Brand (or "No Brand"), Product Type ("Variable Product" or "Simple Product"), Total Variants, Tax Configuration, Price Range (variant products only), Daily Sales Target (such as "20 units/day"; only if above 0; for variant products it is the sum of all variants), Total Stock, Total Serials, Created, Last Updated.
- **Description.** Shown only if the product has a description.

Tabs at the bottom.

Variants (n) tab (opens first). A table with one row per variant:

Column	What it shows
Image	A small picture or a "No Image" box.
Variant Details	Name, "SKU: ...", "Barcode: ...", and a blue chip "Warranty: n months" if set.
Pricing	"Regular: BDT x", "Wholesale: BDT y", and a green chip "Updated" when the price has changed before. Hover over it for "Price updated recently".
Units	"Sale: ..." and "Purchase: ..." ("N/A" if none).
Stock & Inventory	The stock as "n units" (red if any branch is at or below the alert level, green if in stock, grey if zero). A red alert icon with the tip "Low stock alert in one or more branches". "Alert: n". If the stock is in 2 or more branches, a chip such as "2 branches"; hover over it to see each branch and quantity.
Serials	A barcode icon with a count and "available/total available" (hover for Available, Sold, Defective and Returned counts), or "No serials".

Column	What it shows
Attributes	A purple chip "n attribute(s)" (hover to see each name and value), or "No attributes".
Actions	The button **View Stock**. It opens the stock page for that variant.

Rows that have stock, attributes or price history show a + at the start. Click it to open extra panels: "Stock by Branch (n)", "Attributes (n)", "Recent Price Changes" (the latest 3 changes, each with a date and regular price) and "Expiring Stock (n)" (branch, quantity, expiry date and batch number). If there are no variants you see "No variants available".

Inventory (n) tab. Here n is the number of stock batch records. At the top are summary chips: "Total Stock: n units", "Branches: n", "Low Stock: n branches" (only if any) and "Expiring: n items" (only if any). Below is a table:

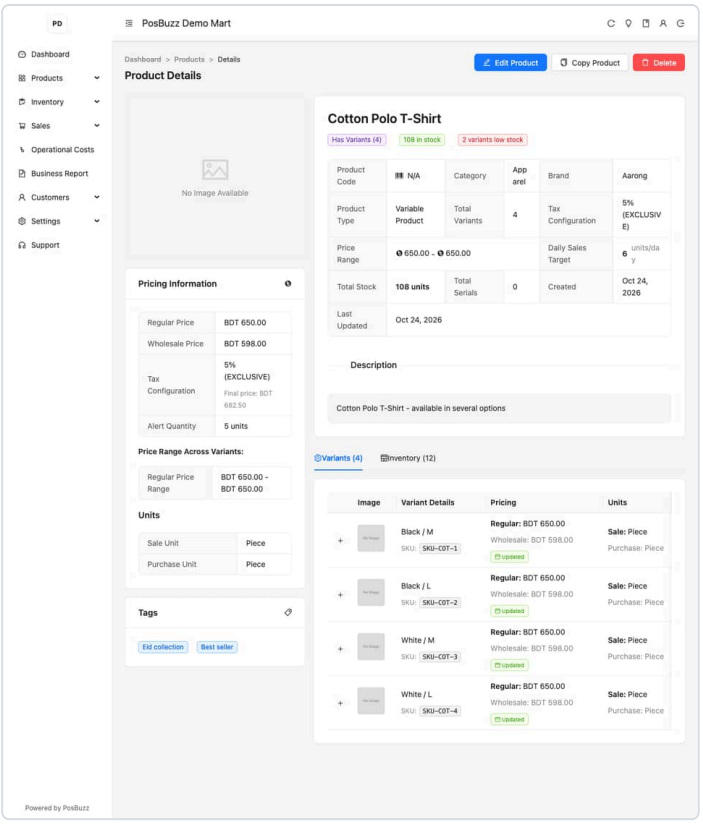

Column	What it shows
Variant	The variant name.
Branch	The branch name (or "Main Branch"), with a green "Main" tag for the main branch.
Quantity	"n units".
Batch Number	The batch code, or "-".
Expiry Date	The date. Red with an "Expired" tag if past. Orange with an "Expiring Soon" tag if within 30 days. "No expiry" if none.
Vendor	The vendor name (hover for contact and phone), or "No vendor".
Added Date	The date the batch was added.

The table shows 10 rows per page. If there are none: "No inventory records available".

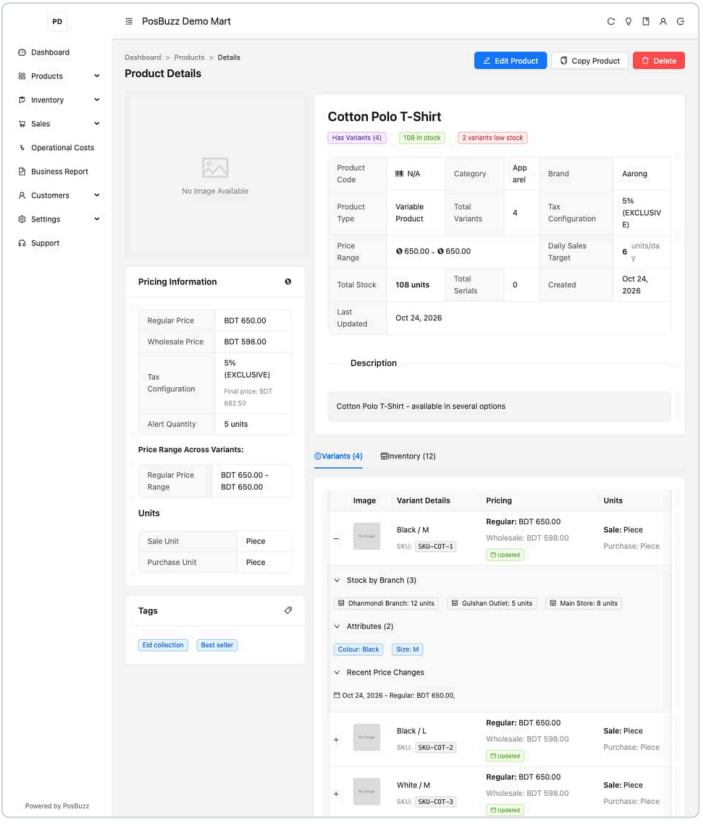

Error state. If the product cannot be loaded (for example it was deleted), you see a card titled "Error" with "Failed to load product details. Please try again later." and the button **Return to Products**.

> **Good to know:** The "Low Stock" chip on the Inventory tab checks each batch row against the alert quantity, not the branch total. It can show a slightly different number from the "variant(s) low stock" badge, which checks the branch total.

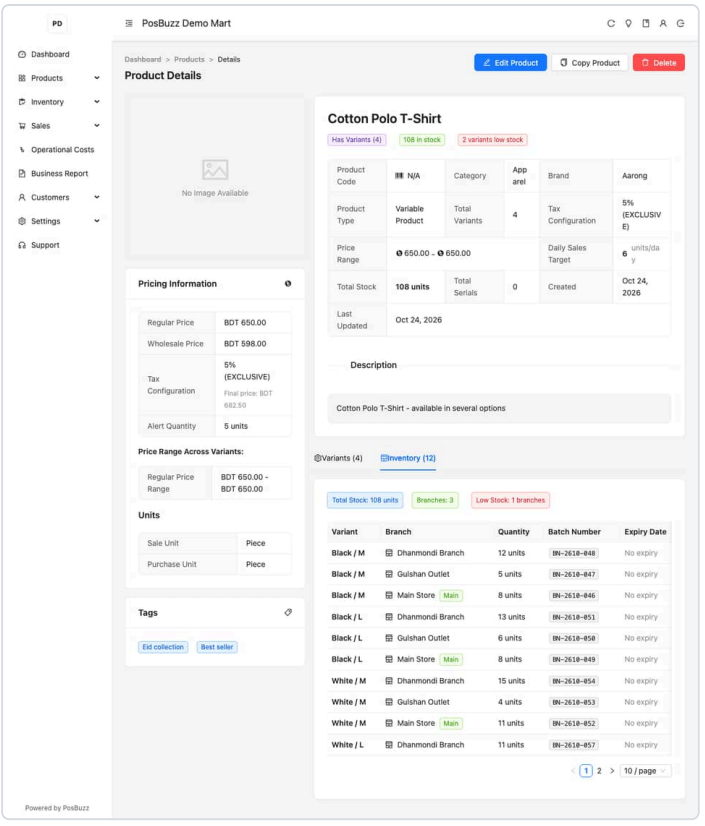

> **Good to know:** The Pricing Information card shows only the default variant's prices. See the Variants tab for the other variants.

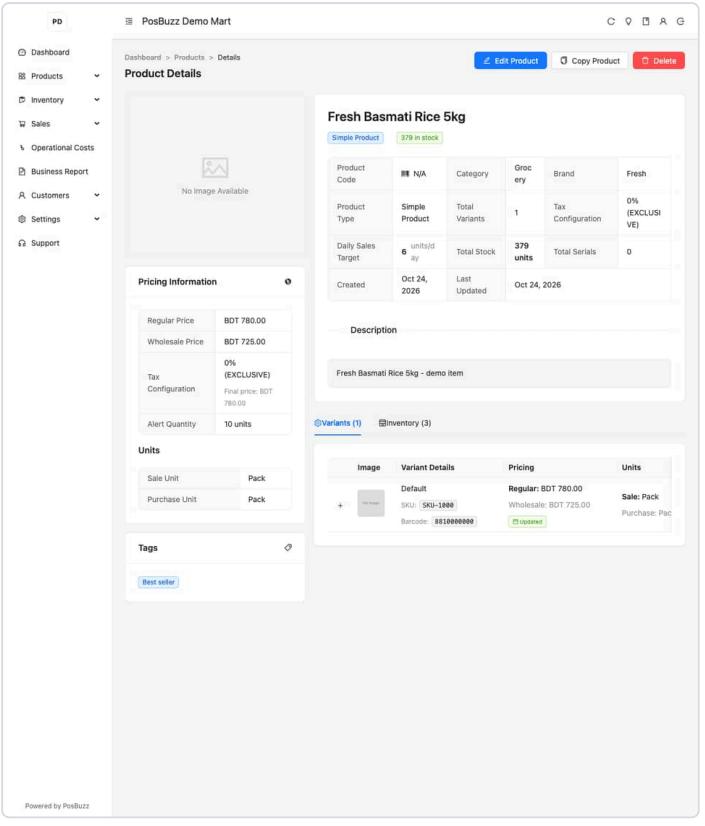

Cotton Polo T-Shirt: image, pricing, tags, basic information and the Variants tab.

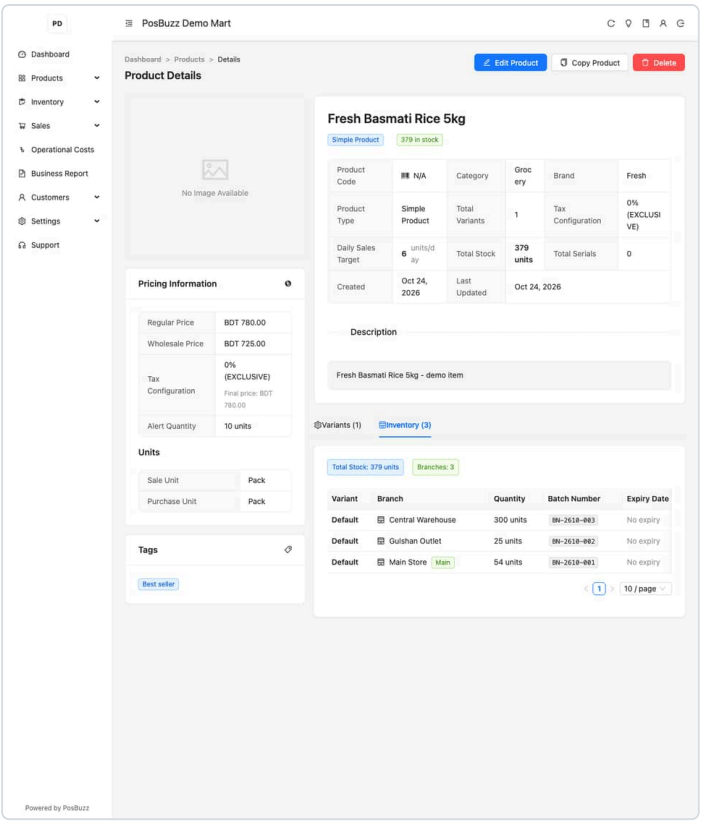

A variant row opened to show Stock by Branch, Attributes and Recent Price Changes.

The Inventory tab with summary chips and one row per batch.

Fresh Basmati Rice 5kg shows the Simple Product badge and one variant named Default.

Three batches in three branches.

A simple product shows the same cards. It has the badge **Simple Product**, a single variant called Default, and no Price Range lines.

How to check stock in each branch

1. Open the **Variants** tab.
2. Click the + at the start of the row, or hover over the "n branches" chip.
3. To open the full stock page, click **View Stock**.

What happens next: You see the quantity per branch, or the variant stock page opens.

How to delete a product from this page

1. Click **Delete**.
2. In the **Delete Product** box, read "Are you sure you want to delete this product? This action cannot be undone."
3. Click **Yes** (red). Click **No** to cancel.

What happens next: On success you go back to the Products list. No message is shown. If deleting fails, a box titled **Operation Failed** says "Failed to delete. Please try again later." and you stay on the page.

How to edit or copy from this page

1. Click **Edit Product** or **Copy Product** in the header.

What happens next: The matching form opens.

Messages on this screen

Message	What it means	What to do
Failed to load product details. Please try again later.	The product could not be opened.	Click **Return to Products**.
Operation Failed: Failed to delete. Please try again later.	The delete did not work.	Try again later. Products with sales history cannot be deleted.

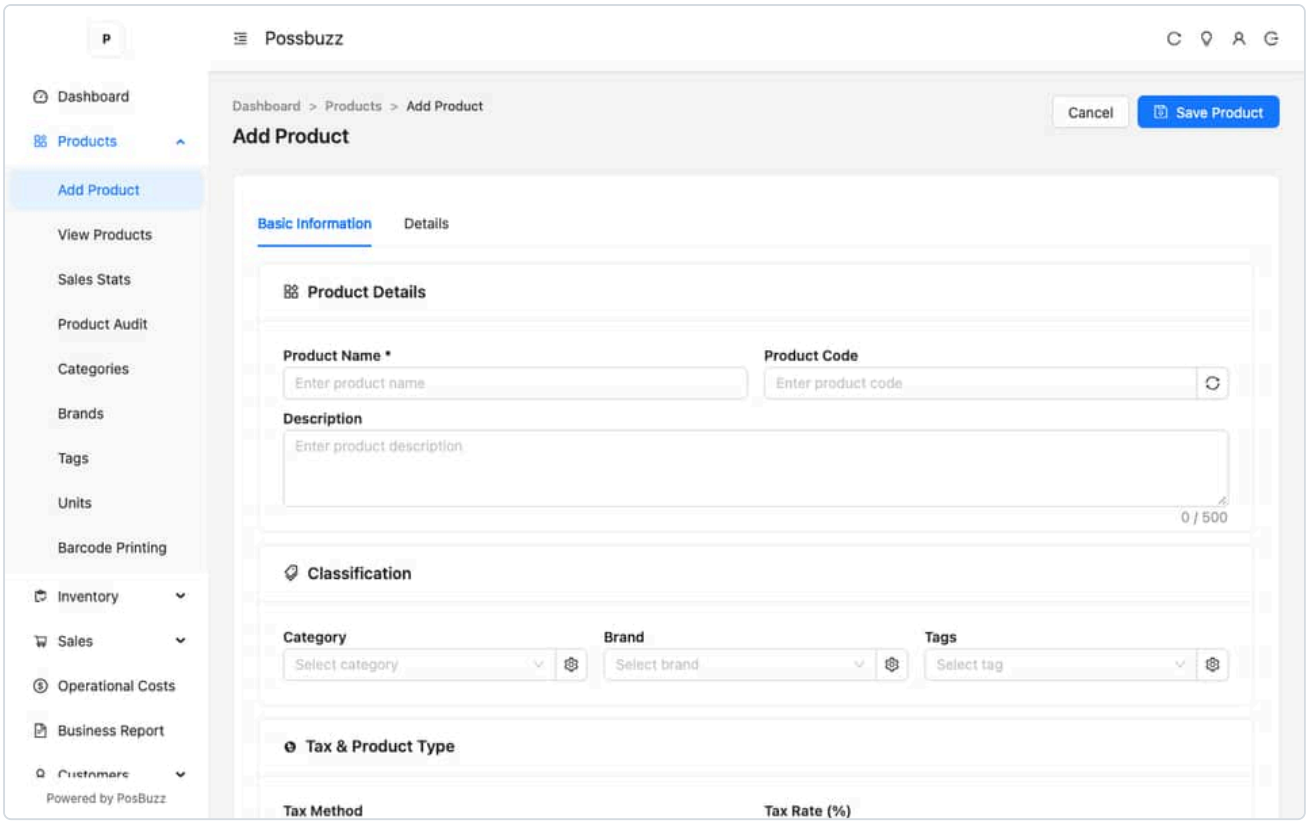

Add Product, Edit Product and Copy Product

What it is

One form with three uses. **Add Product** creates a new product with its price, units, optional variants and optional opening stock. **Edit Product** changes an existing product. **Copy Product** starts a new product from a copy of an old one.

Where to find it

- Add: **Products > Add Product** in the menu, or the **Add Product** button on the Products list. Needs the add products permission.
- Copy: the copy icon on the Products list, or **Copy Product** on Product Details. Needs the add products permission.
- Edit: the pencil icon on the Products list, or **Edit Product** on Product Details. Needs the edit products permission.

The Add Product form, Basic Information tab.

What you see

The page title is **Add Product**, **Edit Product** or **Copy Product**. While an existing product loads, a full-page spinner shows.

Top right:

- **Cancel**. Goes back to the Products list without saving. It does not ask you to confirm, so anything you typed is lost.
- **Save Product** (when adding or copying) or **Update Product** (when editing). A spinner shows while it saves.

The form has two tabs:

- **Basic Information**
- **Details** (simple product) or **Variants (n)** (variant product)

Basic Information tab

Card **Product Details**:

Field	Required	Notes
Product Name *	Yes	Hint "Enter product name". Must not already be used by another product in your shop. For a simple product, the name is copied to its single variant.

Field	Required	Notes
Product Code	No	Hint "Enter product code". The round arrow button next to it makes a code: the first 3 letters or digits of the name in capitals (padded with X), a dash and 6 random digits, such as "COC-482913". If the name is empty it starts with "PRD". Must not already be used in your shop.
Description	No	A text box with a counter. Up to 500 characters. Hint "Enter product description".

Card **Classification**:

Field	Required	Notes
Category	No	A searchable list with the hint "Select category" that you can clear. The gear button next to it (tip "Manage category") opens the category list.
Brand	No	Hint "Select brand". Gear button tip "Manage brand".
Tags	No	Pick several. Hint "Select tag". Gear button tip "Manage tag". The list closes after each pick.

Card **Tax & Product Type**:

Field	Required	Notes
Tax Method	Yes (always has a value)	**Exclusive** (the default) or **Inclusive**.
Tax Rate (%)	No	A whole number from 0 to 100. Empty counts as 0.
Product type switch	-	Off (default) reads "Simple product (single variant)". On reads "Variant product".

Exclusive means the tax is added on top of the price when you sell. Inclusive means the price already contains the tax.

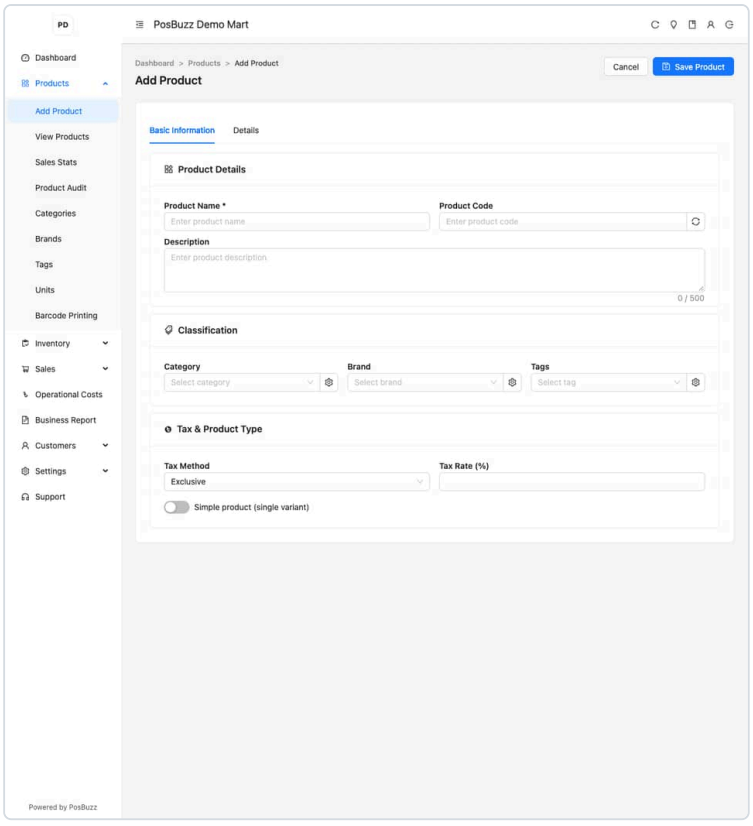

If you try to switch a saved variant product back to simple, the switch does not move and a warning says "Variant product cannot be converted back to simple product."

The Manage pop-up. The gear buttons next to Category, Brand, Tags, Sale Unit and Purchase Unit open a pop-up so you can fix the list without leaving the product. Below, {X} stands for Category, Brand, Tag or Unit.

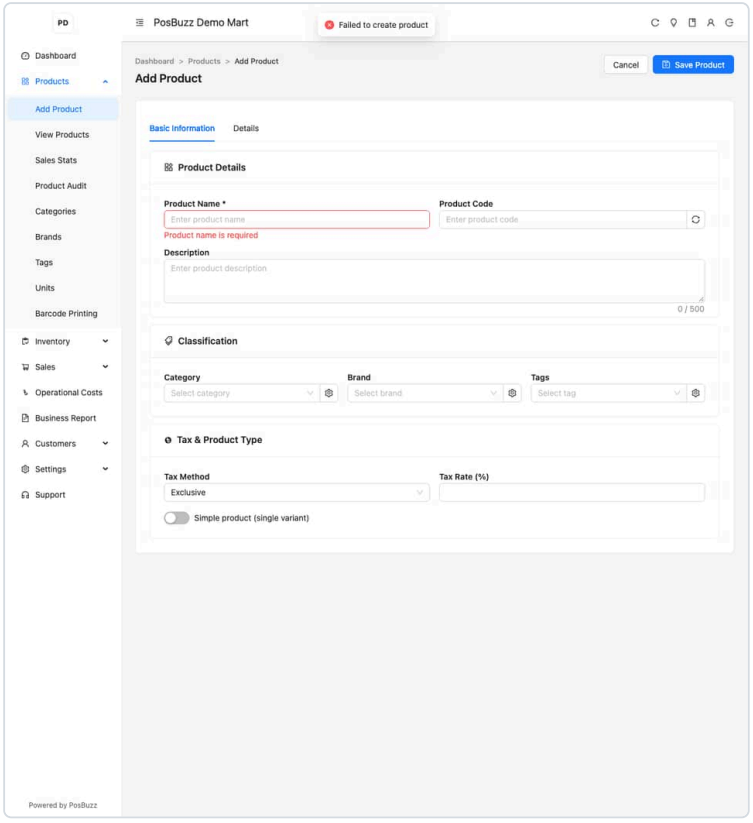

- The pop-up is titled **Manage {X}**. It has a button **Add {X}** and a list of all items, each with a pencil and a bin. An empty list says "No {x} found".
- **Add {X}** opens a small form with one field, **{X} Name** (required, up to 100 characters). If you leave it empty: "Please enter {x} name". Click **OK** to save or **Cancel** to close. You see "{X} created successfully" and the new item is chosen for you (added to your picks for Tags).
- The pencil opens **Edit {X}** with the same field. You see "{X} updated successfully".
- The bin asks **Delete {X}** and "Are you sure you want to delete '{name}'?". Click **OK** (red) to confirm. You see "{X} deleted successfully", and the item is removed from the field if it was chosen.

- Failures show the server's reason or "Failed to create {X}", "Failed to update {X}" or "Failed to delete {X}".

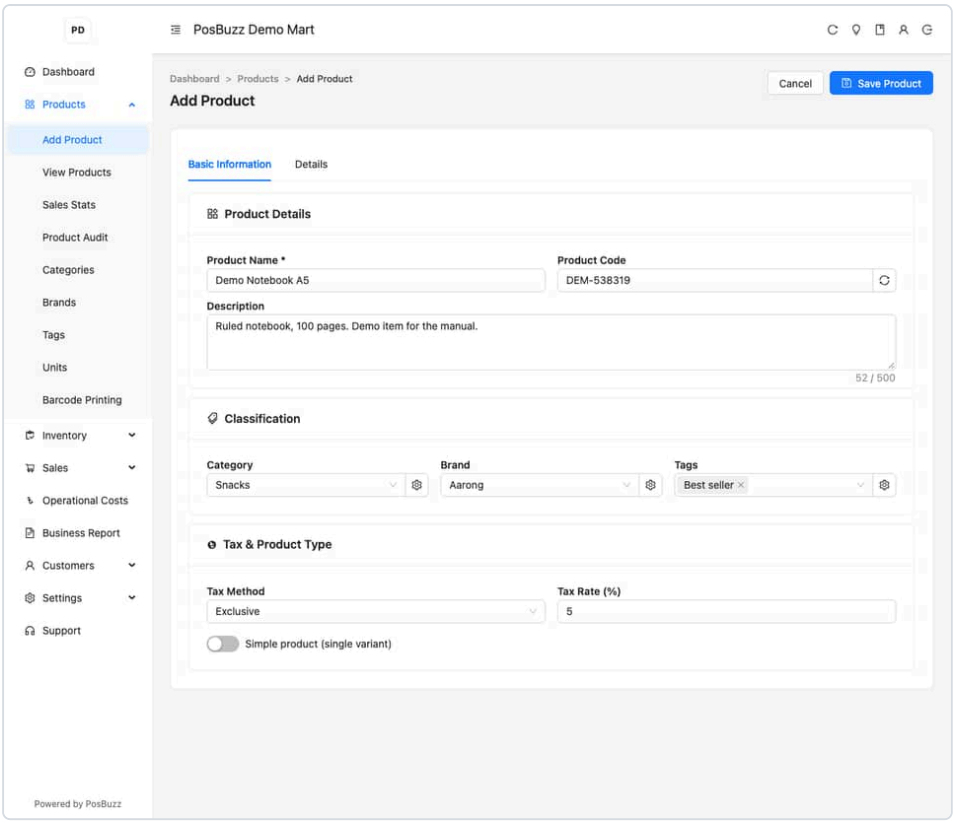

> **Good to know:** This pop-up only manages names. A brand's logo and website can be set only on the **Brands** screen.

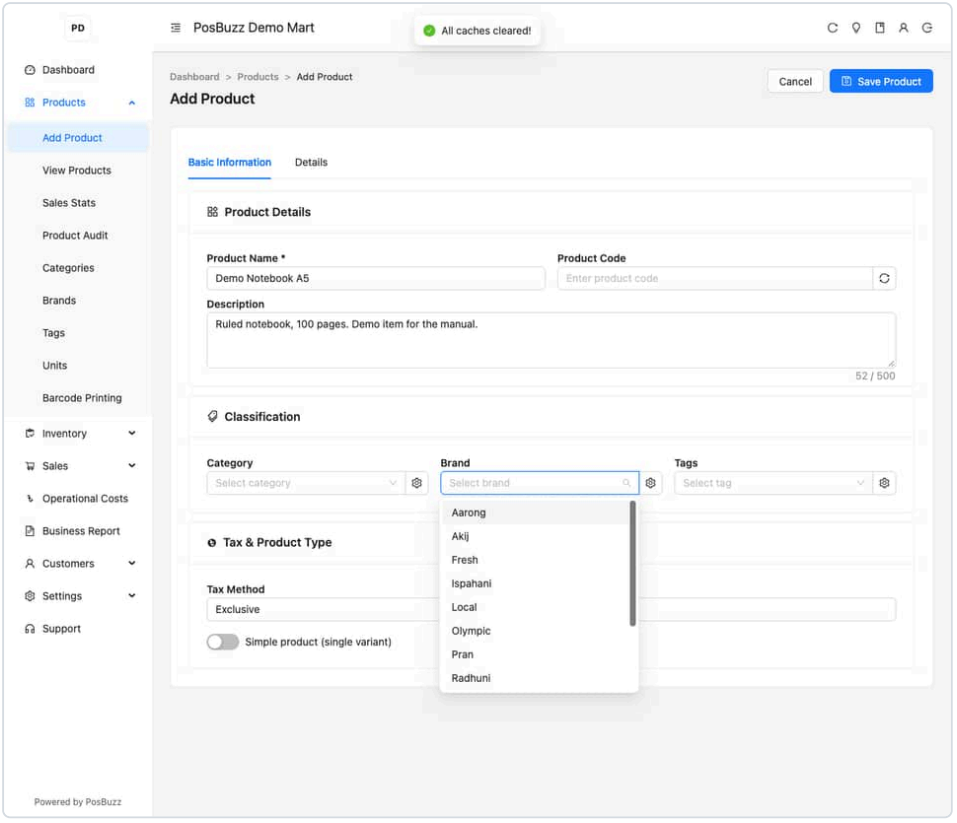

The empty Basic Information tab. The switch is off, so the product is simple.

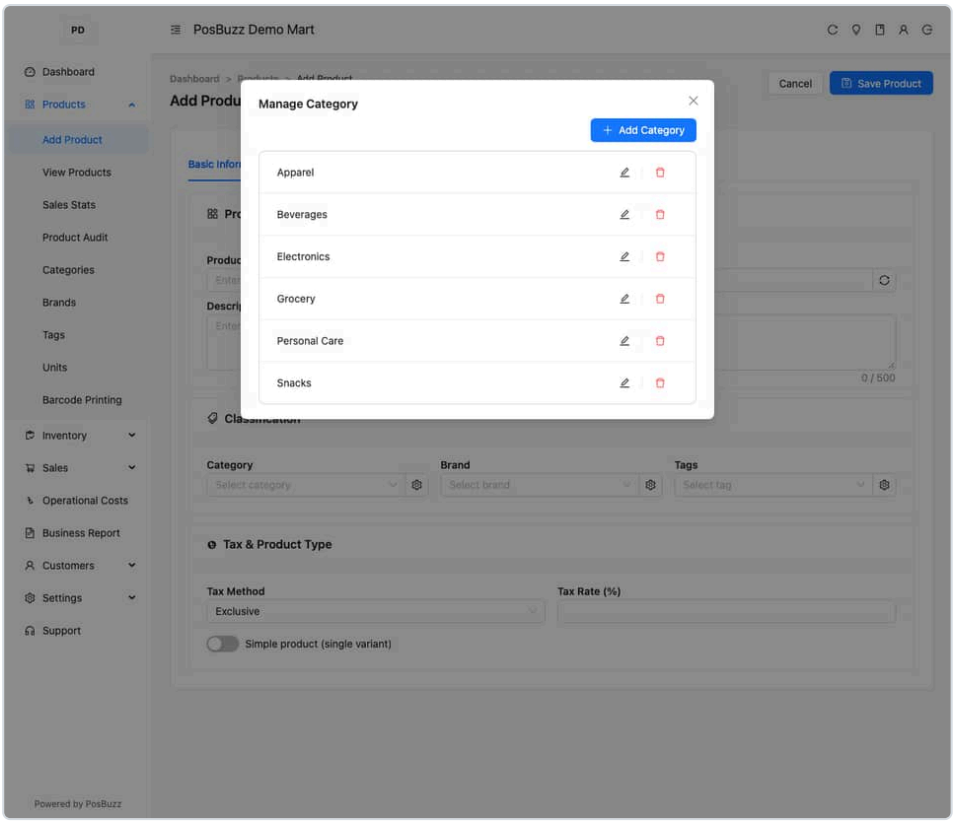

Pressing Save Product with an empty name shows Product name is required.

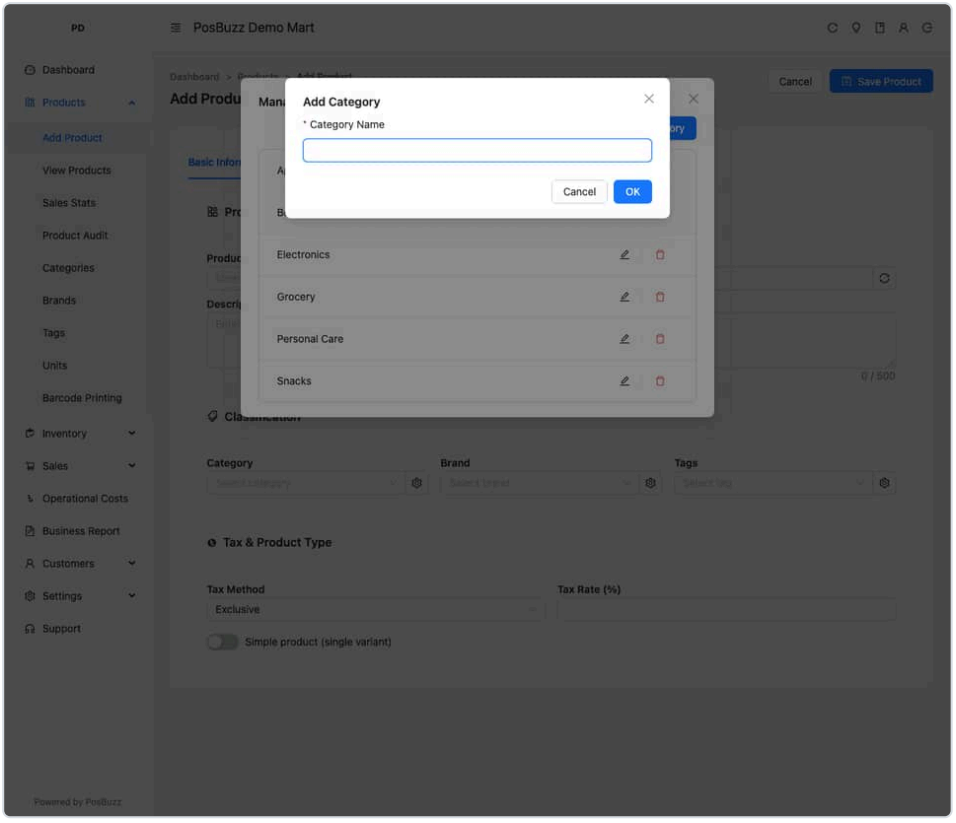

Name, description, category, brand, tag and tax rate filled in.

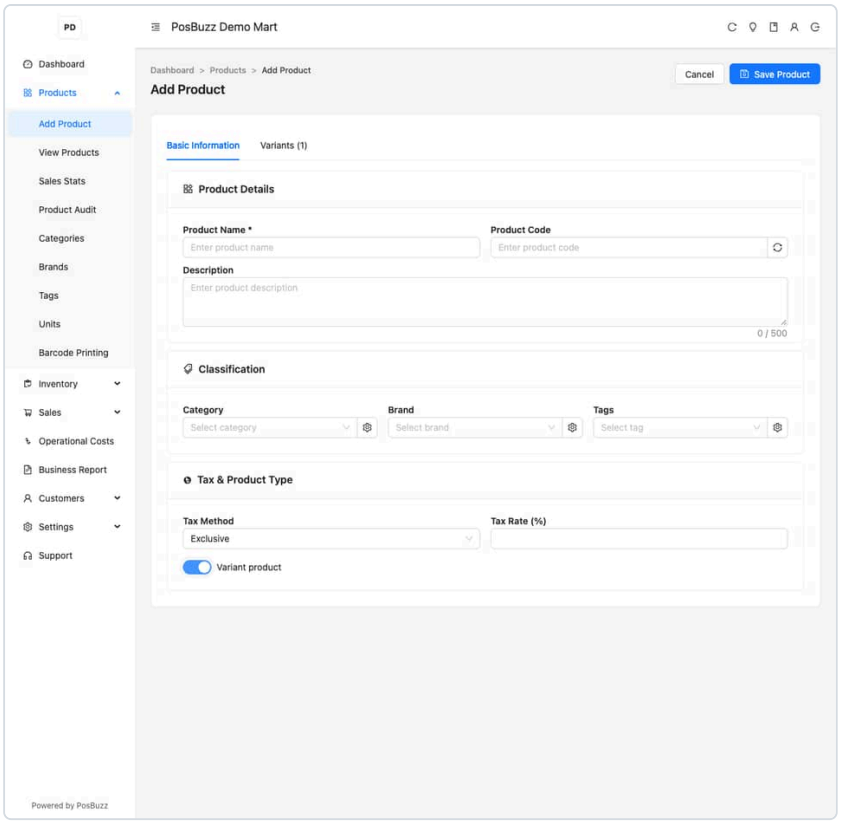

The Category list open.

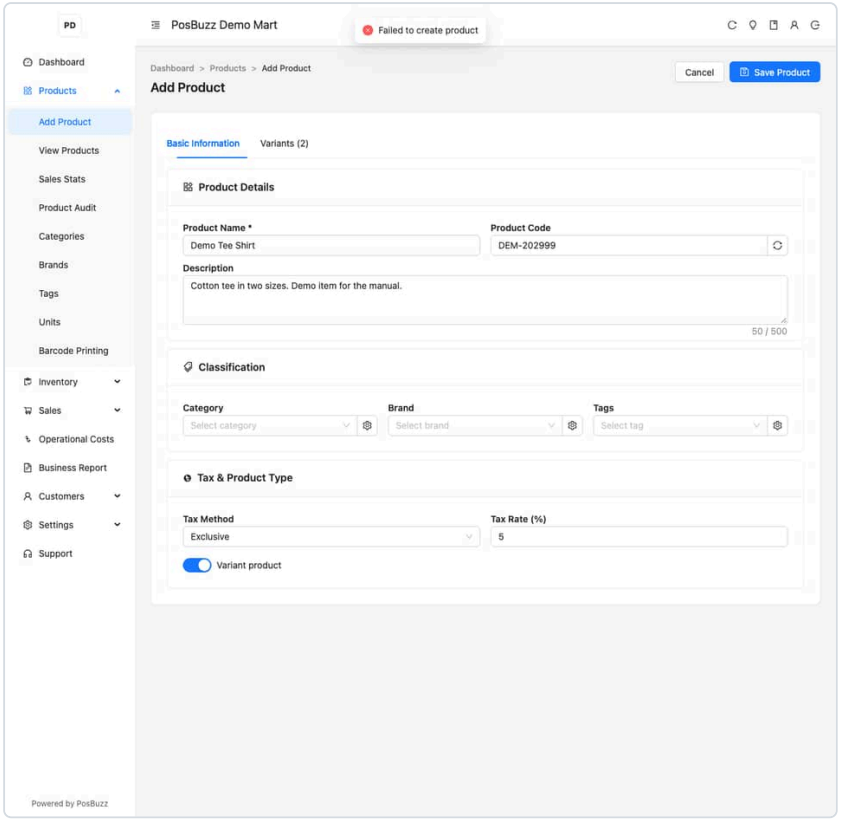

The pop-up opened by the gear button next to Category.

The small form to add a category without leaving the product.

With the switch on it reads Variant product and the second tab is called Variants (1).

The second tab now reads Variants (2).

Which tabs you see. The tabs change with the switch.

Mode	Tabs on the form
Add, simple product (switch off)	Basic Information, Details. Inside Details: one sub-tab called Details, and Add Inventory (n).
Add, variant product (switch on)	Basic Information, Variants (n). Inside Variants: Variant 1, Variant 2 and so on, each with its own Add Inventory (n).
Edit, simple product	Basic Information, Details. There is no Add Inventory part.
Edit, variant product	Basic Information, Variants (n) with Variant 1, Variant 2 and so on. There is no Add Inventory part.

Details tab (simple product) and Variants tab (variant product)

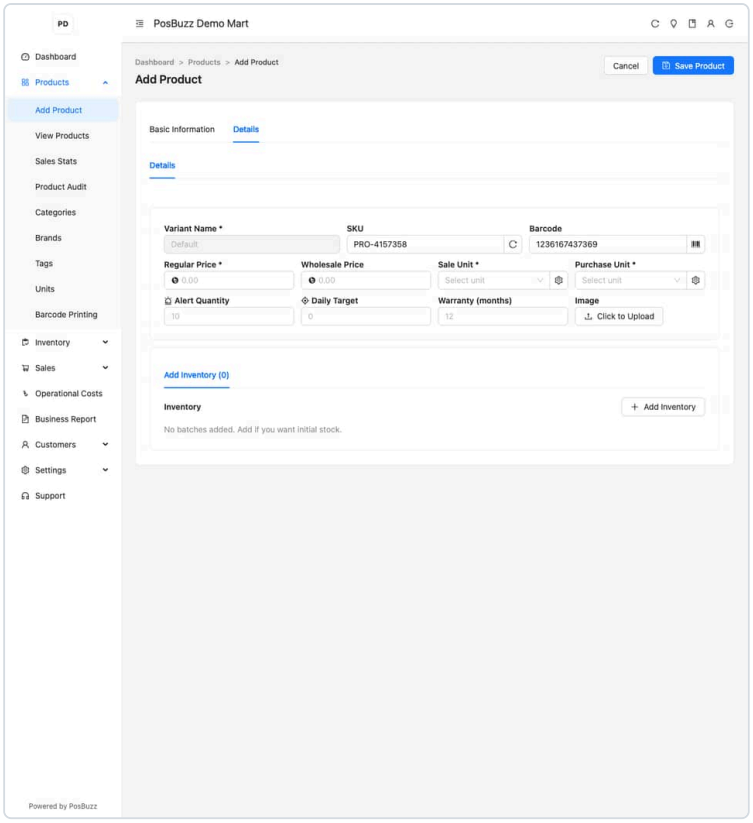

For a variant product the top bar reads "Variants (n)" and has two buttons: **Copy & Add Variant** and **Add Variant**. Each variant has its own sub-tab called "Variant 1", "Variant 2" and so on. For a simple product the one sub-tab is called "Details". When there are two or more variants, each variant sub-tab has a red **Delete** button.

If any field has an error, a yellow box on this tab says **Please resolve validation errors before saving.**

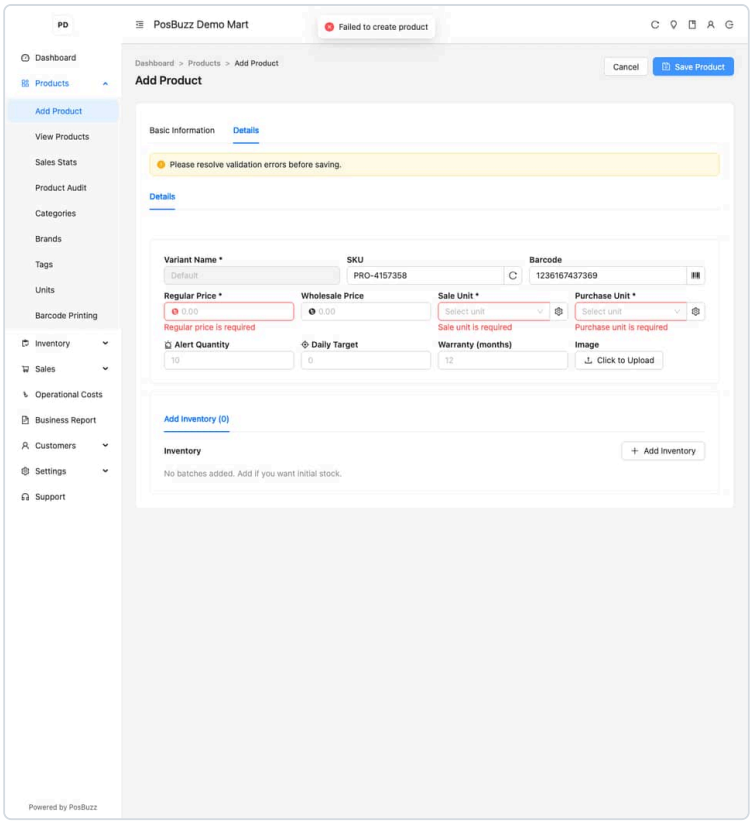

Each variant has these fields:

Field	Required	Notes
Variant Name *	Yes	Locked (greyed out) for a simple product, because it follows the product name.
SKU	No	Filled in for you. The reload button makes a new one. A simple product gets "PRO-" and 7 digits. A variant product gets 3 letters from the product name, "-SKU-" and 5 digits, such as "TSH-SKU-04721". Must not repeat inside the same product (capital and small letters count as the same).
Barcode	No	Filled in for you with a 13-digit number that starts with "123". The barcode button makes a new one. Must not repeat inside the same product.
Regular Price *	Yes	Taka sign, hint "0.00", two decimals. Must be above 0.
Wholesale Price	No	Taka sign, hint "0.00", two decimals. Cannot be negative.
Sale Unit *	Yes	Hint "Select unit". Gear button tip "Manage unit".
Purchase Unit *	Yes	Hint "Select unit". Gear button tip "Manage unit".
Alert Quantity	No	Bell icon, hint "10". Empty is saved as 0, which means no alert.
Daily Target	No	Target icon, hint "0". The number of units you aim to sell each day. It is used by the Daily Target report.

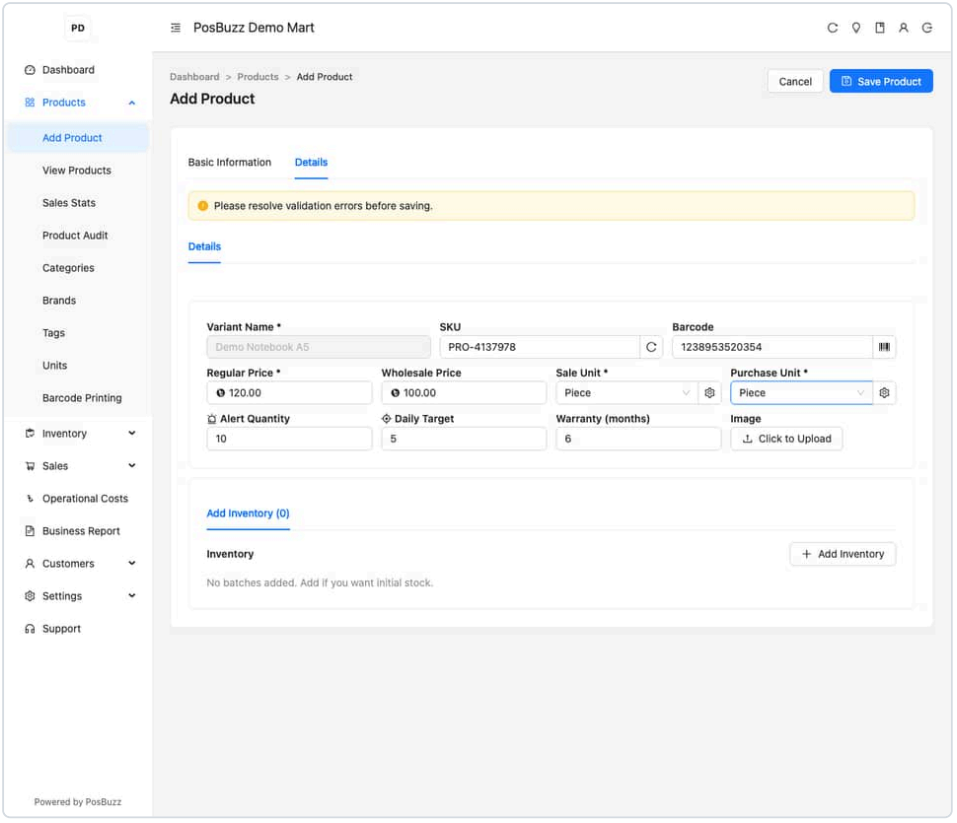

Field	Required	Notes
Warranty (months)	No	Hint "12". From 0 to 120.
Image	No	Click **Click to Upload**. One JPG or PNG file under 10 MB. After upload the file name shows with a way to remove it.

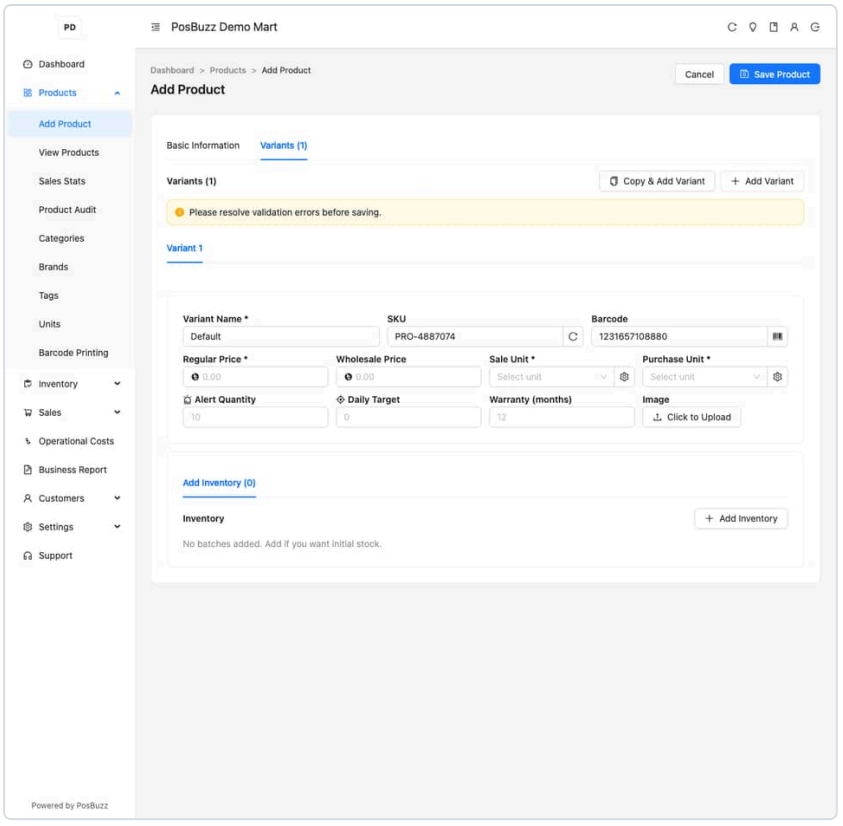

The Details tab of a simple product. The Variant Name is locked and the SKU and Barcode are filled in.

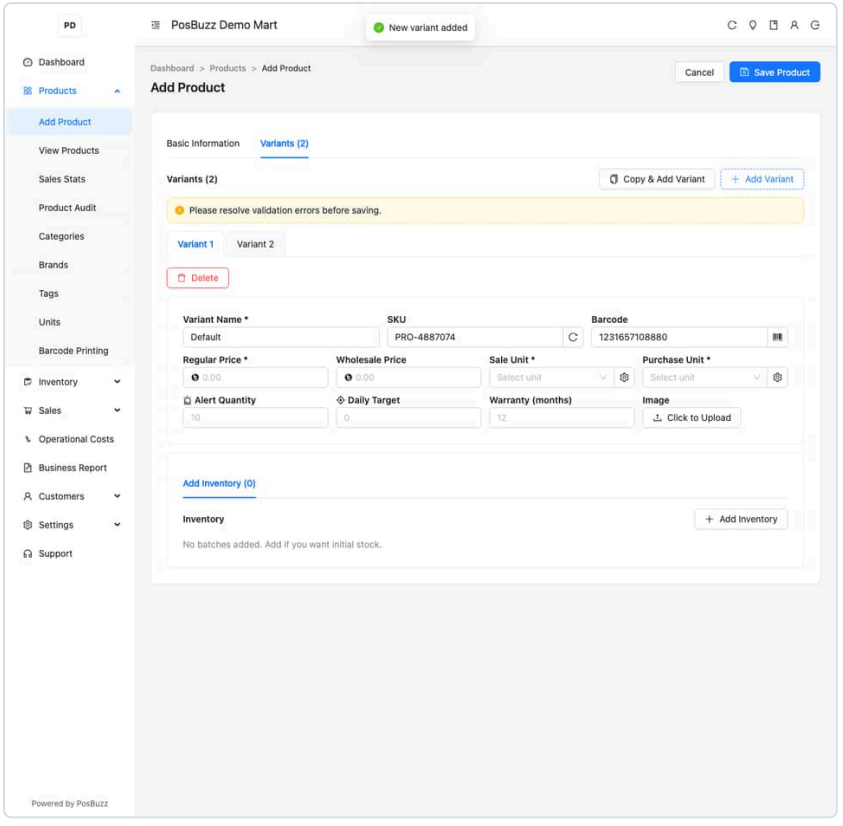

The yellow box, the red fields and the general message Failed to create product.

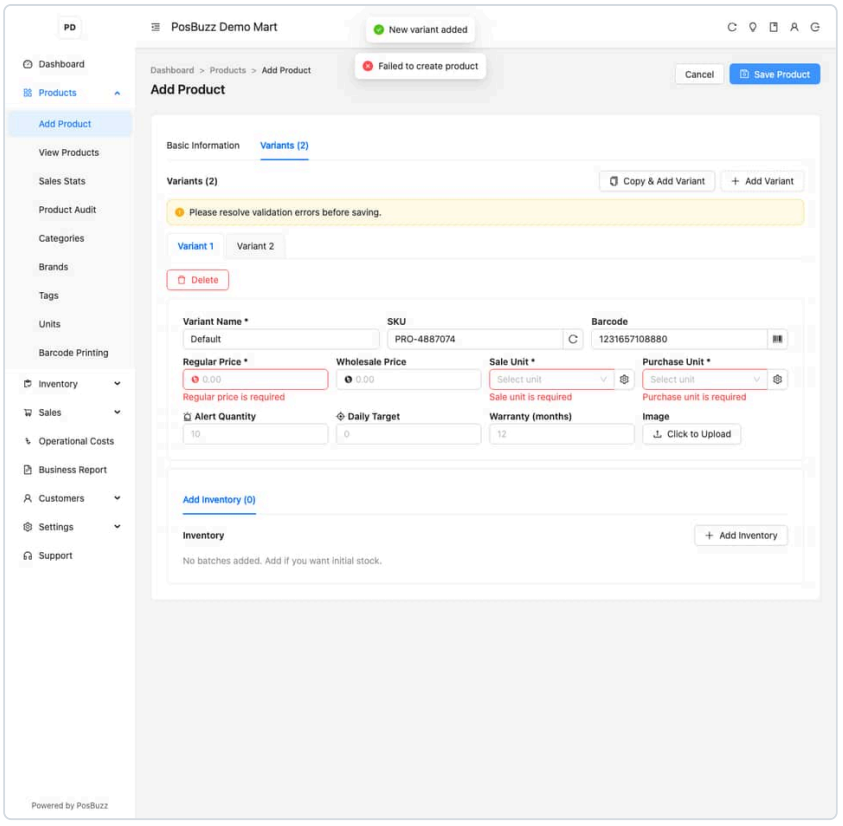

Prices, units, alert quantity, daily target and warranty filled in.

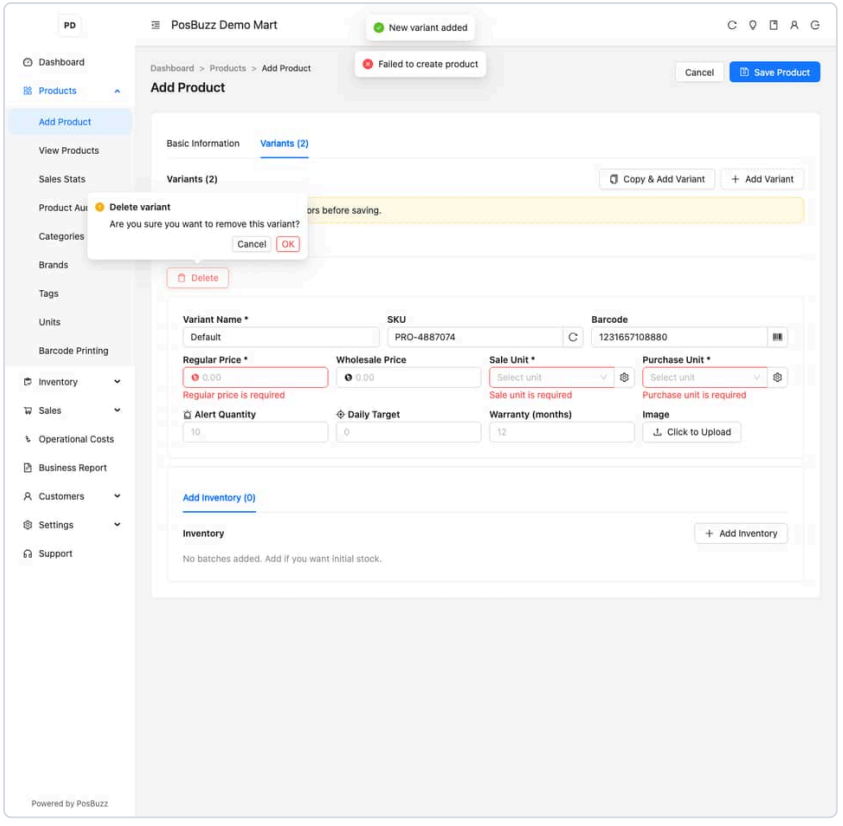

The Variants tab with Copy & Add Variant and Add Variant.

After Add Variant there are two sub-tabs and a red Delete button.

Required fields of a variant marked in red.

The Delete variant question with Cancel and OK.

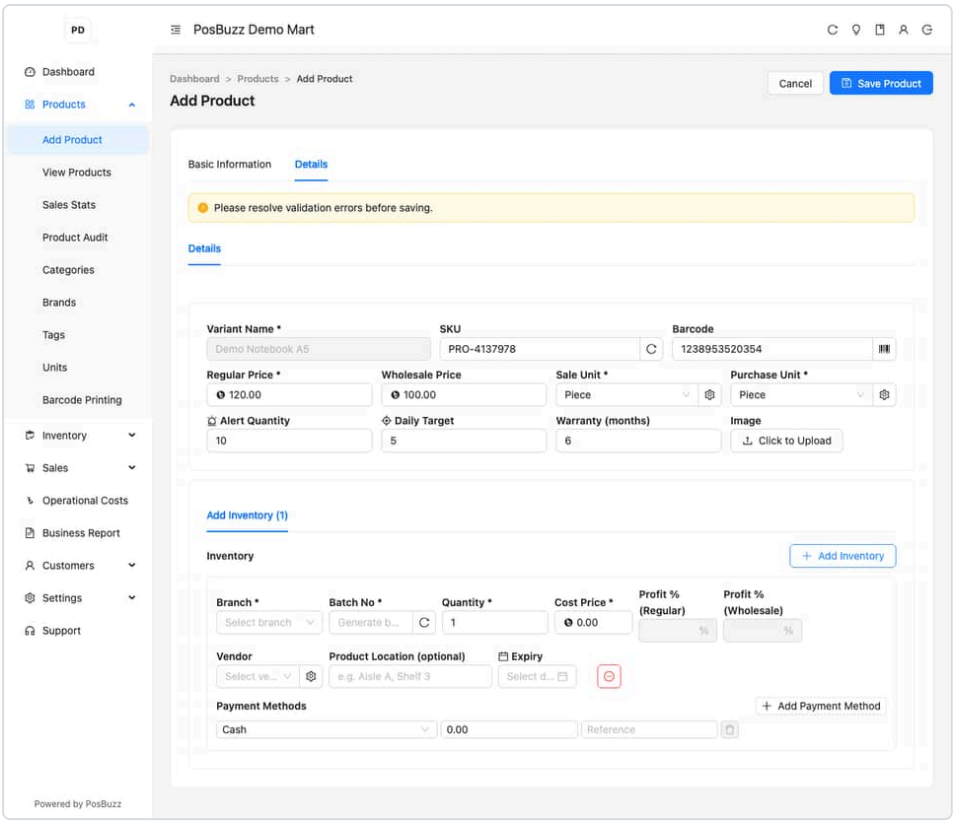

Add Inventory sub-tab (opening stock)

This sub-tab is named **Add Inventory (n)**. It shows only when you add or copy a product, never when you edit. Use it to record the stock you already have.

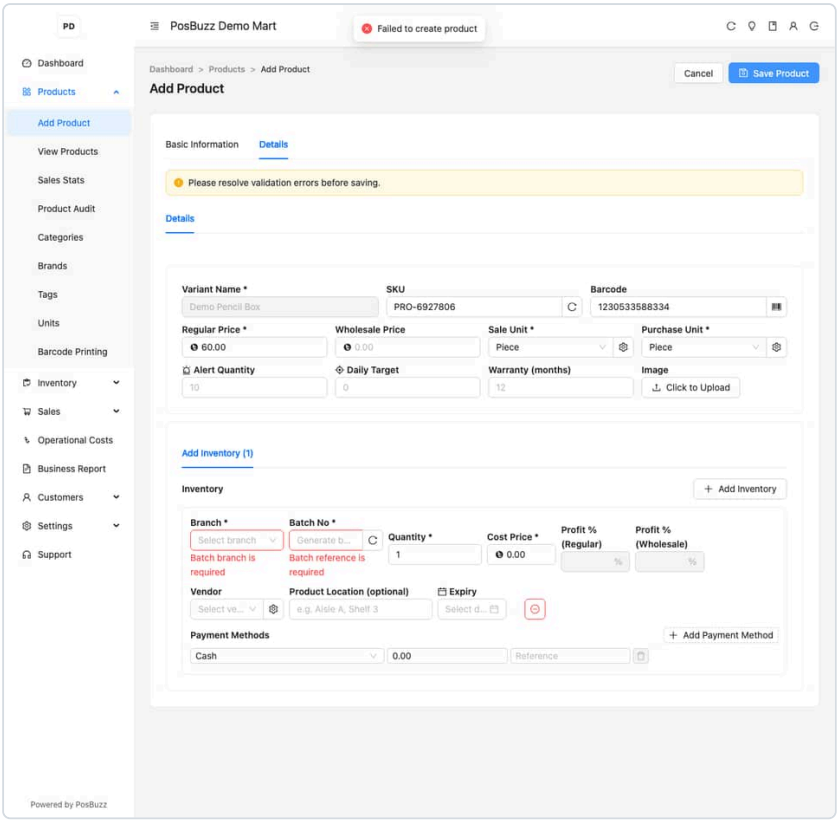

- The heading is "Inventory" with a button **Add Inventory**.
- With no batches you see "No batches added. Add if you want initial stock."
- Each batch is a card with these fields:

Field	Required	Notes
Branch *	Yes	Hint "Select branch".
Batch No *	Yes	Hint "Generate batch". The reload button fills in the last 6 digits of the current time.
Quantity *	Yes	A whole number, at least 1. Starts at 1. If you clear it, it goes back to 1.
Cost Price *	Effectively optional	Taka sign, two decimals. The price you paid for one unit. Starts at 0. Cannot be negative.
Profit % (Regular)	No	Greyed out until the cost price is above 0. Shows how much the Regular Price is above cost. Typing a percentage changes the variant's Regular Price.
Profit % (Wholesale)	No	The same, linked to the Wholesale Price.
Vendor	No	Hint "Select vendor". Searchable and clearable. Gear button tip "Manage vendors".
Product Location (optional)	No	Hint "e.g. Aisle A, Shelf 3".
Expiry	No	A date picker.

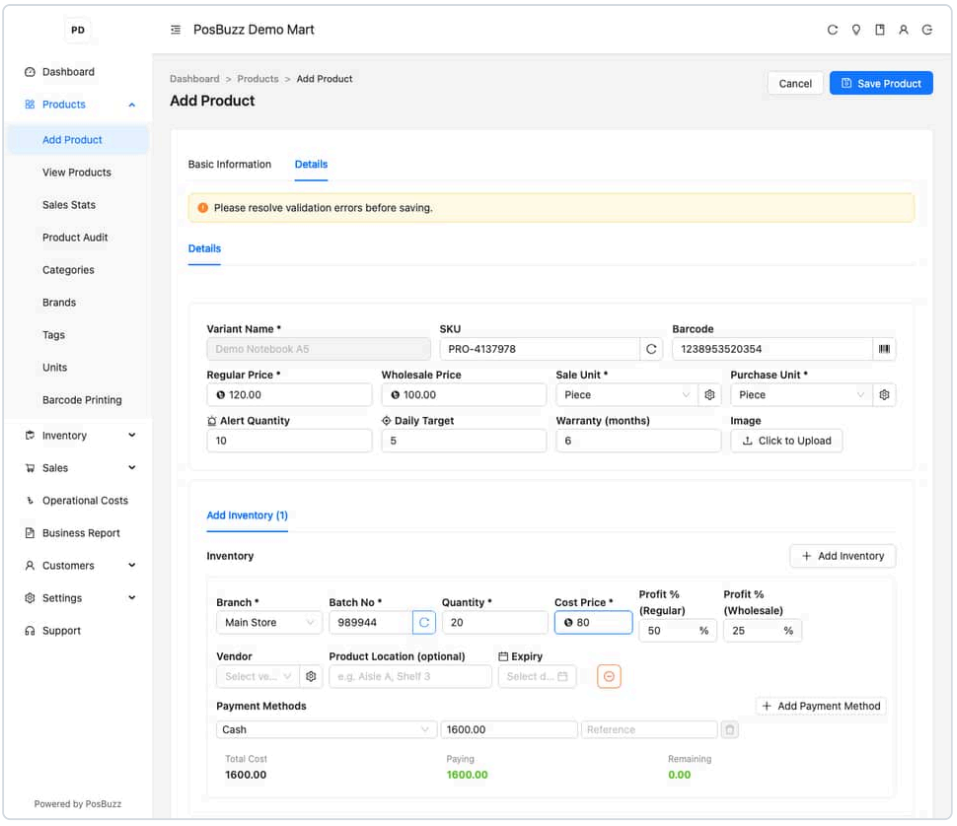

- A red minus button removes the batch row. It does not ask you to confirm.
- Under each batch is a **Payment Methods** section that records how you paid for this purchase:
  - Click **Add Payment Method** to add a row. A new row is filled with the amount still unpaid.
  - Each row has a method list (**Cash**, **Card**, **Cheque**, **Bank Transfer**, **Mobile Money**, **MFS**), and for Card and Bank Transfer a second list "Select bank". For MFS a list "Select MFS" is required. Then an amount (two decimals), a "Reference" box and a red delete button. The delete button is greyed out when only one row is left.
  - The first row starts as Cash. While there is only one Cash row, its amount follows quantity times cost by itself.
  - When the total is above 0, a summary shows **Total Cost**, **Paying** (green) and **Remaining** (red if above 0).
  - Rows with amount 0 are ignored when you save.
  - Any part of the cost not covered by the payment rows stays as money you owe the vendor.

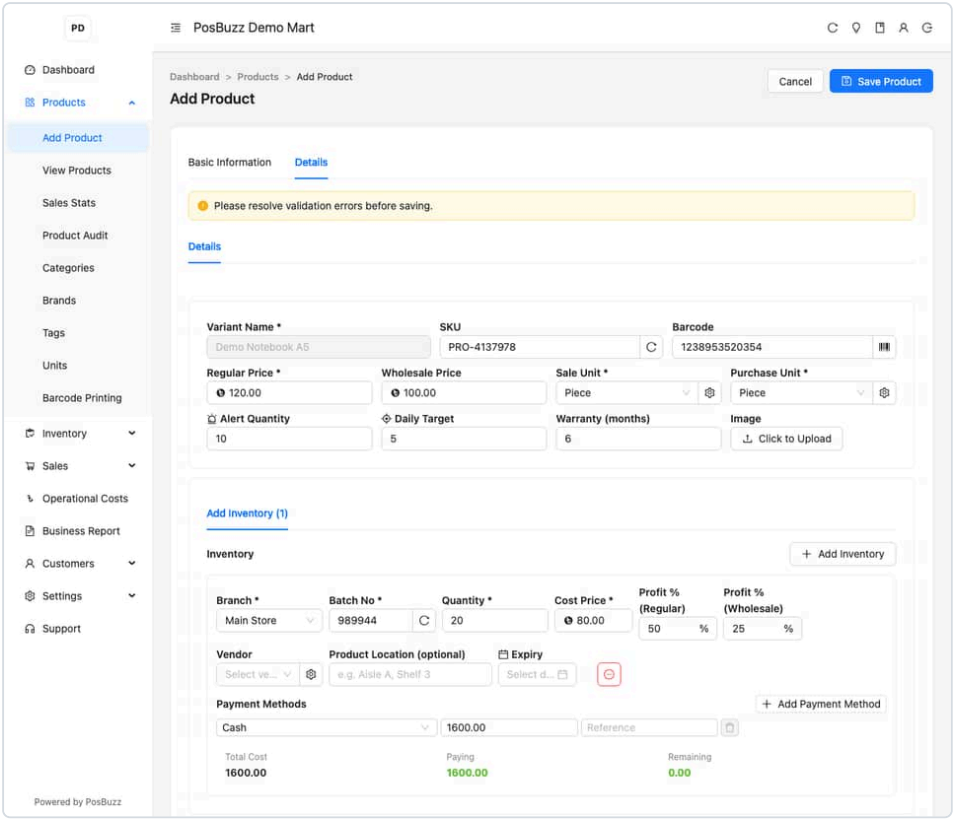

A new batch card with branch, batch number, quantity, cost price, profit, vendor, location, expiry and payment methods.

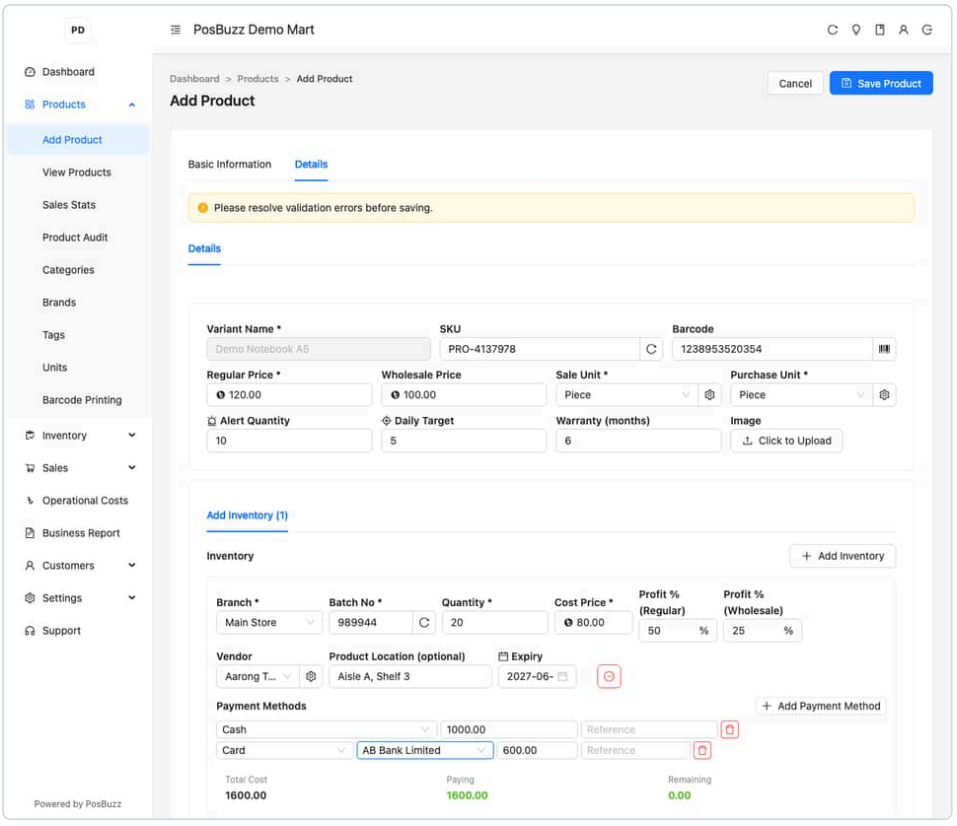

Batch branch is required and Batch reference is required.

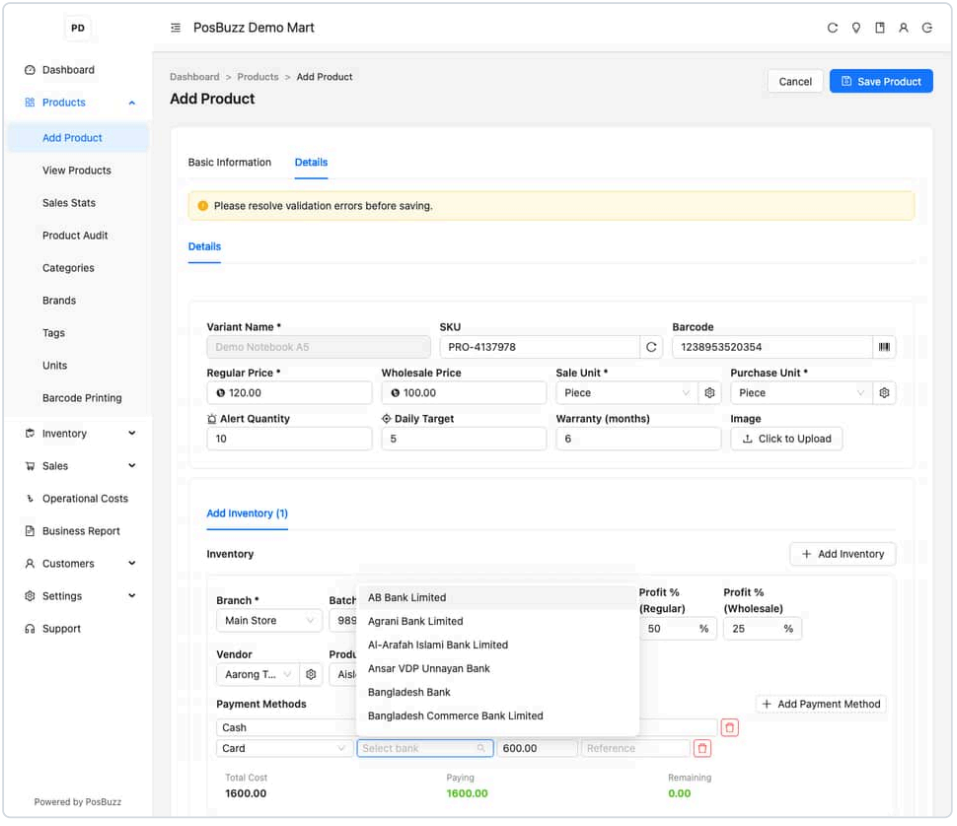

Quantity 20 and cost price 80. The payment total follows quantity times cost.

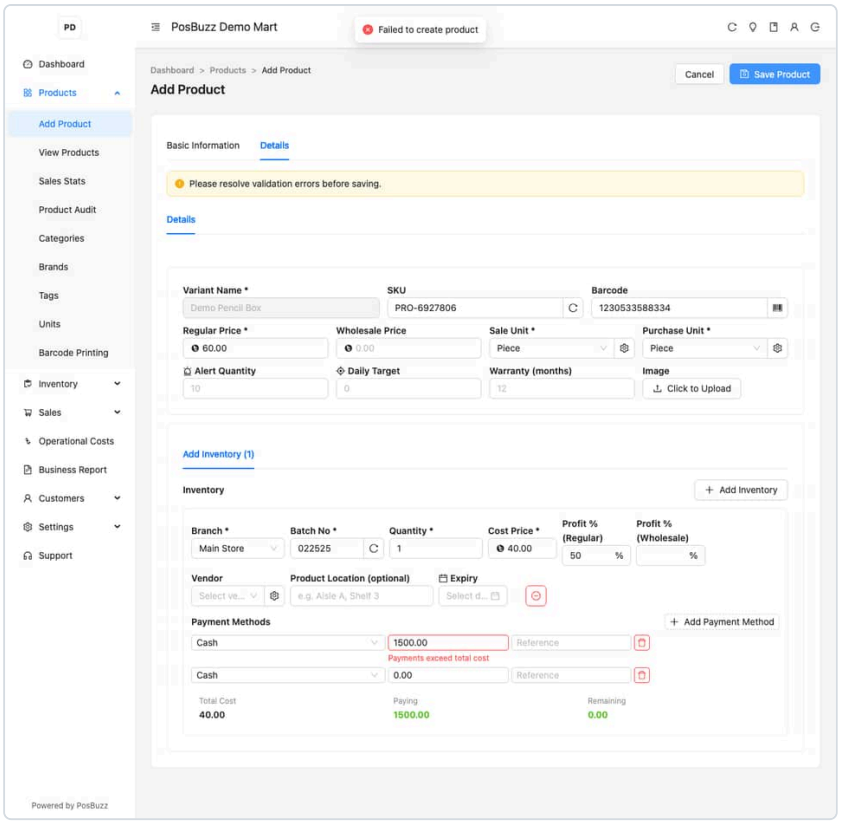

Profit % (Regular) 50 and Profit % (Wholesale) 25 are worked out from the prices and the cost.

Two payment rows with Total Cost, Paying and Remaining.

Choosing Card shows a Select bank list.

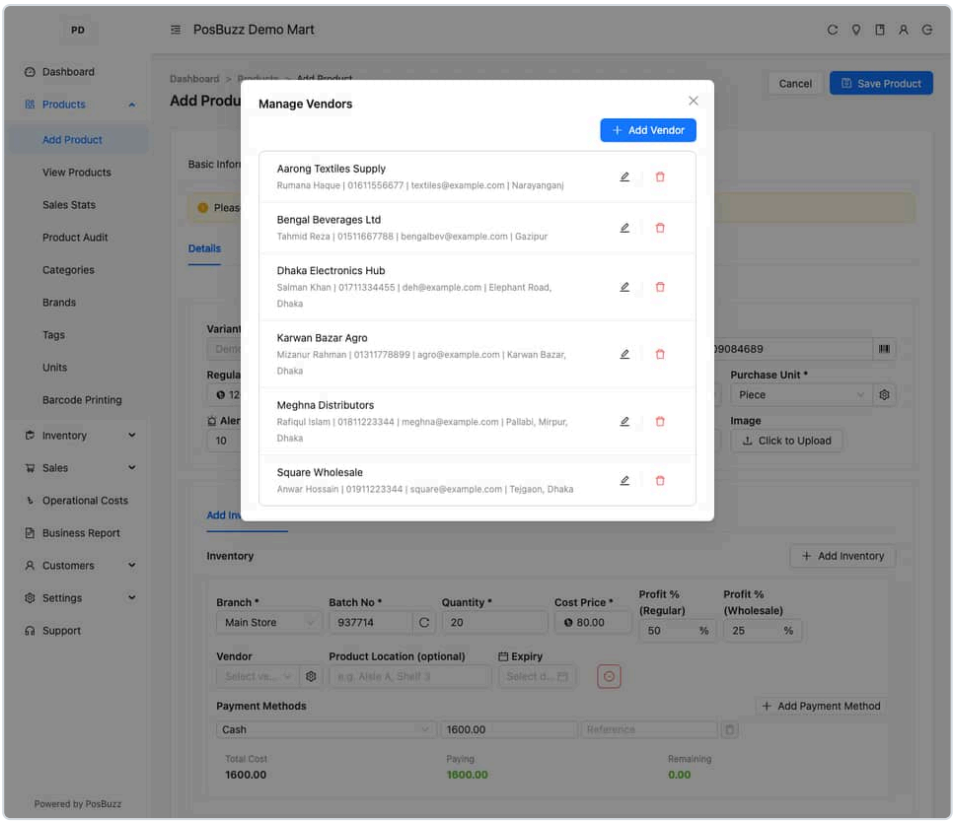

The red message Payments exceed total cost under the amount.

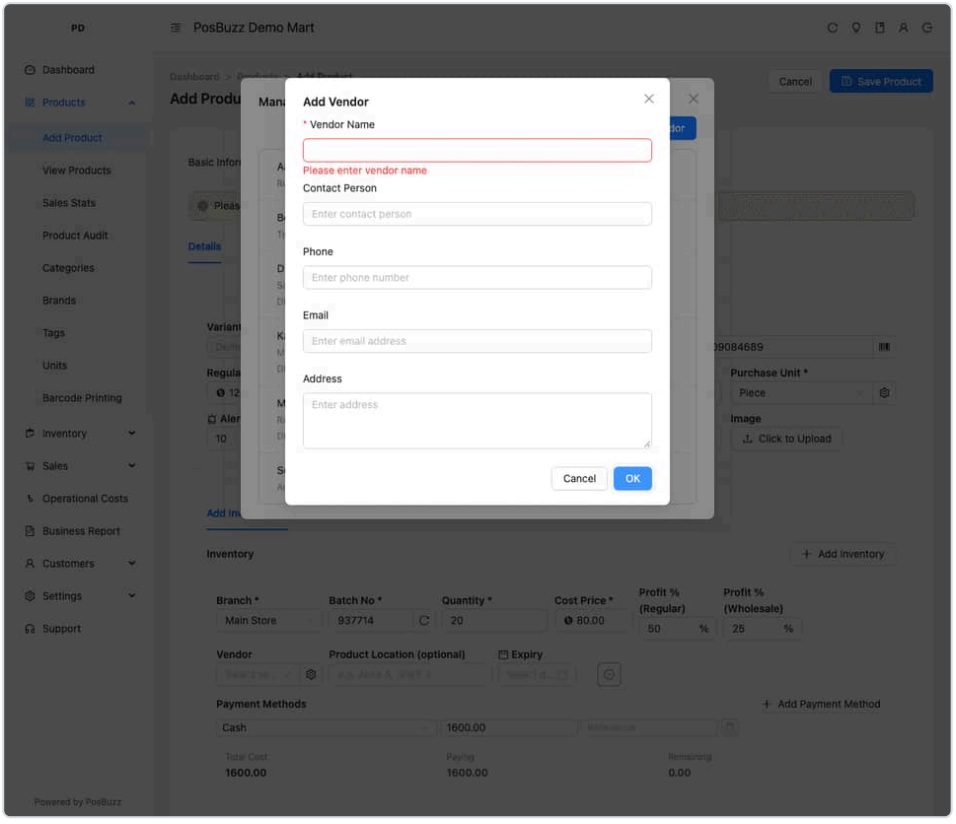

Manage Vendors pop-up (gear next to Vendor). It is titled **Manage Vendors** and has a button **Add Vendor**. Each vendor row shows contact, phone, email and address, or "No additional info". Each row has a pencil and a bin. An empty list says "No vendors found".

Add Vendor and **Edit Vendor** fields:

Field	Required	Notes
Vendor Name	Yes	Up to 100 characters. Error: "Please enter vendor name".
Contact Person	No	Up to 100 characters. Hint "Enter contact person".
Phone	No	Up to 30 characters. Hint "Enter phone number".
Email	No	Up to 120 characters. Hint "Enter email address". Must be a valid email: "Please enter a valid email".
Address	No	A 3-line box, up to 300 characters. Hint "Enter address".

The list of vendors with contact, phone, email and address.

Please enter vendor name when the name is empty.

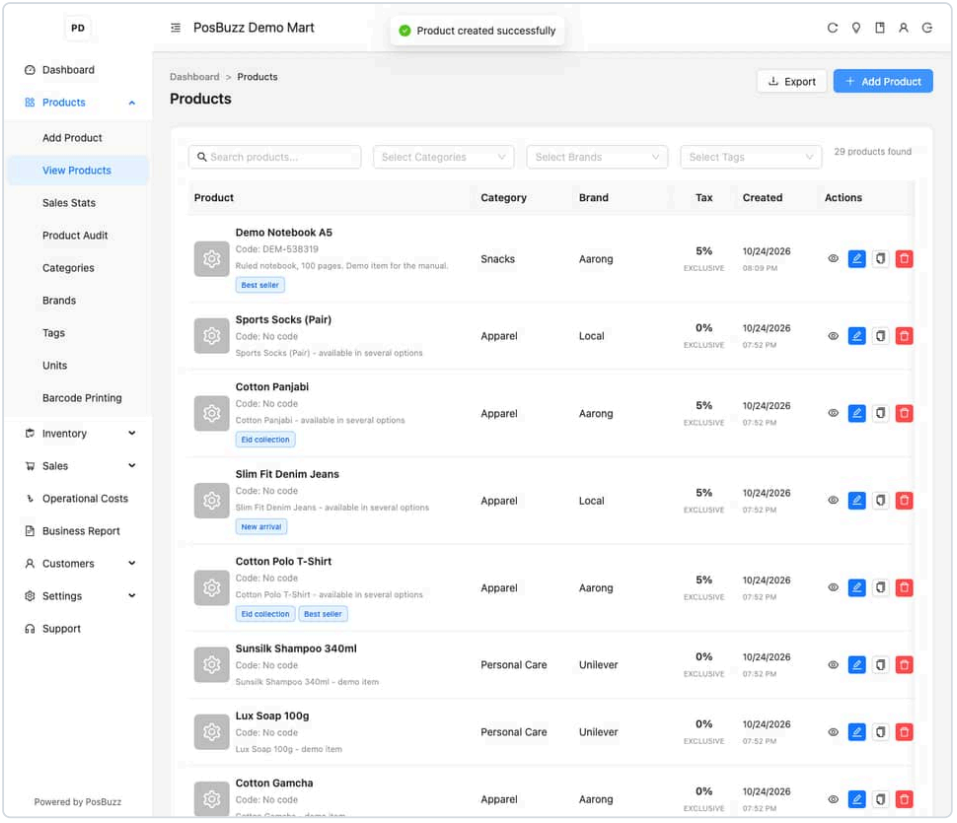

The delete question reads **Delete Vendor** and "Are you sure you want to delete {name}?".

How to add a simple product

A simple product has one price and no sizes or colours.

1. Click **Products > Add Product** in the menu.
2. On **Basic Information**, type the **Product Name**.
3. If you want a code, click the round arrow button next to **Product Code**, or type your own.
4. Add a **Description** if you like. Choose a **Category**, **Brand** and **Tags** if you like.
5. Set the **Tax Method** and the **Tax Rate (%)**. Leave the product type switch off.
6. Open the **Details** tab. The **SKU** and **Barcode** are already filled in.
7. Type the **Regular Price**. Choose the **Sale Unit** and **Purchase Unit**. If the lists are empty, click the gear button and add a unit first.
8. Fill in **Wholesale Price**, **Alert Quantity**, **Daily Target**, **Warranty (months)** and **Image** if you want.
9. If you want to record opening stock, open **Add Inventory (0)** and follow "How to add opening stock" below.
10. Click **Save Product**.

What happens next: You see "Product created successfully" and go to the Products list. Any opening stock is added to the chosen branches at once.

The new product at the top of the list with the success message.

How to add a product with variants

1. On **Basic Information**, turn the product type switch on. It now reads "Variant product" and the second tab becomes **Variants (1)**.
2. Fill in **Variant 1**: name, prices, units and the rest.

3. Click **Add Variant** for a blank variant with a new SKU and barcode. You see "New variant added". Or click **Copy & Add Variant** to duplicate the variant you are looking at. This copies prices, units, alert, target, warranty, image and opening stock rows, but leaves the name empty and gives a new SKU and barcode. You are moved to the new sub-tab.
4. Type a name in each variant, for example Small, Medium and Large.
5. To remove a variant, open its sub-tab, click **Delete**, and confirm **Delete variant** ("Are you sure you want to remove this variant?"). If you remove the first (default) variant, the next one becomes the default.
6. Click **Save Product**.

What happens next: You see "Product created successfully" and go to the Products list.

> **Good to know:** If you click **Add Variant** while the product is still simple, the product becomes a variant product automatically. Once a variant product is saved, it cannot be changed back to a simple product.

How to add opening stock

1. On the **Details** tab (or on a variant's sub-tab), open **Add Inventory (n)**.
2. Click **Add Inventory**.
3. Choose the **Branch**.
4. Click the reload button in **Batch No**, or type a batch number.
5. Enter the **Quantity** and the **Cost Price**.
6. Optionally set **Profit % (Regular)**, **Vendor**, **Product Location (optional)** and **Expiry**.
7. Under **Payment Methods**, click **Add Payment Method** if you paid in more than one way. Choose the method and amount, and add a bank or MFS provider where asked.
8. Check **Total Cost**, **Paying** and **Remaining**.
9. Click **Save Product**.

What happens next: The stock is added to the branch as a batch when the product is saved.

> **Good to know:** If two batch rows of the same variant use the same batch number, they must have the same expiry date (or both have none).

How to use Profit % to set the price

1. In a batch, enter the **Cost Price**, for example 100.
2. Type 25 in **Profit % (Regular)**. The variant's Regular Price becomes 125.00.
3. Or do it the other way: type the Regular Price and the Profit % shows 25.
4. Do the same with **Profit % (Wholesale)** for the Wholesale Price.

What happens next: The price and the profit stay linked. Profit is worked out as (price minus cost) divided by cost, times 100, rounded to two decimals. It can go down to minus 100. If you clear the Profit % box, the price is cleared too.

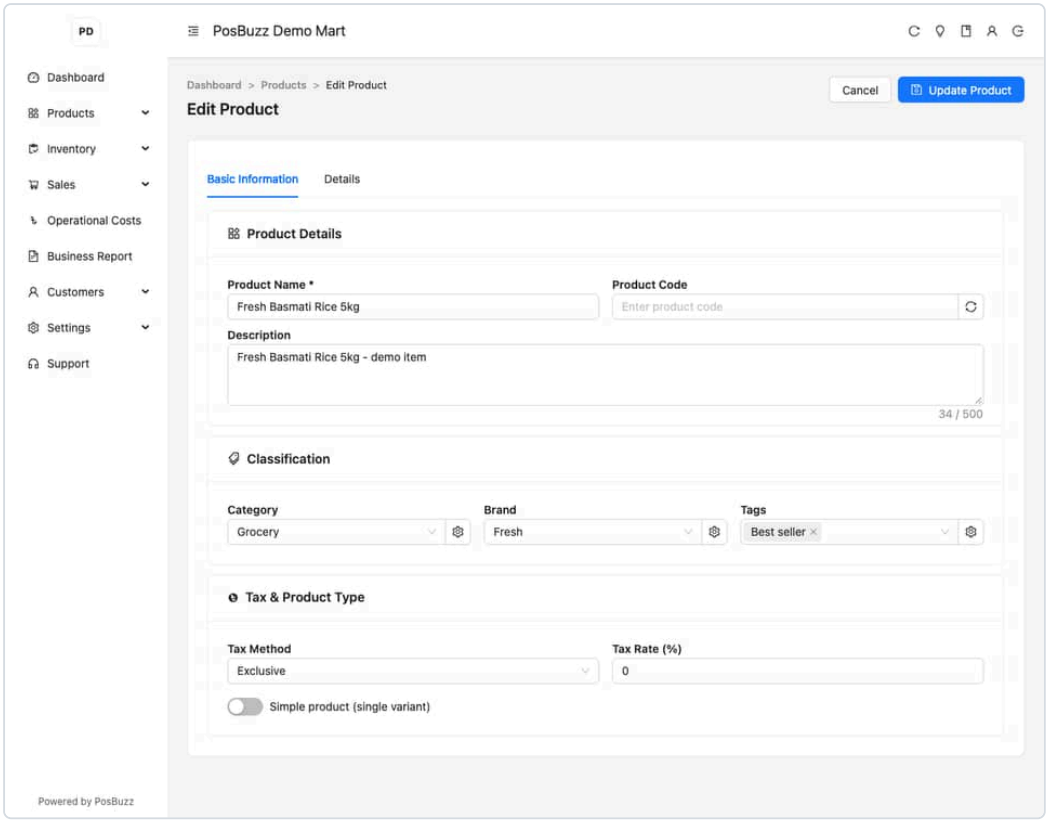

> **Good to know:** The Profit % box shows exactly what you type until you click out of it. Then it shows the recalculated figure.

How to edit a product

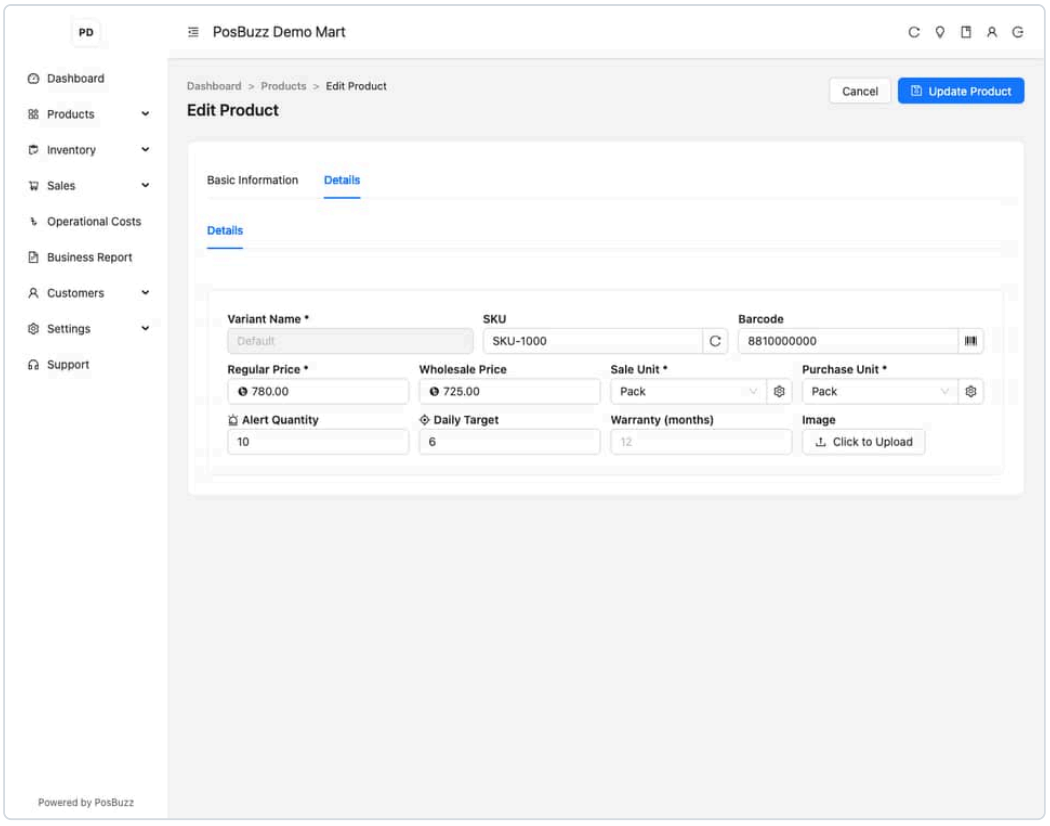

1. Click the pencil icon on the Products list, or click **Edit Product** on Product Details.
2. Change what you need on either tab.
3. To add a variant, click **Add Variant**. To remove one, use its **Delete** button. Removed variants are deleted only when you click **Update Product**.
4. Click **Update Product**.

What happens next: You see "Product updated successfully" and go back to the Products list. If it fails you see the server's reason or "Failed to update product".

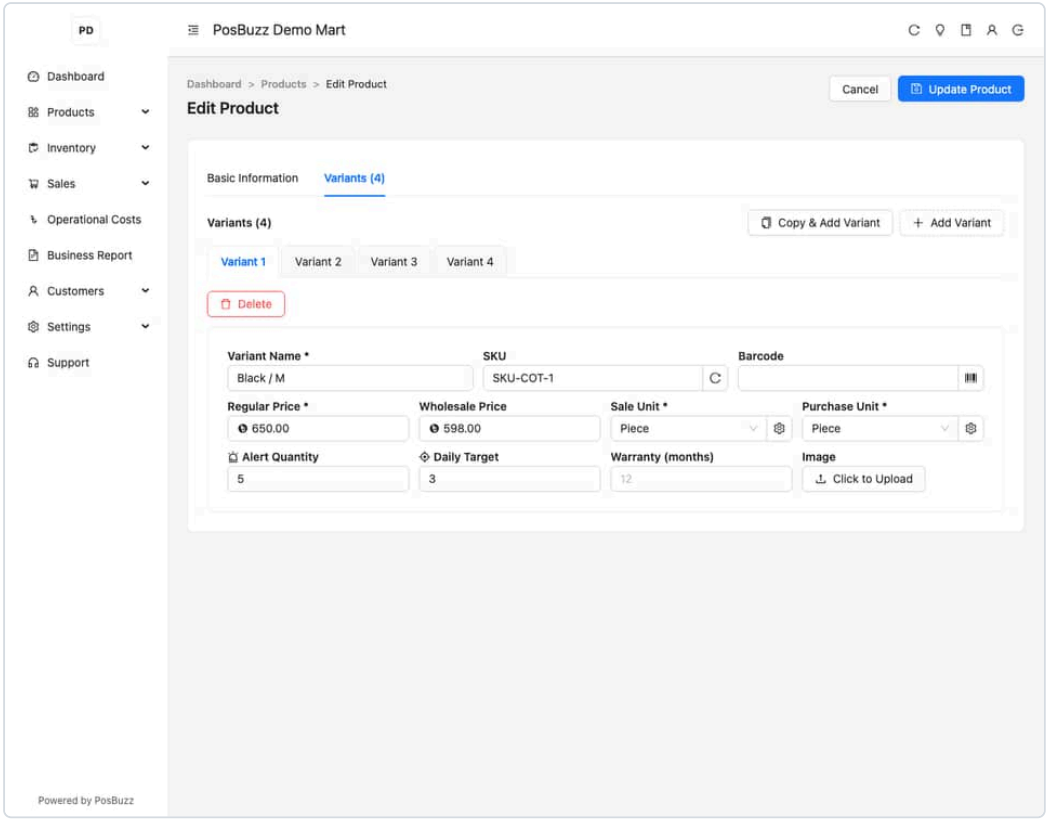

> **Good to know:** The **Add Inventory** sub-tab is not there when you edit. To change stock later, use the Inventory screens. Serial numbers and attributes that a variant already has are kept when you save, but this form has no fields to add or change them.

Edit Product has Basic Information and Details only, with no Add Inventory part.

Details of a simple product when editing.

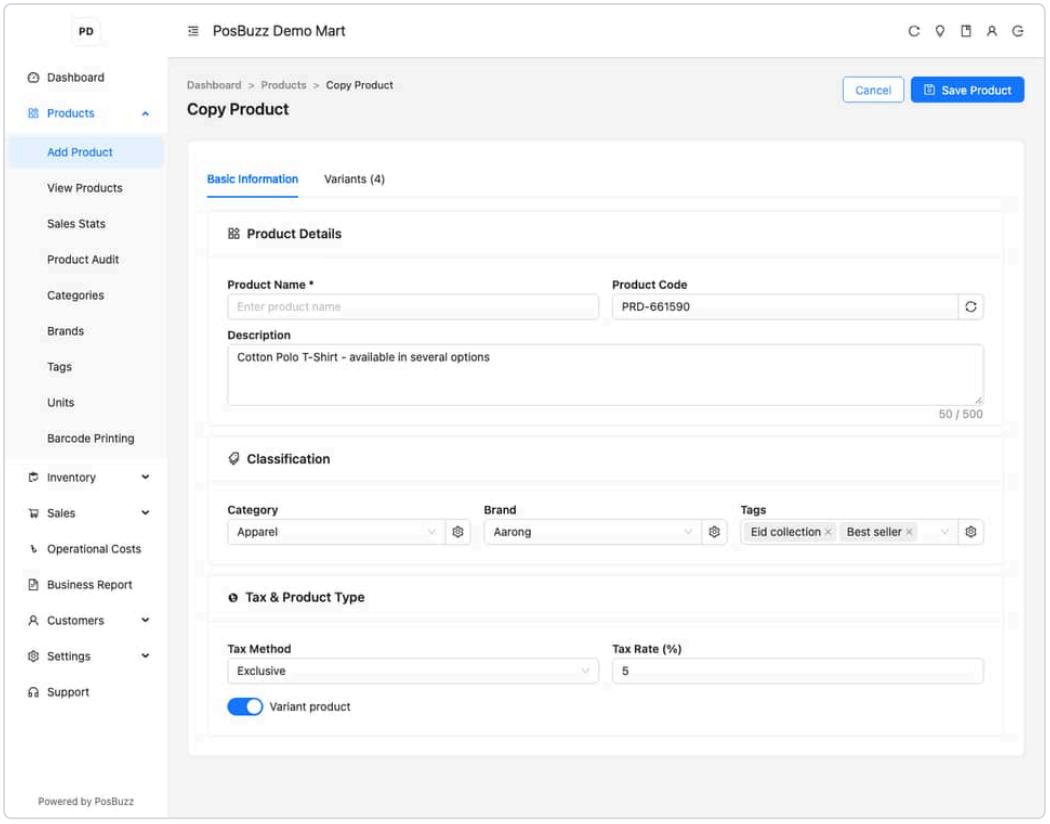

A variant product has Variants (4) with Variant 1 to Variant 4 and no inventory part.

How to copy a product

1. Click the copy icon on the Products list, or **Copy Product** on Product Details.
2. The form opens titled **Copy Product**. It has the description, category, brand, tags, tax, and each variant's prices, units, alert, target, warranty and image.
3. The **Product Name** is empty. Type the new name.
4. A new Product Code (starting "PRD-" and 6 digits) is made for you. Each variant gets a new SKU and barcode.
5. Change what you need. Add opening stock if you want.
6. Click **Save Product**.

What happens next: The new product is created. Attributes, serial numbers and stock of the old product are not copied.

Copy Product: the name is empty, a new code PRD-661590 is made and the tags, category and variants are copied.

Checking errors before you save

When you click **Save Product** or **Update Product**, the form checks your entries. Errors show in red under the field, and the field gets a red border. An error clears as soon as you change that field.

Good to know: When the form has errors, the message at the top reads only "Failed to create product" (or "Failed to update product"). The real reasons are the red texts under the fields. Errors on the Details or Variants tab cannot be seen while you are on Basic Information, so switch tabs to find them. The yellow box "Please resolve validation errors before saving." appears on that tab.

Message	What it means	What to do
Product name is required	The name is empty.	Type a name.
Tax rate must be a whole number between 0 and 100	The rate is not a whole number or is out of range.	Use 0 to 100 without decimals.
At least one variant is required	No variant exists.	Keep at least one variant.
Simple product can only have one variant	A simple product has two or more variants.	Turn on **Variant product** or remove extra variants.
Variant product cannot be converted back to simple product.	You tried to change a saved variant product to simple.	Keep it as a variant product.
Name is required	A variant has no name.	Type the variant name.
Regular price is required	The Regular Price is empty or 0.	Enter a price above 0.
Sale unit is required	No Sale Unit chosen.	Choose one. Add a unit first if the list is empty.
Purchase unit is required	No Purchase Unit chosen.	Choose one.
Wholesale price cannot be negative	A Wholesale Price below 0.	Enter 0 or more.
SKU must be unique	Two variants of this product share a SKU.	Change one, or use the reload button.
Barcode must be unique	Two variants of this product share a barcode.	Change one, or use the barcode button.
Batch branch is required	A stock batch has no branch.	Choose a branch.
Batch reference is required	A batch has no batch number.	Type one or click the reload button.
Batch quantity is required	A batch has no quantity.	Enter 1 or more.
Batch cost cannot be negative	Cost price is below 0.	Enter 0 or more.
Provider is required	You chose MFS but no provider.	Choose a provider under **Select MFS**.
Payments exceed total cost	Payment rows add up to more than quantity times cost.	Lower the amounts.

Message	What it means	What to do
Same batch number must use the same expiry date	Two rows share a batch number but have different expiry dates.	Make the dates match.
You can only upload JPG/PNG file!	The image is another file type.	Use a JPG or PNG.
Image must be smaller than 10MB!	The image is too big.	Use a smaller image.
{file} upload failed.	The upload did not work.	Try again.
A product with this name already exists.	The name is taken.	Use another name.
A product with this code already exists.	The code is taken.	Use another code.
Product limit reached: ...	Your plan limit is reached.	Upgrade your plan.
Simple products can only have one variant	The server found two or more variants on a simple product.	Use a variant product.
New variants require all required fields	A new variant is missing something required.	Fill in the name, price and units.
Variant n: batch number "..." has different expiry dates in row a and row b. Same batch number must use the same expiry date.	Same as the batch rule above.	Make the dates match.
Product created successfully	The new product was saved.	Nothing.
Product updated successfully	The change was saved.	Nothing.
Failed to update product	The change could not be saved.	Check the red texts, then try again.
New variant added	A blank variant was added.	Fill it in.

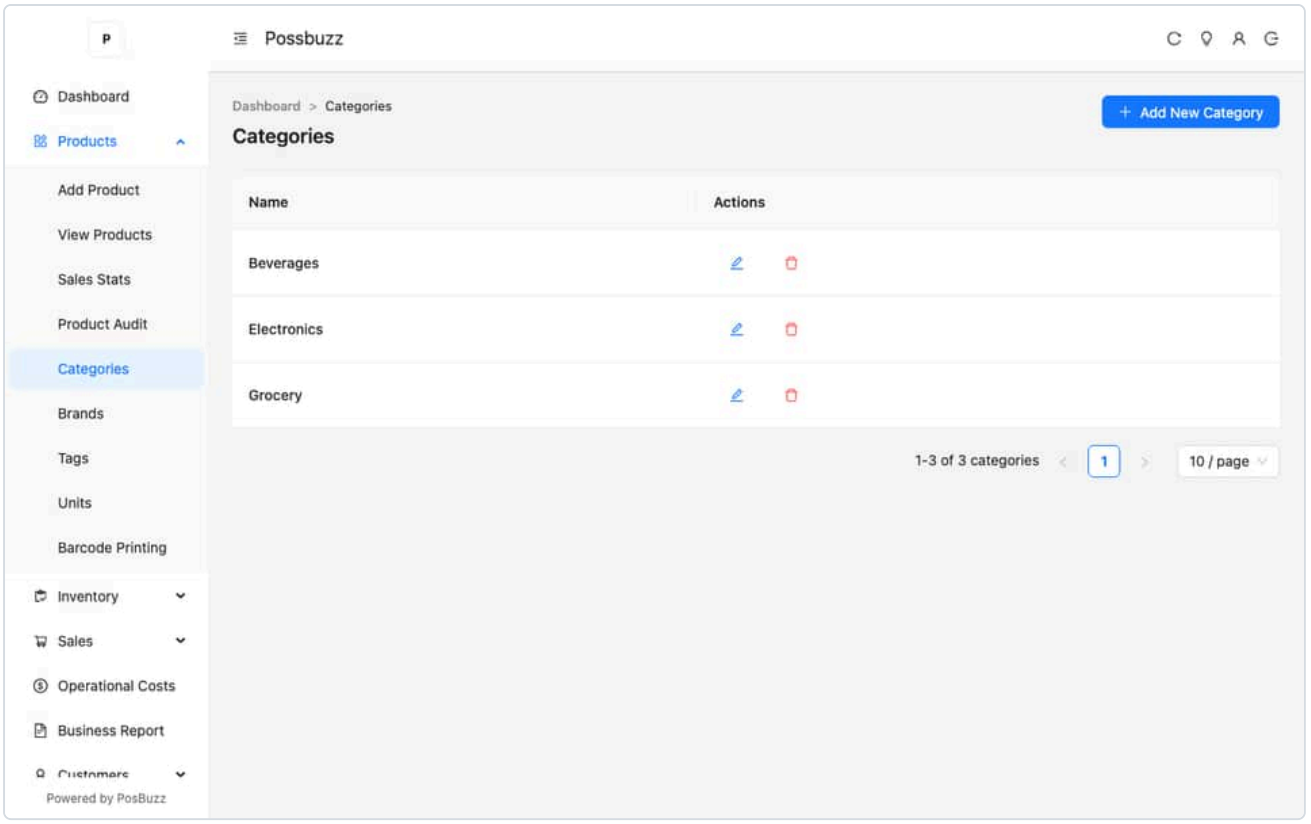

Categories

What it is

The list of groups (for example Beverages, Snacks, Dairy) that you use to sort products and to filter the Products list.

Where to find it

Menu: **Products > Categories**. You need the permission to edit products or to add products.

The Categories list.

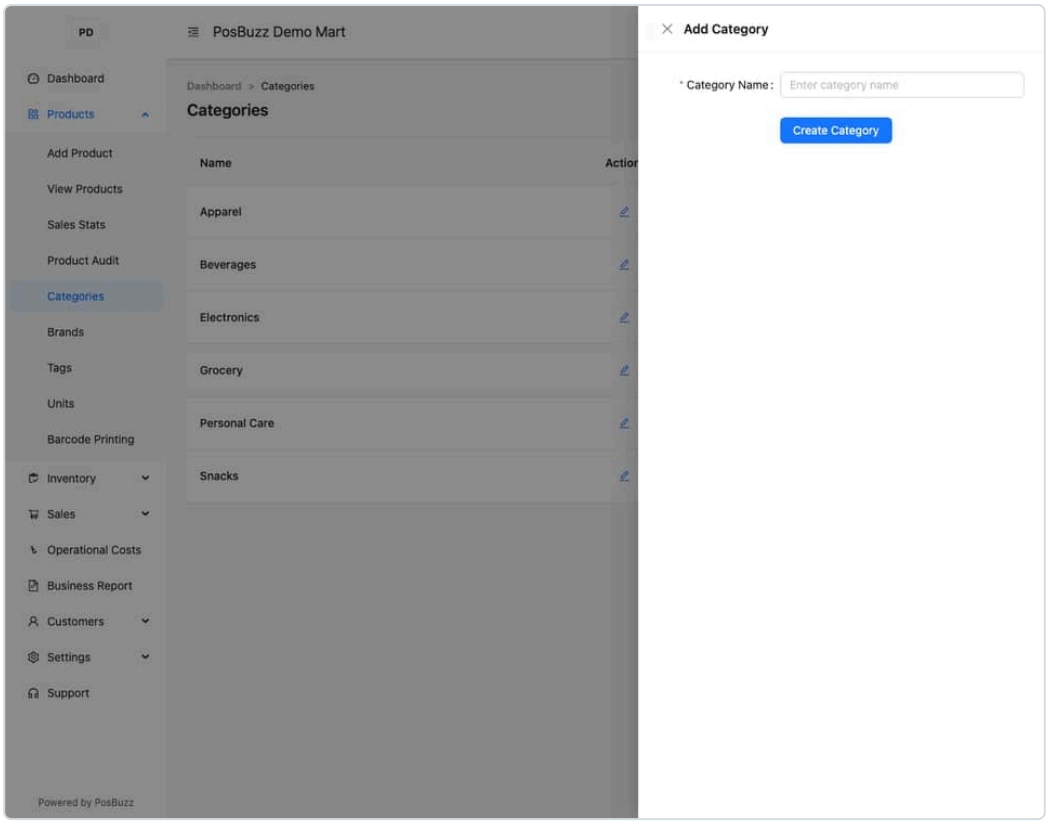

What you see

- A blue button **Add New Category** at the top right.
- A table with two columns: **Name** (in bold) and **Actions** (a pencil to edit and a red bin to delete).
- At the bottom: "1-3 of 3 categories", page buttons, a page size choice and a jump box. The default is 10 per page.
- If the list cannot load, you see "Failed to load categories".

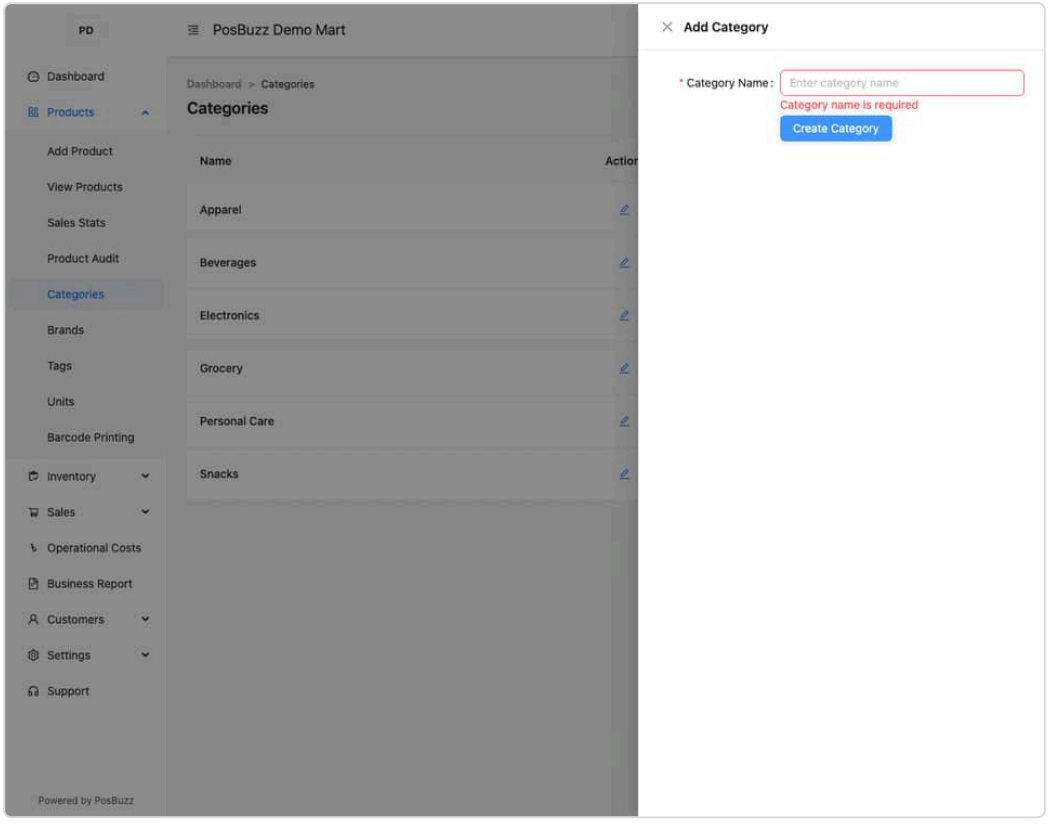

The side form. Adding or editing opens a panel on the right. Its title is **Add Category** or **Update Category**. Close it with the x.

Field	Required	Notes
Category Name	Yes	Hint "Enter category name". Must be unique in your shop.

The button at the bottom reads **Create Category** (new) or **Update Category** (edit).

The side panel for a new category.

Leaving the name empty shows the required message in red.

How to add a category

1. Click **Add New Category**.
2. Type the **Category Name**.

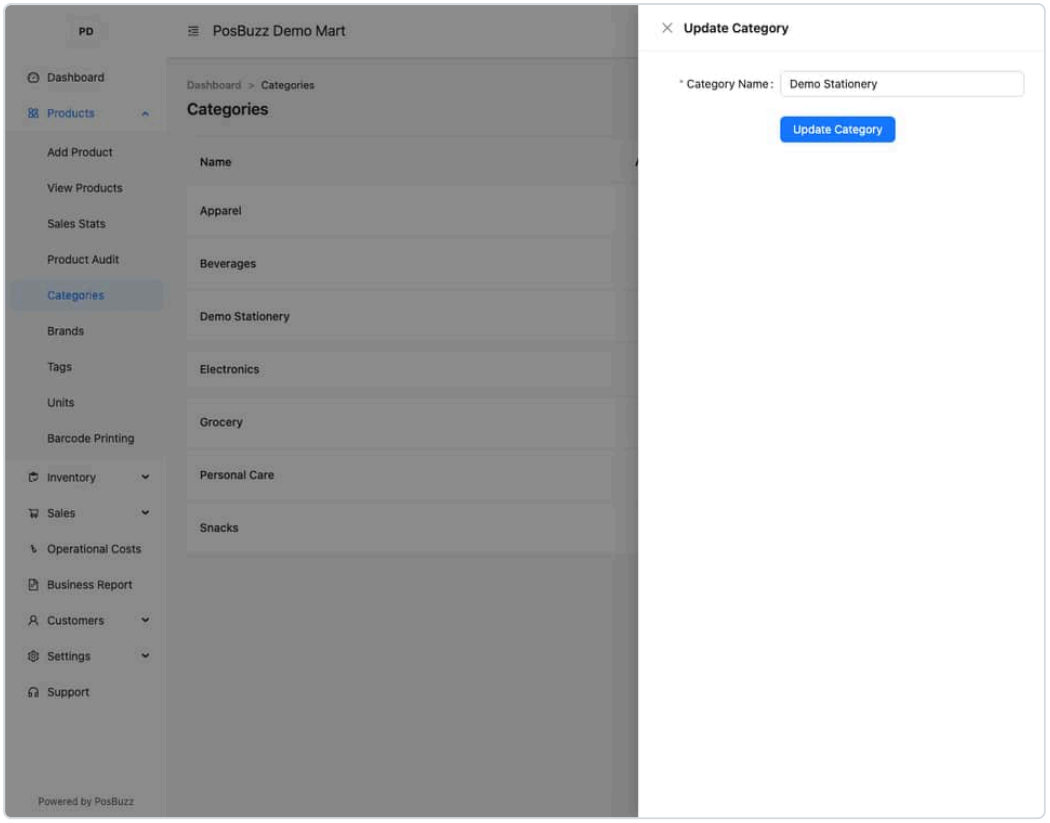

3. Click **Create Category**.

What happens next: You see "Category created successfully". The panel closes and the list refreshes.

How to edit a category

1. Click the pencil on the row.
2. Change the **Category Name**.
3. Click **Update Category**.

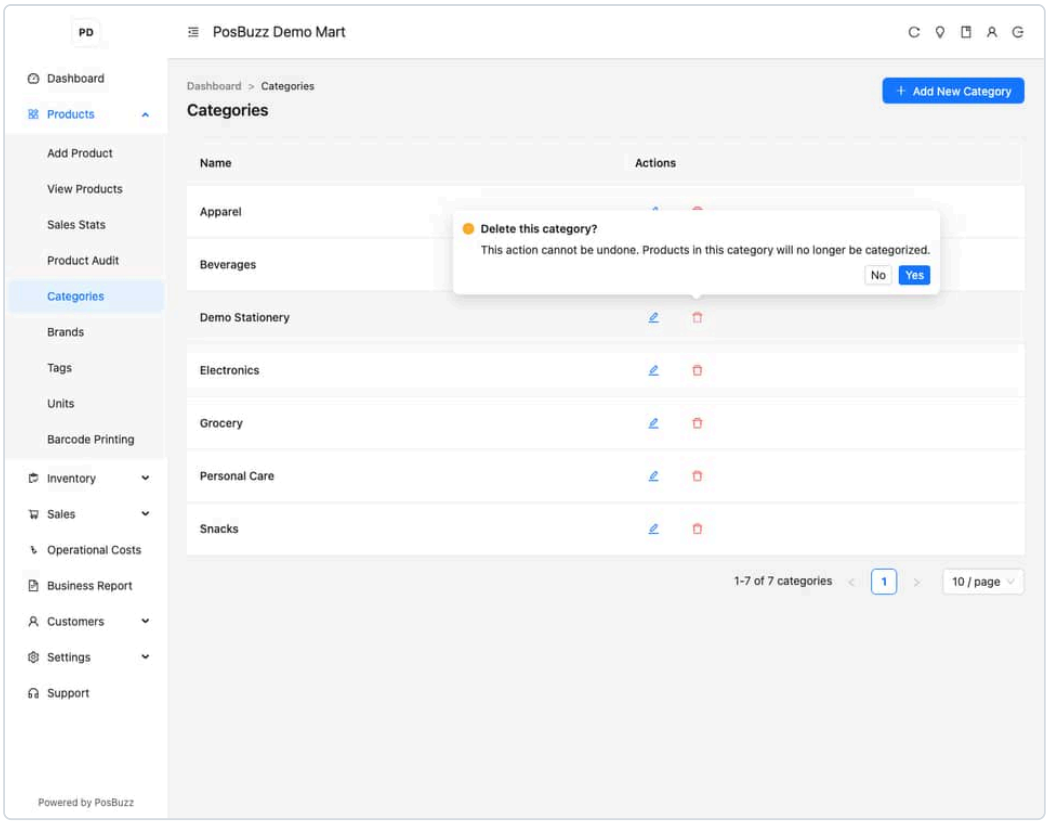

What happens next: You see "Category updated successfully".

The same panel when editing, with the name filled in.

How to delete a category

1. Click the red bin on the row.
2. Read the question **Delete this category?** and "This action cannot be undone. Products in this category will no longer be categorized."
3. Click **Yes**. Click **No** to cancel.

The Delete this category? question with No and Yes.

What happens next: You see "Category deleted successfully". The products are not deleted. They show "No category" instead.

> **Good to know:** You can also add, edit and delete categories from the gear button on the product form.

Messages on this screen

Message	What it means	What to do
Category name is required	The name is empty.	Type a name.
Category created successfully	Saved.	Nothing.
Category updated successfully	Saved.	Nothing.
Category deleted successfully	Removed.	Nothing.
A category with this name already exists.	The name is taken.	Use another name.
Failed to create category / Failed to update category / Failed to delete category	The action failed and the server gave no reason.	Try again.
Failed to load categories	The list could not load.	Refresh the page.

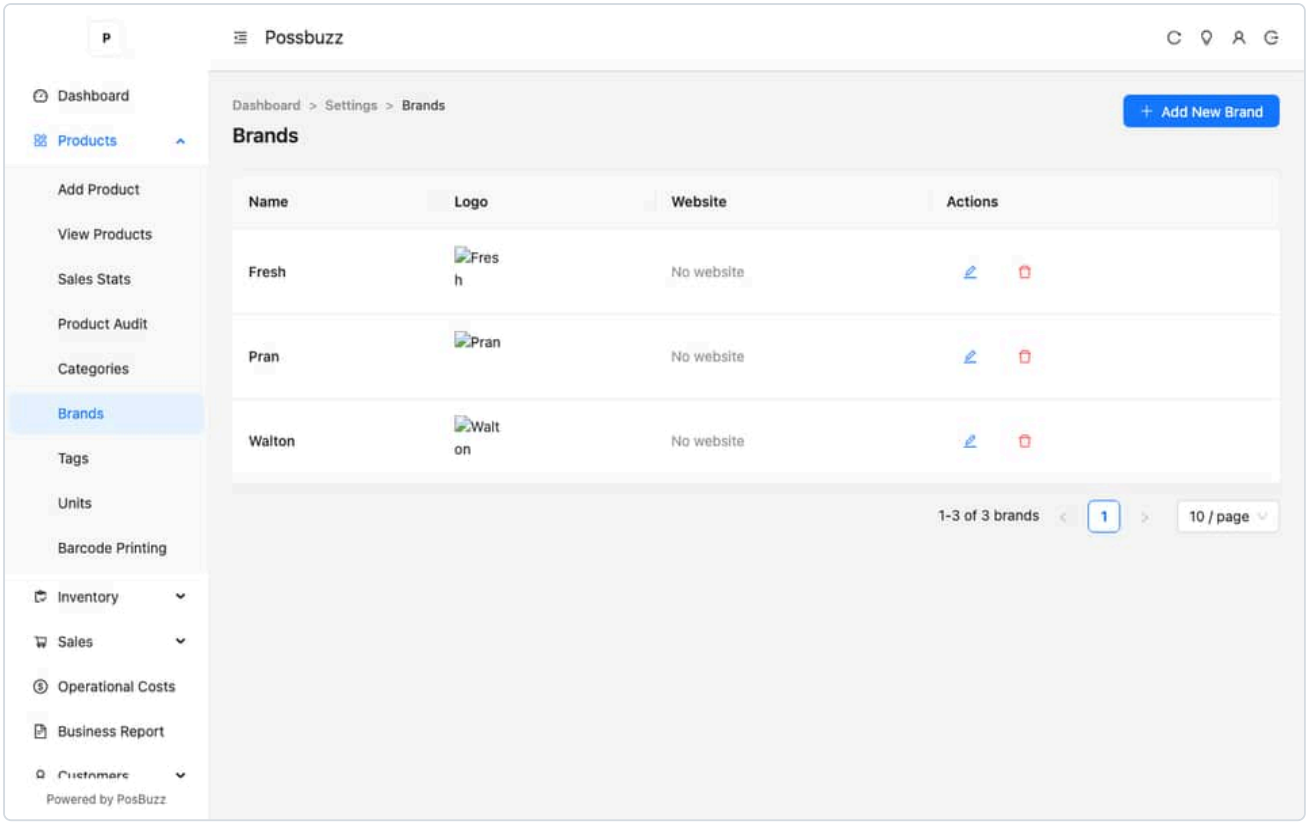

Brands

What it is

The list of brands you sell, each with an optional logo and website.

Where to find it

Menu: **Products > Brands**. You need the permission to edit products or to add products.

The Brands list with logo and website columns.

What you see

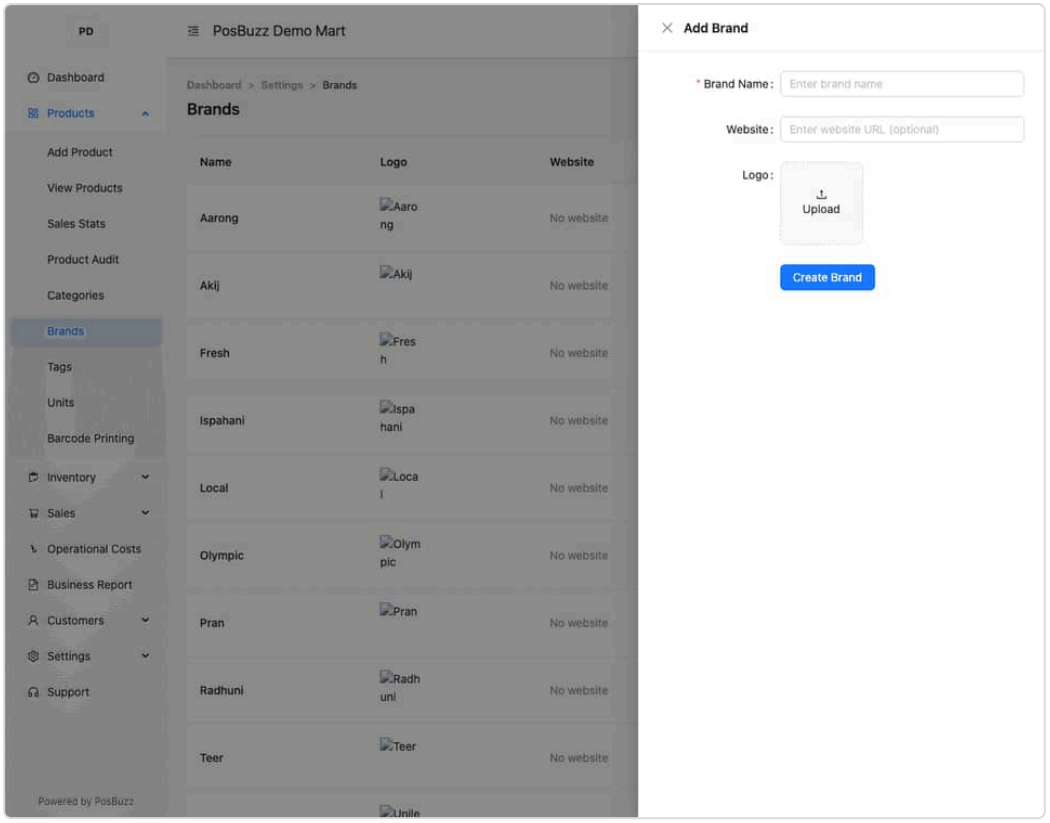

- The path at the top reads Dashboard > Settings > Brands.
- A blue button **Add New Brand**.
- A table with these columns: **Name** (bold), **Logo** (a small picture; click it to enlarge), **Website** (a clickable link that opens in a new tab, or a grey "No website") and **Actions** (a pencil and a red bin).
- At the bottom: "1-3 of 3 brands" with page controls.
- If the list cannot load: "Failed to load brands".

> **Good to know:** The word "Settings" in the path at the top is a link that does not lead to a real page. Use the side menu instead. If a brand has no logo, the Logo column may show a broken picture box with the brand name in text, as in the screenshot.

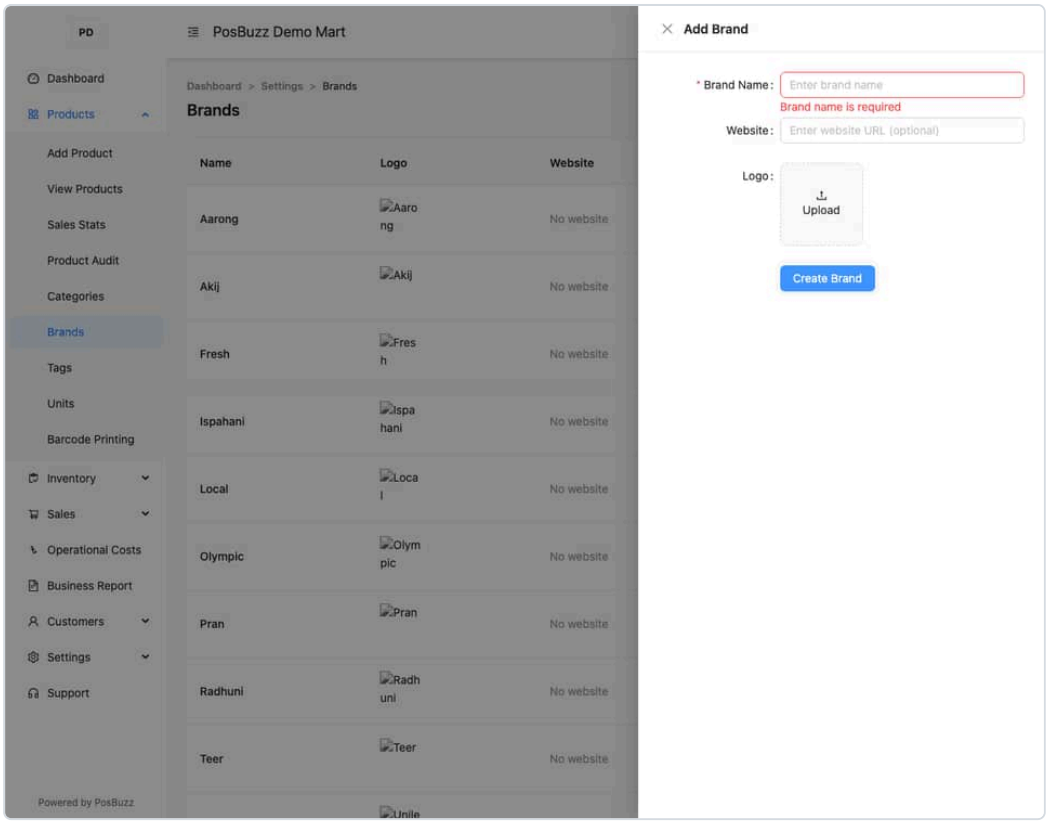

The side form. Title **Add Brand** or **Update Brand**.

Field	Required	Notes
Brand Name	Yes	Hint "Enter brand name". Must be unique in your shop.
Website	No	Hint "Enter website URL (optional)". Must be a valid address. Start with https://.
Logo	No	An "Upload" box. One JPG or PNG under 10 MB.

The button reads **Create Brand** or **Update Brand**.

The side panel for a new brand.

Leaving the name empty shows the required message in red.

How to add a brand

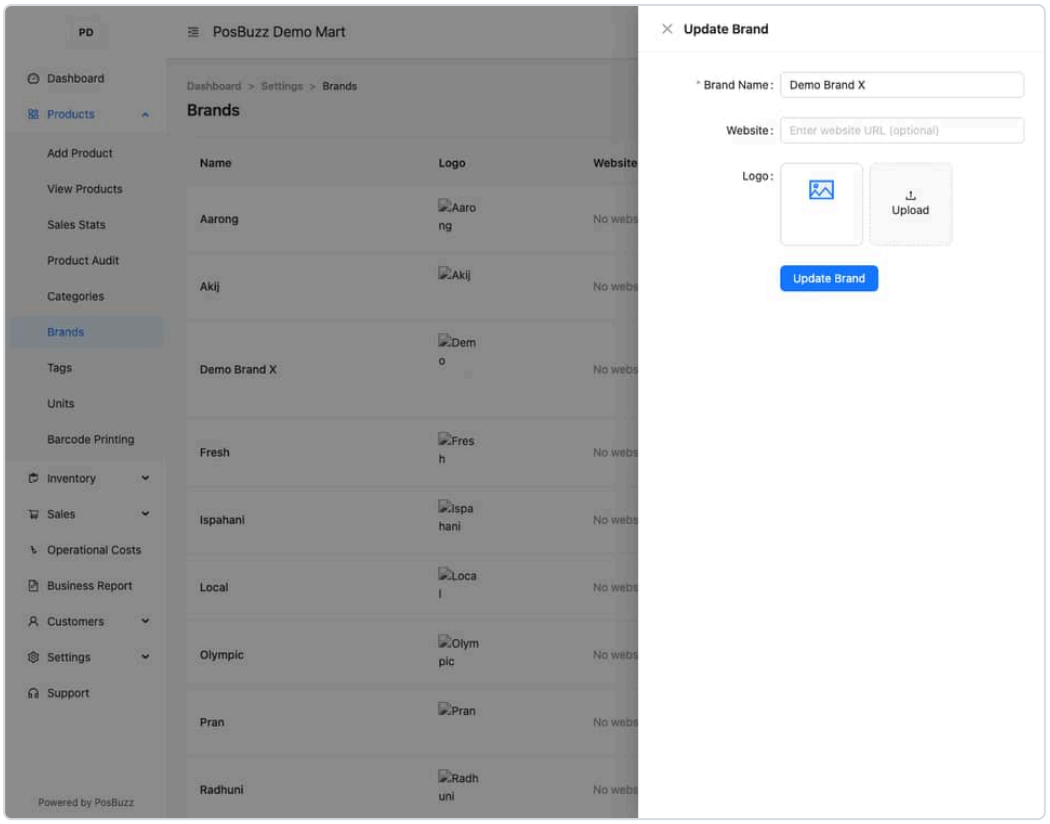

1. Click **Add New Brand**.
2. Type the **Brand Name**.
3. Type the **Website** if you want (include https://).
4. Click the **Upload** box and choose a logo if you want.
5. Click **Create Brand**.

What happens next: You see "Brand created successfully" and the list refreshes.

How to edit a brand

1. Click the pencil on the row.
2. Change the name, website or logo.
3. Click **Update Brand**.

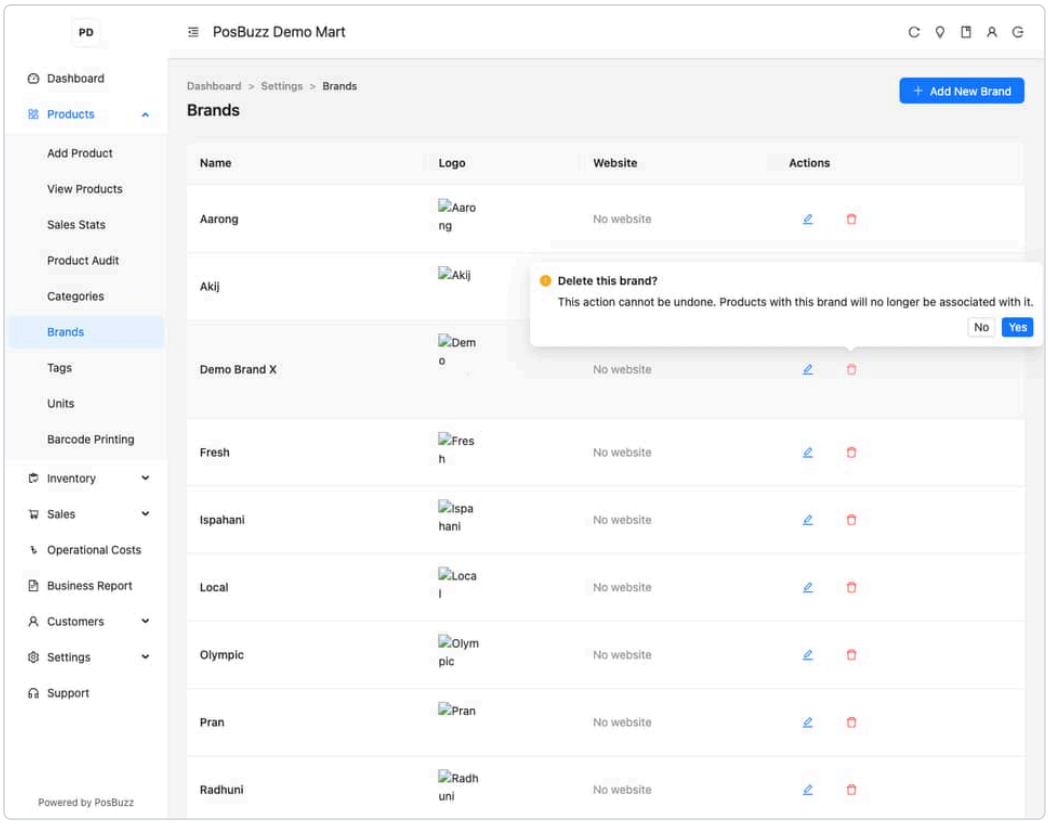

What happens next: You see "Brand updated successfully".

The same panel when editing, with the name filled in.

How to delete a brand

1. Click the red bin on the row.
2. Read **Delete this brand?** and "This action cannot be undone. Products with this brand will no longer be associated with it."
3. Click **Yes**, or **No** to cancel.

The Delete this brand? question with No and Yes.

What happens next: You see "Brand deleted successfully". Products stay, and show "No brand".

> **Good to know:** The gear button on the product form changes only the brand name. Set logos and websites here.

Messages on this screen

Message	What it means	What to do
Brand name is required	The name is empty.	Type a name.
Please enter a valid website URL	The website is not a proper address.	Type it like https://example.com.
You can only upload JPG/PNG file!	Wrong file type.	Use a JPG or PNG.
Image must be smaller than 10MB!	Logo is too big.	Use a smaller file.
{file} upload failed.	The upload did not work.	Try again.
Brand created successfully / Brand updated successfully / Brand deleted successfully	The action worked.	Nothing.
A brand with this name already exists.	The name is taken.	Use another name.
Failed to create brand / Failed to update brand / Failed to delete brand	The action failed with no reason given.	Try again.
Failed to load brands	The list could not load.	Refresh the page.

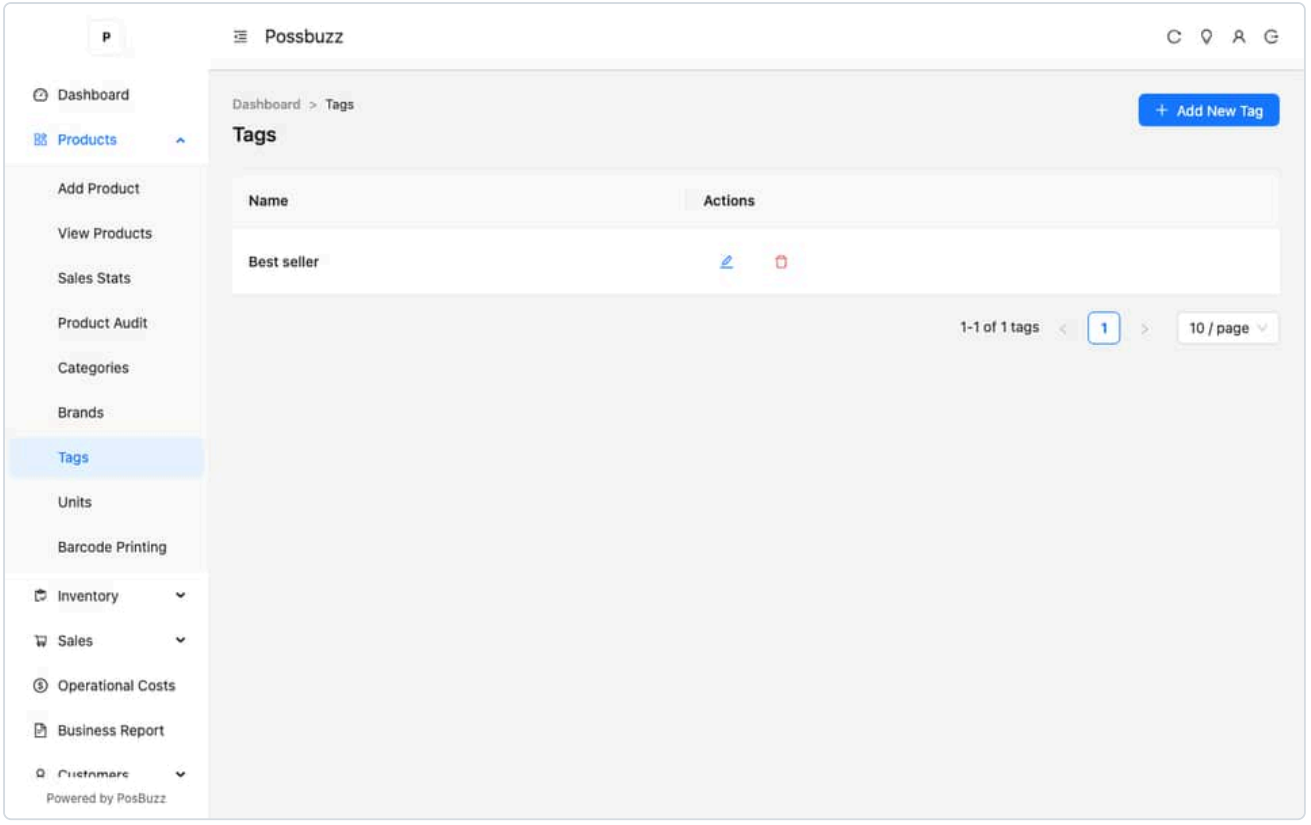

Tags

What it is

Short labels such as "New Arrival", "Halal" or "Best Seller" that you can put on many products. You can filter the Products list by tag.

Where to find it

Menu: **Products > Tags**. You need the permission to edit products or to add products.

The Tags list.

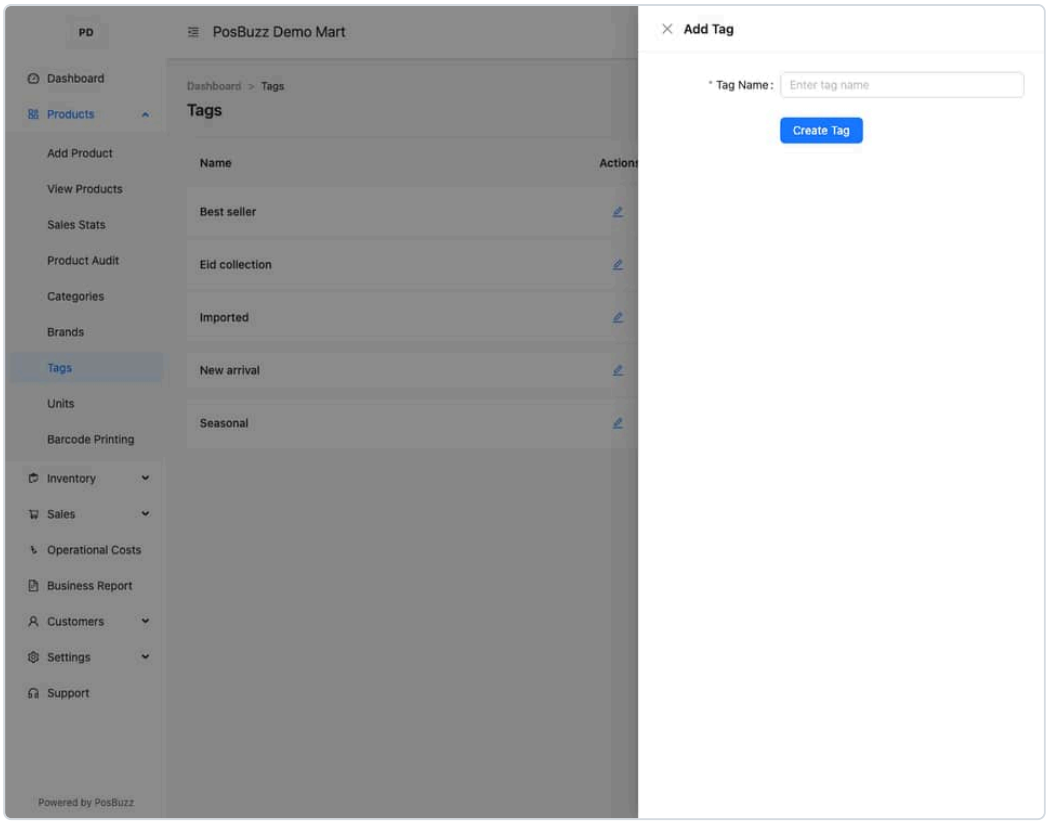

What you see

- A blue button **Add New Tag**.
- A table with **Name** and **Actions** (a pencil and a red bin).
- At the bottom: "1-1 of 1 tags" with page controls.
- If the list cannot load: "Failed to load tags".

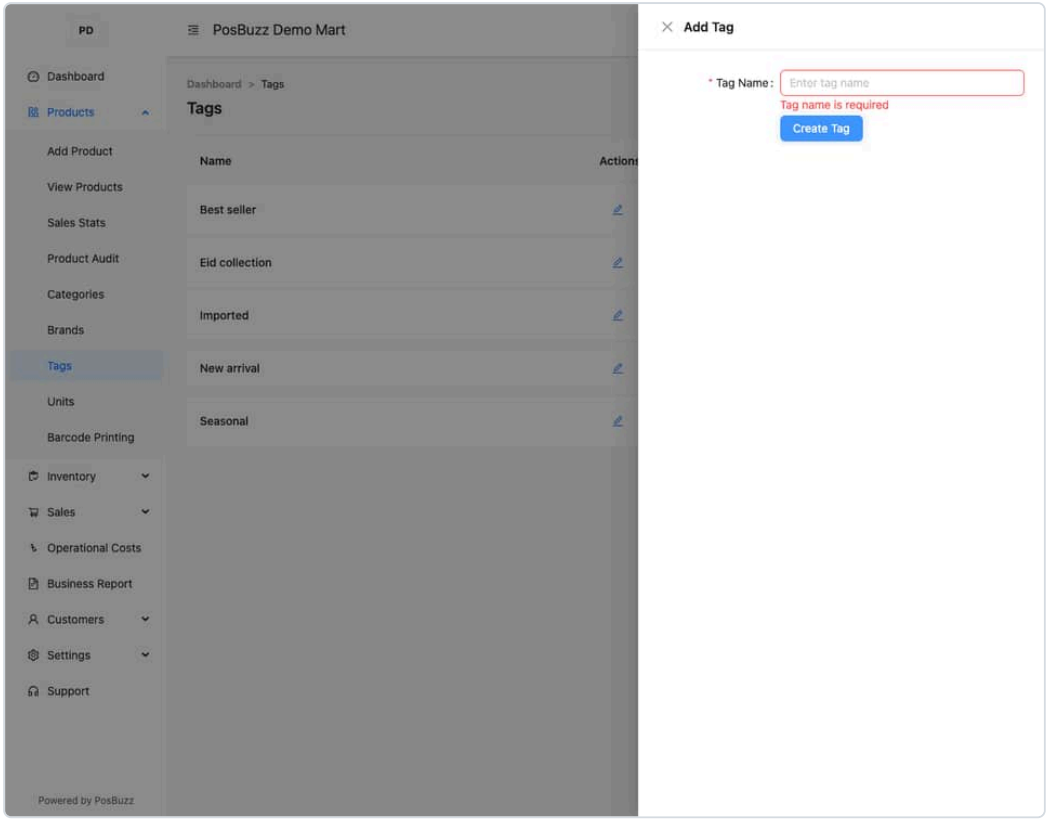

The side form. Title **Add Tag** or **Update Tag**.

Field	Required	Notes
Tag Name	Yes	Hint "Enter tag name". Must be unique in your shop.

The button reads **Create Tag** or **Update Tag**.

The side panel for a new tag.

Leaving the name empty shows the required message in red.

How to add a tag

1. Click **Add New Tag**.
2. Type the **Tag Name**.

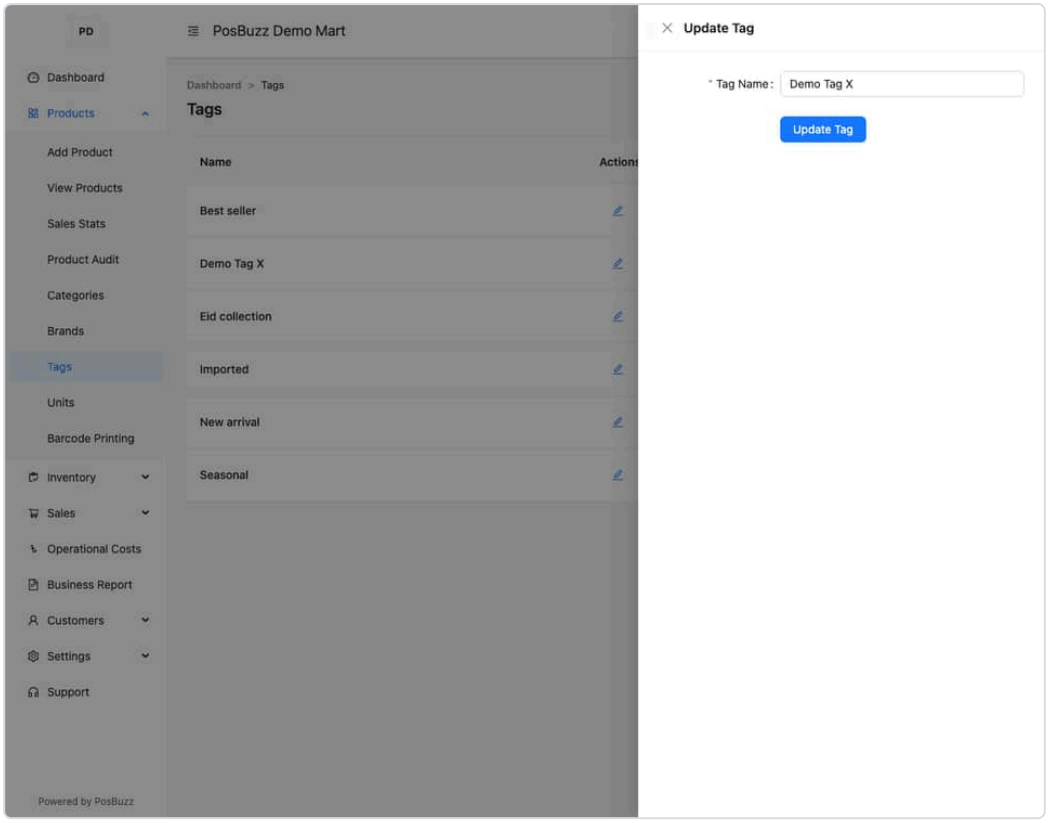

3. Click **Create Tag**.

What happens next: You see "Tag created successfully".

How to edit a tag

1. Click the pencil on the row.
2. Change the **Tag Name**.
3. Click **Update Tag**.

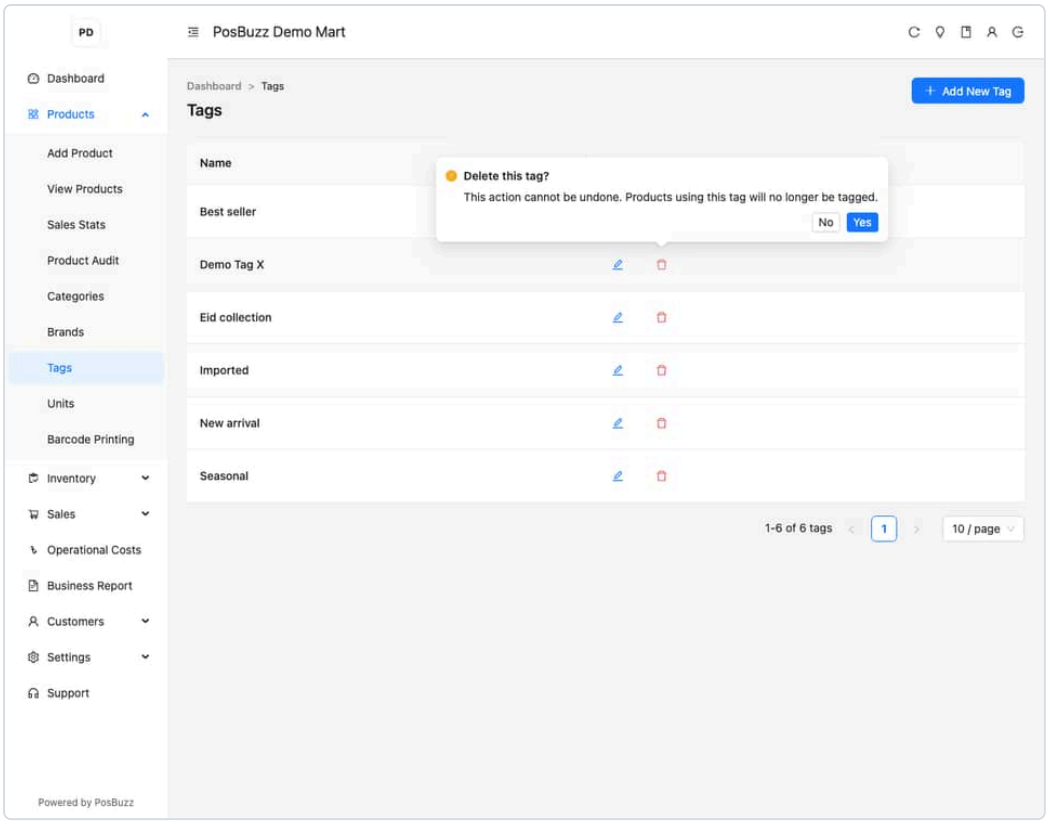

What happens next: You see "Tag updated successfully".

The same panel when editing, with the name filled in.

How to delete a tag

1. Click the red bin on the row.
2. Read **Delete this tag?** and "This action cannot be undone. Products using this tag will no longer be tagged."
3. Click **Yes**, or **No** to cancel.

The Delete this tag? question with No and Yes.

What happens next: You see "Tag deleted successfully". The tag is taken off every product that had it. The products stay.

A product can have many tags. To put a tag on a product, use the **Tags** field on the product form.

Messages on this screen

Message	What it means	What to do
Tag name is required	The name is empty.	Type a name.
Tag created successfully / Tag updated successfully / Tag deleted successfully	The action worked.	Nothing.
Failed to create tag / Failed to update tag / Failed to delete tag	The action failed.	Try again.
Failed to load tags	The list could not load.	Refresh the page.

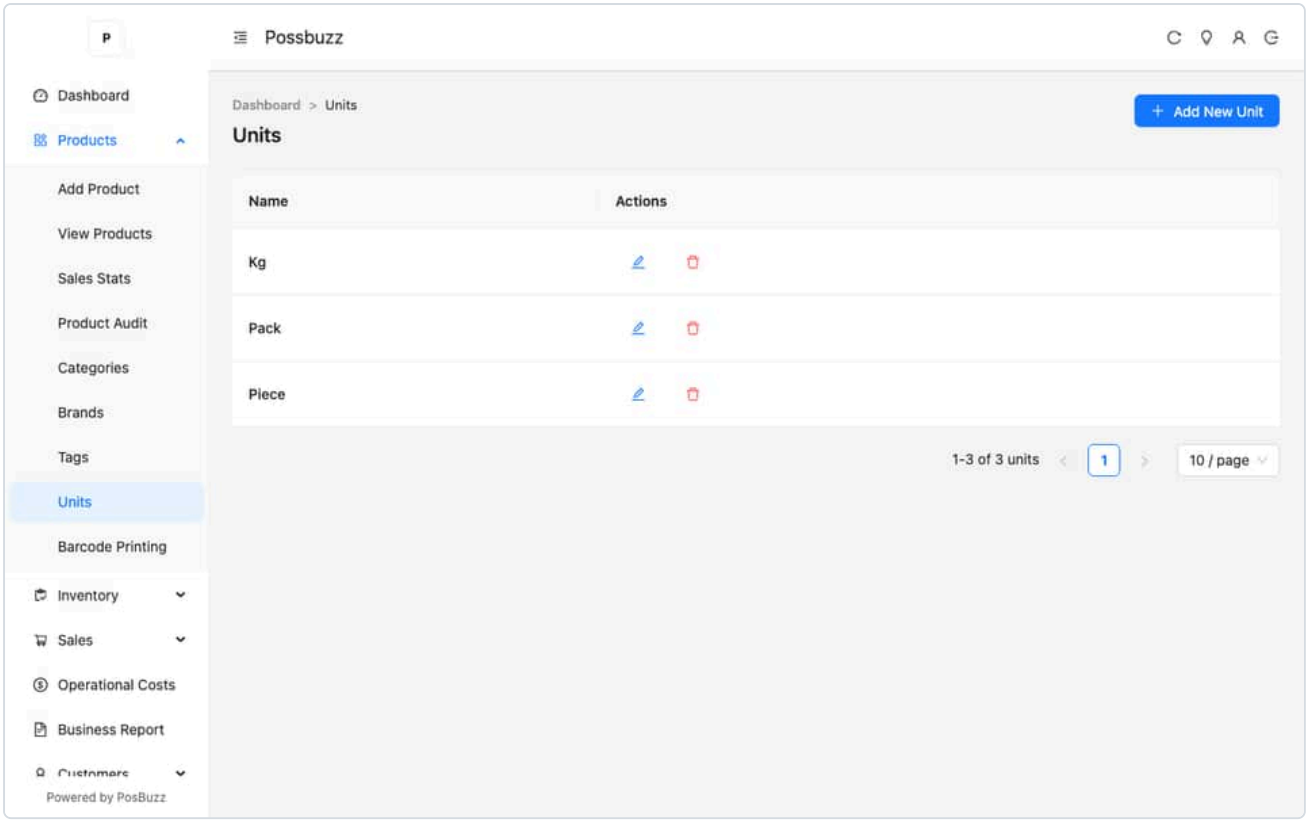

Units

What it is

The units you measure and sell by, such as Piece, Kilogram, Liter or Box. Each variant needs a Sale Unit and a Purchase Unit chosen from this list.

Where to find it

Menu: **Products > Units**. You need the permission to edit products or to add products.

The Units list.

What you see

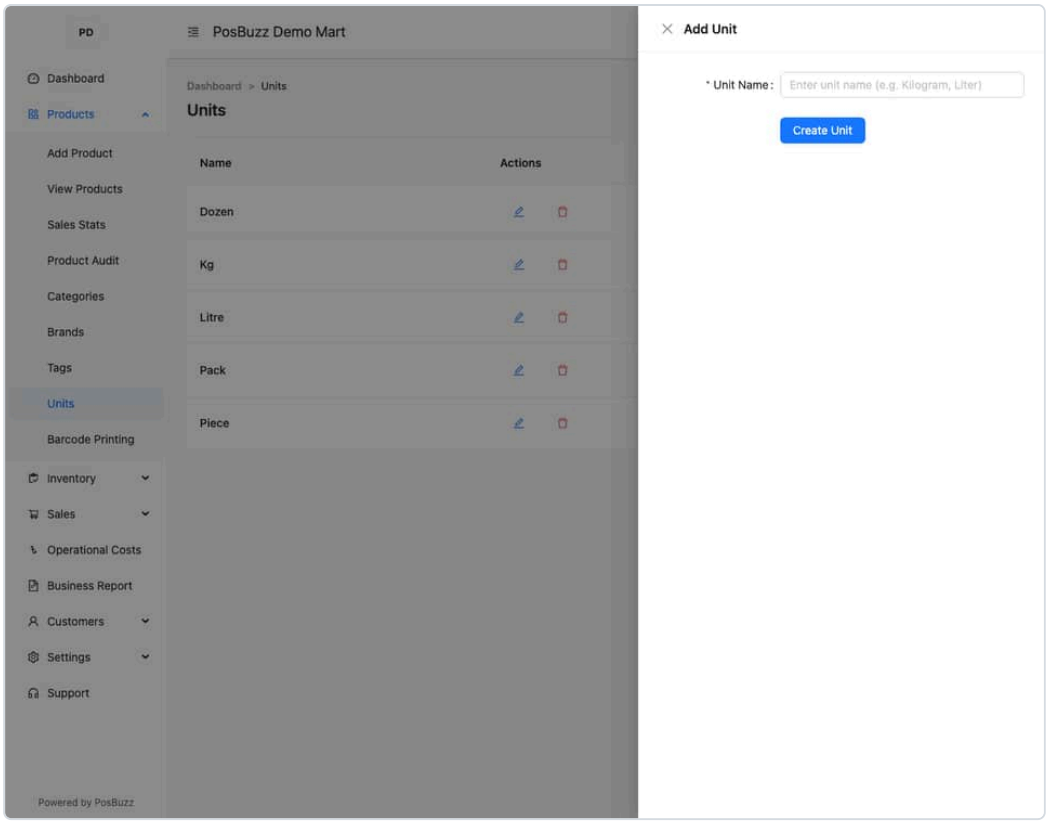

- A blue button **Add New Unit**.
- A table with **Name** and **Actions** (a pencil and a red bin).
- At the bottom: "1-3 of 3 units" with page controls.
- If the list cannot load: "Failed to load units".

The side form. Title **Add Unit** or **Update Unit**.

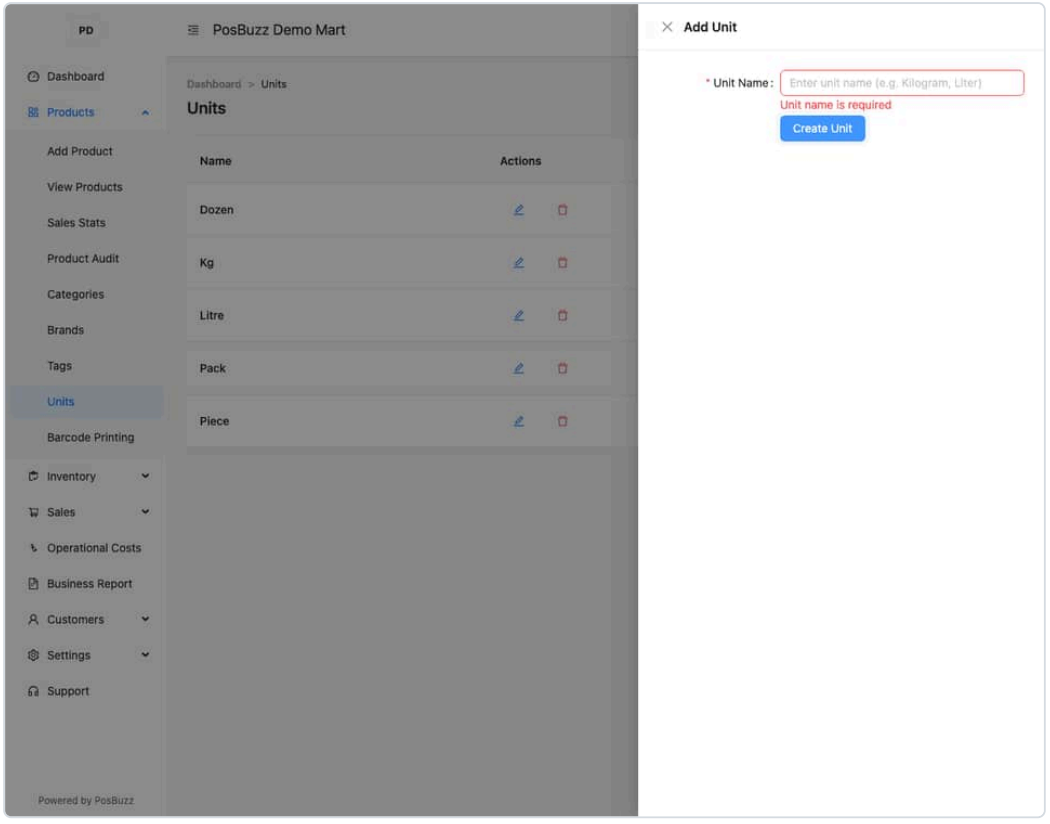

Field	Required	Notes
Unit Name	Yes	Hint "Enter unit name (e.g. Kilogram, Liter)".

The button reads **Create Unit** or **Update Unit**. Only a name is stored. There is no field for a unit code on this page.

> **Good to know:** You need at least one unit before you can save any product, because Sale Unit and Purchase Unit are required.

The side panel for a new unit.

Leaving the name empty shows the required message in red.

How to add a unit

1. Click **Add New Unit**.
2. Type the **Unit Name**, for example "Kilogram".

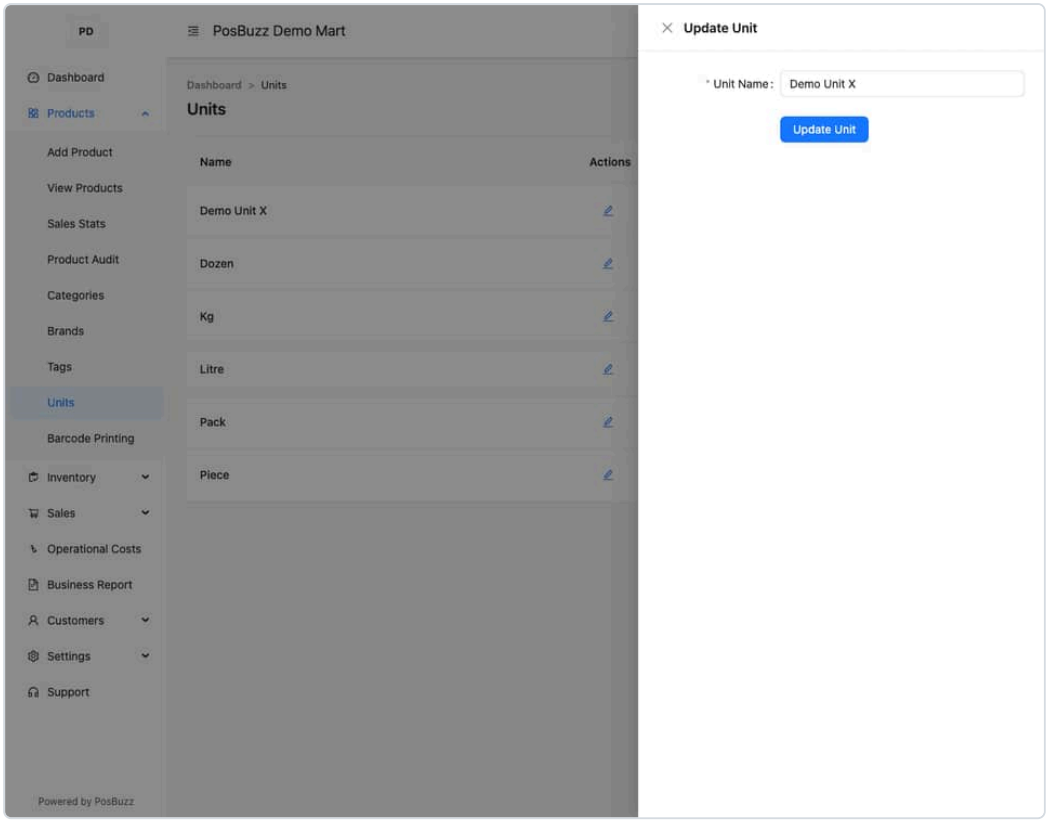

3. Click **Create Unit**.

What happens next: You see "Unit created successfully".

How to edit a unit

1. Click the pencil on the row.
2. Change the **Unit Name**.
3. Click **Update Unit**.

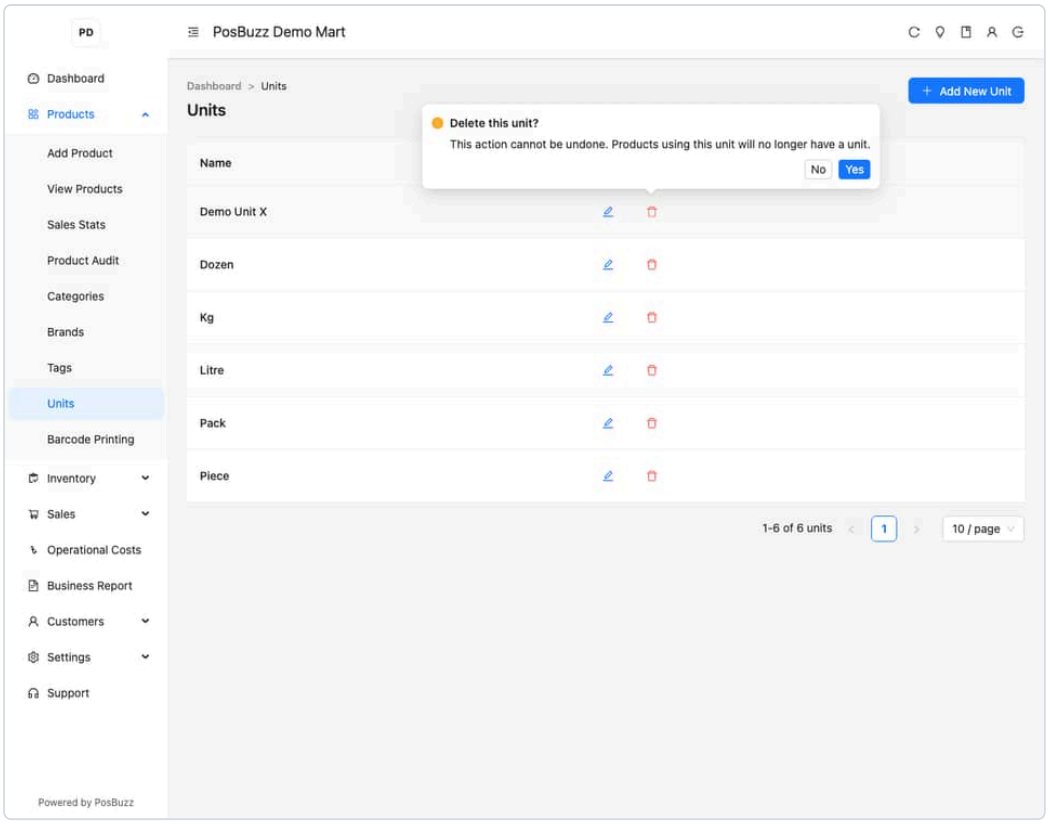

What happens next: You see "Unit updated successfully".

The same panel when editing, with the name filled in.

How to delete a unit

1. Click the red bin on the row.
2. Read **Delete this unit?** and "This action cannot be undone. Products using this unit will no longer have a unit."
3. Click **Yes**, or **No** to cancel.

The Delete this unit? question with No and Yes.

What happens next: An unused unit is removed and you see "Unit deleted successfully".

> **Good to know:** The question above says products will lose their unit. In practice, a unit that any product variant uses cannot be deleted. You will see a message like "This unit is still used by other records, so it can't be changed or deleted. Remove or reassign those first." To delete such a unit, first change the units on those products.

Messages on this screen

Message	What it means	What to do
Unit name is required	The name is empty.	Type a name.
Unit created successfully / Unit updated successfully / Unit deleted successfully	The action worked.	Nothing.
Unit with name "{name}" already exists	The name is taken.	Use another name.
This unit is still used by other records, so it can't be changed or deleted. Remove or reassign those first.	Products use this unit.	Change those products to another unit first.
Failed to create unit / Failed to update unit / Failed to delete unit	The action failed.	Try again.
Failed to load units	The list could not load.	Refresh the page.

Barcode Printing

Menu: **Products > Barcode Printing**. Requires permission to add products.

Labels print through your browser; the print-server agent is not required. The agent remains available for thermal receipts, including their sale barcode.

Choose the paper and label layout

Choose a label preset or enter a custom **Label width (mm)** and **Label height (mm)**. Roll/strip mode sizes each print page to one row of labels. Set **Labels across** for rolls with multiple stickers per row. Sheet mode supports A4 (210 × 297 mm) or custom paper dimensions.

Set the horizontal/vertical gaps, side and top/bottom margins, label padding, text size, barcode height and text alignment to match your stock. **Skip used labels** leaves the selected number of slots blank on the first sheet. The label count and page count appear beside the live preview. Quantity supports 1–1000 copies.

Choose the content

Select a product to fill its barcode, name, price and actual VAT rate, or enter your own values. Selecting a branch fills its name and address. Edit all text freely. Switch shop, branch, location, product, price/VAT and barcode text on or off separately. **Print Barcode Only** hides every text field.

Formats include CODE128 (default), CODE39, EAN13, EAN8 and UPC. Retail formats require valid digits and checksums; CODE39 uses uppercase characters. Invalid barcodes and layouts cannot print. If content exceeds the label or barcode bars become too narrow, increase the size, shorten the content or reduce/hide text.

Preview and print

1. Set dimensions to match the paper loaded in your printer.
2. Select a product or enter a barcode and optional label text.
3. Set Quantity and the content switches.
4. Check the live label, then click **Preview** to inspect the complete pages and copy layout.
5. Click **Print Label**. In the browser dialog, choose your printer and matching paper size, set scale to **100%**, and turn off browser headers and footers. Save as PDF is also available through the browser.

The browser dialog controls the printer and its paper settings. Opening it does not confirm that a physical label printed. **Clear** restores the default form.

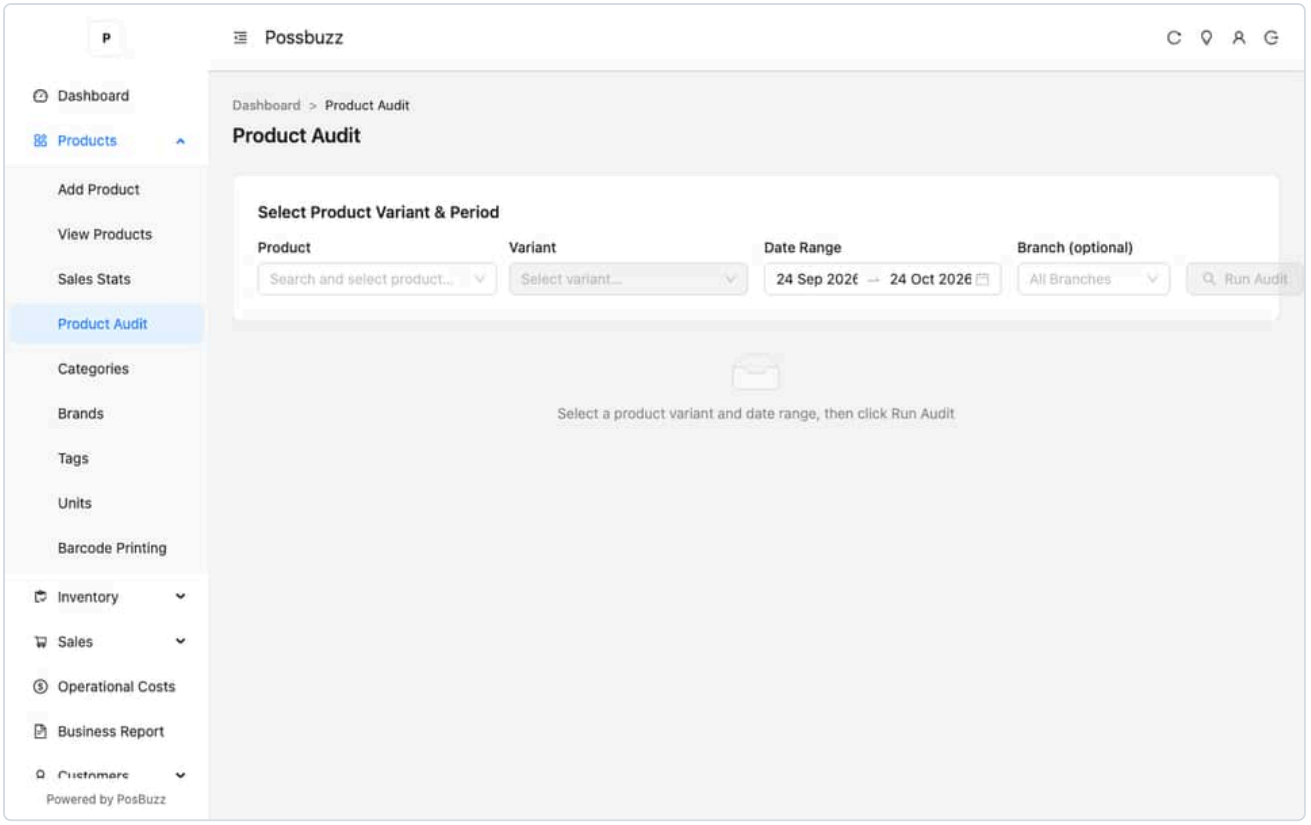

Product Audit

What it is

A history of every stock movement of one variant over a period, batch by batch. It covers purchases, sales, returns, transfers and manual changes, so you can see how the stock went from the opening figure to today's figure and who made each change. This screen only shows information. It does not change anything.

Where to find it

Menu: **Products > Product Audit**. You need the product audit permission.

The Product Audit filters before an audit is run.

What you see

A card titled **Select Product Variant & Period** with these fields:

Field	Required	Notes
Product	Yes	Searchable list, hint "Search and select product...". Options read "name (code)". It searches up to 60 products.
Variant	Yes	Hint "Select variant...". Options read "variant - SKU". Greyed out until you choose a product. Choosing another product clears it.
Date Range	Yes	A from and to picker, shown like "24 Oct 2026". It starts as the last 30 days up to today. It cannot be cleared.

Field	Required	Notes
Branch (optional)	No	Shows "All Branches". You can clear your choice.

The button **Run Audit** is greyed out until a variant is chosen.

Before you run an audit, a message says "Select a product variant and date range, then click Run Audit". While it loads, a spinner shows.

After you run the audit:

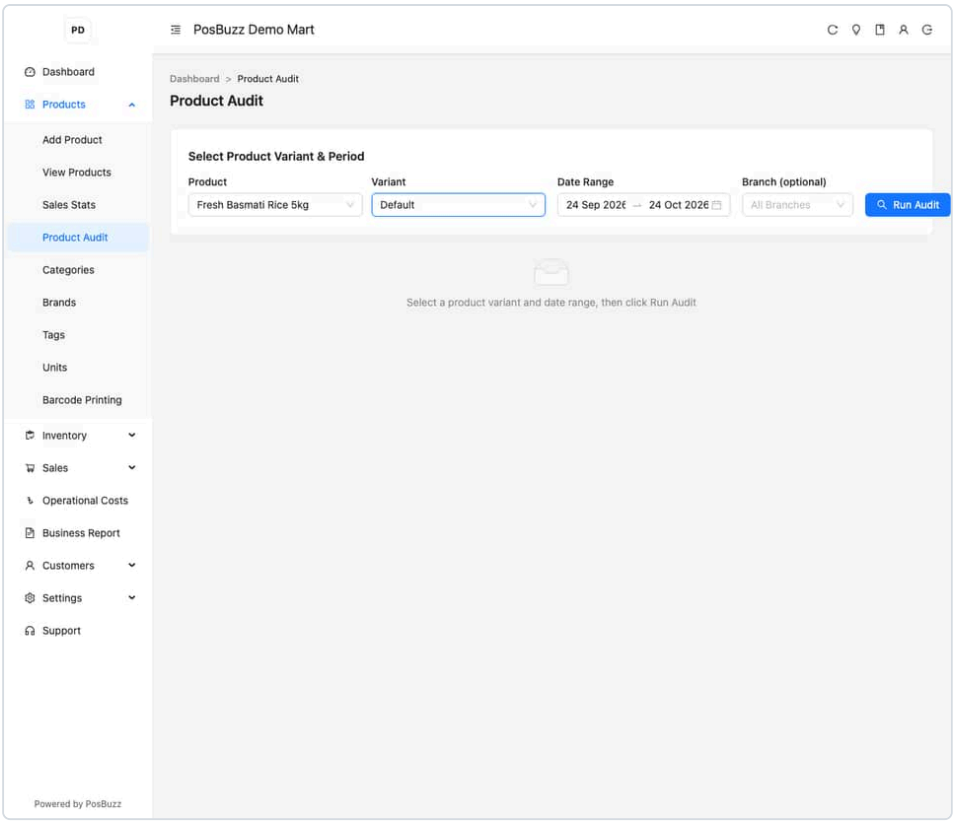

- A header card with "Product: {product} - {variant}" and "Period: {start} to {end}". It has two buttons: **Refresh** and **Download PDF**.
- Four summary cards: **Est. Opening Stock**, **Current Stock** (blue), **Net Change** (green with a plus if up, red if down) and **Total Movements**.
- **Branch Breakdown** table, only when more than one branch is involved. Columns: Branch, Opening, Current, Net Change and Events.
- Tabs:
  - **Product Info**: Product, Product Code, Variant, SKU, Barcode, Category, Brand, Sale Unit, Regular Price, Wholesale Price (a dash if missing) and Attributes (only if any).
  - **Batch Timeline (n Batches)** (opens first): one card per batch. The card title is the batch number with a branch tag (or "Unknown Branch") and an orange-red vendor tag if there is a vendor. On the right: "Period Start: qty" and "Current: qty". The table has these columns: **Date/Time**, **Event**, **Qty Change** (green plus or red minus), **Stock After**, **Details / Reference** (notes, or a dash) and **User** (a name, or "System").

Event labels:

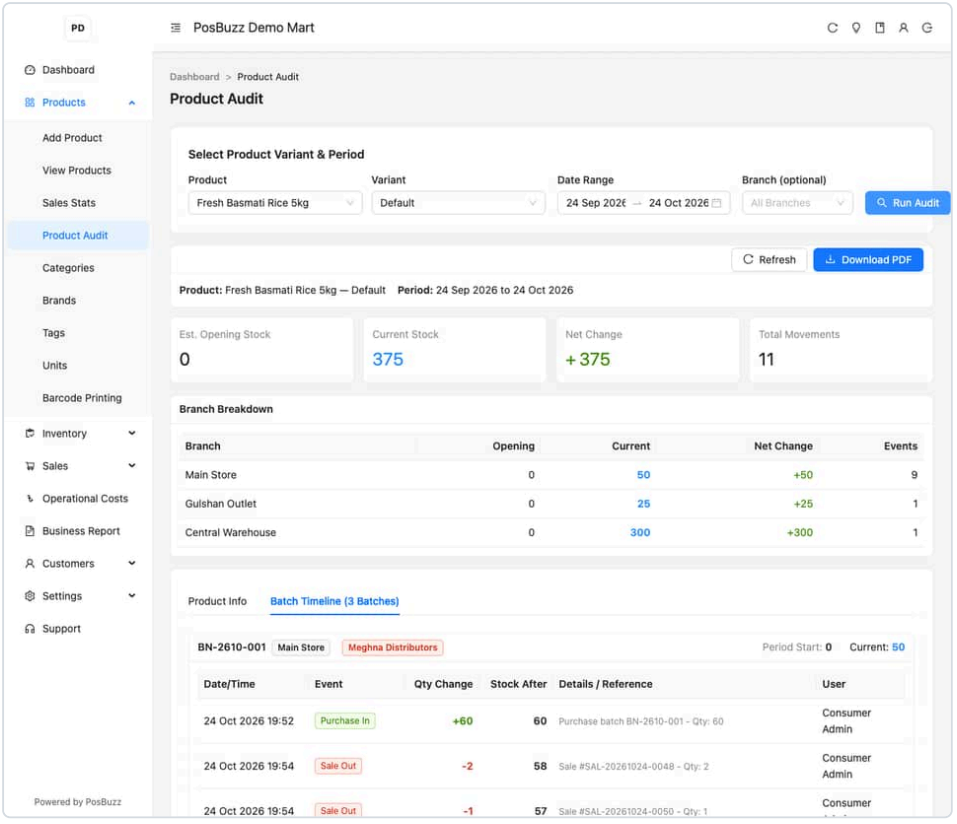

Event	Colour	Meaning
Purchase In	Green	Stock came in from a purchase.
Sale Out	Red	Stock went out by a sale.
Return Restock	Cyan	A returned item went back to stock.
Transfer Out	Orange	Stock left for another branch.
Transfer In	Blue	Stock arrived from another branch.
Manual Adjust	Purple	Someone changed the stock by hand.
Exchange Out	Magenta	Stock went out in an exchange.

Empty messages: "No batches or movements found in this period." (no batches at all) and "No movements in this period" (inside one batch card).

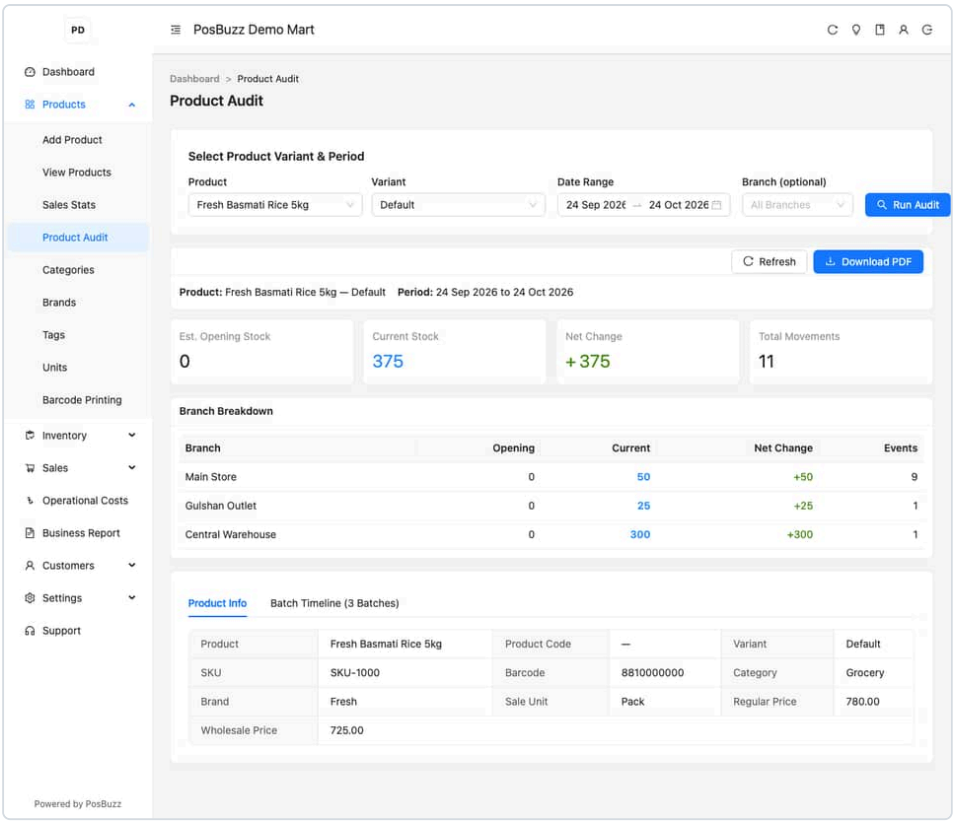

If loading fails, a red box says **Failed to load audit data** with the detail.

Product and variant chosen, ready to click Run Audit.

Summary cards, Branch Breakdown and the Batch Timeline.

The Product Info tab of the audit.

How to run an audit

1. Choose the **Product**.
2. Choose the **Variant**.
3. Change the **Date Range** if you need to. Choose a **Branch** if you want only one.
4. Click **Run Audit**.
5. Read the four summary cards.
6. Open **Batch Timeline** to read each movement.

What happens next: The audit appears below the filters. If you change any filter afterwards, it reloads by itself.

> **Good to know: Est. Opening Stock** is an estimate. It is worked back from today's stock and the movements in the period.

How to download the audit as a PDF

1. Run the audit.
2. Click **Download PDF**.

What happens next: A PDF is saved to your computer. The file name comes from the server, otherwise it is `product-audit.pdf`.

> **Good to know:** If the PDF cannot be made, no message appears and nothing downloads. Try again.

How to reload the audit

1. Click **Refresh**.

What happens next: The audit loads again with the same settings.

Messages on this screen

Message	What it means	What to do
Select a product variant and date range, then click Run Audit	No audit has been run yet.	Choose a variant and click **Run Audit**.
Failed to load audit data	The audit could not load.	Click **Refresh** or run it again.
No batches or movements found in this period.	This variant has no batches.	Check the product and dates.
No movements in this period	This batch had no movement in the dates chosen.	Widen the date range if needed.

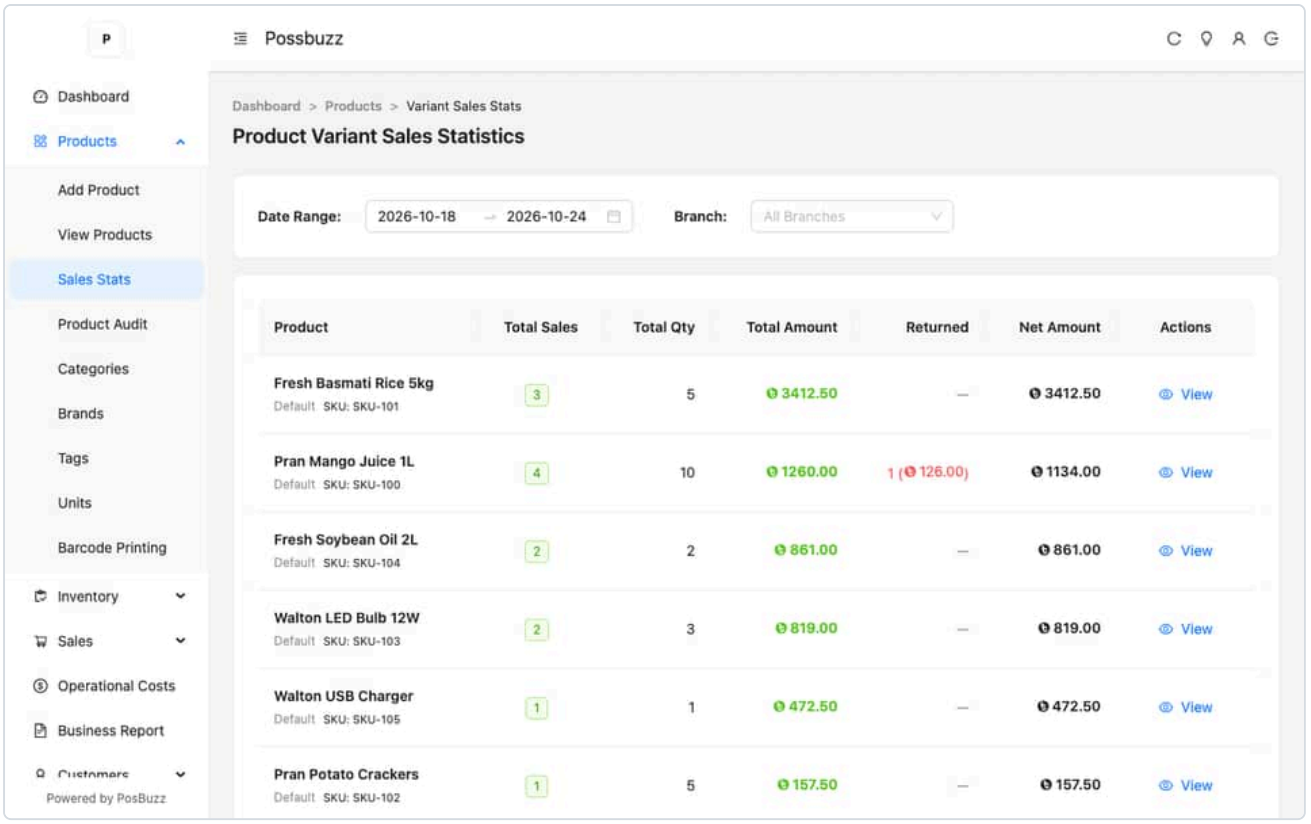

Sales Stats

What it is

Shows how much of each product variant was sold in a period: number of sales, quantity, money, returns and net money. Best sellers come first. Each variant also has its own detail page with a daily trend and every sale it appeared in.

Where to find it

Menu: **Products > Sales Stats**. You need the business insights permission. The page title is **Product Variant Sales Statistics**.

Variant sales for one week, with returns and a View link on each row.

What you see

The path at the top reads Dashboard > Products > Variant Sales Stats.

Filter card:

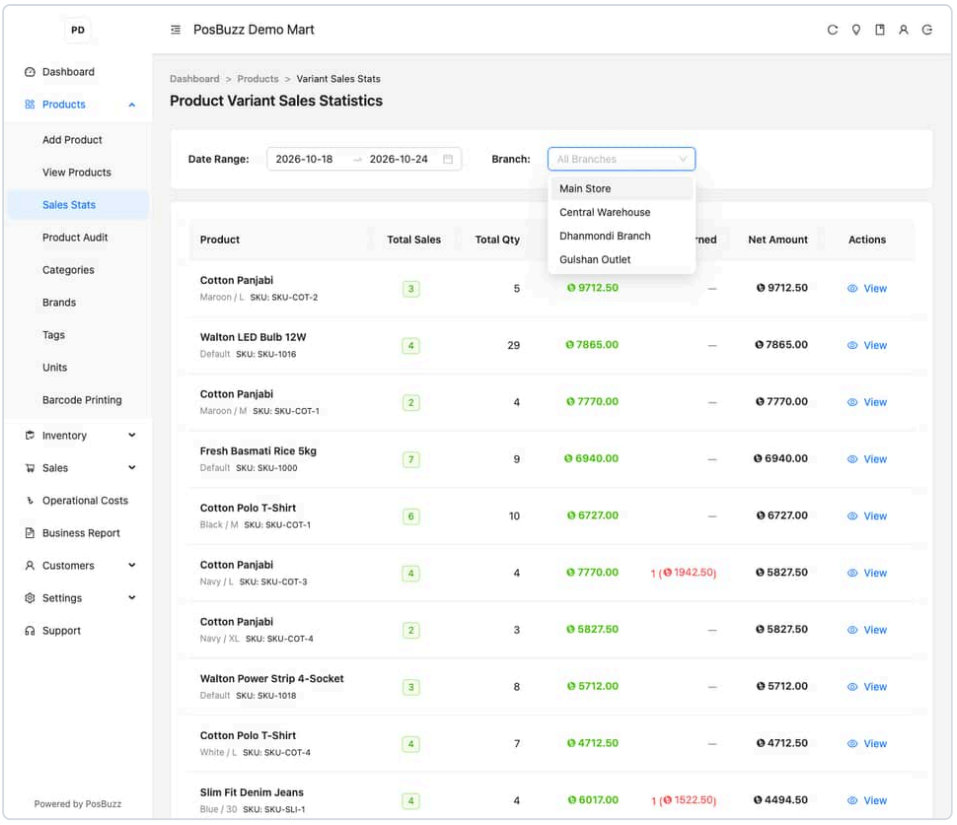

Field	Notes
Date Range	A from and to picker shown like 2026-10-18. Starts at the beginning of this week and ends today. Future dates cannot be chosen. It cannot be cleared.
Branch	Shows "All Branches". You can clear your choice.

Table. Rows are ordered by net amount, highest first. You cannot sort by clicking the headings.

Column	What it shows
Product	The product name in bold, the variant name in grey, and "SKU: ...".
Total Sales	The number of sales, in a tag (green if above 0).
Total Qty	The quantity sold.
Total Amount	The money earned, in green.
Returned	The returned quantity and its amount in red, or a dash.
Net Amount	Total Amount minus the returned amount, in bold.
Actions	A **View** link with an eye icon.

At the bottom: "1-6 of 6 variants", page controls and a page size choice (20 per page by default).

Only variants that had sales in the chosen period are listed.

The Branch list of the filter card.

How to see sales for a period

1. Choose the **Date Range**.
2. Optional: choose a **Branch**.

What happens next: The table reloads by itself and goes back to page 1.

How to open one variant's detail

1. Click **View** on the row.

What happens next: The variant's detail page opens, with the same date range and branch.

Variant detail page (from View)

What it is. The daily sales trend of one variant and every sale it appeared in.

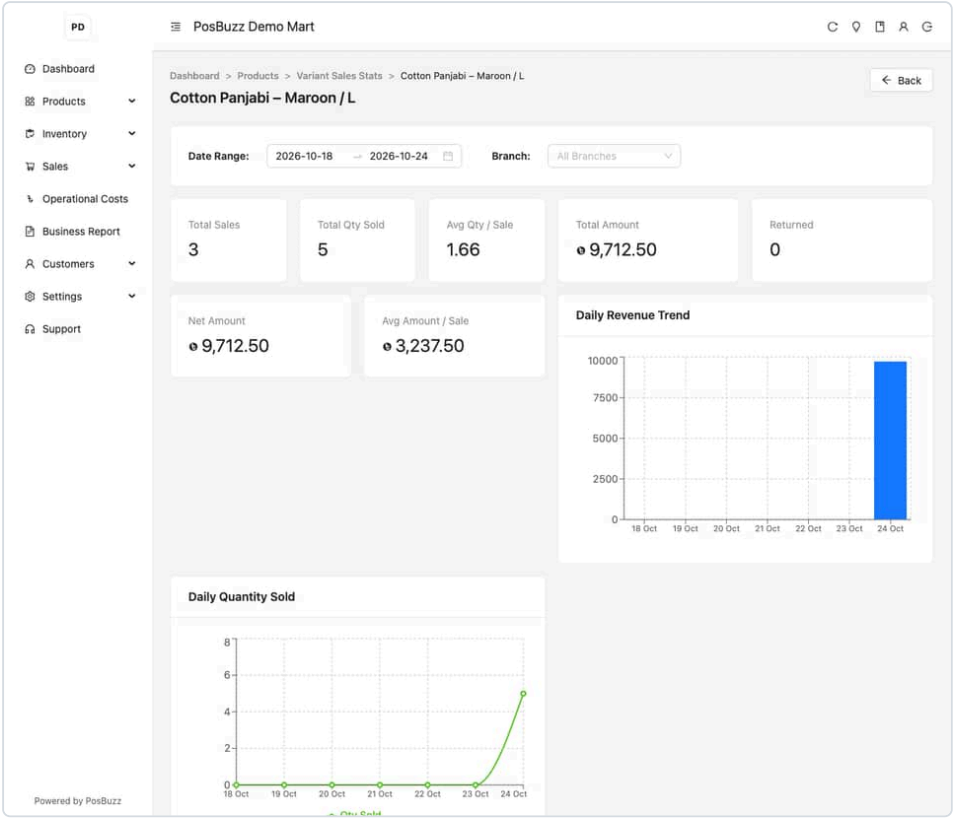

What you see.

- The page title is "product - variant" (it reads "Variant #id" until loaded). The path reads Dashboard > Products > Variant Sales Stats > the variant.
- A **Back** button (arrow) at the top right.

- A filter card with **Date Range:** (no future dates, cannot be cleared) and **Branch:** ("All Branches"). They start with the choices from the list page, or this week and all branches if you opened the page directly.
- Summary cards: **Total Sales**, **Total Qty Sold**, **Avg Qty / Sale**, **Total Amount**, **Returned** (red when above 0, with its amount in brackets), **Net Amount** and **Avg Amount / Sale**. The average figures are per sale.
- Two charts with one point for each day of the range (days with no sales show zero): **Daily Revenue Trend** (blue bars; hover to see "Amount: BDT x") and **Daily Quantity Sold** (a green line, "Qty Sold"). If there is nothing to draw: "No sales data available for selected range".
- The table **Individual Sale Records**:

Column	What it shows
Sale #	A blue link that opens that sale.
Date	The date and time, such as "24 Oct 2026, 02:15 PM".
Customer	The customer name, or a grey "Walk-in".
Branch	The branch, or a dash. Hidden on small screens.
Qty	The quantity sold.
Total Amount	The money, in green.
Returned	The returned quantity in red, or a dash.
Status	PAID (green), PARTIAL (orange), DUE (red) or CANCELLED (grey).

At the bottom: "1-20 of n records" with page controls. 20 per page by default.

Cards and charts for Cotton Panjabi, Maroon / L.

How to read one variant's sales.

1. Click **View** on the Sales Stats list.
2. Change **Date Range** or **Branch** if you want a different view. The page reloads.
3. Read the summary cards and the two charts.
4. Scroll to **Individual Sale Records**. Click a **Sale #** to open that sale.
5. Click **Back** to return to the list.

What happens next: Clicking **Back** takes you to the Sales Stats list.

> **Good to know:** When you return with **Back**, the list's filters start again from this week and all branches.

Messages on this screen

Message	What it means	What to do
No sales data available for selected range	No sales to draw a chart for.	Widen the date range.

Part 3 - Inventory, vendors and purchase payments

This part explains how to receive stock, move it between branches, correct it, check it, and keep track of what you owe your suppliers. All of these screens are under **Inventory** in the left menu.

Things that work the same on many screens:

- **Reset** (or **Reset Filters**) clears the search box and all filters on that screen.
- Search boxes wait a moment (about half a second) after you stop typing before they show results.
- Lists show a count at the bottom, such as "1-10 of 25 batches". You can change the page size to 10, 20, 50 or 100.
- Money is in taka (BDT). Most screens show a small taka sign before the amount. Purchase Payments and Make Payment show "BDT" as text.
- **Export** button: on the View Inventory screen it opens a small menu with **Export as PDF**. The file is saved as inventory.pdf. If it fails you see "Failed to export the list" (or a message from the server).
- An **Import Excel** button exists on View Inventory but is normally switched off and not shown. See "Import from Excel" under View Inventory if your shop has it.

Payment Methods rows (used when adding stock and when paying a supplier)

Two screens (Add Inventory and Make Payment) let you record how you paid. The same rows appear on both.

Item	Notes
Payment Methods heading and **Add Payment Method** button	Adds another payment row. A new row starts as Cash and is filled with the amount still unpaid.
Method	Choose one: Cash, Card, Cheque, Bank Transfer, Mobile Money or MFS. The box says "Method" until you choose.
Provider	Appears only for Card, Bank Transfer and MFS. For Card and Bank Transfer the box says "Select bank" and lists banks in Bangladesh. For MFS it says "Select MFS" and lists bKash, Nagad, Rocket, MyCash, Islami Bank mCash, Trust Axiata Pay (TAP), FirstCash, Upay, OK Wallet, Rupali Bank, Telecash, Islamic Wallet and Meghna Pay.
Amount	Shows "0.00" until you type. Cannot be below 0. Two decimal places.
Reference	Optional text, for example a cheque number or a transaction number.
Red delete button	Removes the row. It is switched off when only one row is left.
Footer	Shows **Total Cost**, **Paying** and **Remaining**. Remaining turns green when it reaches 0.

Message	What it means	What to do
CARD payment must have a provider selected (the same for BANK TRANSFER and MFS)	A Card, Bank Transfer or MFS row has an amount but no bank or MFS chosen.	Pick the bank or MFS in that row, then try again.

Vendor picker and quick vendor forms (used on Add Inventory and Edit Inventory)

On the stock form, the **Supplier/Vendor** box says "Select supplier/vendor". You can type to search by name, contact person, phone or email. Each choice shows the vendor name and "Contact: ...". When you point at a choice, small Edit and Delete icons appear. At the bottom of the list is the **Add new vendor** button.

How to add a vendor from the stock form

1. Open the **Supplier/Vendor** box.
2. Press **Add new vendor**.
3. Fill in the **Add New Vendor** window (fields below).
4. Press **Create**.

Field	Required	Notes
Vendor Name	Yes	At least 2 characters, at most 100.
Contact Person	No	At most 100 characters.
Phone Number	No	At most 20 characters.
Email	No	At most 100 characters. Must look like an email address.
Address	No	At most 255 characters. Three-line box.

What happens next: You see "Vendor created successfully" and the new vendor is chosen for you on the stock form.

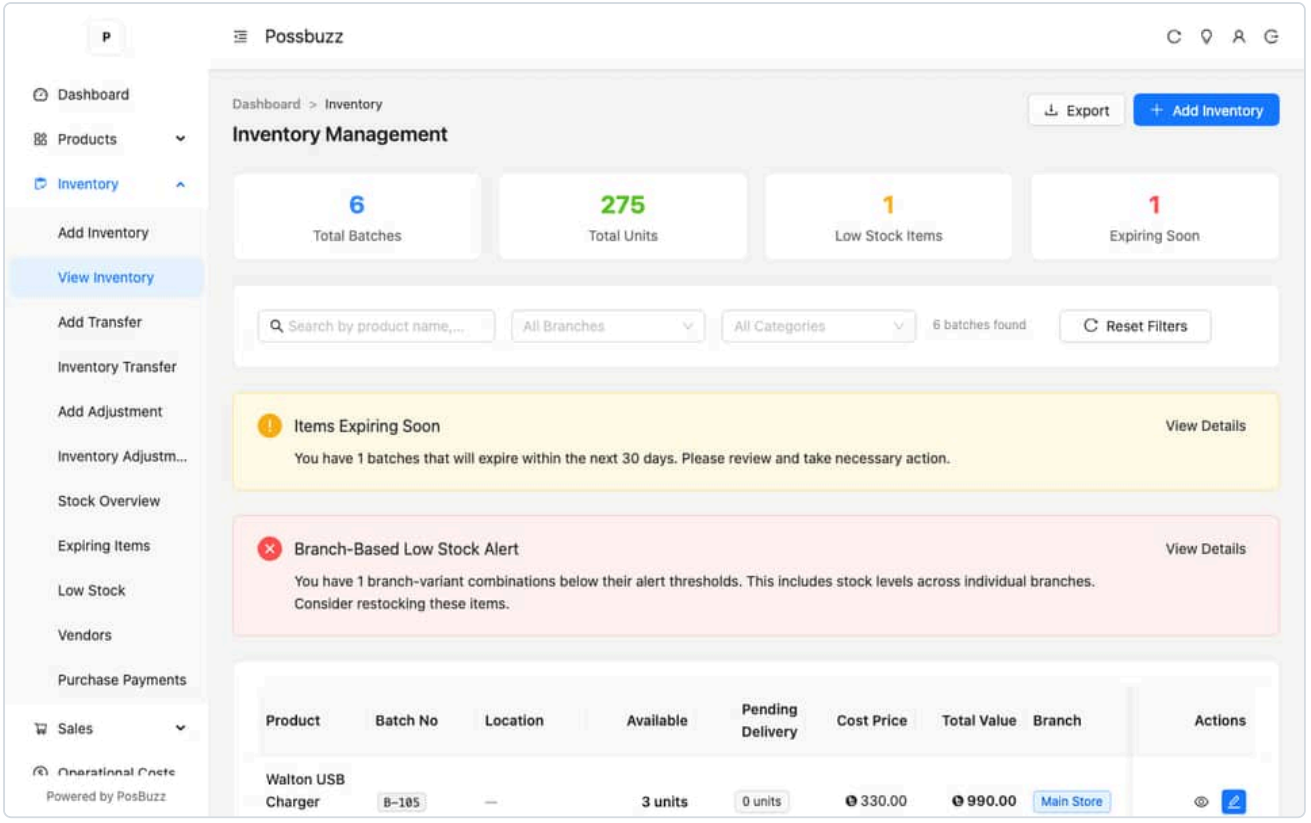

How to edit or delete a vendor from the stock form

1. Open the **Supplier/Vendor** box and point at the vendor.
2. To change it, press the Edit icon, change the fields in the **Edit Vendor** window and press **Update**. You see "Vendor updated successfully".
3. To remove it, press the Delete icon. The **Delete Vendor** window asks "Are you sure you want to delete this vendor? This action cannot be undone." Press **Yes** to delete or **No** to stop. You see "Vendor deleted successfully".

Message	What it means	What to do
Please enter vendor name	The name box is empty.	Type the vendor name.

Message	What it means	What to do
Vendor name must be at least 2 characters	The name is too short.	Type a longer name.
Please enter a valid email	The email is not in a proper format.	Correct it or leave it empty.
Operation Failed: Failed to delete. Please try again later. (or a message from the server)	The vendor was not deleted.	Read the message. See the Vendors section for why a vendor may not be deleted.

View Inventory

The View Inventory screen with summary cards, filters, alerts and the batch table.

What it is

A list of every stock batch. A batch is one purchase of one product variant into one branch. It shows quantity, cost and expiry date.

Where to find it

Left menu, **Inventory**, then **View Inventory**. You need the Inventory Batches permission. If you cannot see it, ask the owner.

What you see

The page title is **Inventory Management**. The path at the top is Dashboard > Inventory.

Buttons at the top right

- **Export**: see the start of this part.
- **Add Inventory**: opens the Add New Inventory form.
- **Import Excel**: normally hidden (see below).

Inventory value. The **Total Inventory Value** card shows physical units × their batch cost, including units reserved for pending delivery. Separate cards show each branch's inventory value. Choosing a branch changes the heading to **Selected Branch Inventory Value** and shows that branch's value. These totals cover all stock in the selected branch; table search, category and pagination do not change them.

Summary cards. They follow the branch you choose in the filter.

Card	Meaning
Total Batches	Number of batches.
Total Units	Units on hand minus units waiting for delivery.
Low Stock Items	Number of branch and variant pairs at or below their alert quantity.
Expiring Soon	Batches that expire in the next 30 days.

Alerts

- A yellow alert **Items Expiring Soon** appears when there is at least one such batch. It says "You have N batches that will expire within the next 30 days. Please review and take necessary action." **View Details** opens the Expiring Items screen.
- A red alert **Branch-Based Low Stock Alert** appears when stock is low. It says "You have N branch-variant combinations below their alert thresholds. This includes stock levels across individual branches. Consider restocking these items." **View Details** opens the Low Stock screen.

Filters

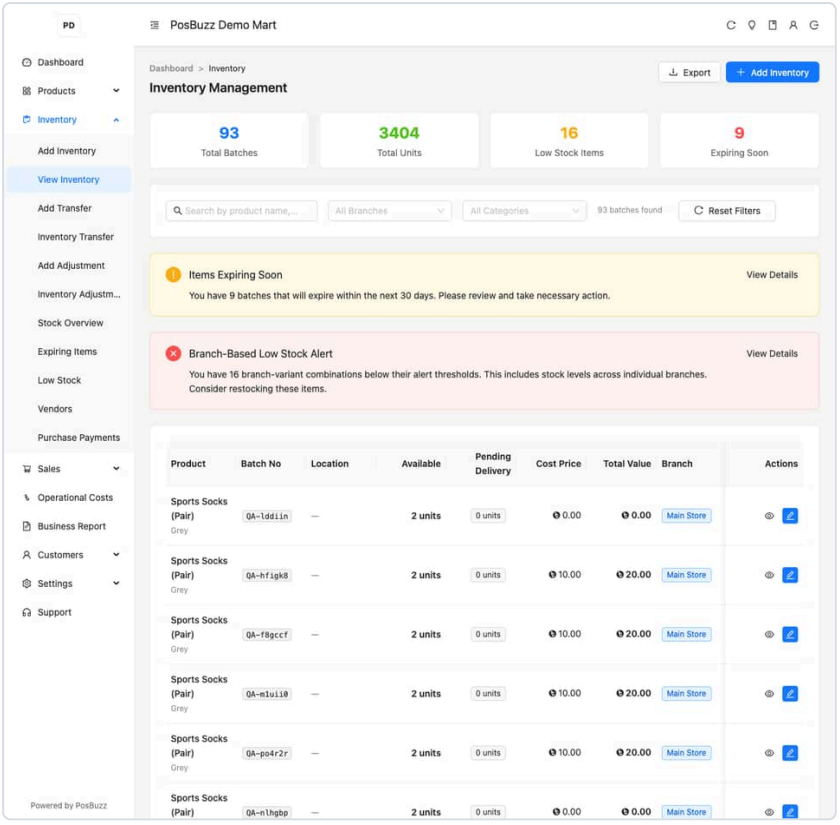

Filter	Notes
Search box ("Search by product name, variant, or batch number...")	Also finds the storage location.
All Branches	Shows one branch only.
All Categories	Shows one product category. You can type to search it.
"N batches found"	The number of batches that match.
Clear all filters link and **Reset Filters** button	Remove all filters.
Active filters: chips	Appear when a search or branch filter is on, for example Search: "rice" or Branch: Main Store. Press the x on a chip to remove it.

Table columns

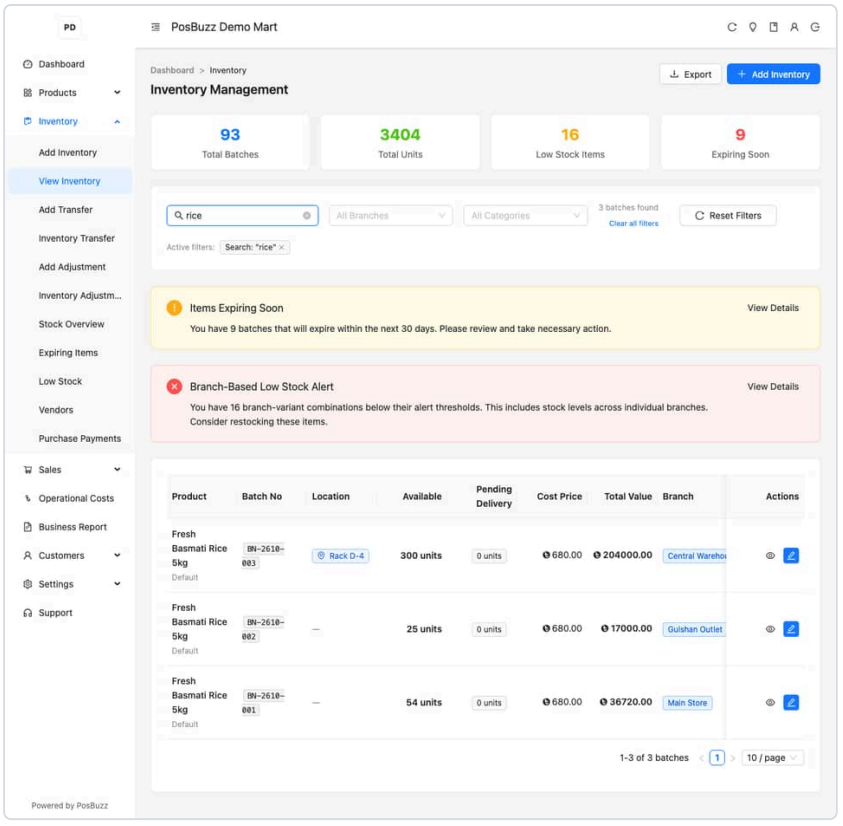

Column	Meaning
Product	Product name (a link to the product page) with the variant below.
Batch No	The batch number.
Location	Storage location in a blue tag, or a dash if none.
Available	Units on hand minus units pending delivery, shown as "N units".
Pending Delivery	Units promised on orders not yet delivered. An orange tag shows when above 0.
Cost Price	Cost of one unit.
Total Value	Cost price times quantity on hand.
Branch	The branch that holds the batch.
Expiry	"No expiry", or the date with a tag. The tag says "Expired", or "Nd left" (for example "5d left"). The tag is red when 7 days or fewer are left and orange when 8 to 30 days are left.
Created	The date the batch was added.
Actions	Eye icon (View Details) and pencil icon (Edit).

At the bottom you see "x-y of N batches", page numbers, the page size and a box to jump to a page.

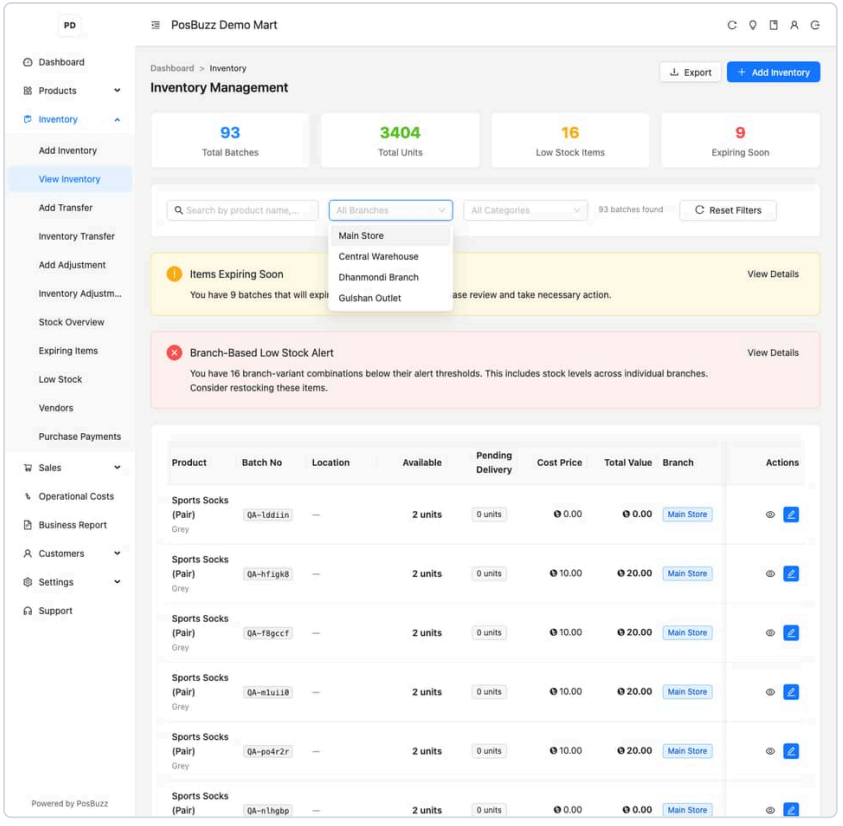

> **Good to know:** The "Expired" tag exists on this list, but the Expiring Items screen only lists batches that have not yet expired. Do not rely on Expiring Items to show batches already past their date.

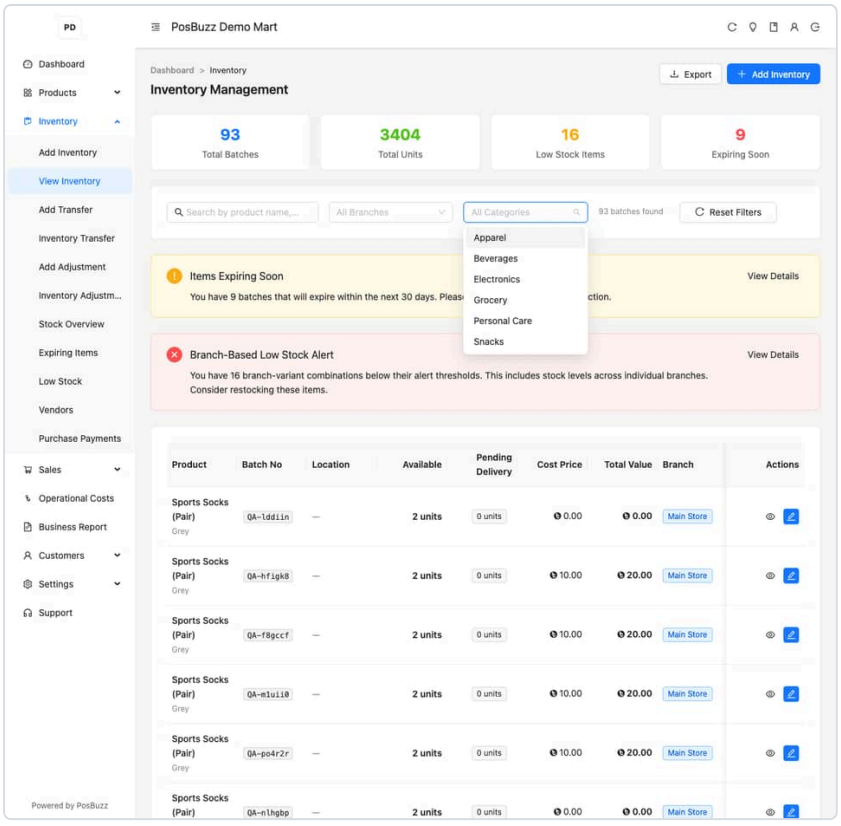

View Inventory with the summary cards and alerts.

A search for "rice" with the active filter chip.

The All Branches list.

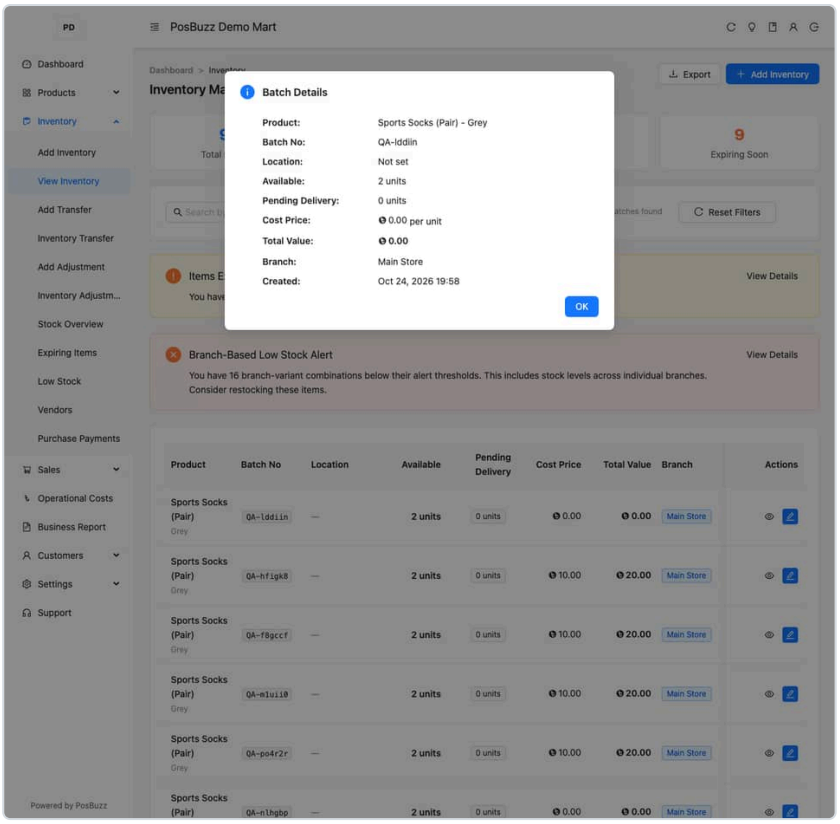

The All Categories list.

How to see the details of a batch

1. Open **Inventory**, then **View Inventory**.
2. Find the batch. Use the search box or filters if needed.
3. Press the eye icon (**View Details**) in the **Actions** column.

What happens next: The **Batch Details** window opens. It shows Product, Batch No, Location ("Not set" if empty), Available, Pending Delivery, Cost Price ("per unit"), Total Value, Branch, Vendor, Expiry Date (with an **Expiring Soon** tag if within 30 days) and Created.

The Batch Details window.

How to filter the batch list

1. Type in the search box, or choose a branch or a category.
2. Check the "N batches found" text and the chips under **Active filters:**.
3. To start again, press **Reset Filters** or **Clear all filters**.

What happens next: The table and the summary cards change to match the branch you chose.

How to edit a batch

1. Press the pencil icon in the **Actions** column.
2. Change what you need (see the Edit Inventory notes in the next section).
3. Press **Update Inventory**.

What happens next: You return to View Inventory. See the next section for details.

> **Good to know:** There is no working Delete button on this list. The system does not allow a batch that still has stock to be deleted.

How to export the list

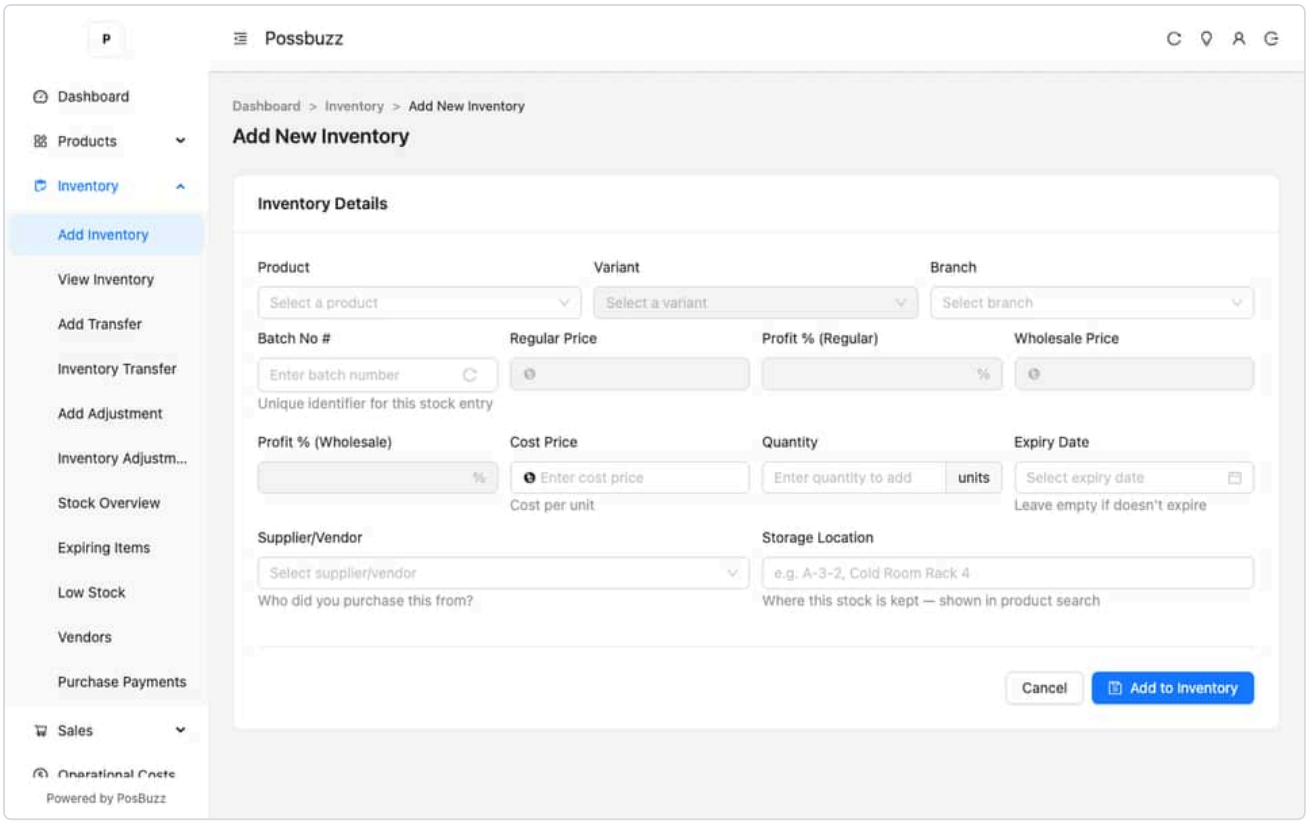

1. Press **Export**.
2. Choose **Export as PDF**.

What happens next: A file called inventory.pdf is saved to your device. The export includes batch cost, per-batch value, total exported inventory value and branch totals in BDT. It exports the whole business list (up to 20,000 positive-stock batches), independently of table filters. Long names wrap, and table headers repeat on new pages. If it fails you see "Failed to export the list".

Import from Excel (only if your shop has it switched on)

This button is normally not shown. If it is, **Import Excel** opens the window **Import Stock Intake from Excel**. It has a link **Download Stock Intake template**, a line "Required columns: ...", and a box "Click or drag the filled .xlsx file here" (maximum 5 MB, only the first sheet is read). The buttons are **Cancel** (or **Done** after finishing) and **Import** (or **Import N row(s)**). Nothing is saved unless every row is correct.

Add Inventory (and Edit Inventory)

The Add New Inventory form before any product is chosen.

What it is

The form you use when stock arrives from a supplier. It records the new batch, its cost, selling prices, expiry date, storage place and what you have paid.

Where to find it

Left menu, **Inventory**, then **Add Inventory**. You can also press **Add Inventory** on View Inventory. To change an existing batch, press the pencil icon on View Inventory (the page is then called **Edit Inventory**). You need the Inventory Batches permission.

What you see

The page title is **Add New Inventory** (or **Edit Inventory**). The main card is **Inventory Details**.

Field	Required	Notes
Product	Yes	You can type to search. Cannot be changed when editing.
Variant	Yes	Available after you choose a product. Shows "Please select a product first" or "No variants found" when there is nothing to pick. Cannot be changed when editing. Choosing a variant fills the Regular Price and Wholesale Price and, when adding, a batch number.
Branch	Yes	The branch that receives the stock. Shows "Select branch".
Batch No #	Yes	Placeholder "Enter batch number". Hint: "Unique identifier for this stock entry". The refresh icon (**Generate batch number**) makes a new 6-digit number. Cannot be changed when editing. Must be new for this variant.
Regular Price	No	Selling price. Two decimals, not below 0. Switched off until Cost Price is above 0.
Profit % (Regular)	No	Linked to Regular Price. Type a percent and the price is worked out from the cost. The percent also updates when you change the price. Switched off until cost is above 0. Cannot go below -100.
Wholesale Price	No	Same rules as Regular Price.
Profit % (Wholesale)	No	Same rules as Profit % (Regular).
Cost Price	Yes	Placeholder "Enter cost price". Hint: "Cost per unit". Must be above 0.
Quantity	Yes	Placeholder "Enter quantity to add", with "units" beside it. Whole numbers, at least 1. Cannot be changed when editing.
Expiry Date	No	Placeholder "Select expiry date". Hint: "Leave empty if doesn't expire". Format YYYY-MM-DD. Dates in the past cannot be picked.
Supplier/Vendor	No	Hint: "Who did you purchase this from?". See the vendor picker above.
Storage Location	No	Hint: "Where this stock is kept - shown in product search". Example: A-3-2, Cold Room Rack 4. At most 100 characters.

After you choose a variant, a blue box shows "Selected: Product - Variant".

After you choose a variant, a **Payment** card appears. It has the Payment Methods rows described earlier. **Total Cost** is cost price times quantity.

A **Summary** card shows the Product, **Quantity Adding** (N units), **Total Cost** and **Payment Status**:

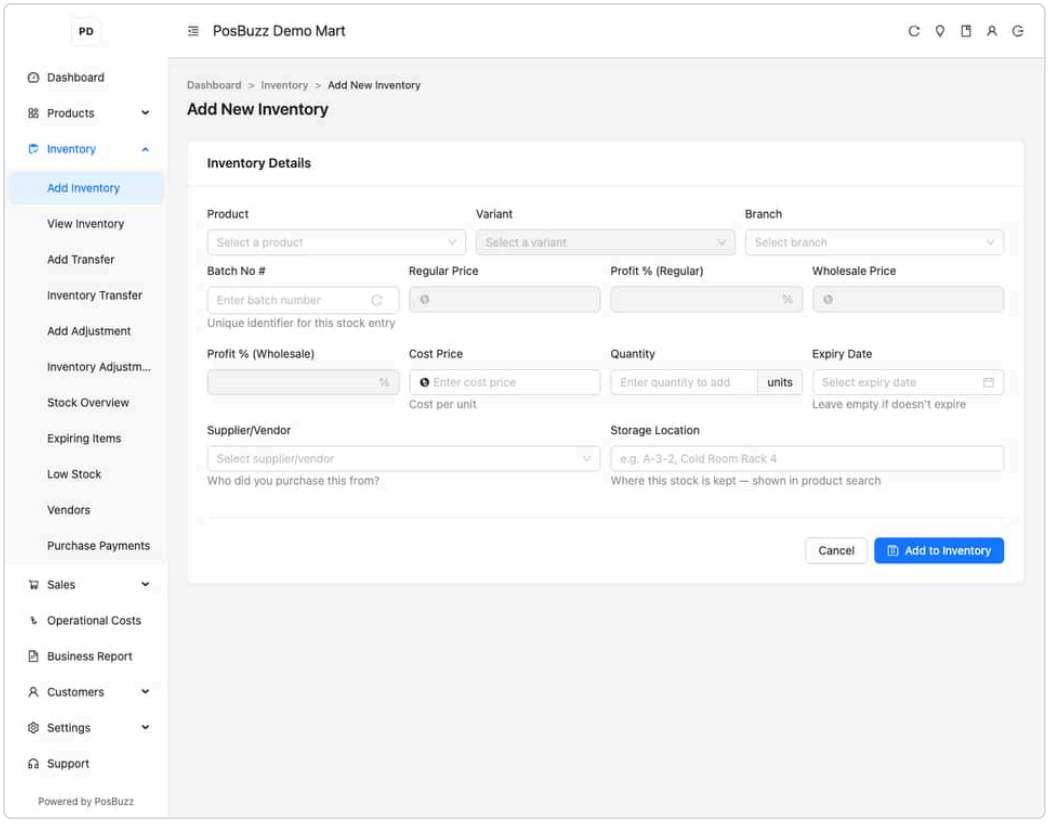

Payment Status	When
Paid (green)	Payments are equal to or above the total cost.
Partial	Some payment is entered, but less than the total.

Payment Status	When
Due (red)	No payment is entered.

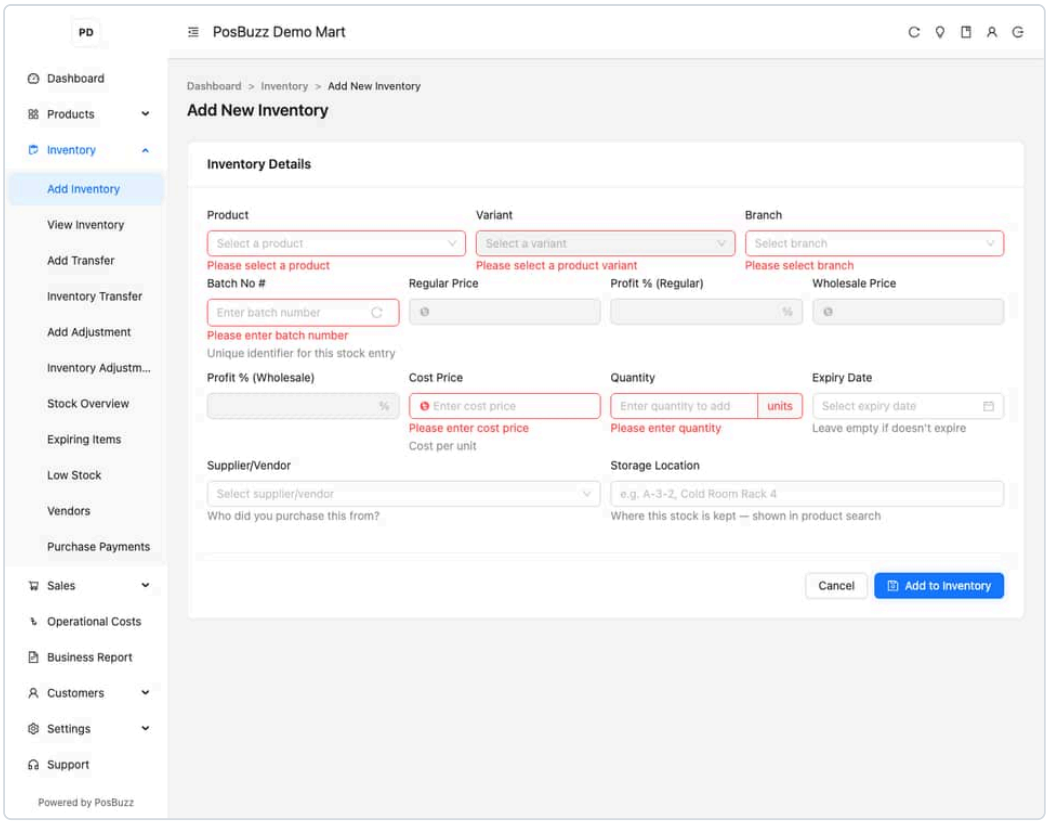

Buttons at the bottom: **Cancel** (back to the list) and **Add to Inventory** (or **Update Inventory** when editing).

> **Good to know:** Saving new Regular and Wholesale prices changes the selling prices of that variant. The old prices are kept in the price history.

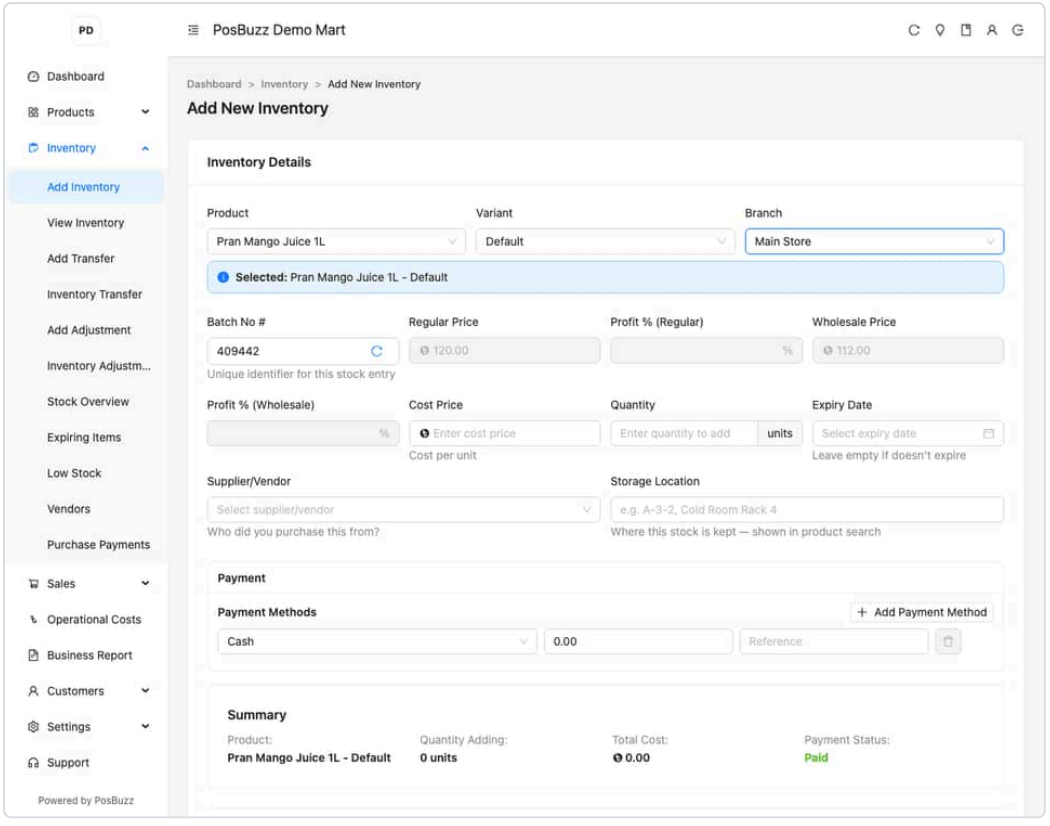

> **Good to know:** If you leave the payment amount at 0 (or empty), the batch is saved as Due, meaning you owe the full cost to the supplier. The Summary shows "Due" in red while you fill the form. A batch with a cost price of 0 (free stock) is saved as Paid. A smaller payment than the total is saved as Partial. Due and Partial batches appear on Purchase Payments.

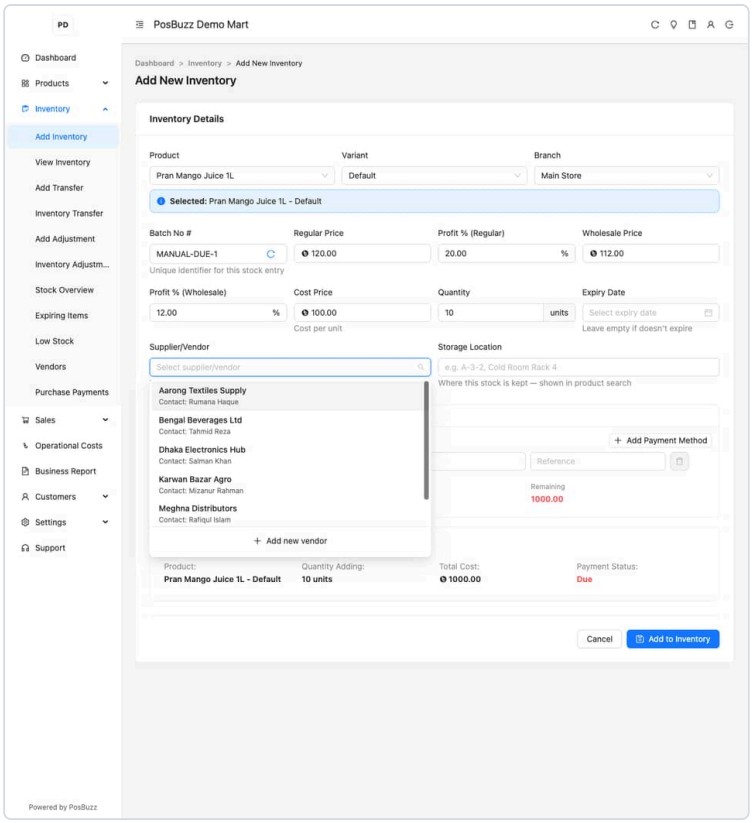

The empty form.

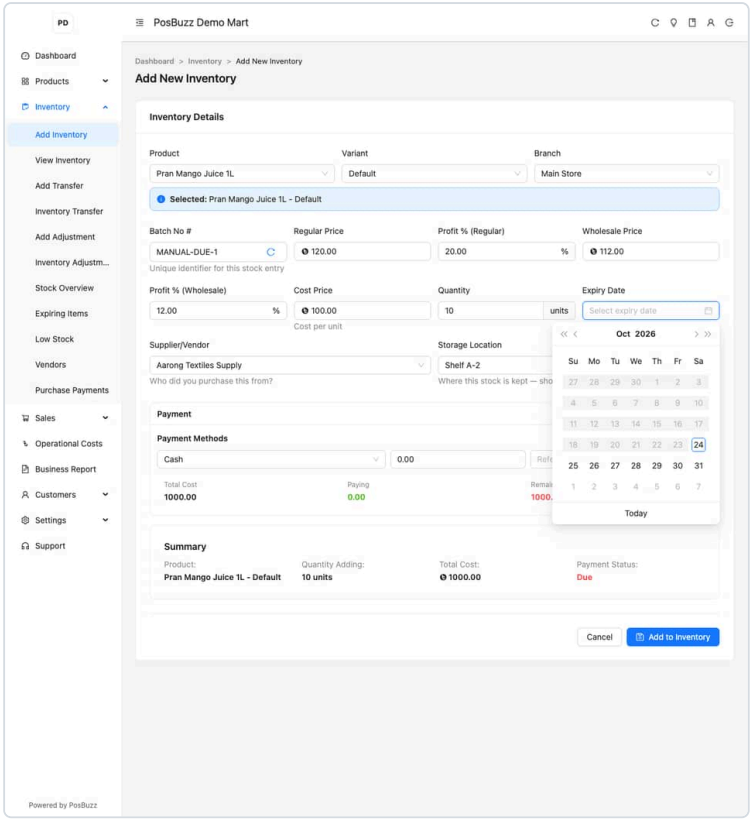

Messages shown when you press Add to Inventory with the form empty.

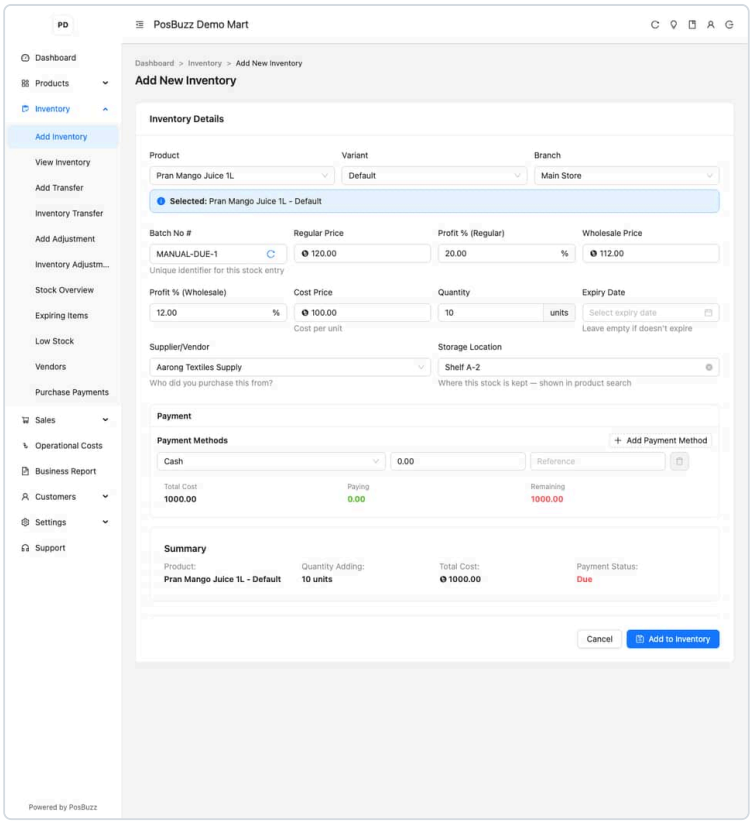

After choosing product, variant and branch, the payment card and summary appear.

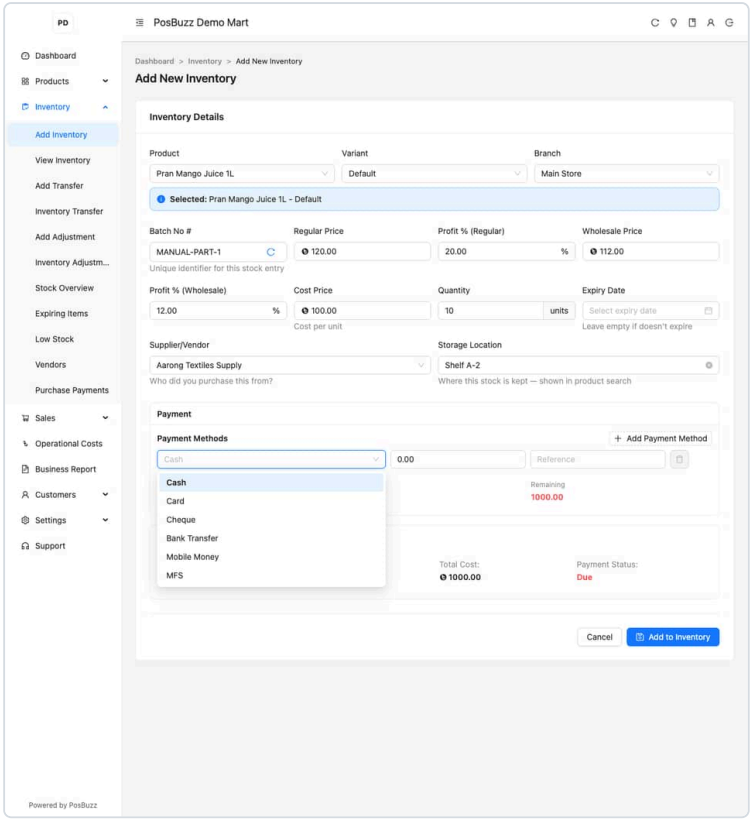

The vendor list with the Add new vendor button.

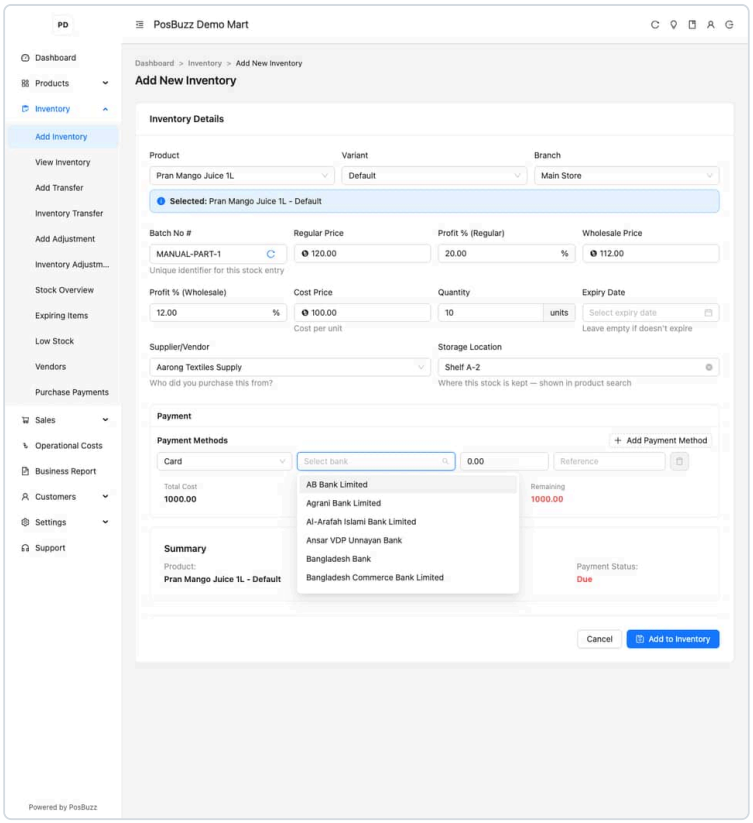

The expiry date picker (past dates are greyed out).

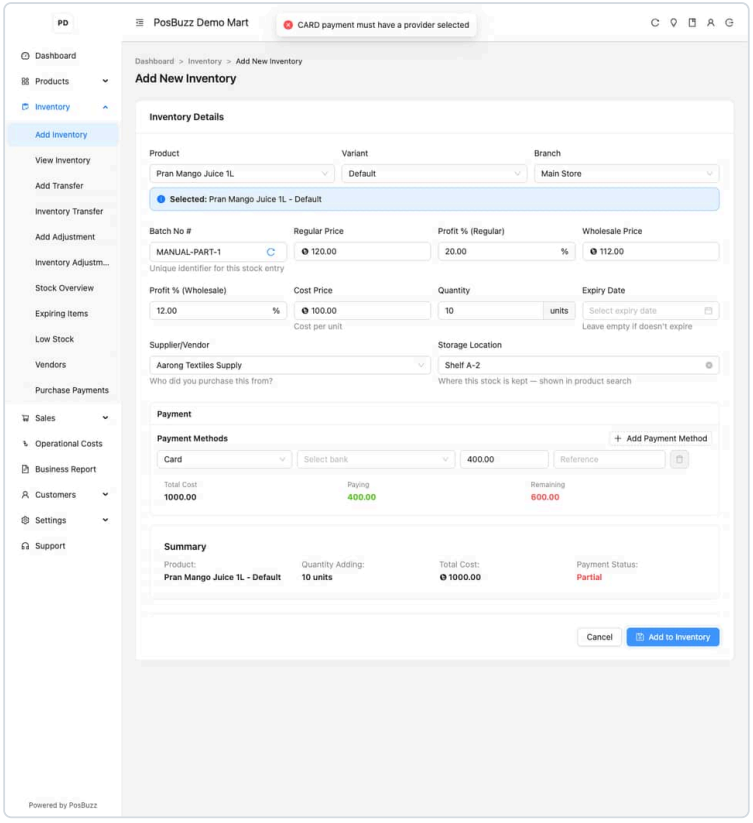

Filled form with no payment: Remaining equals Total Cost and Payment Status is Due.

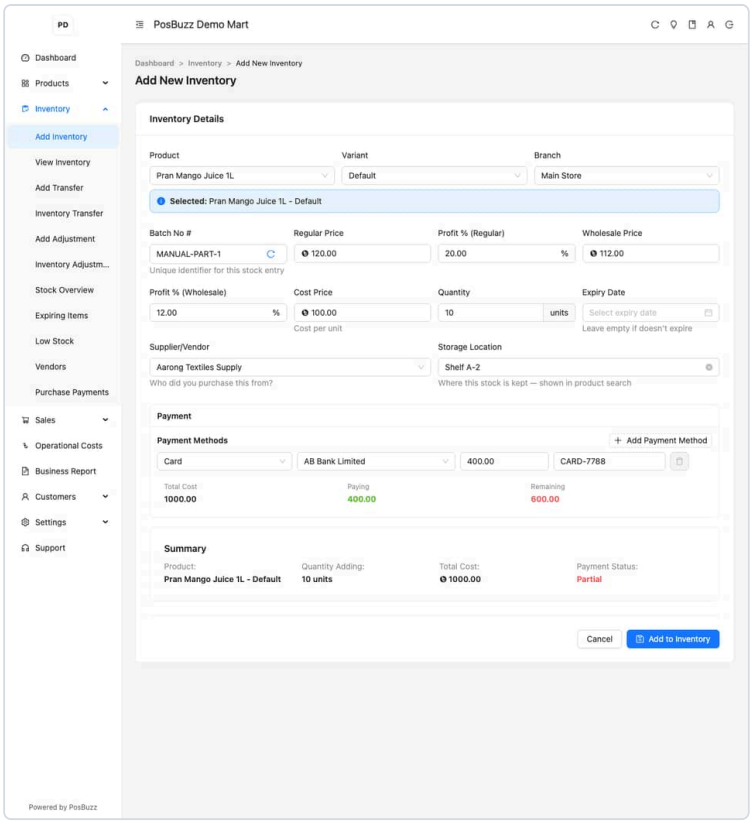

The payment method list.

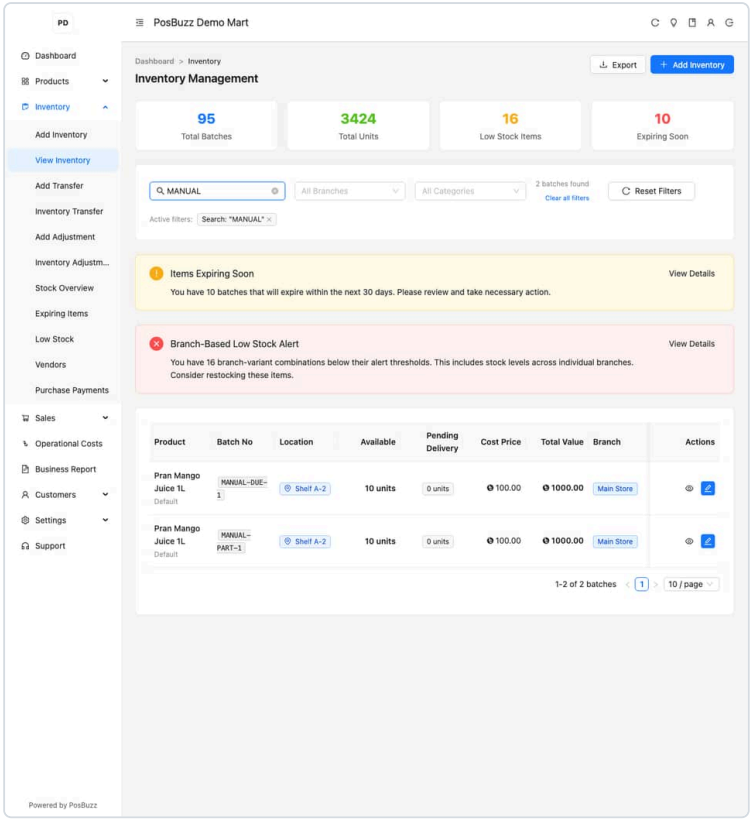

The bank list shown for a Card payment.

A Card payment with no bank chosen is refused.

A part payment: Payment Status shows Partial.

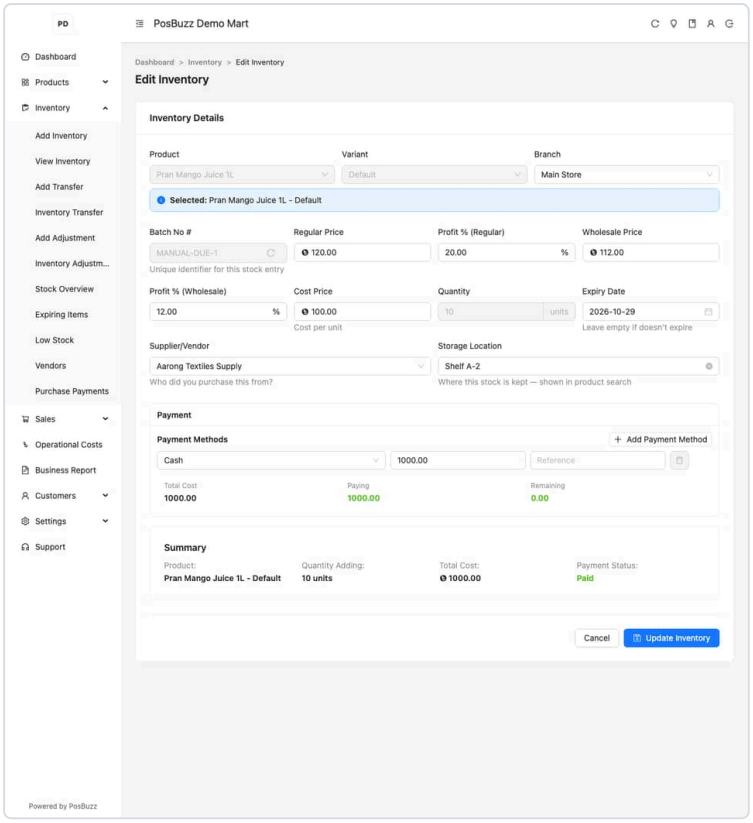

The two new batches in View Inventory.

How to add new stock

1. Open **Inventory**, then **Add Inventory**.
2. Choose the **Product**.
3. Choose the **Variant**.
4. Choose the **Branch**.
5. Check the **Batch No #**. Press the refresh icon if you want a different number, or type your own.
6. Type the **Cost Price** and the **Quantity**.
7. If you want, change **Regular Price**, **Wholesale Price** or the profit percent boxes.
8. If the goods expire, pick the **Expiry Date**.
9. Choose the **Supplier/Vendor** if you know it.
10. Type the **Storage Location** if you want to find the stock by place.
11. In the **Payment** card, choose the **Method**, type the **Amount** and add a **Reference** if you have one. Press **Add Payment Method** for more rows.
12. Read the **Summary** card.
13. Press **Add to Inventory**.

What happens next: You see "Inventory added successfully" and go back to View Inventory. The stock is added to the branch you chose, and a "purchase in" record is kept.

Edit Inventory: product, variant, batch number and quantity are greyed out.

How to edit a batch

1. On View Inventory, press the pencil icon of the batch.
2. Change the fields you need.

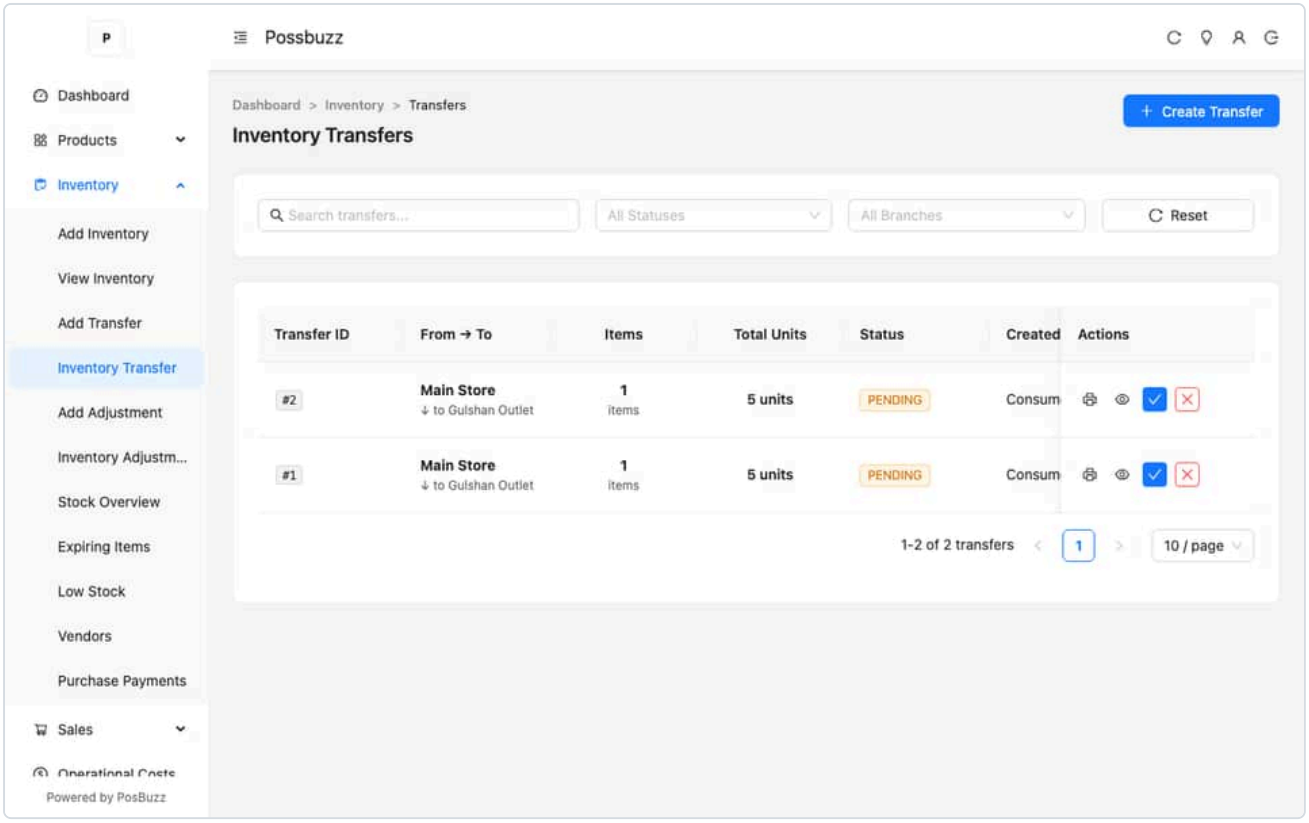

3. Press **Update Inventory**.

What happens next: You see "Inventory updated successfully" and go back to the list.

> **Good to know:** When editing, only these can change: Cost Price, Branch, Vendor, Storage Location, Expiry Date and the selling prices. Product, Variant, Batch No # and Quantity are locked. To change the quantity use an Inventory Adjustment (see below). If you save with the Expiry Date empty, the expiry date is removed. The form shows payments already recorded. If there are none, it shows a Cash payment equal to the full cost.

Message	What it means	What to do
Please select a product	No product chosen.	Choose a product.
Please select a product variant	No variant chosen.	Choose a variant.
Please select branch	No branch chosen.	Choose a branch.
Please enter batch number	Batch number is empty.	Type one or press the refresh icon.
Please enter cost price / Cost price must be positive	Cost is empty or not above 0.	Type a cost above 0.
Please enter quantity / Quantity must be at least 1	Quantity is empty or below 1.	Type a whole number of 1 or more.
Location is too long	Storage Location is over 100 characters.	Shorten it.
CARD (or BANK TRANSFER, MFS) payment must have a provider selected	A payment row needs a bank or MFS.	Choose it.
Batch number "X" already exists for this variant with the same expiry date.	That batch number is already used.	Use a different batch number.
Batch number "X" already exists ... but the expiry date does not match the existing record.	The number is used and the expiry date is different.	Use a different batch number, or match the old expiry date.
Payments exceed total purchase cost	You entered more than the total cost.	Lower the payment amounts.
Payment amounts must be greater than zero	A payment row has 0.	Remove the row or type an amount.
Product variant not found / Branch not found / Vendor not found	The chosen item no longer exists.	Reload the page and choose again.
Failed to add inventory / Failed to update inventory (or a message from the server)	The save did not work.	Read the message, correct it and try again.

Inventory Transfer

The Inventory Transfers list with two pending transfers.

What it is

The list of transfers of stock between branches. A transfer is first Pending. It is then either completed (stock moves) or cancelled.

Where to find it

Left menu, **Inventory**, then **Inventory Transfer**. You need the Inventory Transfer permission.

What you see

The page title is **Inventory Transfers**. The path is Dashboard > Inventory > Transfers. The button **Create Transfer** is at the top right.

Filter	Notes
Search box ("Search transfers...")	See the note below.
All Statuses	Pending, Completed or Cancelled.
All Branches	Matches transfers where the branch is the source or the destination.
Reset	Clears everything.

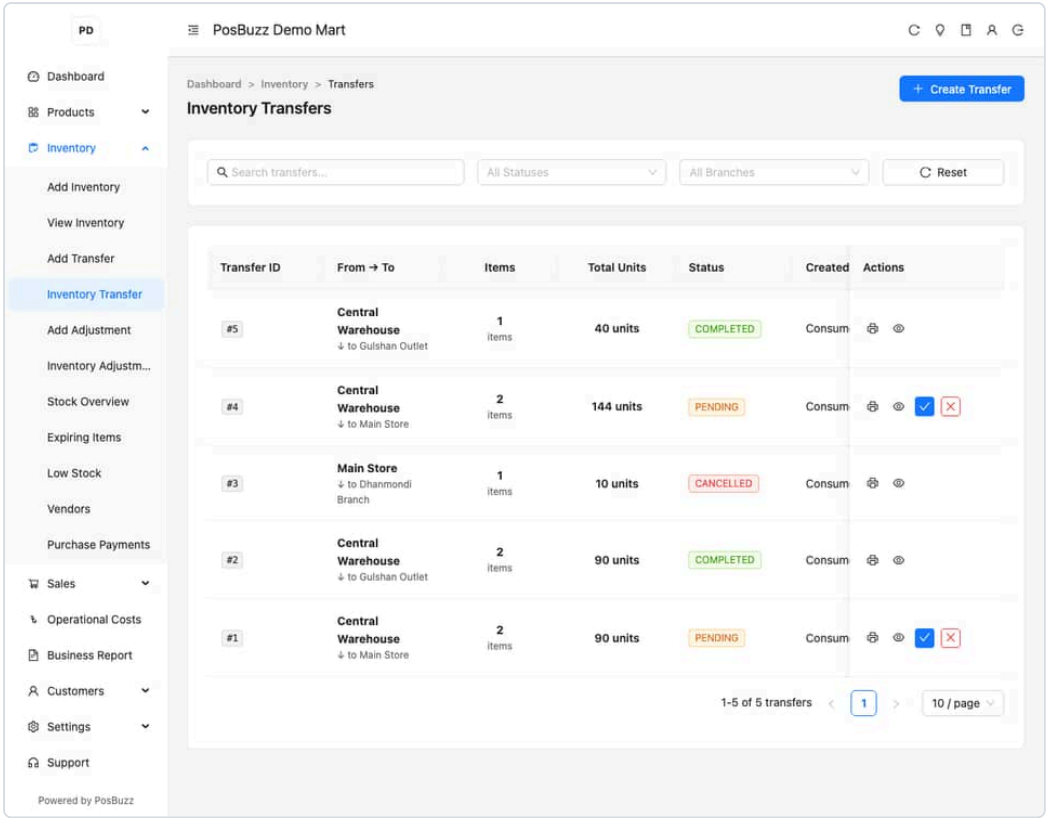

> **Good to know:** The search box finds transfers by transfer number, notes, branch name, who created it, product, variant, SKU or batch number. It works together with the status and branch filters.

Column	Meaning
Transfer ID	The number, such as #2.
From -> To	The source branch in bold and "to" the destination below it. "Warehouse" is shown if a branch name is blank.
Items	Number of different items.
Total Units	Total quantity moved.
Status	PENDING (orange), COMPLETED (green) or CANCELLED (red).
Created By	Who made the transfer.
Created Date	When it was made.
Actions	Icons described below.

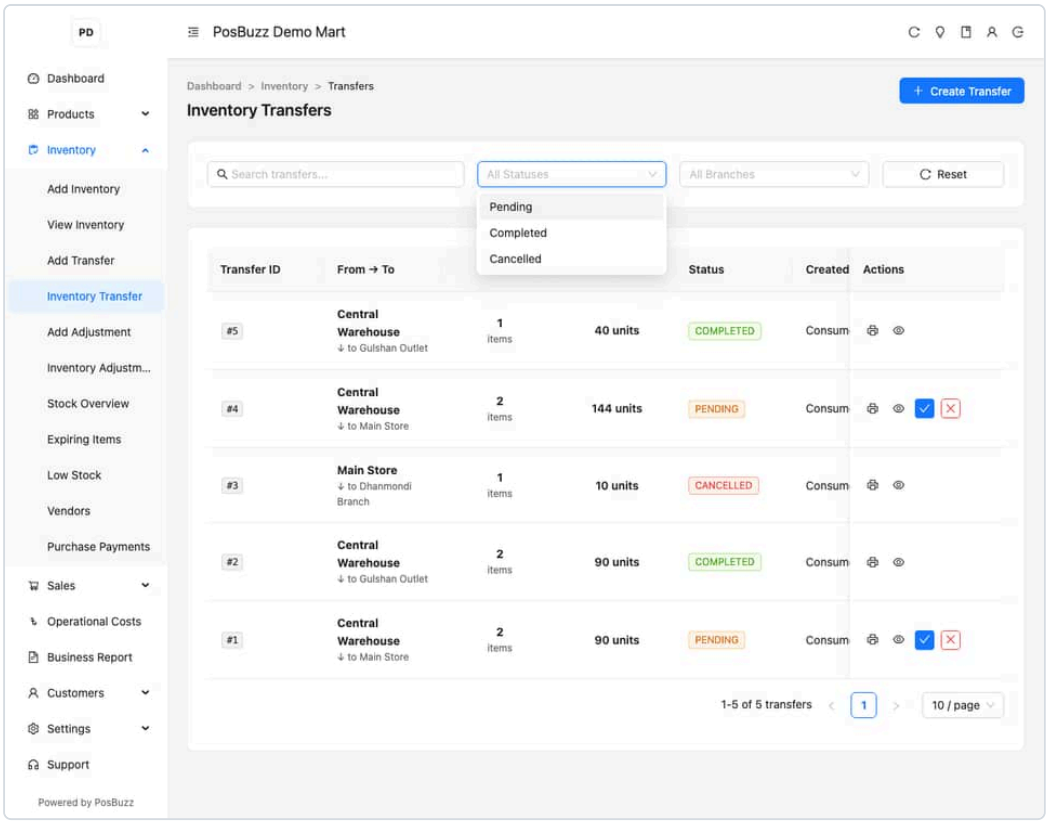

Actions on each row:

- Printer icon (**Print Slip**): a menu with **Transfer Slip** and **Chalan Slip**.
- Eye icon (**View Details**).
- Green check (**Complete Transfer**) and red cross (**Cancel Transfer**). These show only on PENDING rows.

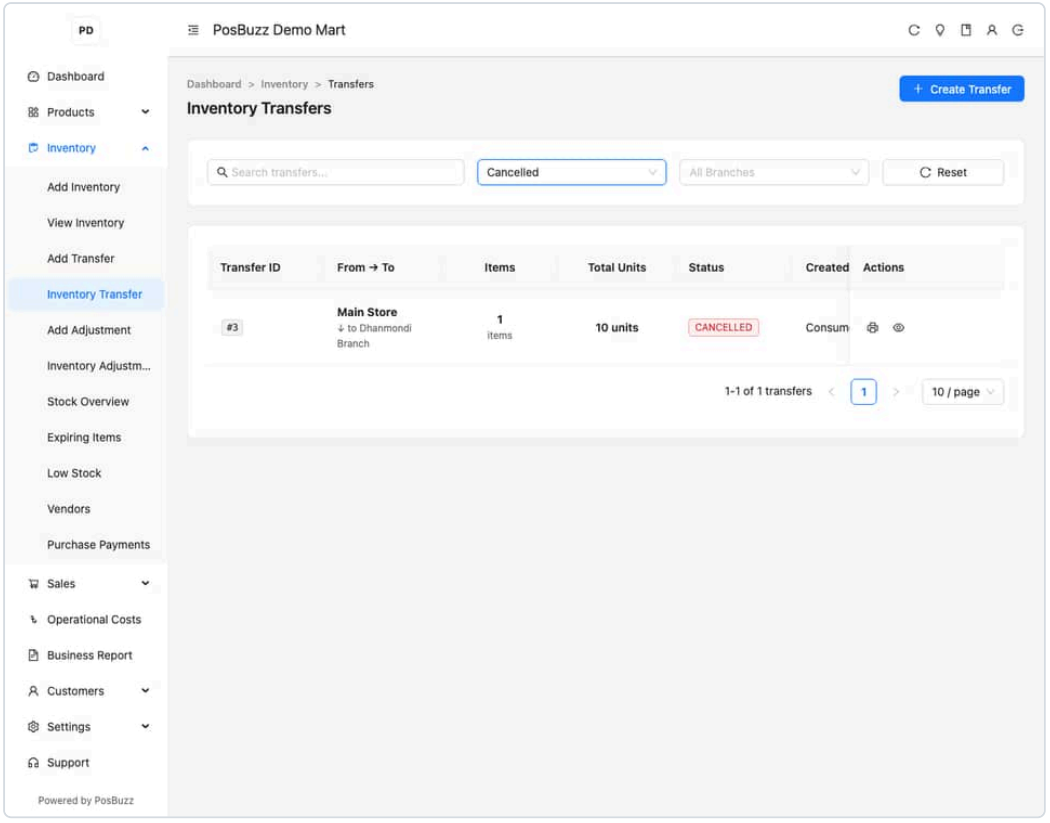

At the bottom you see "x-y of N transfers".

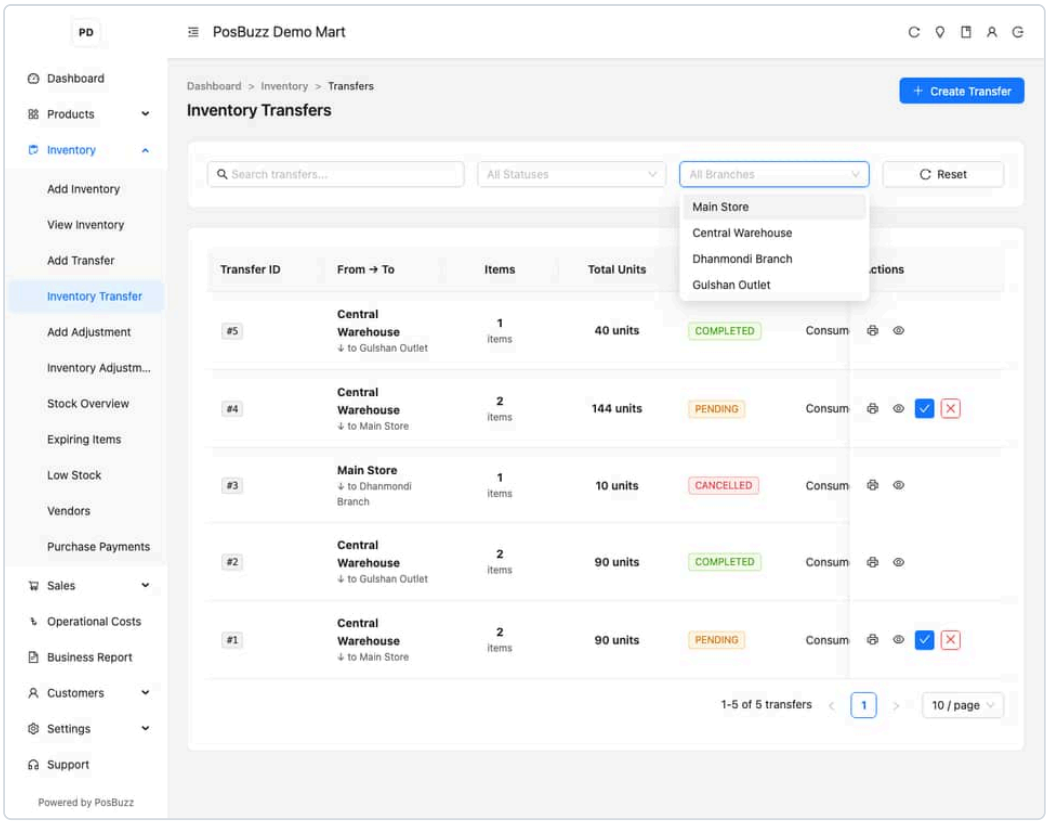

The transfers list with all three statuses.

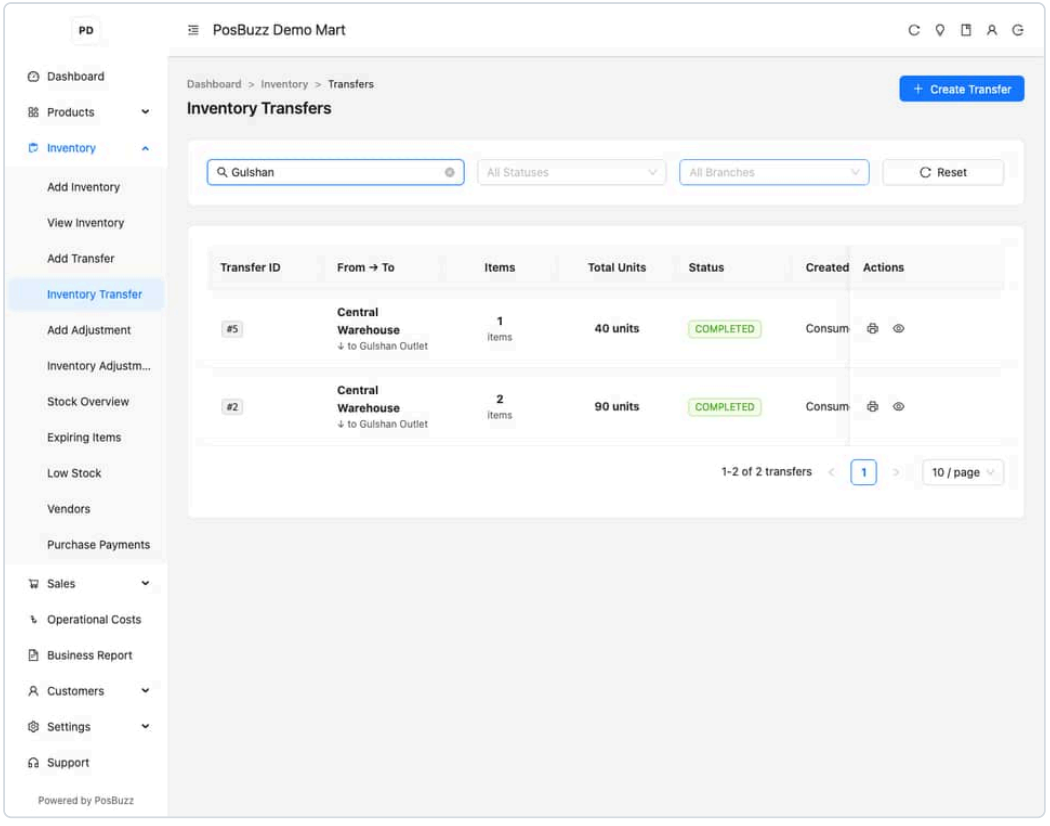

The status filter.

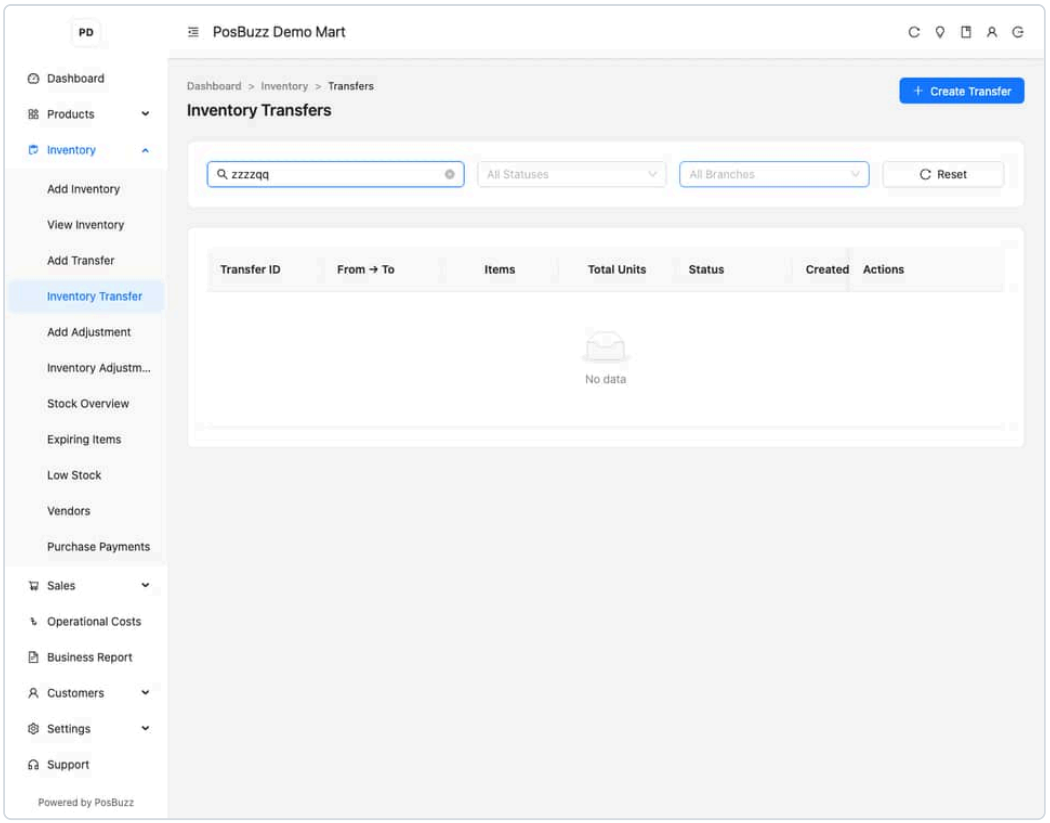

Filtered to Cancelled.

The branch filter.

Searching for "Gulshan".

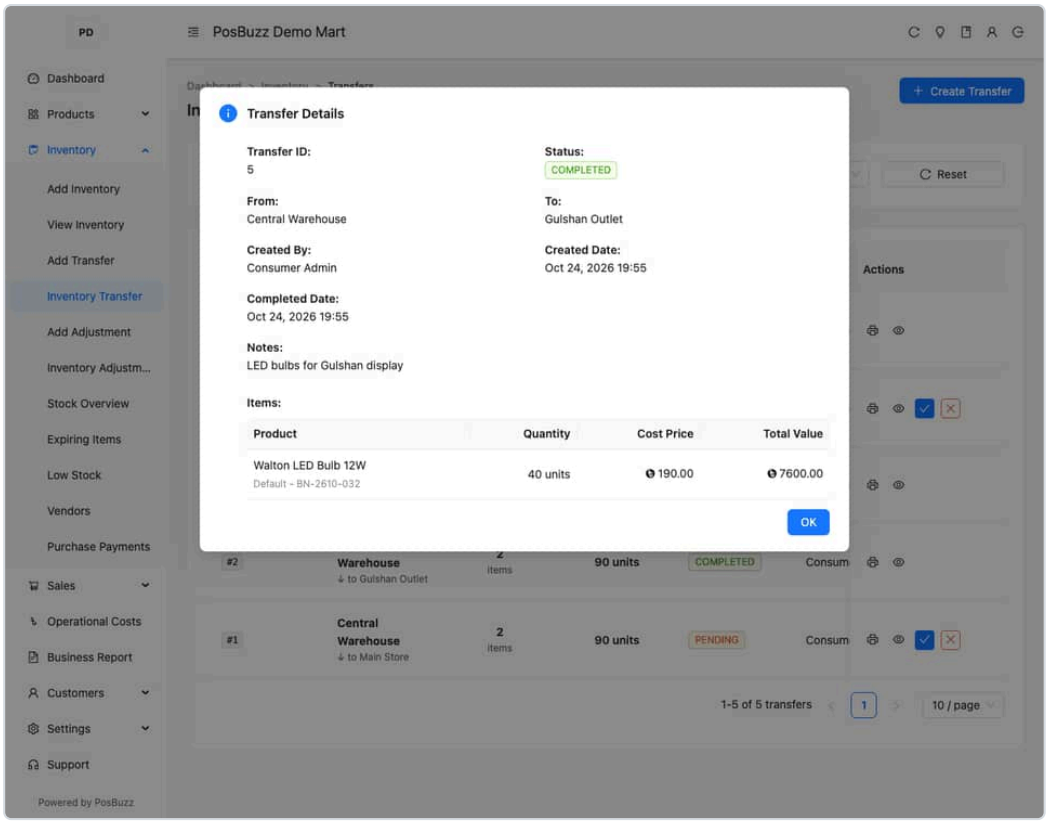

A search with no match shows No data.

How to see transfer details

1. Press the eye icon on the row.

What happens next: The **Transfer Details** window shows Transfer ID, Status, From, To, Created By, Created Date, Completed Date, Notes and a table of items (Product with variant and batch number, Quantity, Cost Price, Total Value).

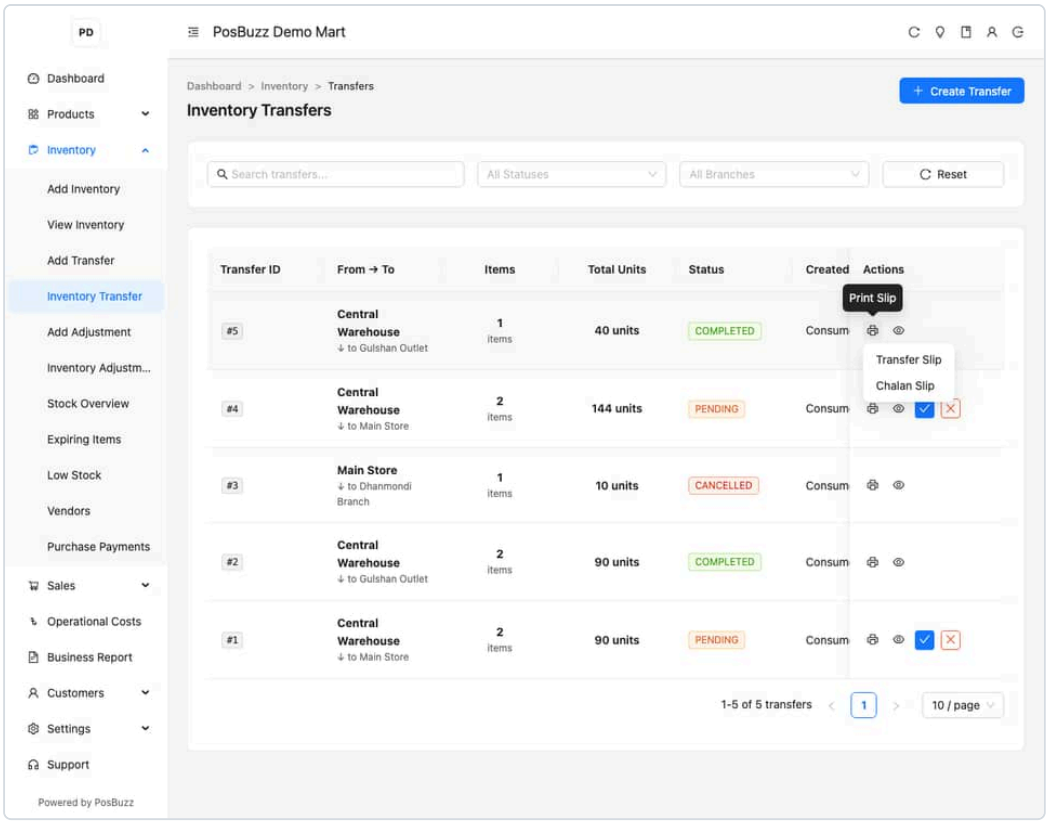

The Transfer Details window.

How to print a transfer slip or chalan slip

1. Press the printer icon on the row.
2. Choose **Transfer Slip** or **Chalan Slip**.
3. In the preview window (titled "Transfer Slip #id" or "Chalan Slip #id", with "A4" and the file name), press **Print** or **Download**. Press **Close** to leave.

What happens next: The slip prints, or a PDF is saved with a name like transfer_slip-TR-5.pdf. If the slip cannot be shown you see "Failed to load the PDF".

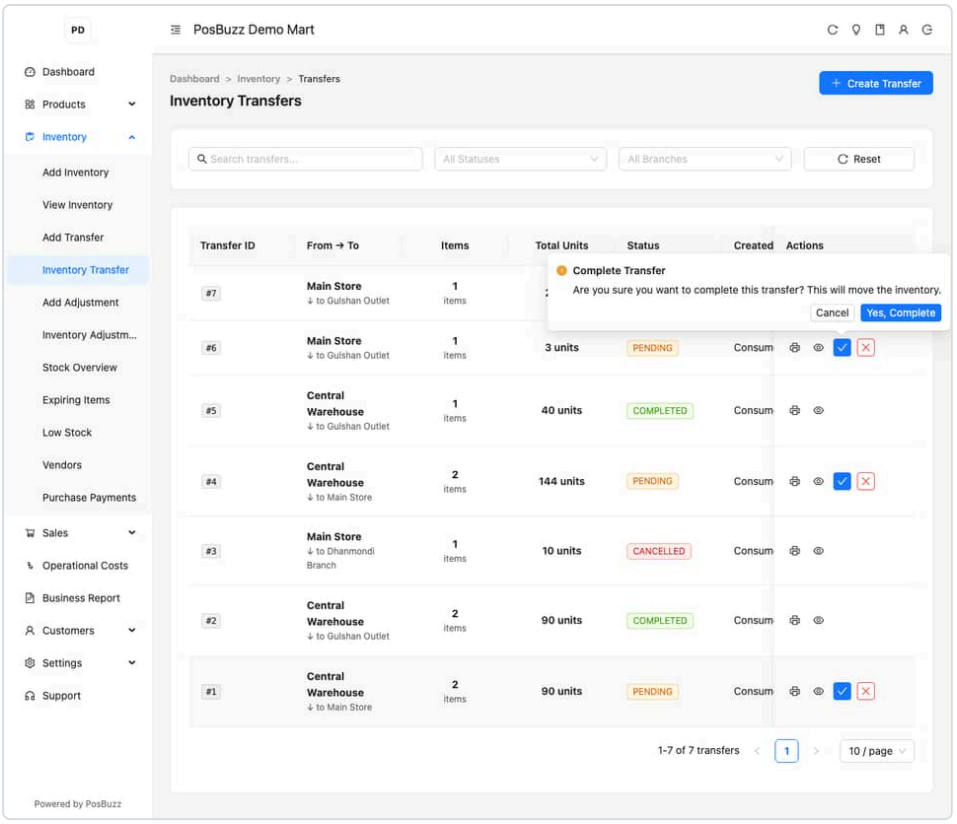

The print menu.

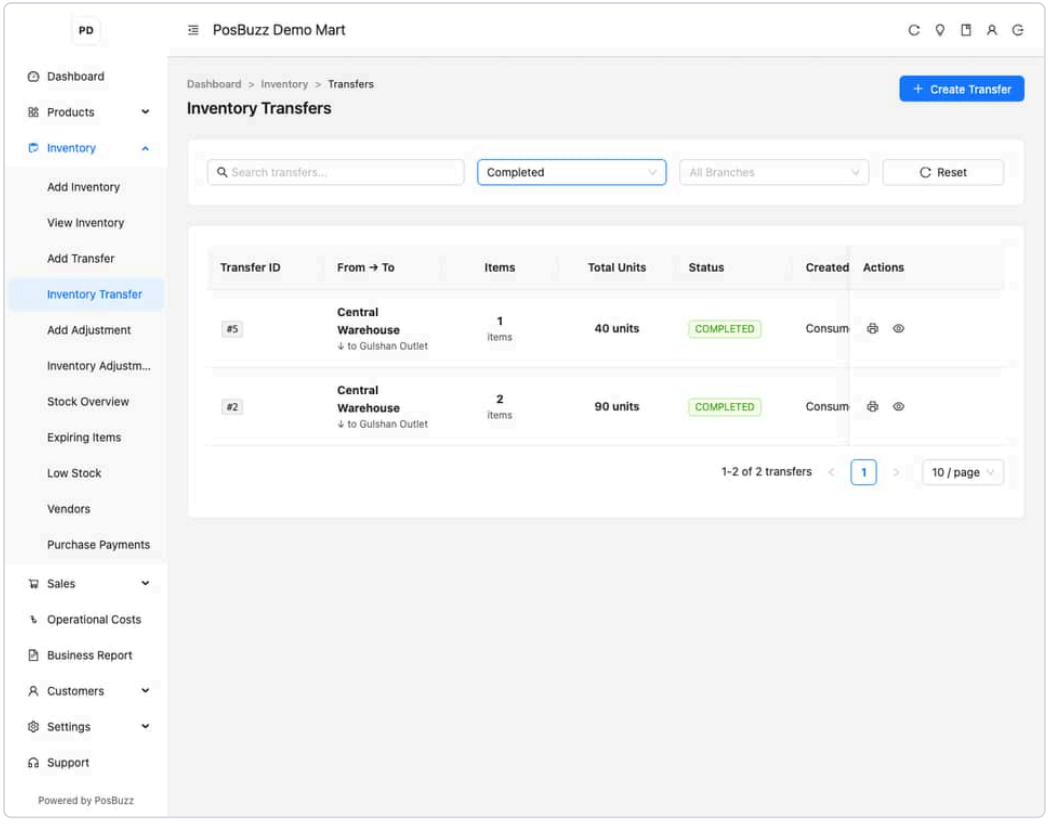

How to complete a pending transfer

1. Press the green check (**Complete Transfer**).
2. Read "Are you sure you want to complete this transfer? This will move the inventory."
3. Press **Yes, Complete** (or **Cancel** to stop).

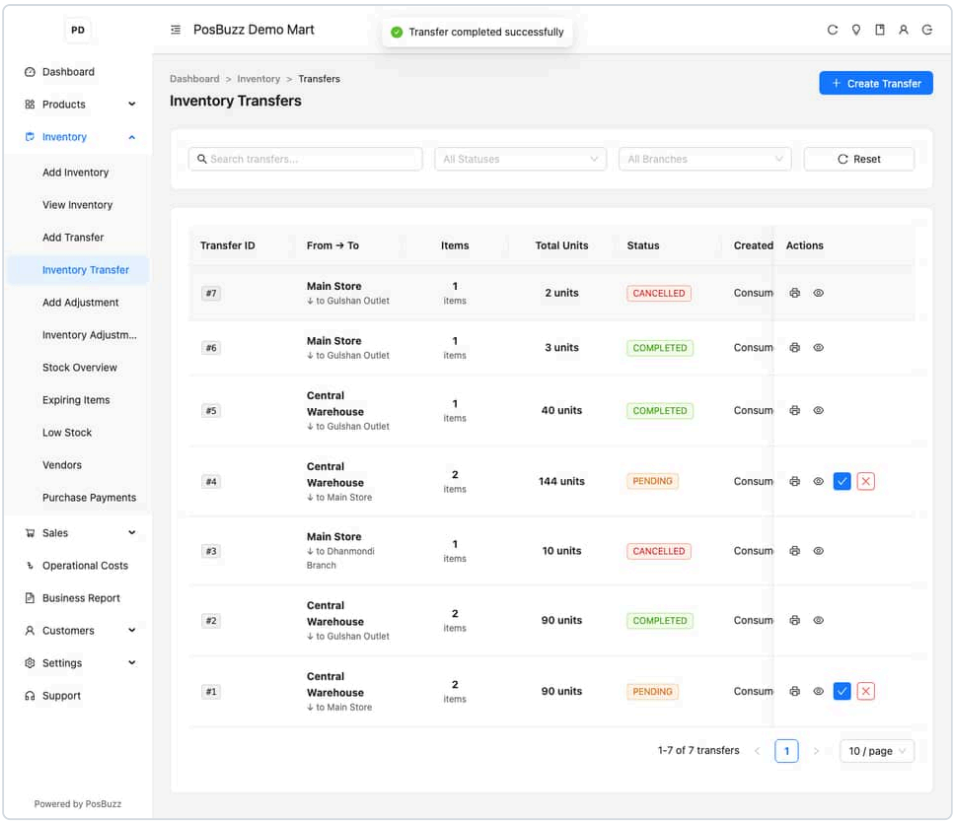

What happens next: You see "Transfer completed successfully". The stock leaves the source batch and arrives at the destination. If the destination already has a batch with the same batch number, cost, expiry date and vendor, the units are added to it. Otherwise a new batch with those same details is made there, without a storage location. The move shows in Movement History as Transfer Out and Transfer In.

The complete confirmation.

Filtered to Completed.

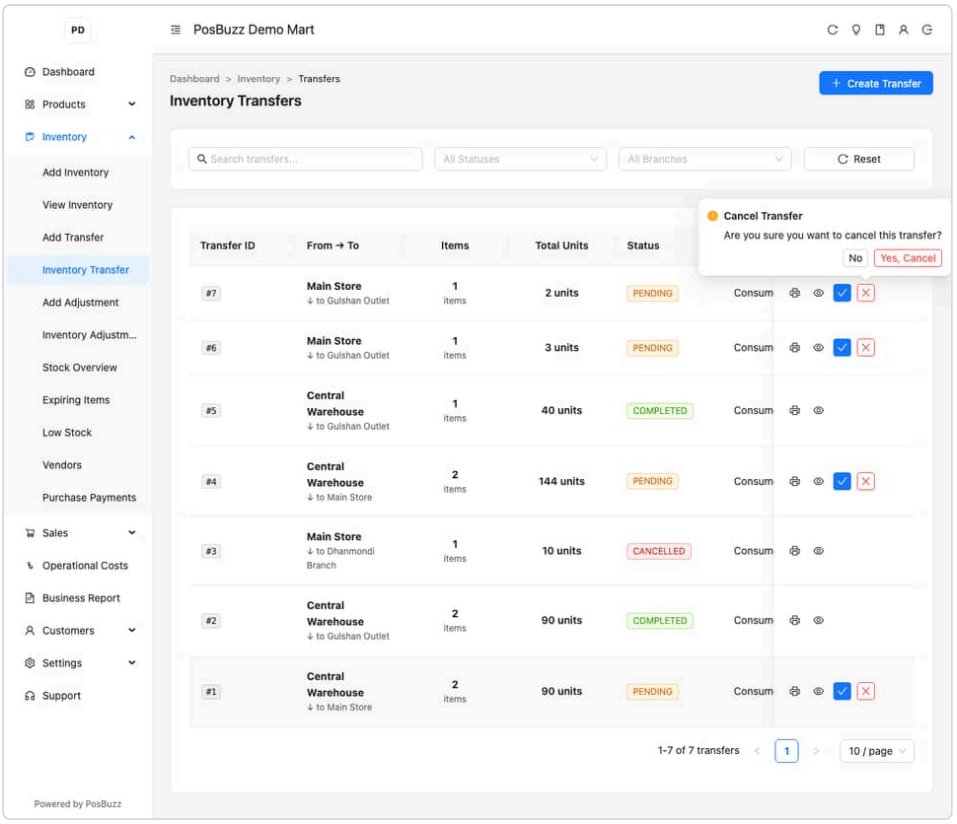

Transfer completed successfully.

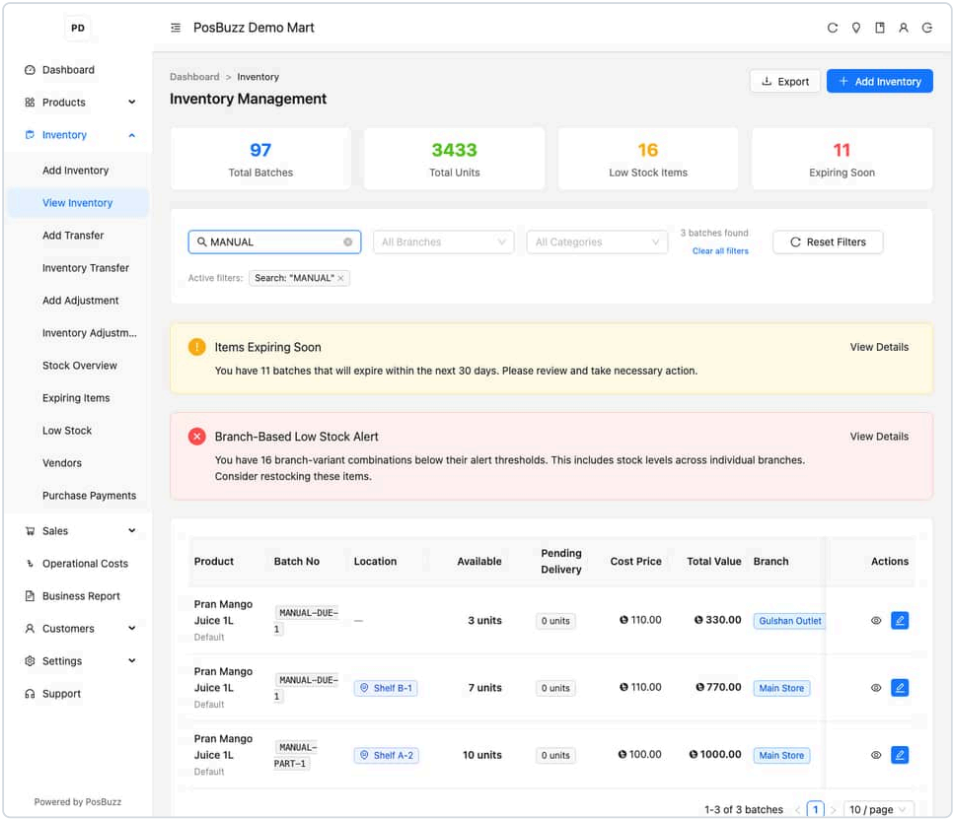

How to cancel a pending transfer

1. Press the red cross (**Cancel Transfer**).
2. Read "Are you sure you want to cancel this transfer?"
3. Press **Yes, Cancel** (or **No** to stop).

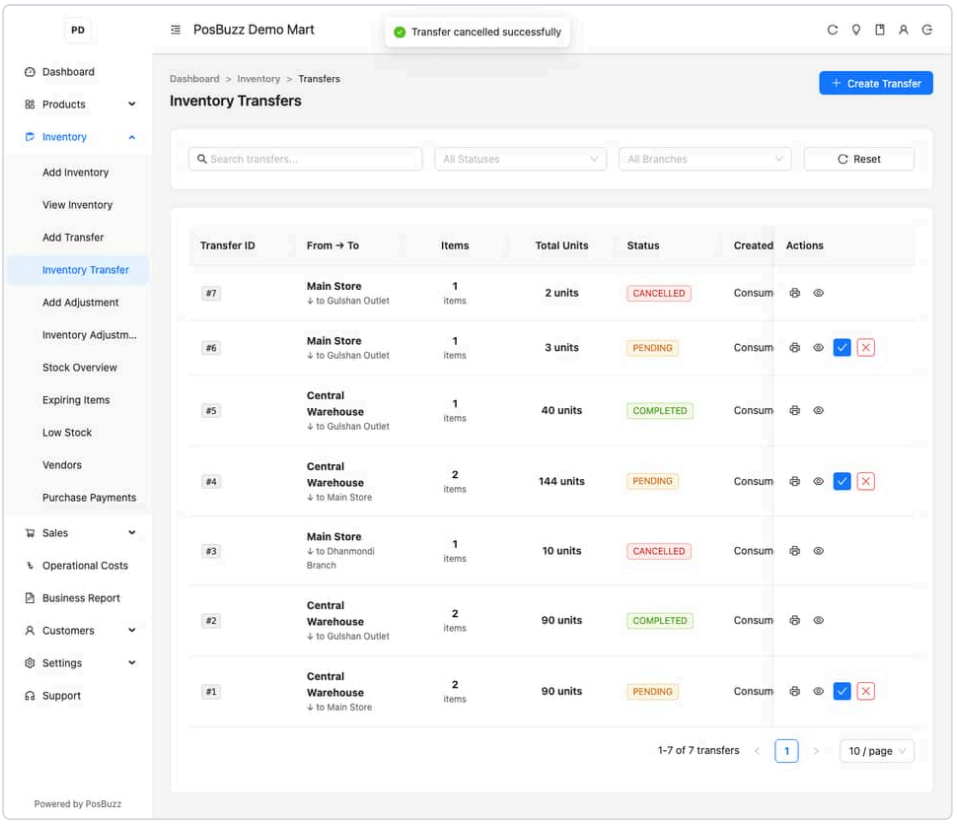

What happens next: You see "Transfer cancelled successfully". Stock stays where it was.

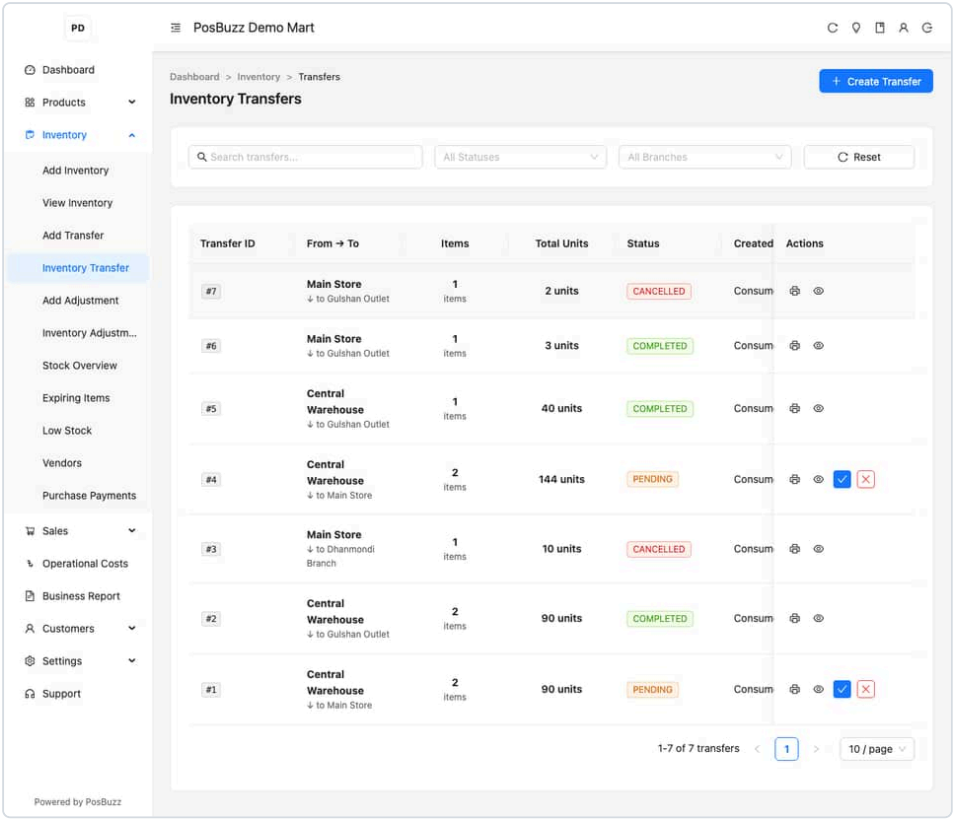

The cancel confirmation.

After completing a transfer of 3 units, the batch has 3 units in Gulshan Outlet and 7 left in Main Store.

Transfer cancelled successfully.

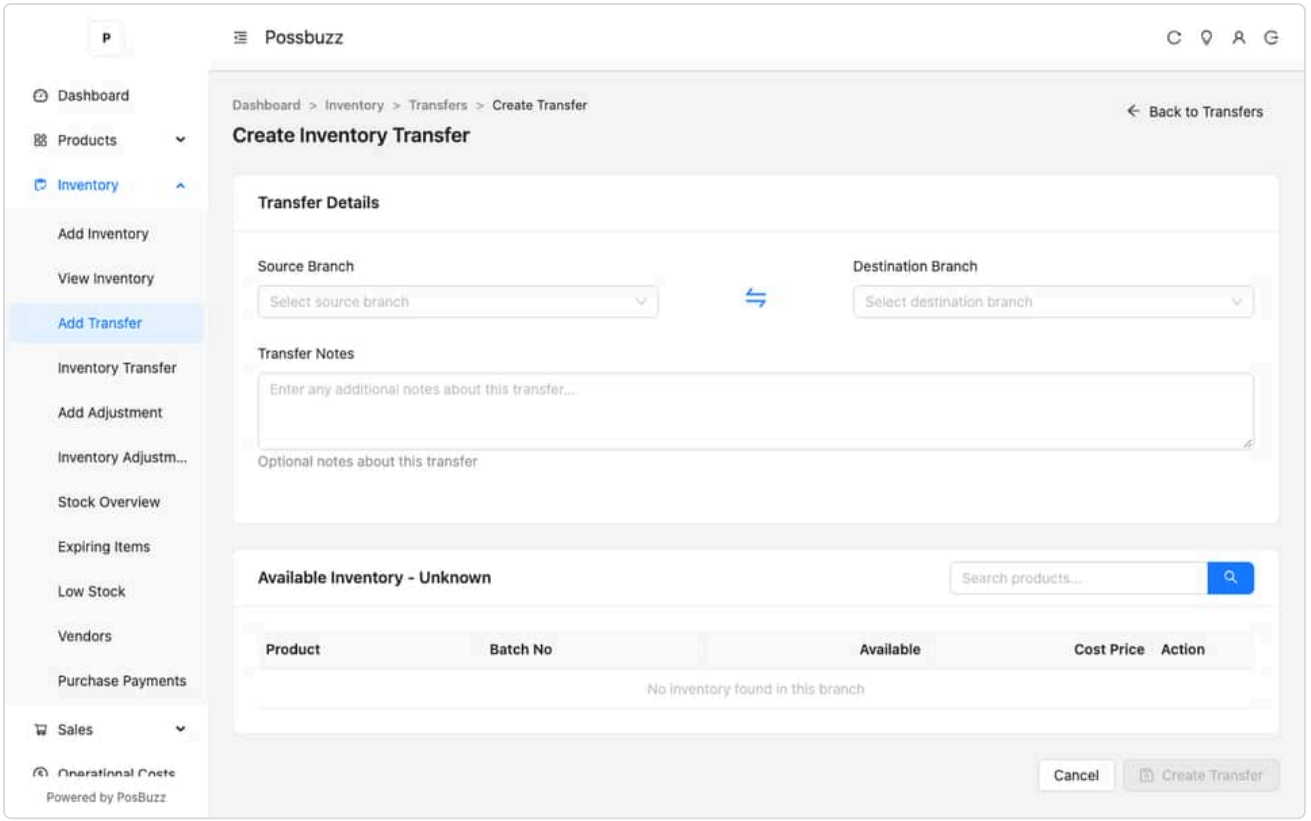

The list after completing and cancelling.

> **Good to know:** Creating a transfer does not take stock out of the source branch. Stock moves only when you complete it. Because of this, stock may be sold in the meantime, and completing the transfer can then fail with "Insufficient stock in source batch ...".

Message	What it means	What to do
Transfer completed successfully	Done.	Nothing.
Transfer cancelled successfully	Done.	Nothing.
Failed to complete transfer / Failed to cancel transfer (or a server message)	The action did not work.	Read the message and try again.
Transfer is not in pending status	The transfer was already completed or cancelled.	Reload the list.
Insufficient stock in source batch to complete this transfer	The source batch has less stock than the transfer needs.	Cancel the transfer and create a smaller one, or add stock to the source.
Failed to load the PDF	The slip could not be shown.	Close and try again.

Add Transfer

The Create Inventory Transfer form before a source branch is chosen.

What it is

The form to start a transfer of chosen batches from one branch to another.

Where to find it

Left menu, **Inventory**, then **Add Transfer** (or press **Create Transfer** on Inventory Transfer). You need the Inventory Transfer permission.

What you see

The page title is **Create Inventory Transfer**. **Back to Transfers** is at the top right.

Transfer Details card

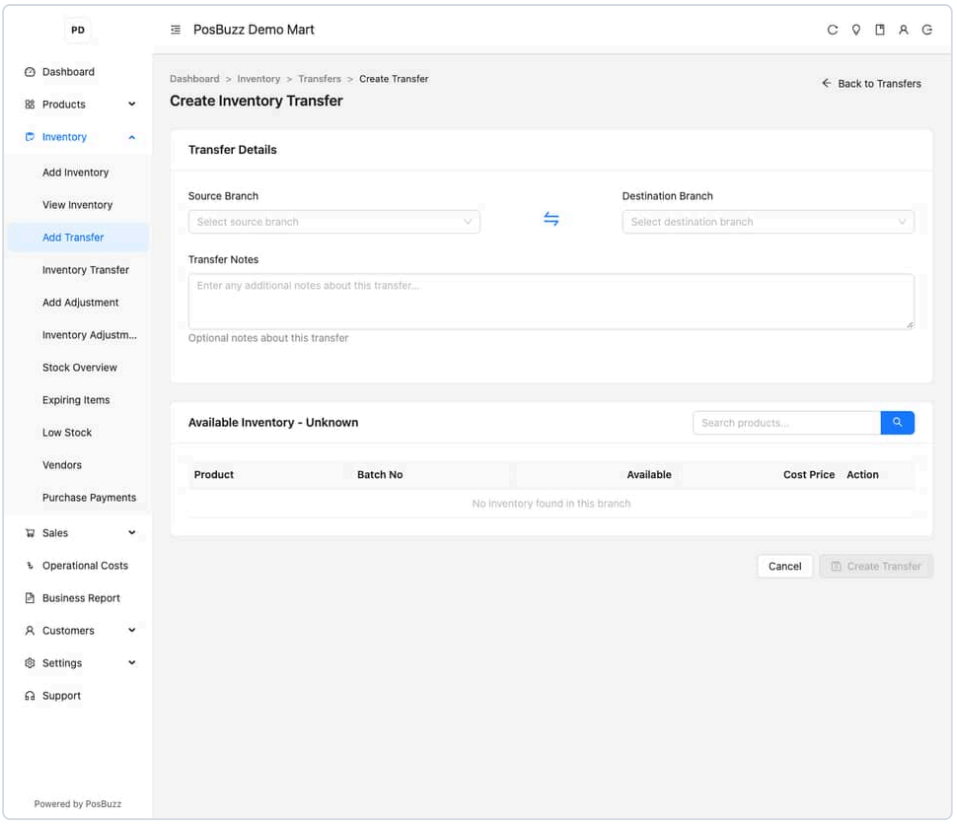

Field	Required	Notes
Source Branch	Yes	Placeholder "Select source branch". Changing it clears the items you chose.
Destination Branch	Yes	Placeholder "Select destination branch". The source branch is not offered. A swap icon sits between the two boxes.
Transfer Notes	No	Hint: "Optional notes about this transfer". Placeholder "Enter any additional notes about this transfer...".

Available Inventory card. Its title includes the source branch name. It has a search box ("Search products...") and a table with Product, Batch No, Available (units on hand in that batch), Cost Price and an **Add** button. With nothing to show it says "No inventory found in this branch" (or "No inventory found in warehouse"). In the picture, before a source is chosen, the title shows "Unknown".

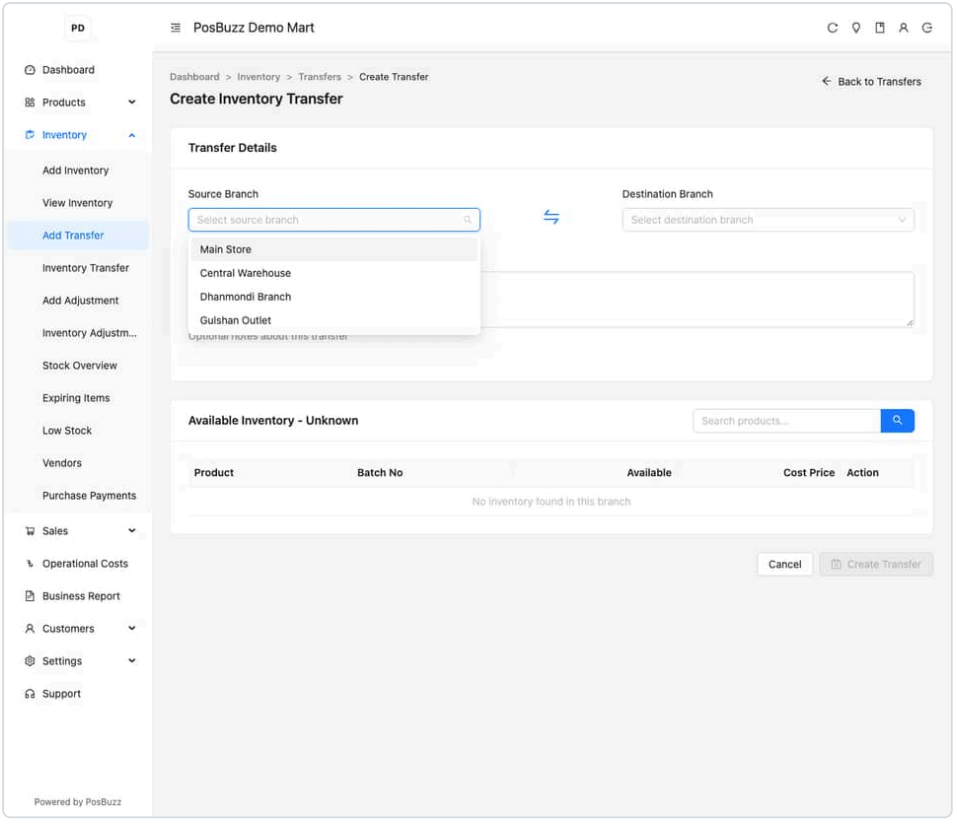

Items to Transfer card. It appears after you add a batch. Columns: Product (name, variant and batch number), Available, **Transfer Quantity** (at least 1, at most the batch quantity, "units" beside it, starts at 1), Total Value and a delete icon. Totals show **Total Items:**, **Total Units:** and **Total Value:**.

Buttons at the bottom: **Cancel** and **Create Transfer** (switched off until you add at least one item).

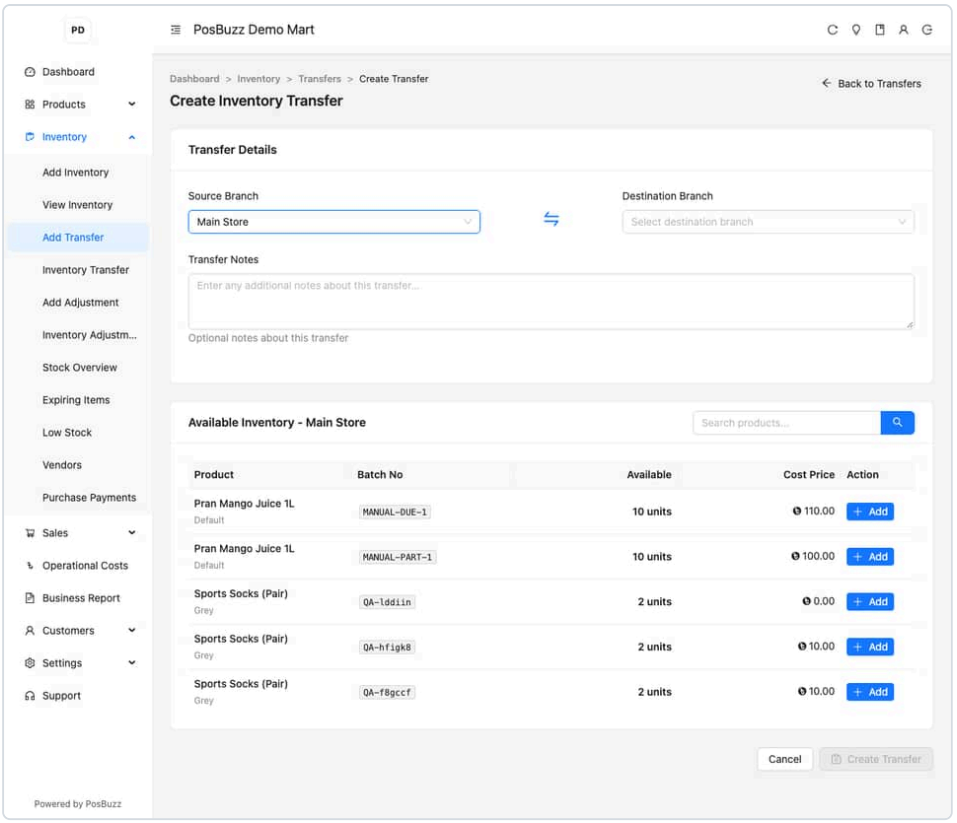

> **Good to know:** You choose the exact batch to move. The system does not pick a batch for you. The Available number in this list is the quantity on hand, but when you save, the system checks the quantity on hand minus units pending delivery. A transfer can be refused even if the list showed enough.

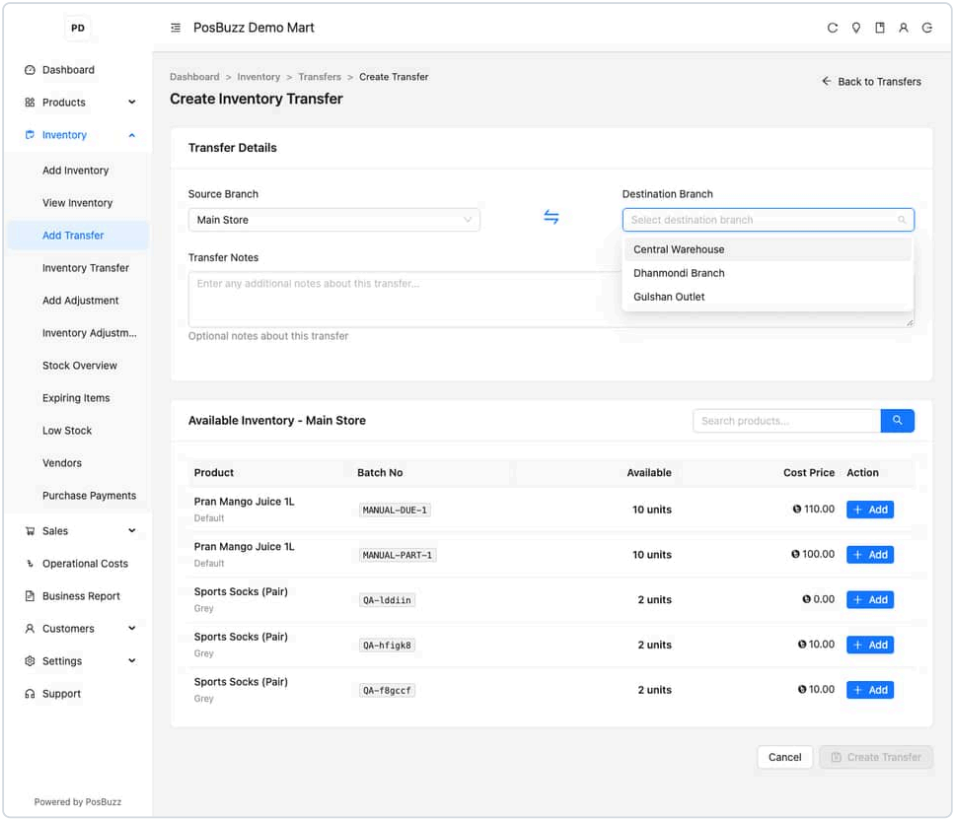

The empty form.

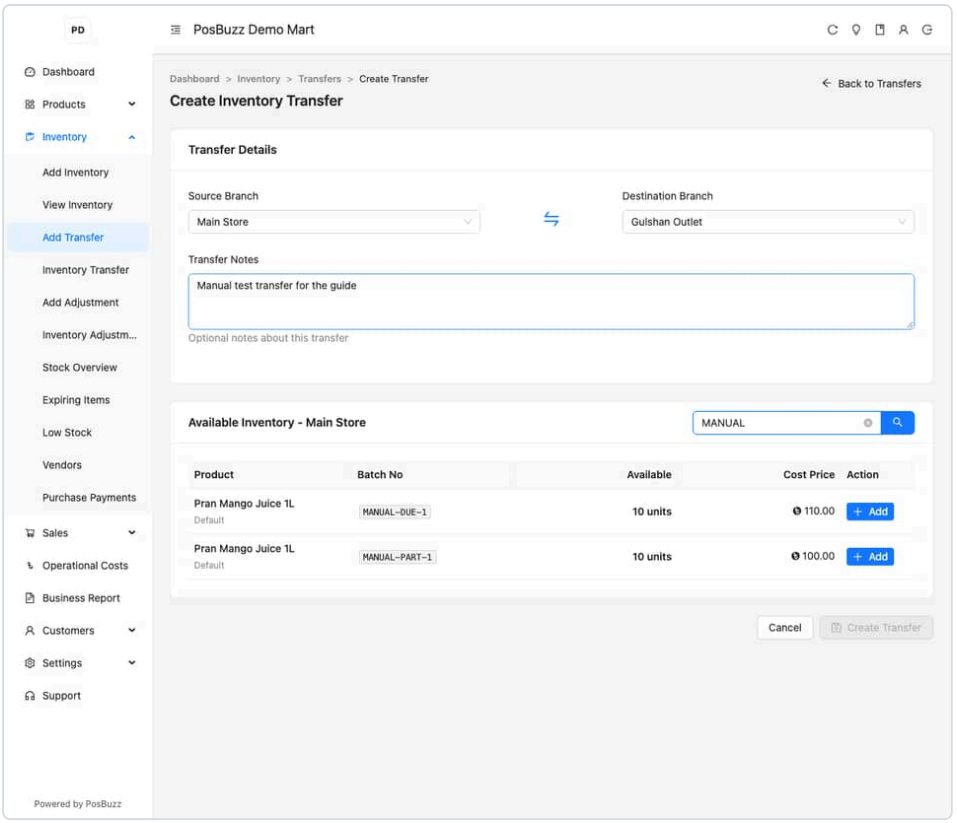

Choosing the source branch.

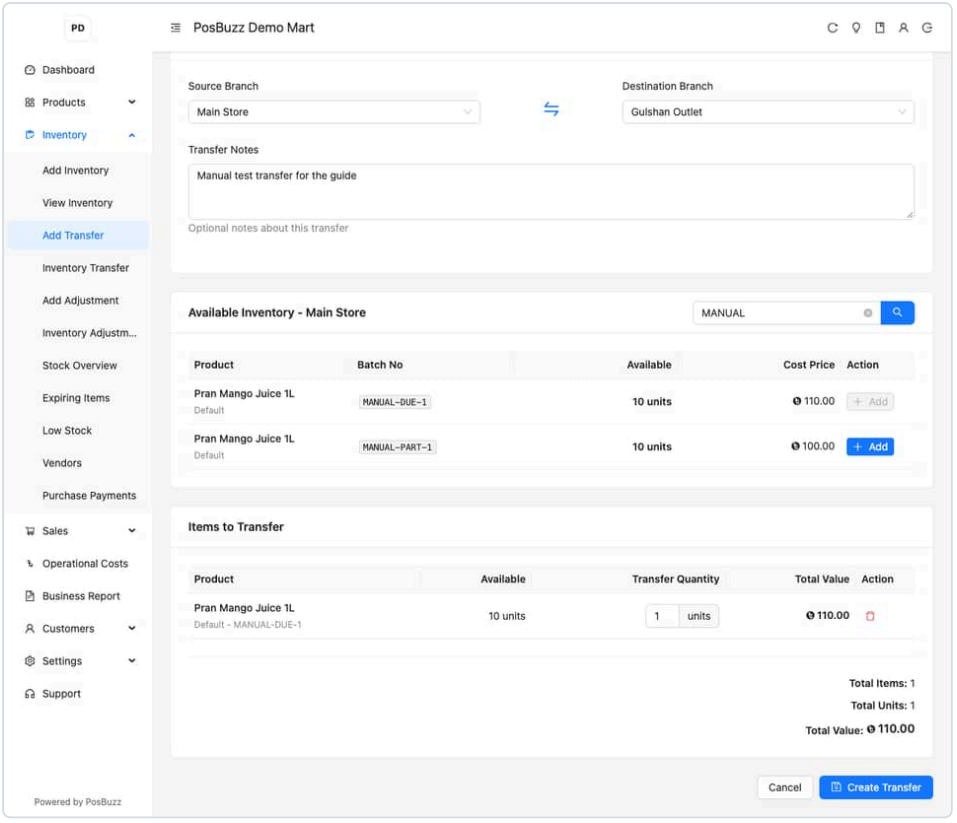

Available Inventory for the source branch.

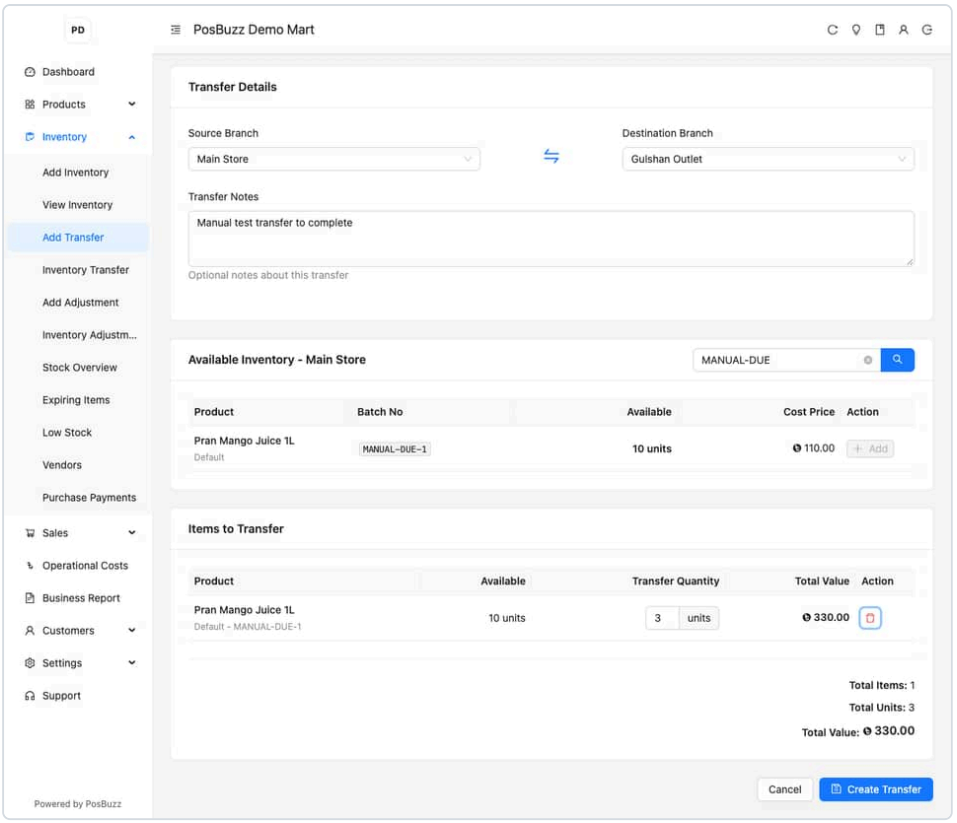

The destination list leaves out the source branch.

Searching the available batches.

The chosen item in Items to Transfer; the Add button is greyed for a batch already added.

Quantity set to 3 with the totals shown.

How to create a transfer

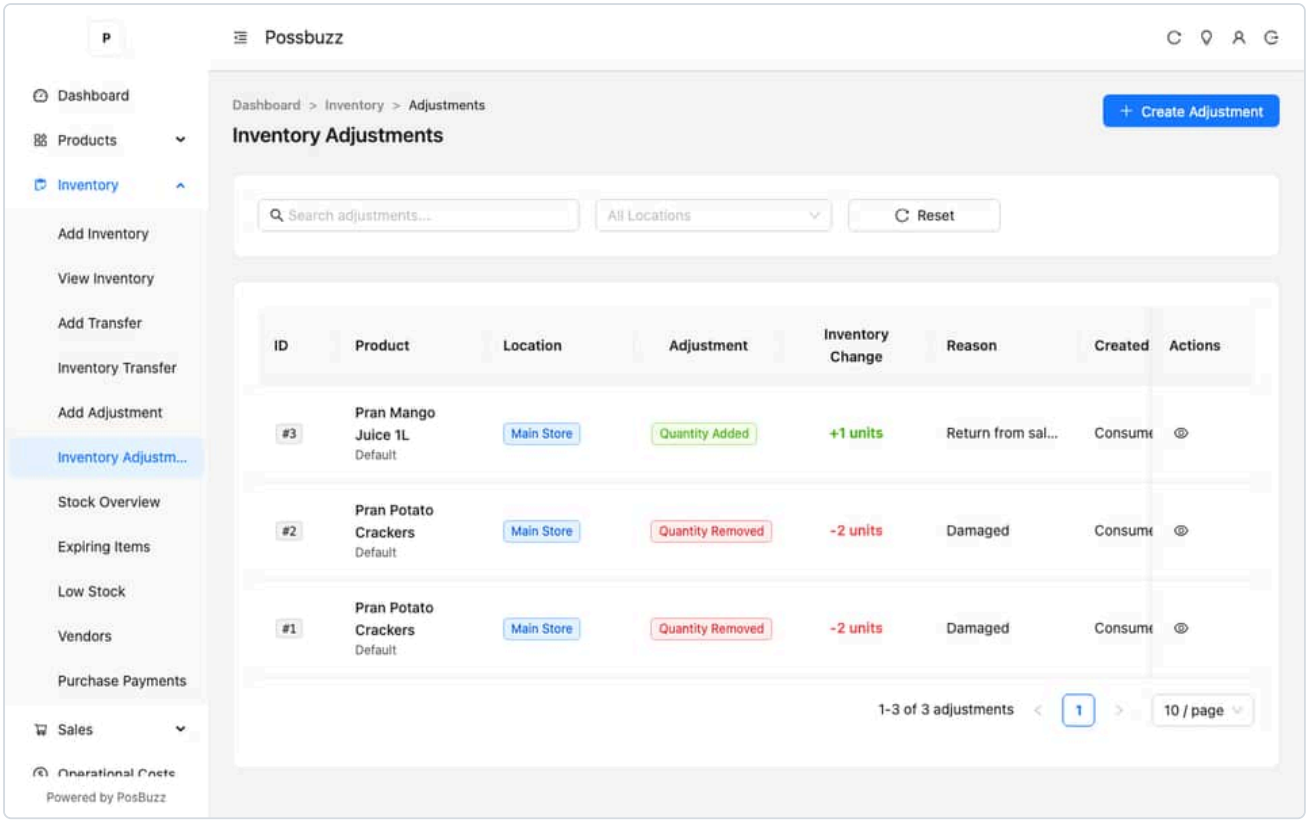

1. Open **Inventory**, then **Add Transfer**.
2. Choose the **Source Branch**.
3. Choose the **Destination Branch**.
4. Type **Transfer Notes** if you want.
5. In **Available Inventory**, search if needed and press **Add** next to each batch you want to move.
6. In **Items to Transfer**, set the **Transfer Quantity** for each item. Press the delete icon to remove an item.
7. Check **Total Items**, **Total Units** and **Total Value**.
8. Press **Create Transfer**.

What happens next: You see "Transfer created successfully" and go to the Inventory Transfers list. The new transfer is Pending. Stock does not move until you complete it from that list.

Message	What it means	What to do
This batch is already added	You pressed Add on a batch already in the list.	Change its quantity in Items to Transfer.
Please select both source and destination branches	One branch is missing.	Choose both.
Source and destination branches cannot be the same	Both are the same branch.	Choose different branches.
Please add at least one item to transfer	The list of items is empty.	Add a batch.

Message	What it means	What to do
Please check the quantities for all items	A quantity is not valid.	Fix quantities (at least 1 and not above Available).
Transfer created successfully	Done.	Complete it from the list.
Failed to create transfer (or a server message)	The save did not work.	Read the message and try again.
Insufficient available quantity in batch N. Available: A, Requested: R	You asked for more than is available.	Lower the quantity.
Batch with ID N not found in	The batch is no longer in that branch.	Reload and choose again.

Inventory Adjustment

The Inventory Adjustments list.

What it is

The history of manual stock corrections, such as damaged or lost goods.

Where to find it

Left menu, **Inventory**, then **Inventory Adjustment**. You need the Inventory Adjustment permission.

> **Good to know:** The list may also need the Inventory Batches permission to load its data. If the list is empty or refused even though you have the Inventory Adjustment permission, ask the owner to check your permissions. We have not confirmed this.

What you see

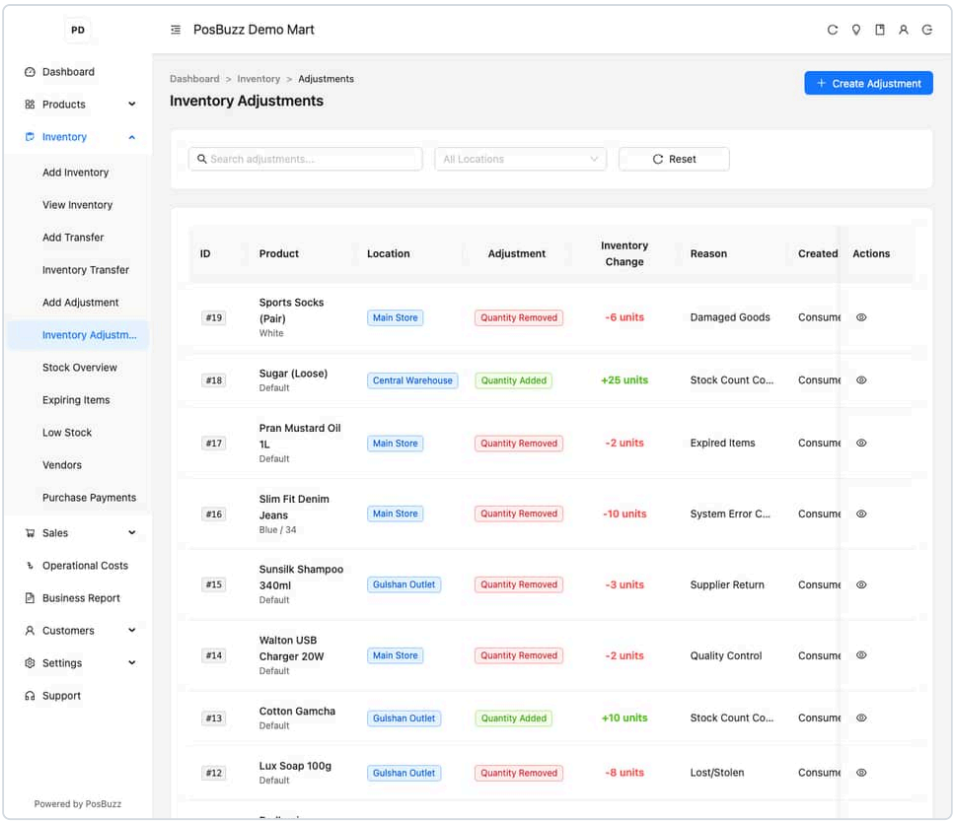

The page title is **Inventory Adjustments**. The button **Create Adjustment** is at the top right.

Filter	Notes
Search box ("Search adjustments...")	See the note below.
All Locations	Shows one branch only.
Reset	Clears the filters.

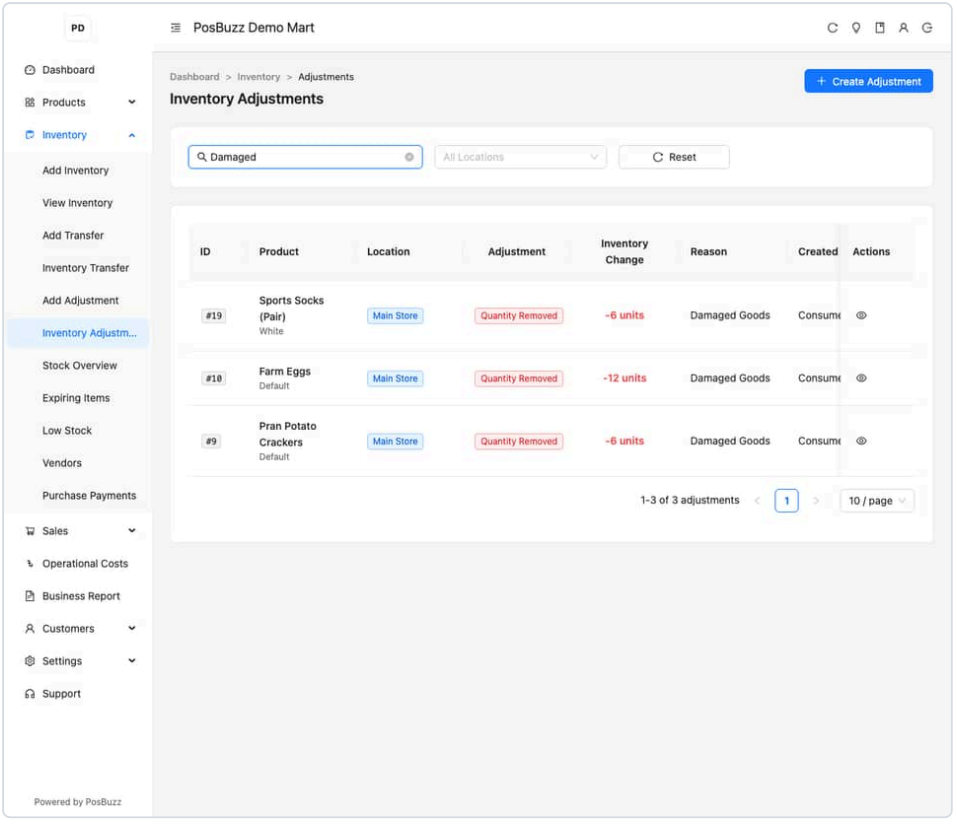

> **Good to know:** The search box finds adjustments by reason, notes, branch, who created it, batch, variant, SKU or product. It works together with the **All Locations** filter.

Column	Meaning
ID	The number, such as #3.
Product	A link to the product, with the variant below.
Location	The branch in a blue tag ("Warehouse" if none).
Adjustment	"Quantity Added" (green) or "Quantity Removed" (red).
Inventory Change	For example "+5 units" or "-3 units".
Reason	The reason, shortened. Point at it to see the whole text.
Created By	Who made it.
Date	When it was made.
Actions	Eye icon (View Details).

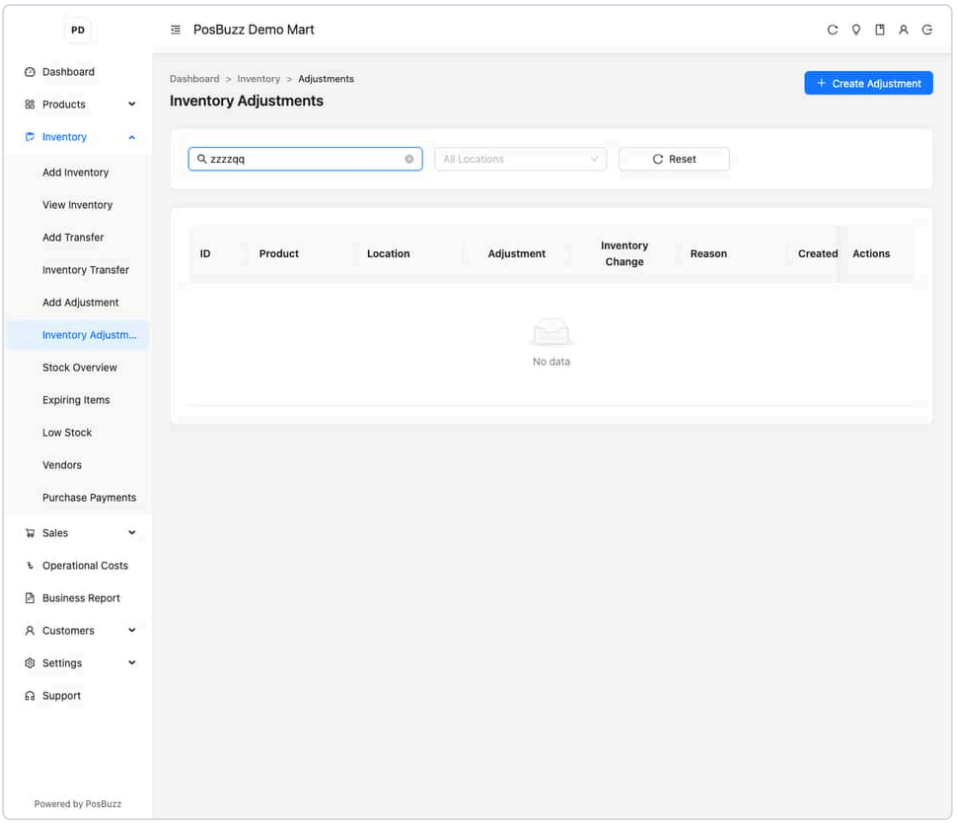

At the bottom you see "x-y of N adjustments".

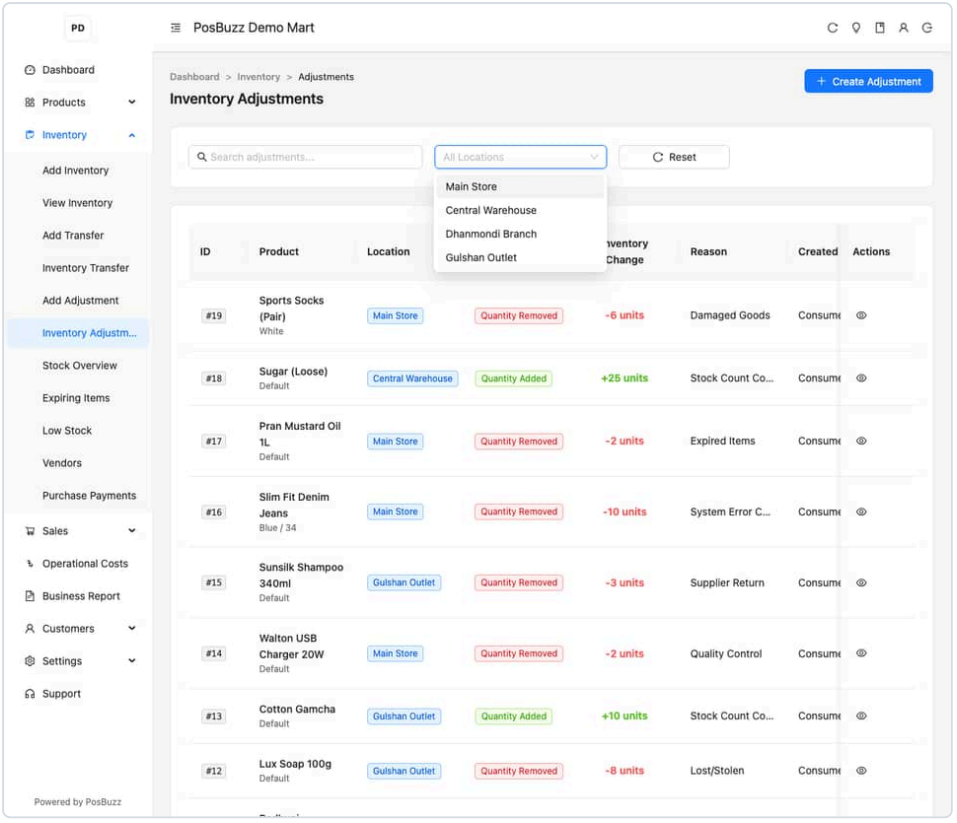

The adjustments list.

Searching for "Damaged".

No match.

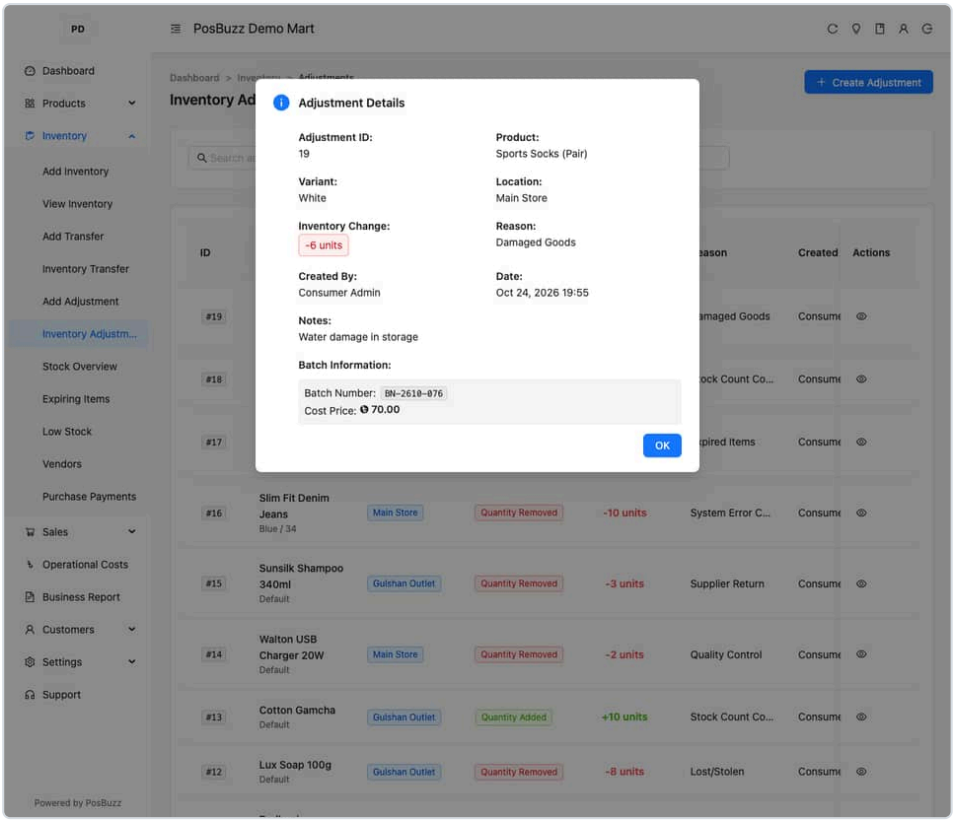

The All Locations list.

How to see adjustment details

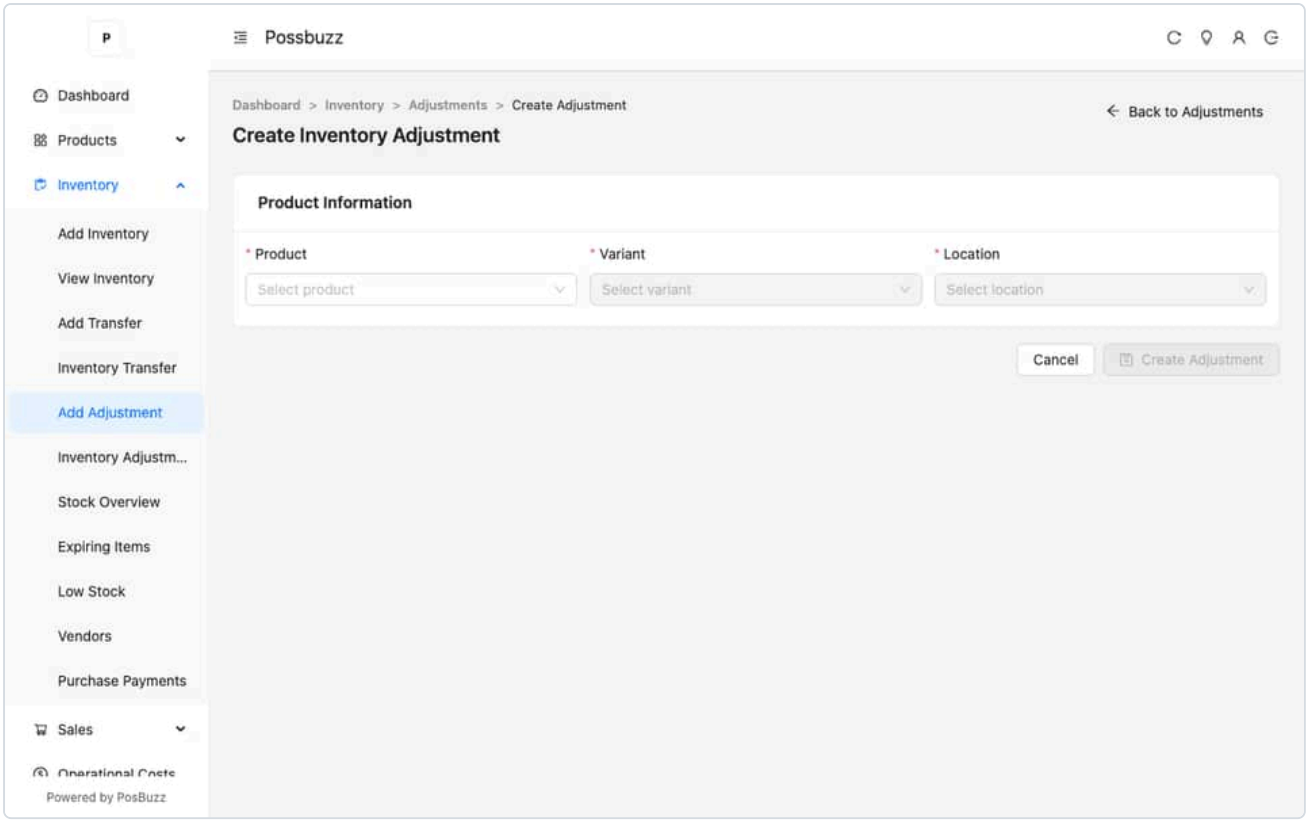

1. Press the eye icon on the row.

What happens next: The **Adjustment Details** window shows Adjustment ID, Product, Variant, Location, Inventory Change, Reason, Created By, Date, Notes and Batch Information (Batch Number and Cost Price).

The Adjustment Details window.

Add Adjustment

The Create Inventory Adjustment form before a product is chosen.

What it is

The form to add to or remove from the stock of one batch, for example after a stock count or when goods are damaged.

Where to find it

Left menu, **Inventory**, then **Add Adjustment** (or press **Create Adjustment** on the Inventory Adjustments list). You need the Inventory Adjustment permission.

What you see

The page title is **Create Inventory Adjustment**. **Back to Adjustments** is at the top right.

Product Information card

Field	Required	Notes
Product	Yes	Placeholder "Select product".
Variant	Yes	Placeholder "Select variant". Available after you choose a product.

Field	Required	Notes
Location	Yes	Placeholder "Select location". This is the branch. Available after you choose a variant.
Batch	Yes	Placeholder "Select batch". Appears after variant and location are chosen. Each choice shows the batch number and "N units - cost".

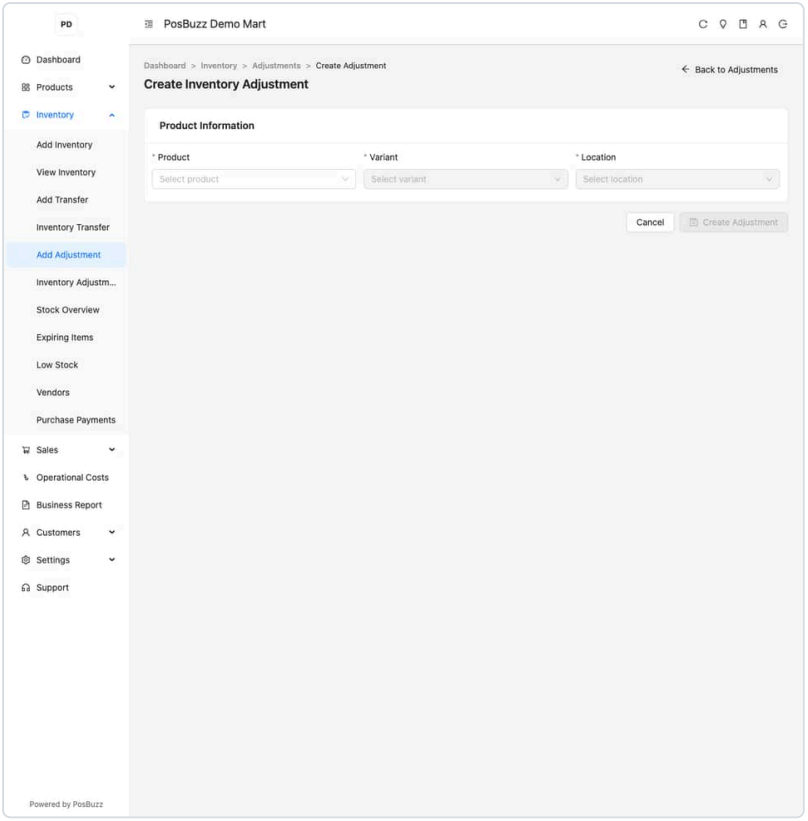

After a batch is chosen, a small card shows **Stock:** N units, **Cost:** and **Batch:**. If there is no batch you see "No batches available" and "No inventory batches found for this variant in ".

Adjustment Details card (appears after you choose a batch)

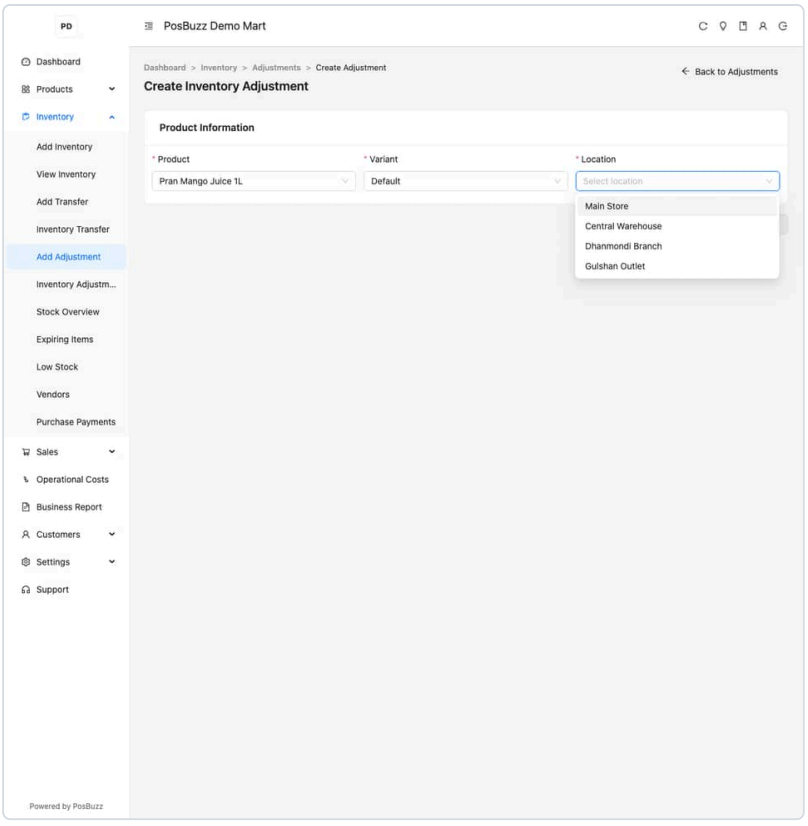

Field	Required	Notes
Inventory Action	Yes	**Add to Inventory** (chosen at first) or **Remove from Inventory**.
Quantity	Yes	Starts at 1. Must be above 0. Shows "u" beside it. When removing it cannot be more than the units in the batch.
Reason	Yes	Placeholder "Select reason for adjustment". Choices: Stock Count Correction, Damaged Goods, Expired Items, Lost/Stolen, Supplier Return, Quality Control, System Error Correction, Other.
Notes	No	Placeholder "Additional notes (optional)".

Inventory Summary: shows Current (N u), Adding or Removing (+N u or -N u) and New (N u). If the new number would be below zero it turns red and you see "Warning: This will result in negative stock!".

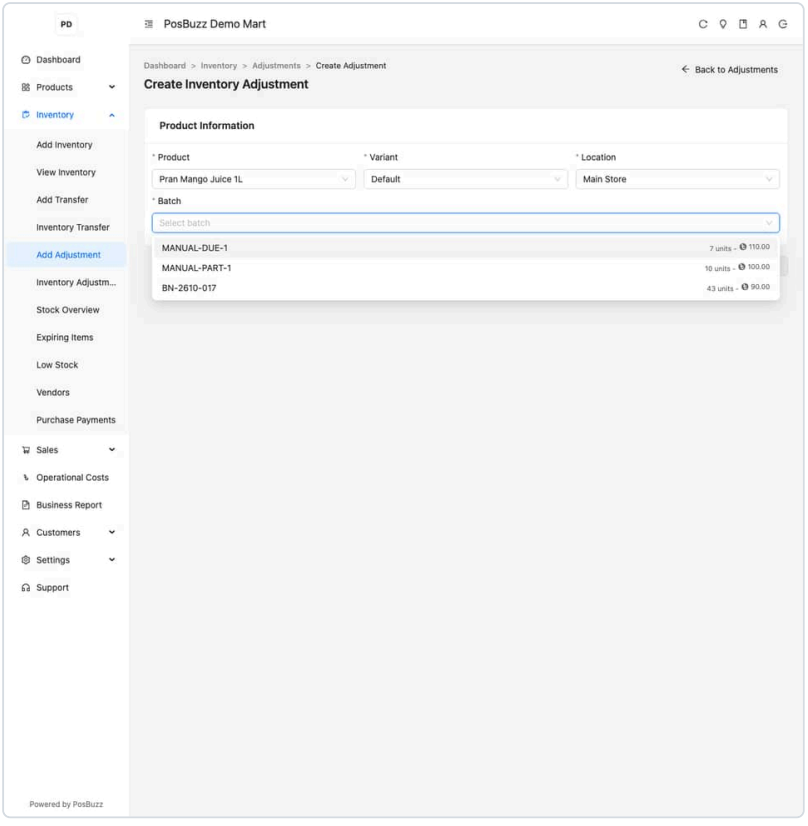

Buttons: **Cancel** and **Create Adjustment** (switched off until a batch is chosen).

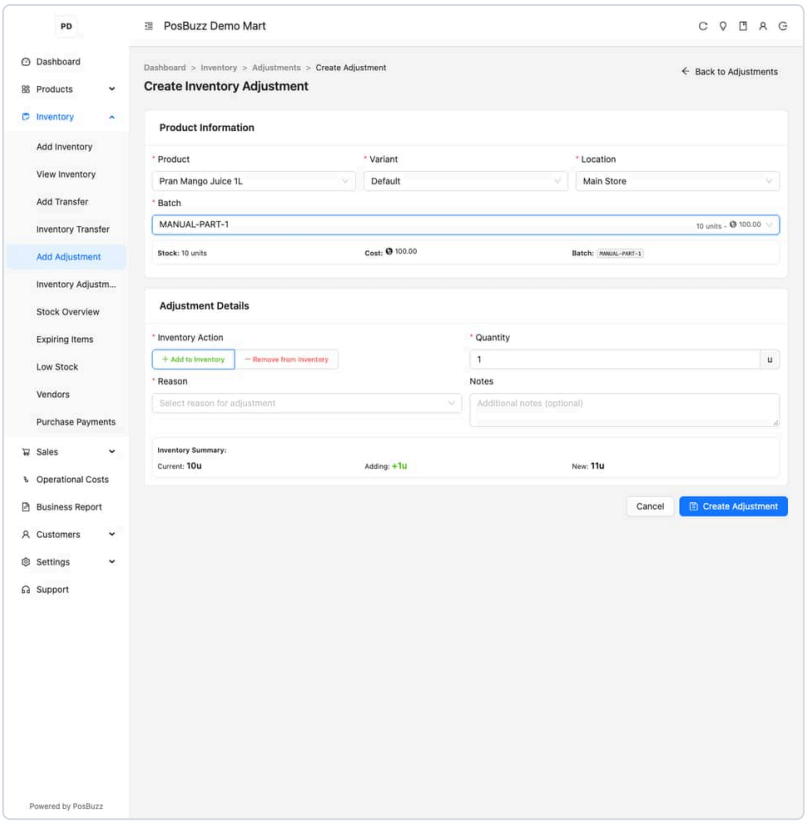

The empty form.

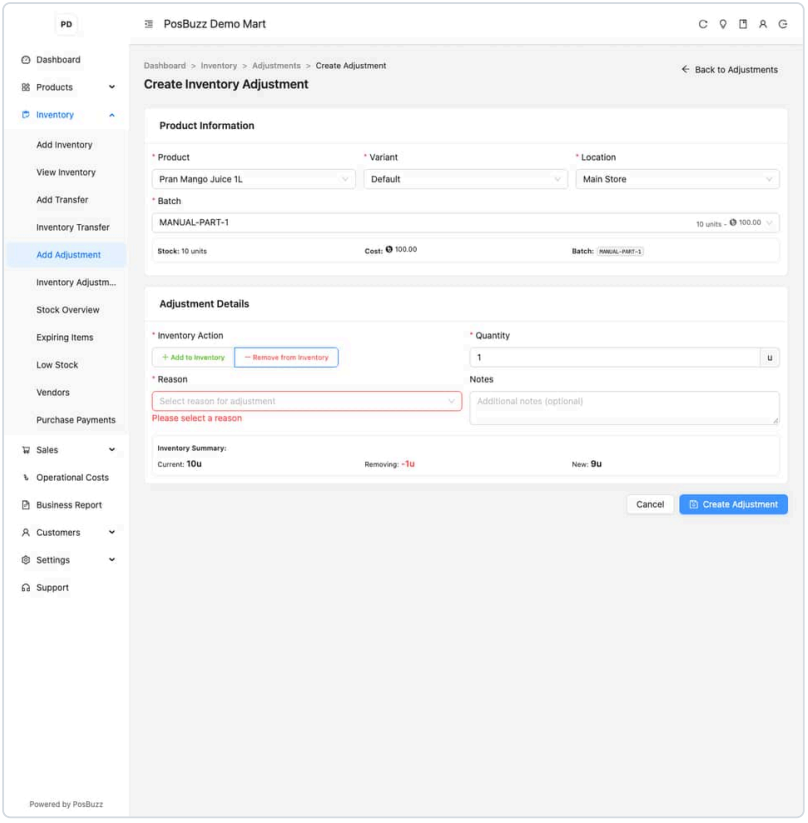

The location list.

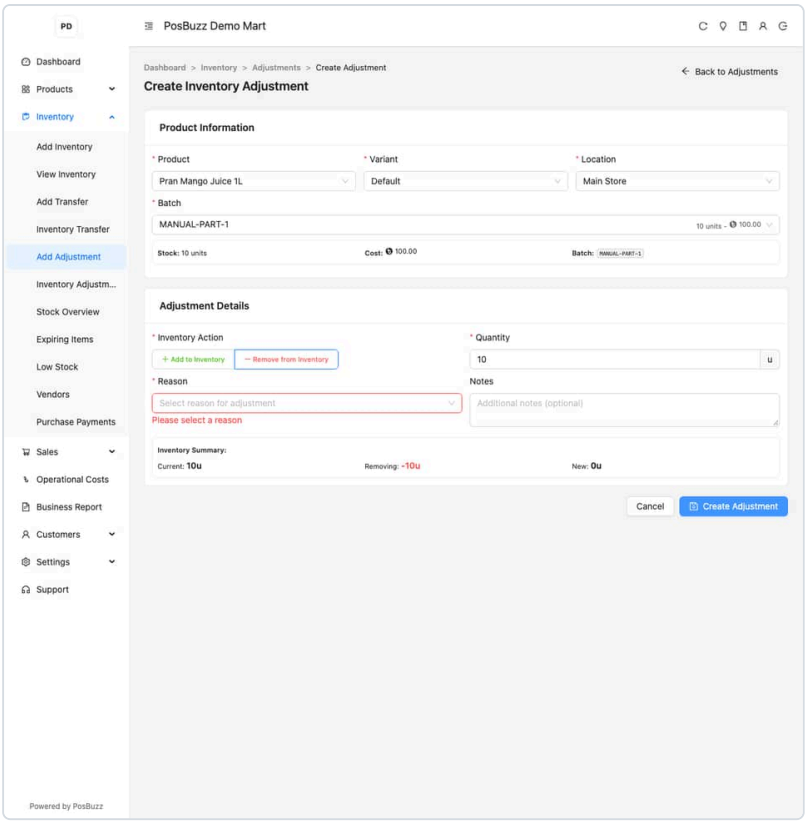

The batch list shows units and cost.

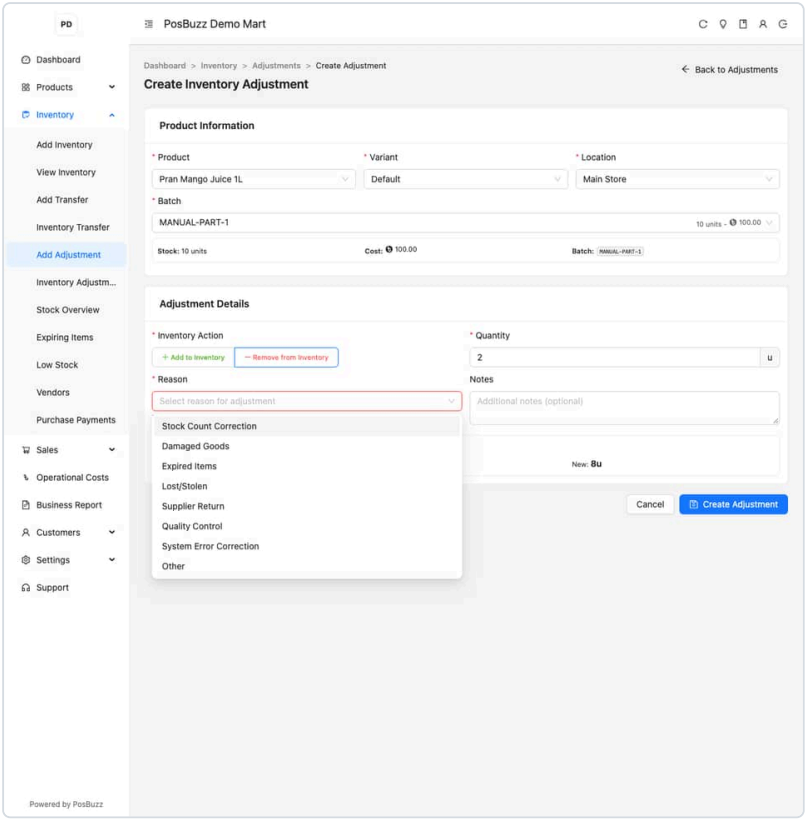

Batch chosen, with the Adjustment Details card.

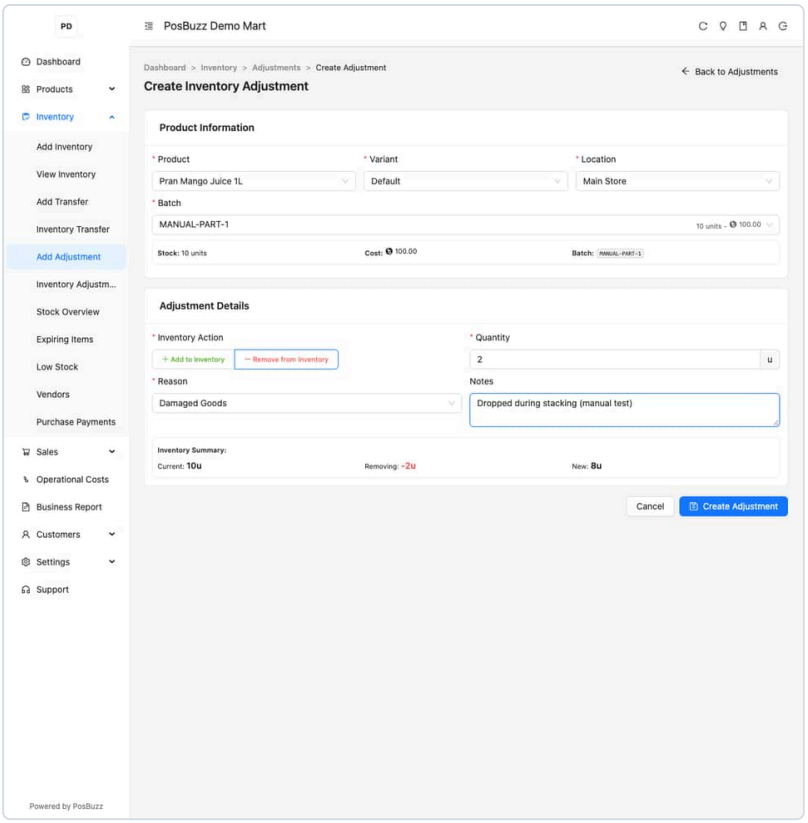

Please select a reason.

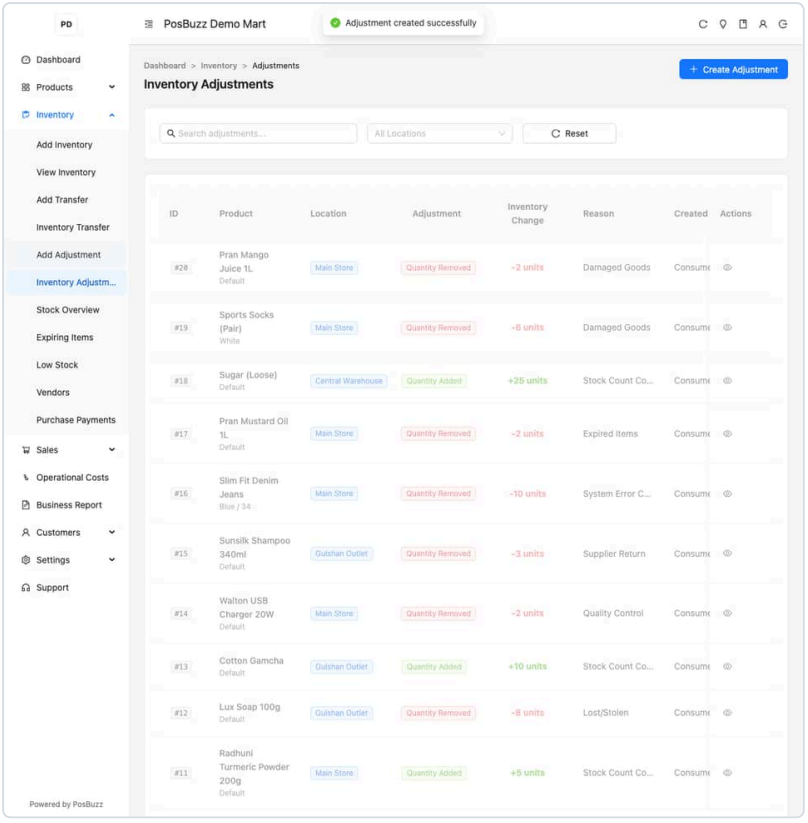

Removing the whole batch shows New: 0u.

The reason list.

Remove 2 units for Damaged Goods.

Adjustment created successfully.

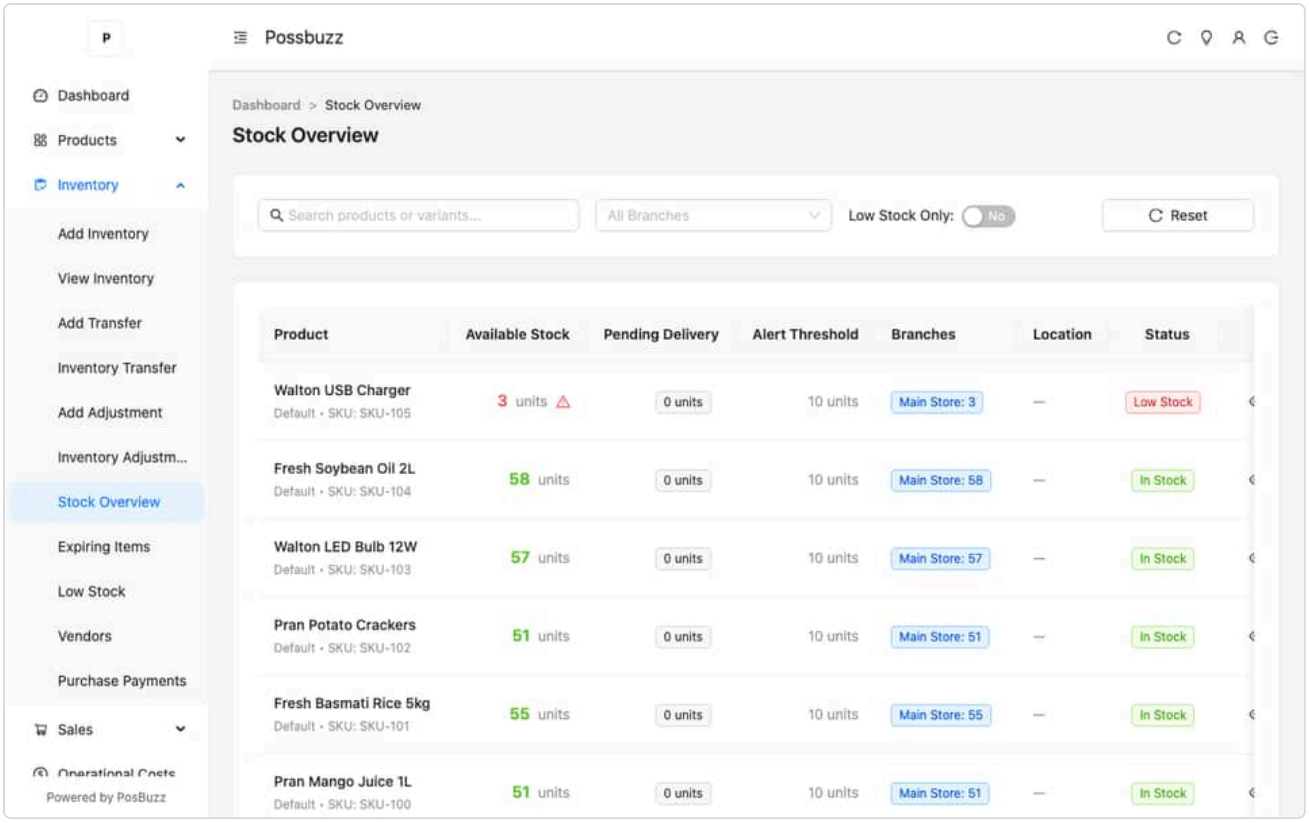

How to adjust stock

1. Open **Inventory**, then **Add Adjustment**.
2. Choose the **Product**, then the **Variant**, then the **Location**.
3. Choose the **Batch**. Check the Stock, Cost and Batch shown.
4. Under **Inventory Action**, choose **Add to Inventory** or **Remove from Inventory**.
5. Type the **Quantity**.
6. Choose the **Reason**.
7. Type **Notes** if you want.
8. Read the **Inventory Summary**.
9. Press **Create Adjustment**.

What happens next: You see "Adjustment created successfully" and go to the Inventory Adjustments list. The batch changes at once. There is no approval step. The change shows in Movement History.

Message	What it means	What to do
Please select a product / variant / location	A choice is missing.	Make the choice.
Please select a batch	No batch chosen.	Choose a batch.
Please enter quantity	Quantity is empty.	Type a number.
Quantity must be greater than 0	Quantity is 0 or less.	Type a number above 0.
Please select a reason	No reason chosen.	Choose one.
Cannot remove more than the available N units	The quantity is above the batch stock.	Lower it.
Cannot remove N units. Only M units available.	Same as above, shown when you save.	Lower it.
Warning: This will result in negative stock!	The new stock would be below zero.	Check the quantity.
No batches available	There is no stock for that variant at that location.	Choose another location or variant.
Failed to create adjustment (or a server message)	The save did not work.	Read the message and try again.

Stock Overview

The Stock Overview list, one row per product variant.

What it is

One row per product variant, showing stock in each branch.

Where to find it

Left menu, **Inventory**, then **Stock Overview**. You need the Inventory Batches permission.

What you see

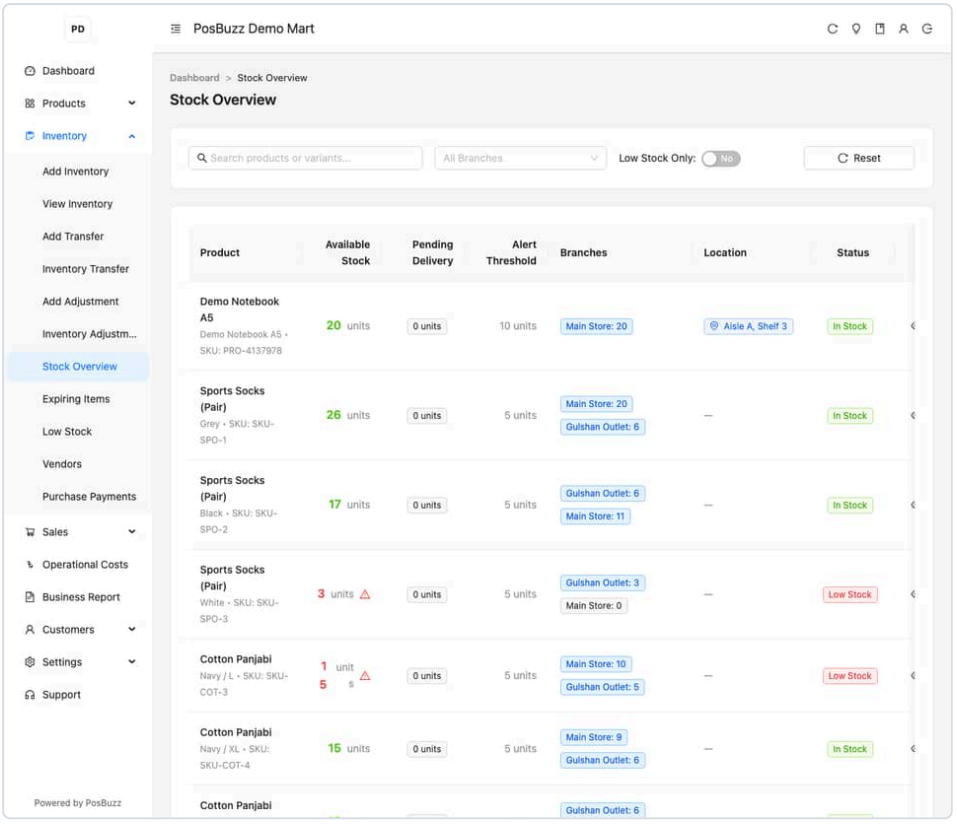

Filter	Notes
Search box ("Search products or variants...")	Also finds product code, SKU, barcode and location.
All Branches	Shows one branch.
Low Stock Only: switch (Yes or No)	Shows only low stock variants.
Reset	Clears the filters.
Active filters: chips	Show what is on.

Column	Meaning
Product	Link to the product, the variant and "SKU: x".

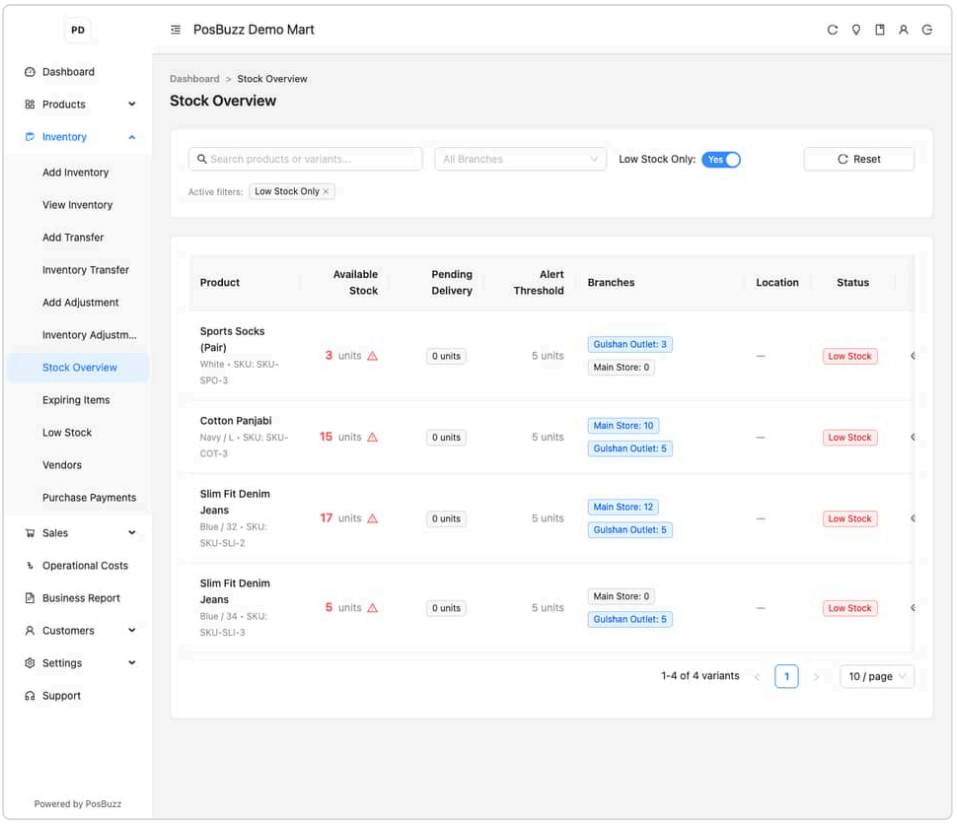

Column	Meaning
Available Stock	Number with "units". A red warning icon ("Low stock alert") shows if low.
Pending Delivery	Units waiting for delivery.
Alert Threshold	The alert quantity, or "Not set".
Branches	Tags such as "Main Store: 3".
Location	Storage locations.
Status	Low Stock (red), In Stock (green) or Out of Stock (grey).
Actions	Eye icon, **View Stock** and **History**.

At the bottom you see "x-y of N variants". Available stock is the quantity on hand minus units pending delivery. A variant is Low Stock when an alert quantity above 0 is set and any one branch is at or below it (or the branch you chose in the filter).

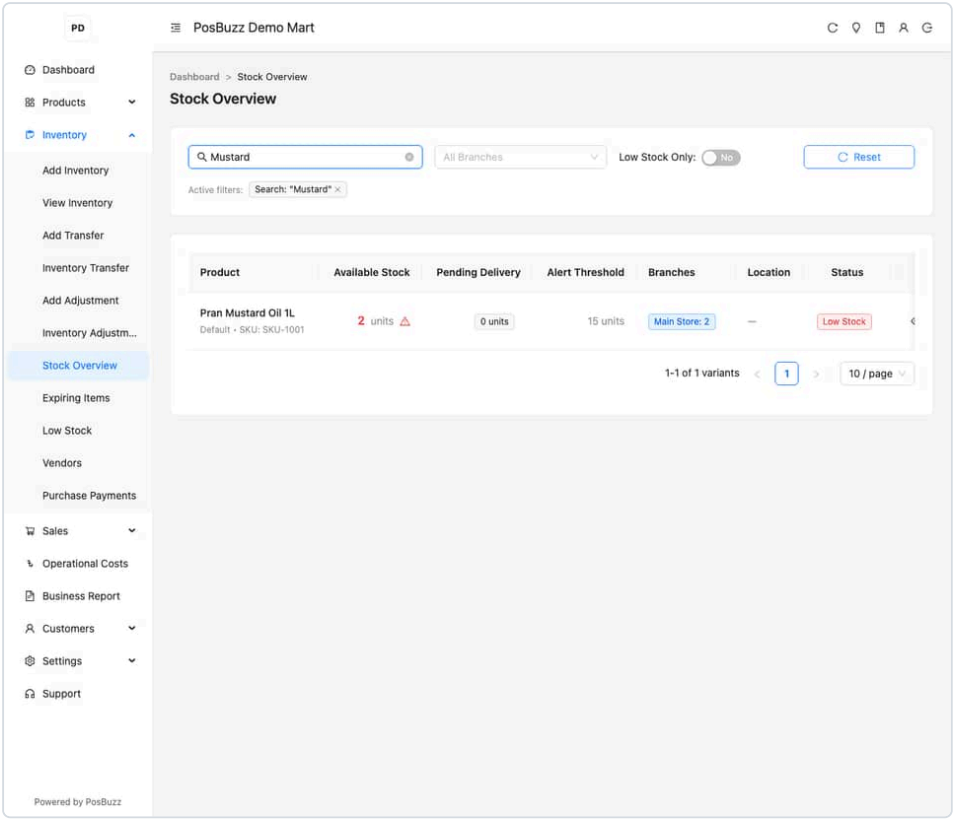

> **Good to know:** The **Low Stock Only:** switch is applied after the page is loaded. A page may therefore show fewer rows than the page size, and some low stock items may be on other pages.

The Stock Overview list.

Low Stock Only switched on.

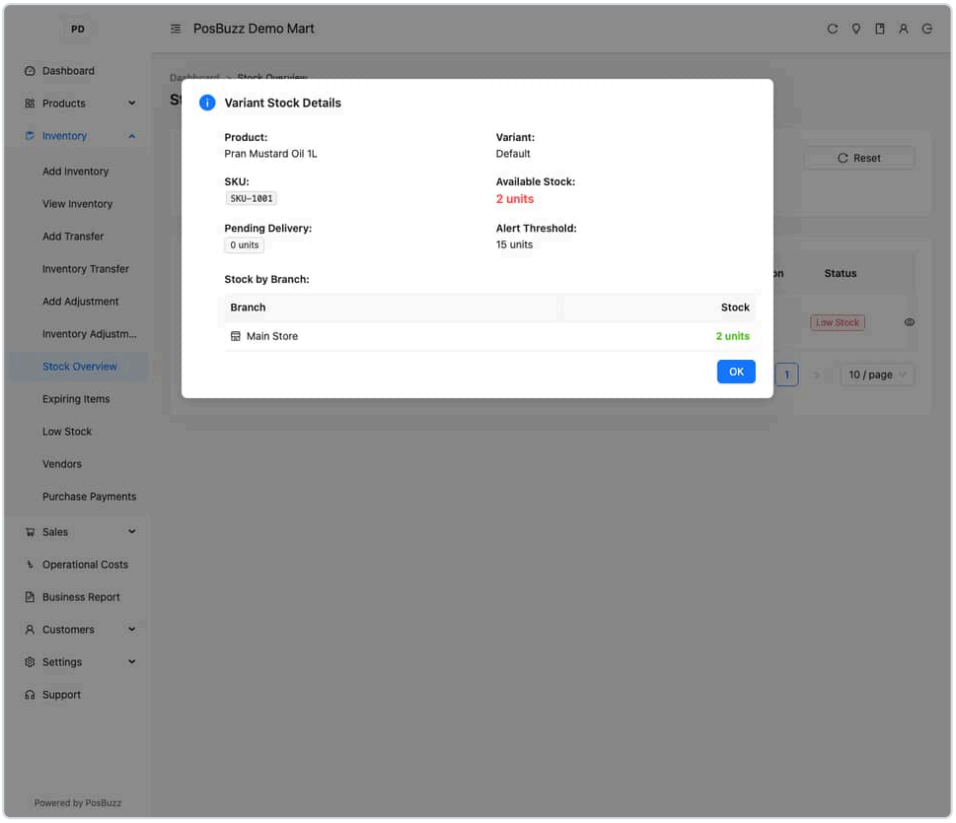

Search.

How to see stock details of a variant

1. Press the eye icon (**View Details**).

What happens next: The **Variant Stock Details** window shows Product, Variant, SKU, Available Stock, Pending Delivery, Alert Threshold and a **Stock by Branch** table.

The Variant Stock Details window.

How to open the full stock page or history

1. Press **View Stock** (tooltip "View Variant Stock") to open Variant Stock Details.
2. Press **History** (tooltip "Movement History") to open Movement History.

How to find low stock items

1. Turn **Low Stock Only:** to **Yes**.
2. Optionally choose a branch.

What happens next: The list shows only variants that are low.

Variant Stock Details

What it is

A full page about the stock of one variant, with its branches and batches.

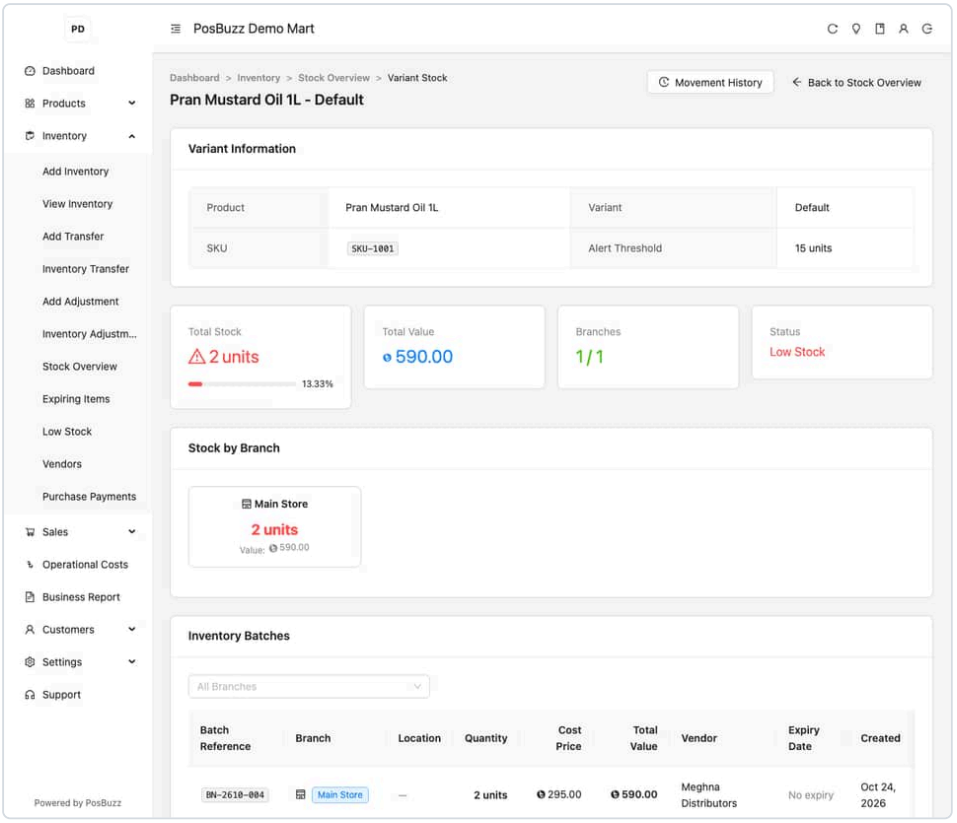

Where to find it

From **Stock Overview** press **View Stock**, or from **Low Stock** press **View Stock**. You need the Inventory Batches permission. It has no menu entry of its own.

What you see

The title is the product name and variant. Buttons: **Movement History** and **Back to Stock Overview**. If nothing is found you see "Variant stock data not found".

- **Variant Information** card: Product, Variant, SKU and Alert Threshold ("Not set" if none).
- Four cards: **Total Stock** (units, with a bar compared to the alert threshold), **Total Value**, **Branches** (branches with stock out of all branches) and **Status** (Low Stock, In Stock or Out of Stock).
- **Stock by Branch** card: one tile per branch with "N units" and "Value:". Value turns red when stock is at or below the alert threshold.
- **Inventory Batches** card: an **All Branches** filter and a table with Batch Reference, Branch, Location, Quantity, Cost Price, Total Value, Vendor, Expiry Date and Created. A **Total** row at the bottom shows units and value. You see "x-y of N batches".

The Variant Stock Details page.

How to read the stock of a variant

1. On Stock Overview, find the variant and press **View Stock**.
2. Look at the cards at the top, then the branch tiles.
3. Use **All Branches** to show the batches of one branch.
4. Press **Movement History** to see changes, or **Back to Stock Overview** to leave.

What happens next: Nothing is changed. This page is for viewing only.

Movement History

What it is

A list of stock changes for one variant: adjustments and transfers.

Where to find it

From **Stock Overview** press **History**, or from **Variant Stock Details** press **Movement History**. You need the Inventory Batches permission. The path is Inventory > Stock Overview > the variant.

What you see

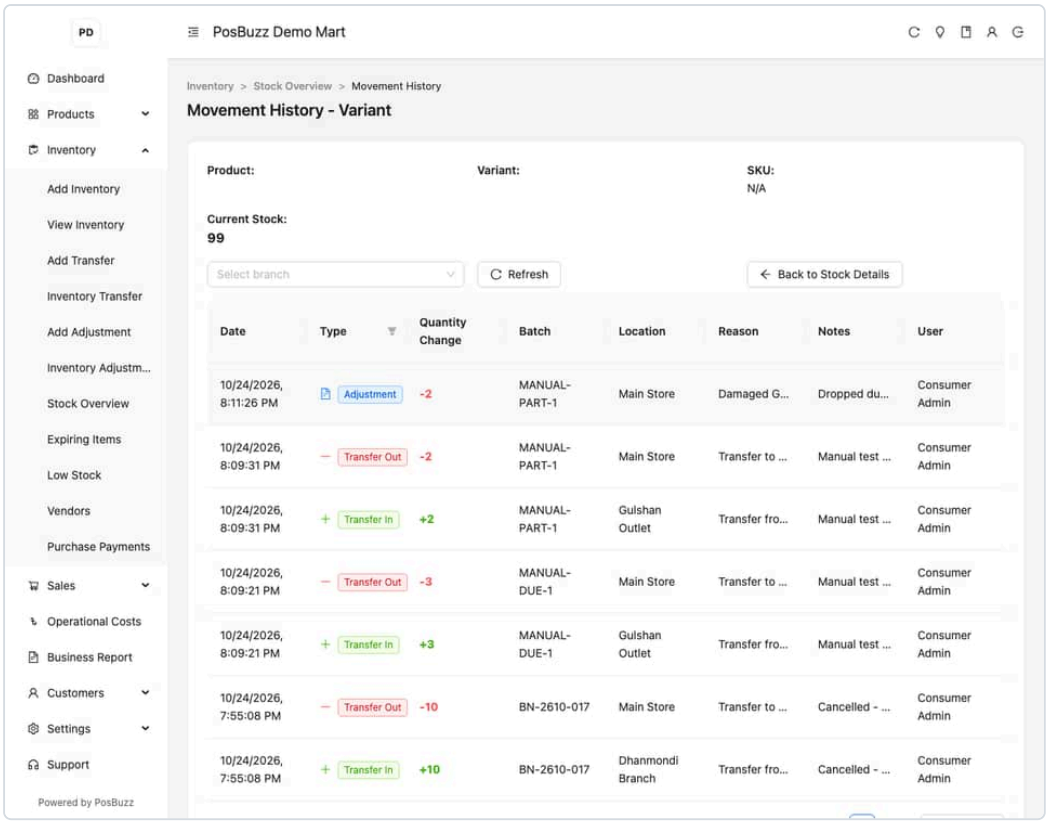

The title is "Movement History" followed by the variant. The top shows Product, Variant, SKU and Current Stock. If an alert quantity is set you also see **Alert Quantity (Per Branch)** with the text "Low stock alerts are triggered when any branch falls below this threshold".

Controls: a **Select branch** box, **Refresh** and **Back to Stock Details**.

Column	Meaning
Date	When it happened.
Type	Adjustment (blue), Transfer In (green) or Transfer Out (red). You can filter this column.
Quantity Change	Plus in green, minus in red.
Batch	The batch number.
Location	The branch.
Reason	The reason. For transfers it says "Transfer to X" or "Transfer from X".
Notes	Notes entered.
User	Who did it.

You can choose 10, 20, 50 or 100 rows per page. The count reads "x-y of N movements".

> **Good to know:** Only adjustments and transfers are listed. Purchases and sales do not appear here. Transfers are listed for every status, including Pending and Cancelled ones (a cancelled transfer appears as a Transfer Out and a Transfer In with a note starting "Cancelled"), and use the date the transfer was created. In our check, the Product, Variant and SKU lines at the top of the page were empty or showed N/A. The page count is based on adjustments only. Treat page numbers and totals as approximate.

Movement History for a variant.

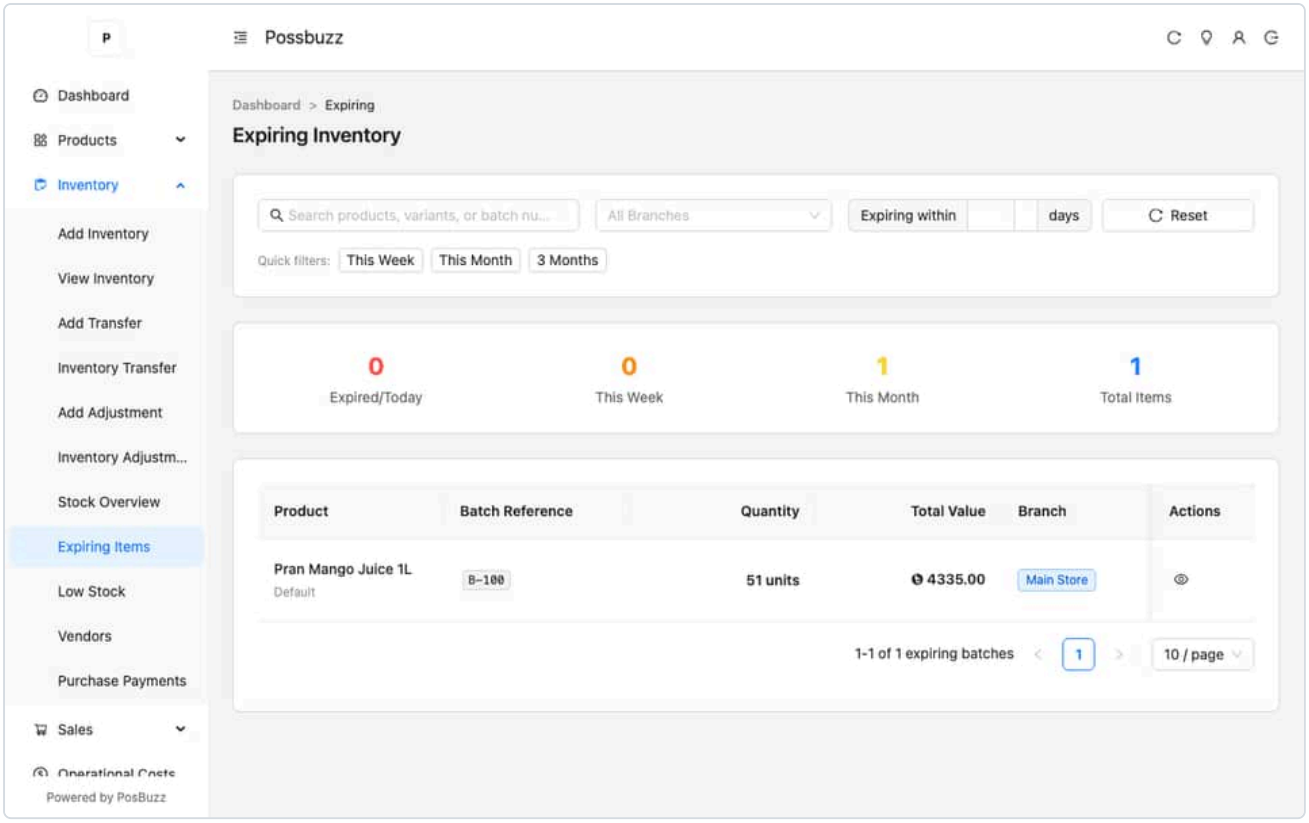

How to see what changed for a variant

1. On Stock Overview press **History** on the variant's row.
2. Choose a branch in **Select branch** if you want one branch only.
3. Use the filter on the **Type** column to show one kind of movement.
4. Press **Refresh** to load again, or **Back to Stock Details** to leave.

What happens next: Nothing is changed.

Message	What it means	What to do
Failed to load variant information. Please try again.	The page could not load the variant.	Press **Go Back** and try again.
Failed to load movement history. Please try again.	The list could not load.	Press **Refresh**.

Expiring Items

The Expiring Inventory screen with one batch that expires within 30 days.

What it is

A list of batches with stock that will expire in the next few days. The default is 30 days.

Where to find it

Left menu, **Inventory**, then **Expiring Items**. You need the Inventory Batches permission.

What you see

The page title is **Expiring Inventory**.

Filter	Notes
Search box ("Search products, variants, or batch numbers...")	Searches the rows already loaded on this page.
All Branches	Shows one branch.
Expiring within [days]	A number from 1 to 365. The default is 30.
Quick filters	**This Week** (7 days), **This Month** (30 days), **3 Months** (90 days).
Reset	Clears the filters.

Filter	Notes
Chip "Expiring within: N days"	Shows the days now chosen.

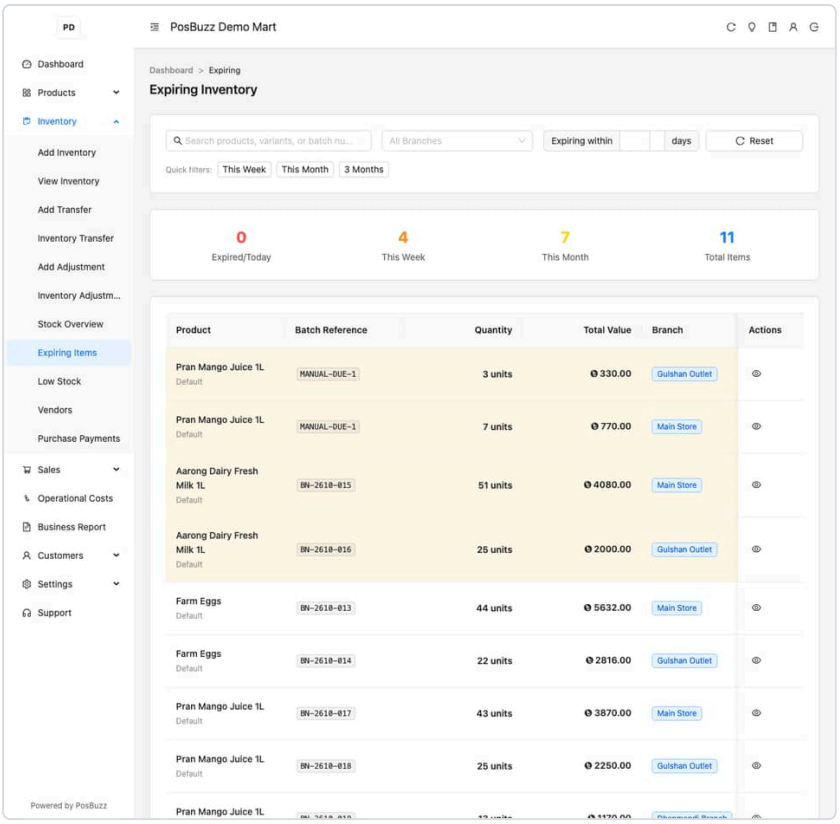

Summary numbers

Card	Meaning
Expired/Today	Batches already expired or expiring today.
This Week	Batches with 7 days or fewer left.
This Month	Batches with 8 to 30 days left.
Total Items	All batches listed.

Column	Meaning
Product	Product with variant.
Batch Reference	The batch number.
Quantity	Units in the batch.
Total Value	Cost value of the batch.
Branch	The branch.
Expiry Date	The date with a tag: "Expires Today" or "Nd left". The tag is orange for 7 days or fewer, yellow up to 30 days and green beyond. You can sort by this column. The soonest date comes first.
Actions	Eye icon (View Details).

Urgent rows are tinted red or orange. At the bottom you see "x-y of N expiring batches".

> **Good to know:** This list covers batches that expire from now until the number of days you chose. Batches whose date has already passed are not listed, so the Expired/Today number will usually be 0 or show only today's items. The Home page counts "Expiring Soon" using 30 days. This page uses the days you pick.

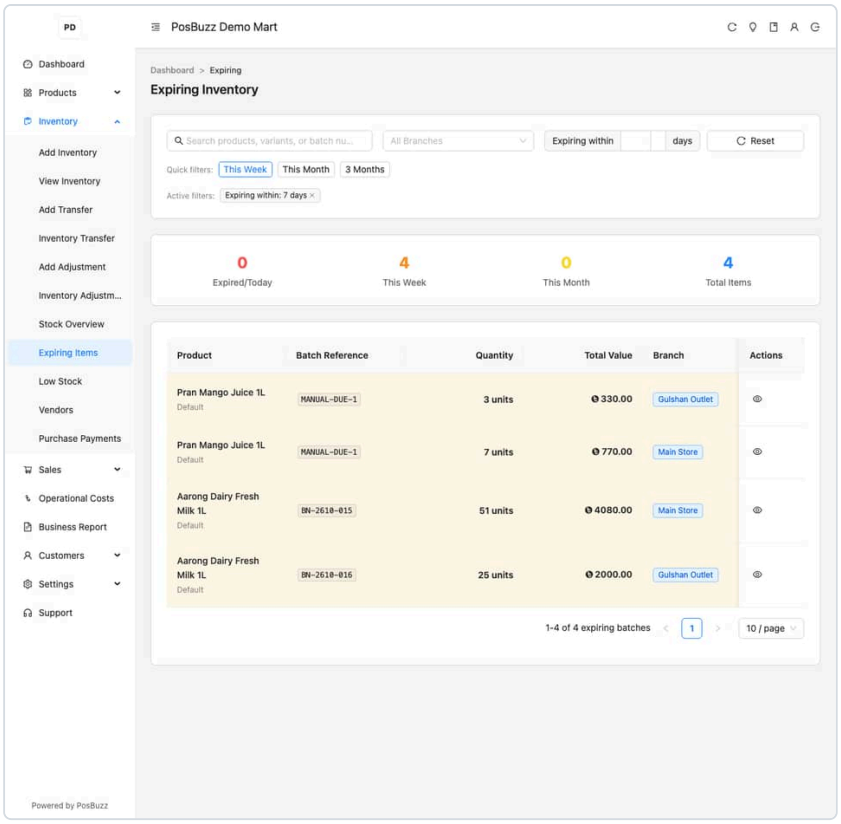

Expiring Items at 30 days; urgent rows are tinted.

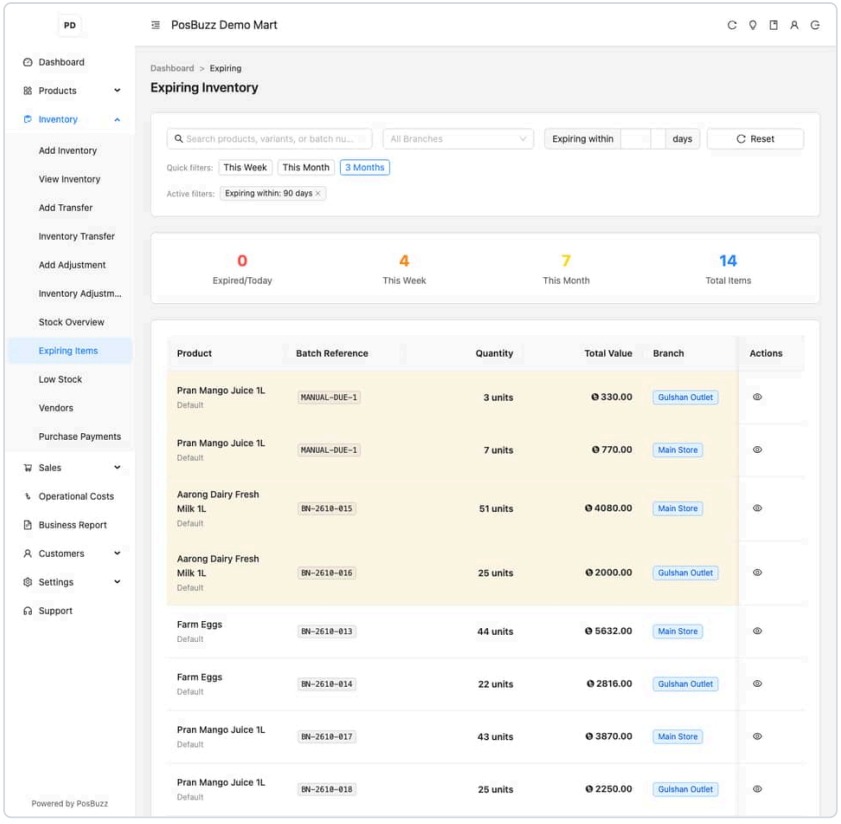

How to find batches that expire soon

1. Open **Inventory**, then **Expiring Items**.
2. Press **This Week**, **This Month** or **3 Months**, or type a number in **Expiring within**.
3. Choose a branch if needed.
4. Look at the summary and the table.

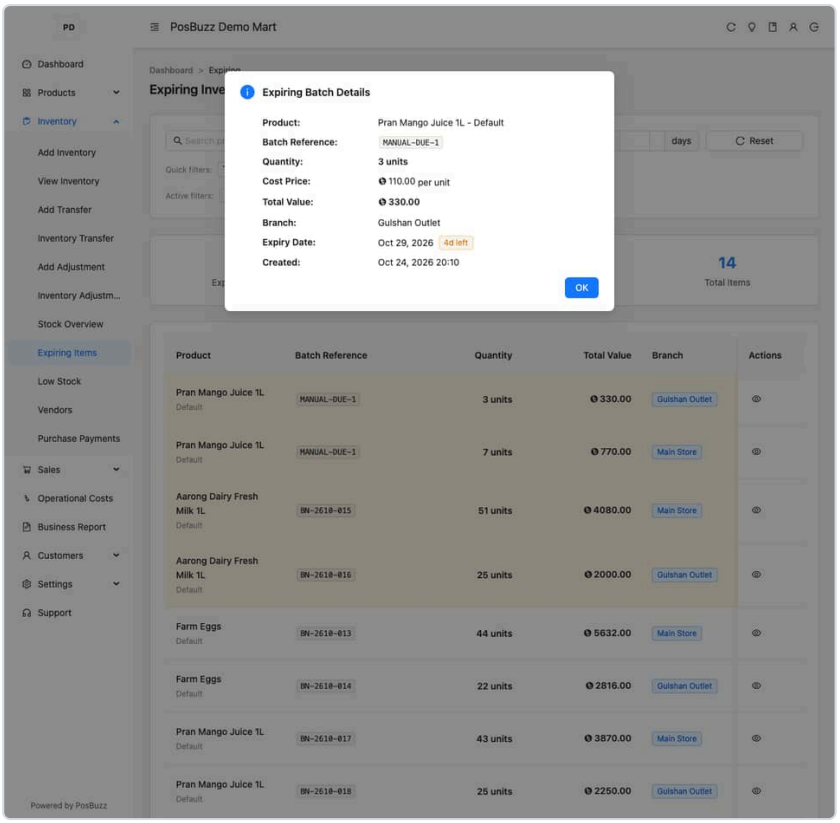

What happens next: The list and the summary change to match the days you chose.

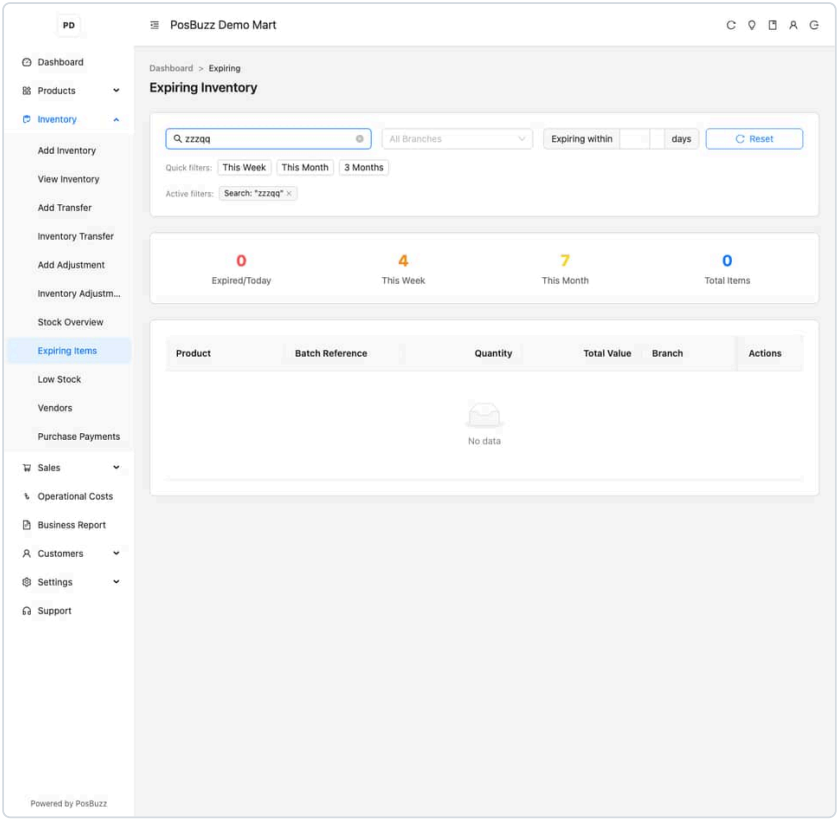

The This Week quick filter.

The 3 Months quick filter.

The Expiring Batch Details window with a "4d left" tag.

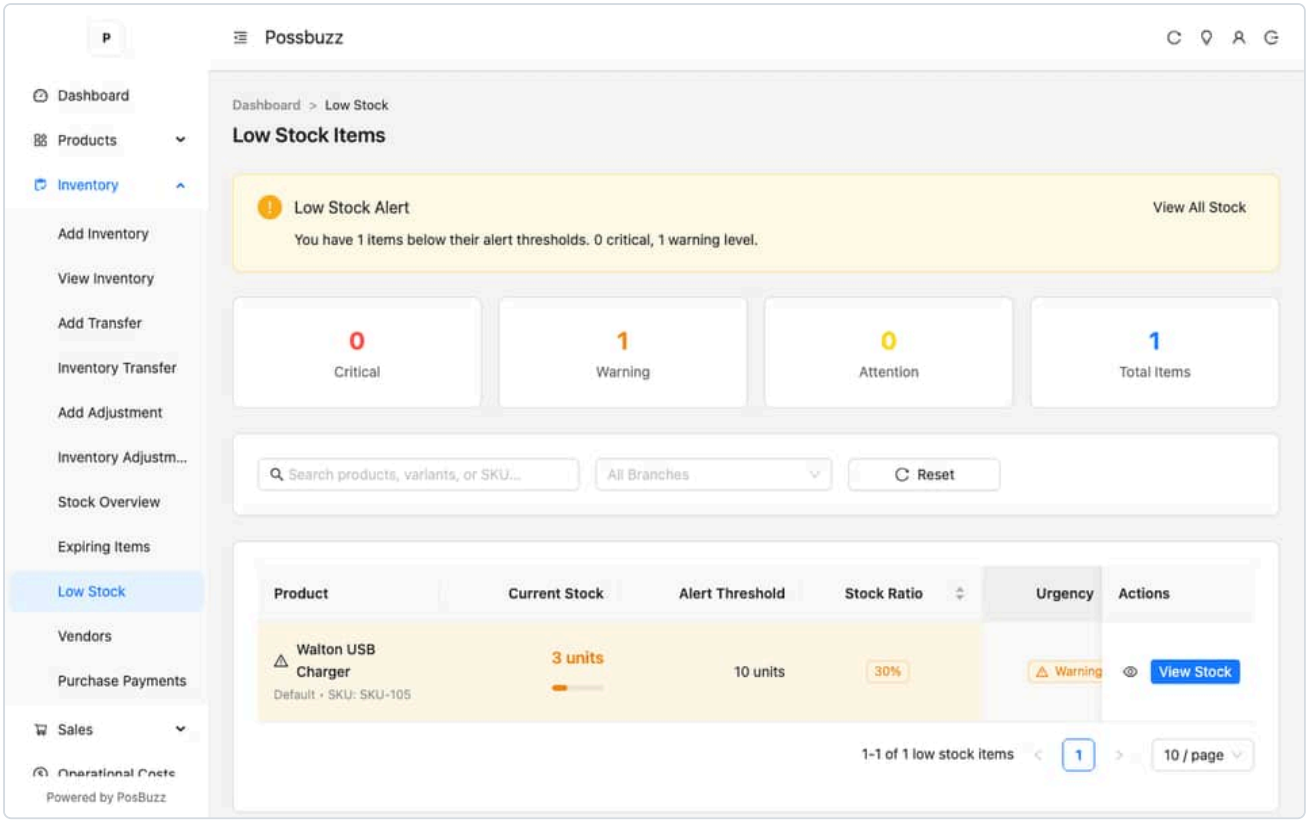

A search with no match.

How to see details of an expiring batch

1. Press the eye icon on the row.

What happens next: The **Expiring Batch Details** window shows Product, Batch Reference, Quantity, Cost Price, Total Value, Branch, Expiry Date, Vendor and Created.

Low Stock

The Low Stock Items screen with one item at warning level.

What it is

A list of variants whose stock in a branch is at or below the alert quantity set on the product. Each affected branch is its own row.

Where to find it

Left menu, **Inventory**, then **Low Stock**. You need the Inventory Batches permission. A variant only appears here if an alert quantity above 0 has been set on the product variant.

What you see

The page title is **Low Stock Items**.

- A top alert **Low Stock Alert**: "You have N items below their alert thresholds. X critical, Y warning level." with the button **View All Stock** (opens Stock Overview).
- Four cards: **Critical**, **Warning**, **Attention** and **Total Items**.

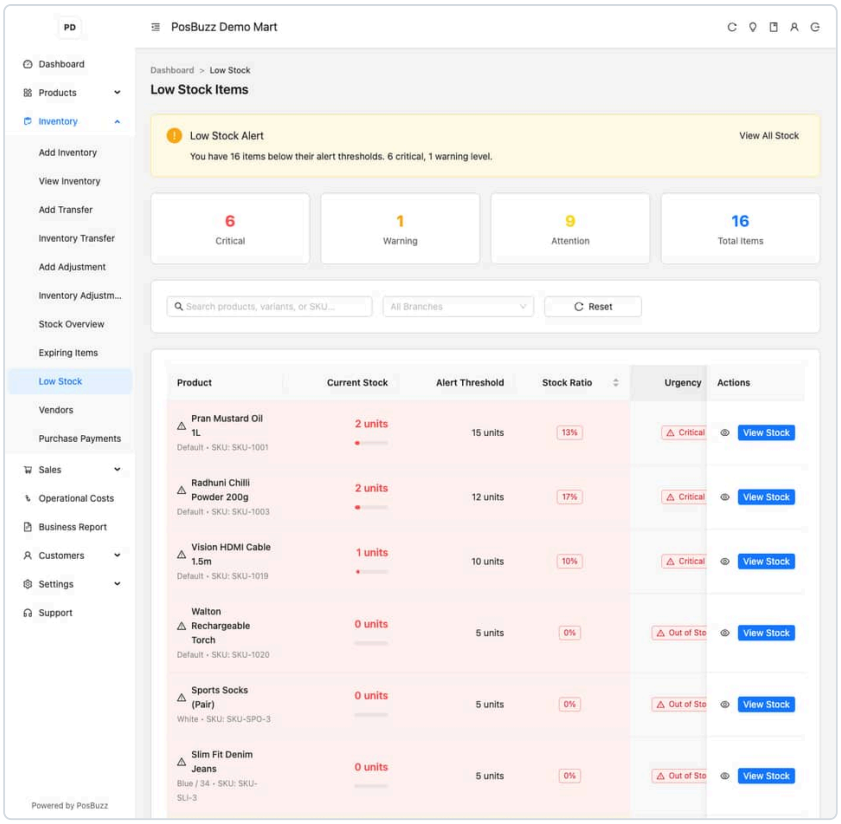

Filter	Notes
Search box ("Search products, variants, or SKU...")	Searches by name, variant or SKU.
All Branches	Shows one branch.
Reset	Clears the filters.

How urgency is worked out (stock compared with the alert quantity):

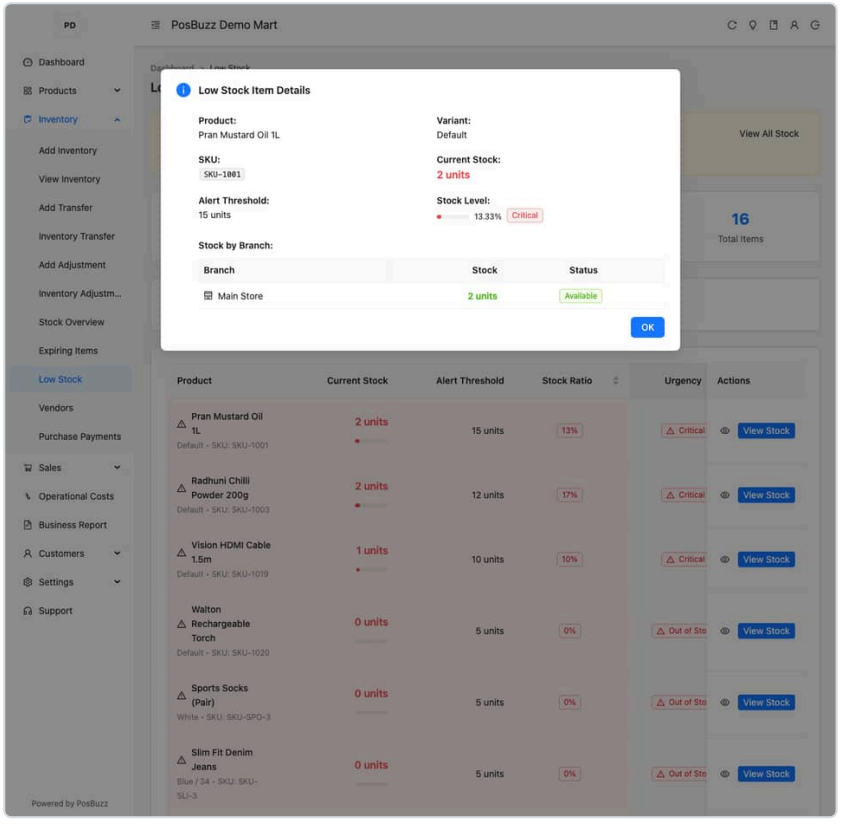

Urgency	When
Out of Stock (critical)	Stock is 0.
Critical	25 percent or less.
Warning	Above 25 and up to 50 percent.
Low (attention)	Above 50 percent.

Column	Meaning
Product	Link to the product with a warning icon, the variant and SKU.
Current Stock	Units with a bar.
Alert Threshold	The alert quantity.
Stock Ratio	Percent tag. You can sort by it.
Urgency	The level above. You can sort by it.
Affected Branch	The low branch in a red tag.
All Branches	Tags for all branches.
Actions	Eye icon and **View Stock**.

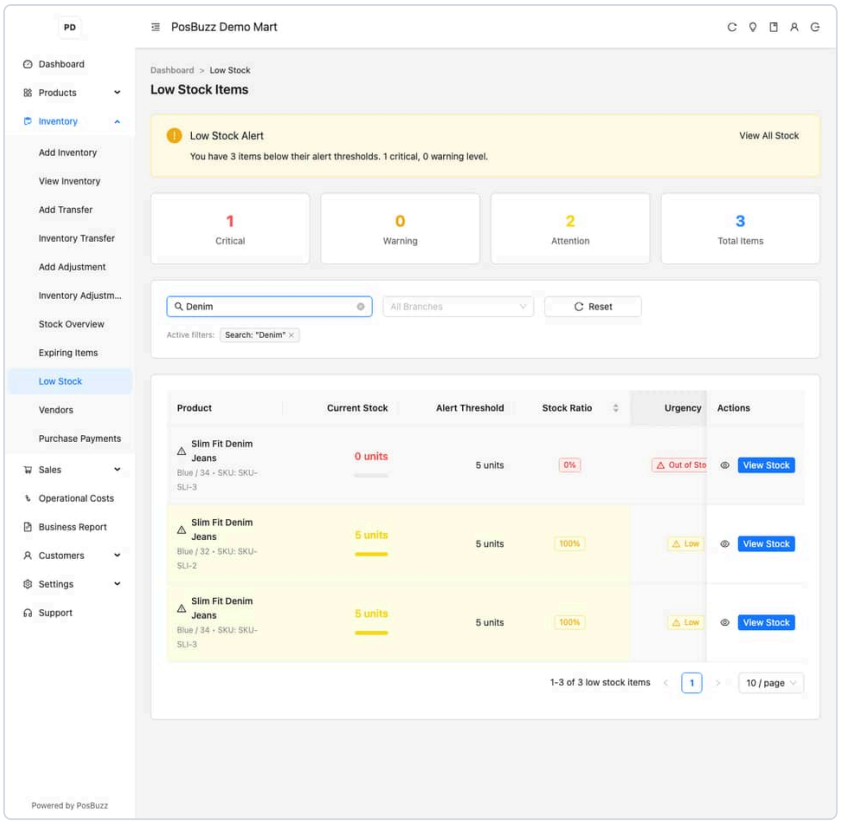

At the bottom you see "x-y of N low stock items". Stock counted is the quantity on hand minus units pending delivery.

Low Stock Items with urgency levels.

The Low Stock Item Details window.

Searching for "Denim".

How to see details of a low stock item

1. Press the eye icon on the row.

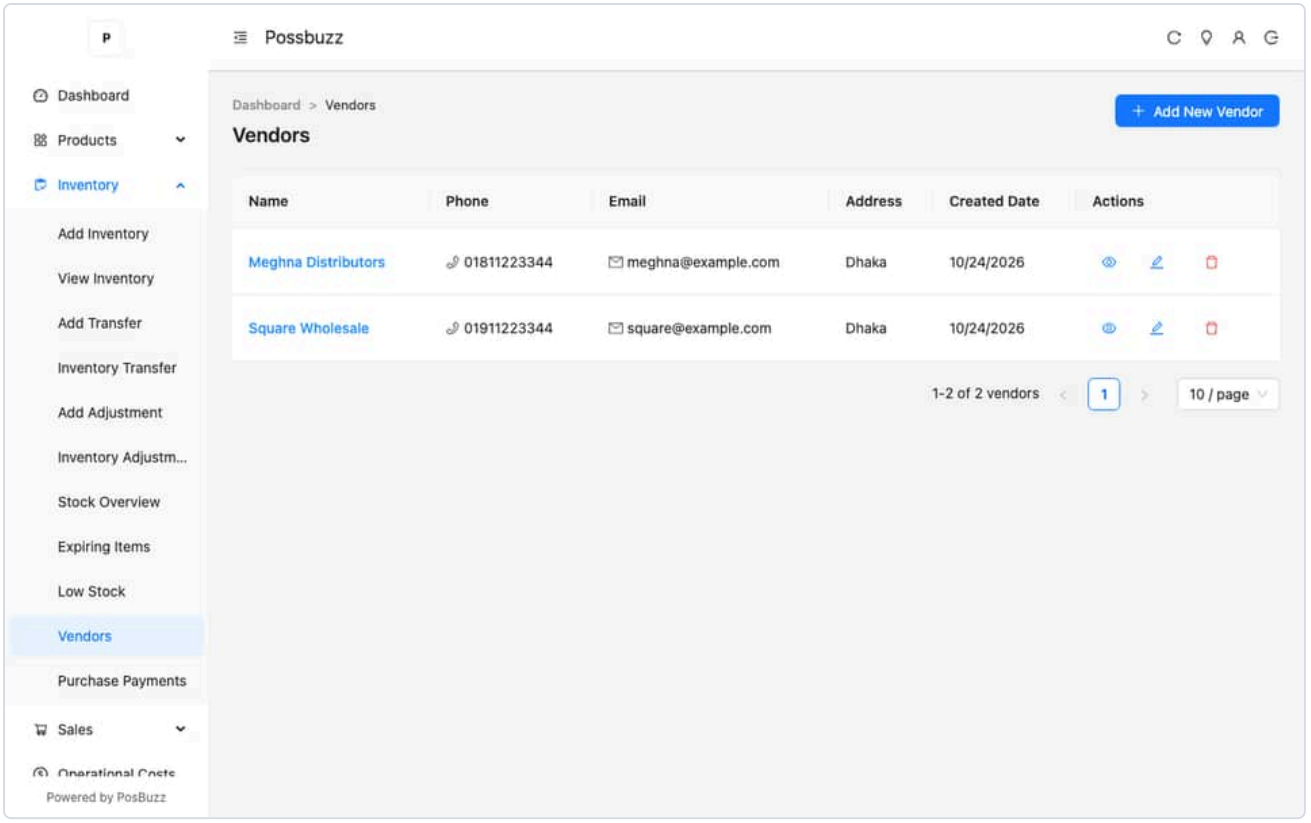

What happens next: The **Low Stock Item Details** window shows the Stock Level and a table of Branch, Stock and Status ("Available" or "Out of Stock"). It has a **View Stock** button.

How to open the stock page of a low item

1. Press **View Stock** on the row.

What happens next: The Variant Stock Details page opens.

Vendors

The Vendors list.

What it is

The list of suppliers you buy from. You can add, view, change and delete them.

Where to find it

Left menu, **Inventory**, then **Vendors**. You need the Vendors permission. The system may also need the Inventory Batches permission to load the list. If you cannot see the menu or the list is refused, ask the owner.

What you see

The page title is **Vendors**. The button **Add New Vendor** is at the top right.

Column	Meaning
Name	A link to the vendor page, with "Contact: x" below if a contact person is saved.
Phone	The phone number, or "No phone".
Email	The email, or "No email".
Address	Shortened address, or "No address".
Created Date	When it was added.

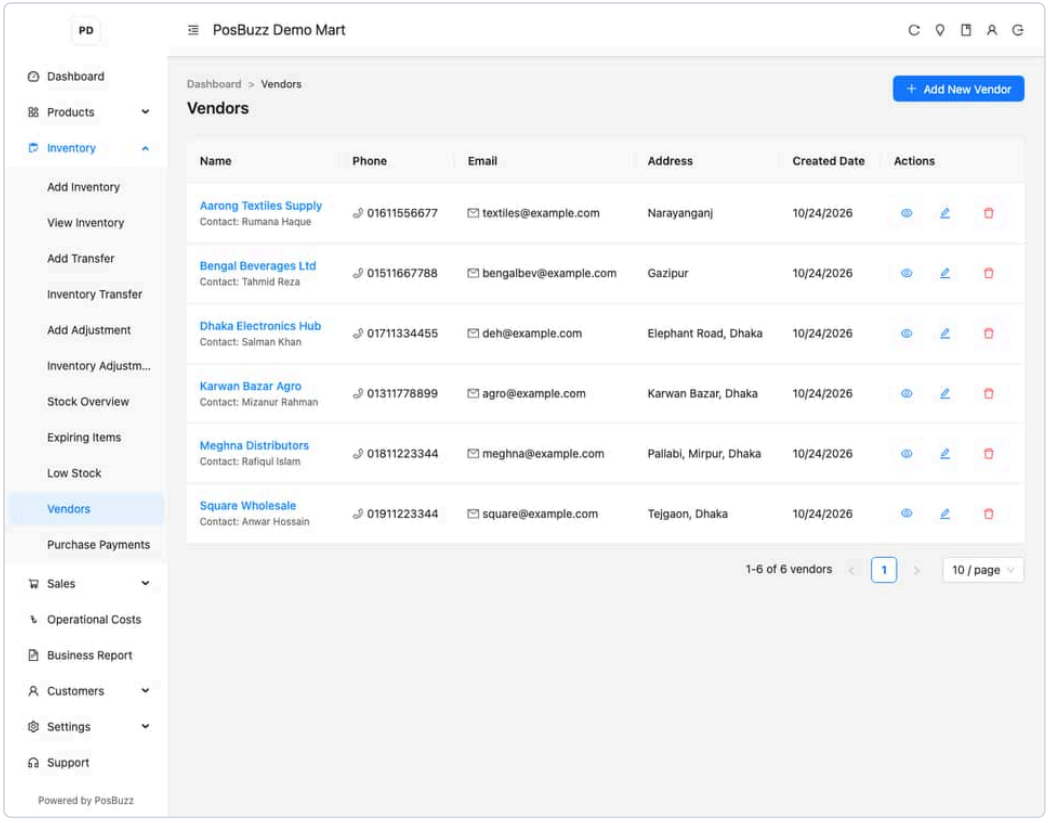

Column	Meaning
Actions	Eye icon (view), pencil icon (edit) and red bin icon (delete).

At the bottom you see "x-y of N vendors". If the list cannot load you see "Failed to load vendors".

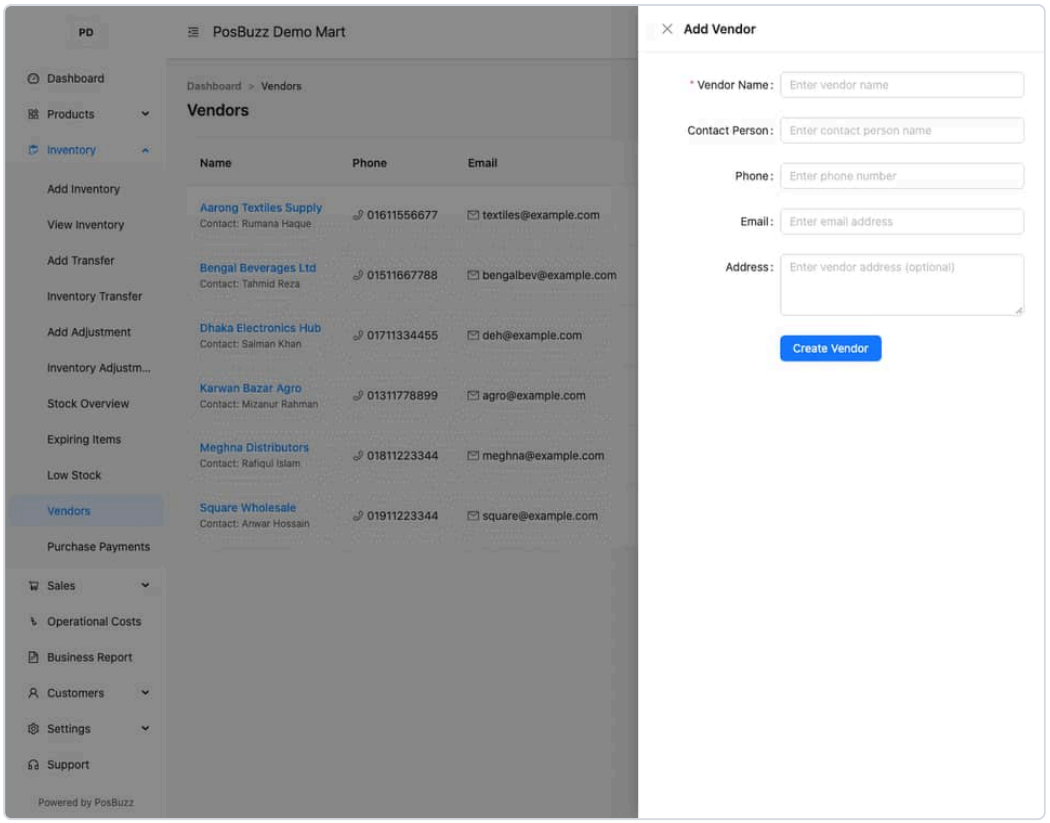

Add Vendor drawer. It opens from the right. Its title is **Add Vendor** (or **Update Vendor** when editing).

Field	Required	Notes
Vendor Name	Yes	Placeholder "Enter vendor name".
Contact Person	No	Placeholder "Enter contact person name".
Phone	No	Placeholder "Enter phone number". Only digits, spaces and the signs - + ( ) are allowed.
Email	No	Placeholder "Enter email address".
Address	No	Three-line box. Placeholder "Enter vendor address (optional)".

The button at the bottom is **Create Vendor** (or **Update Vendor**).

The Vendors list.

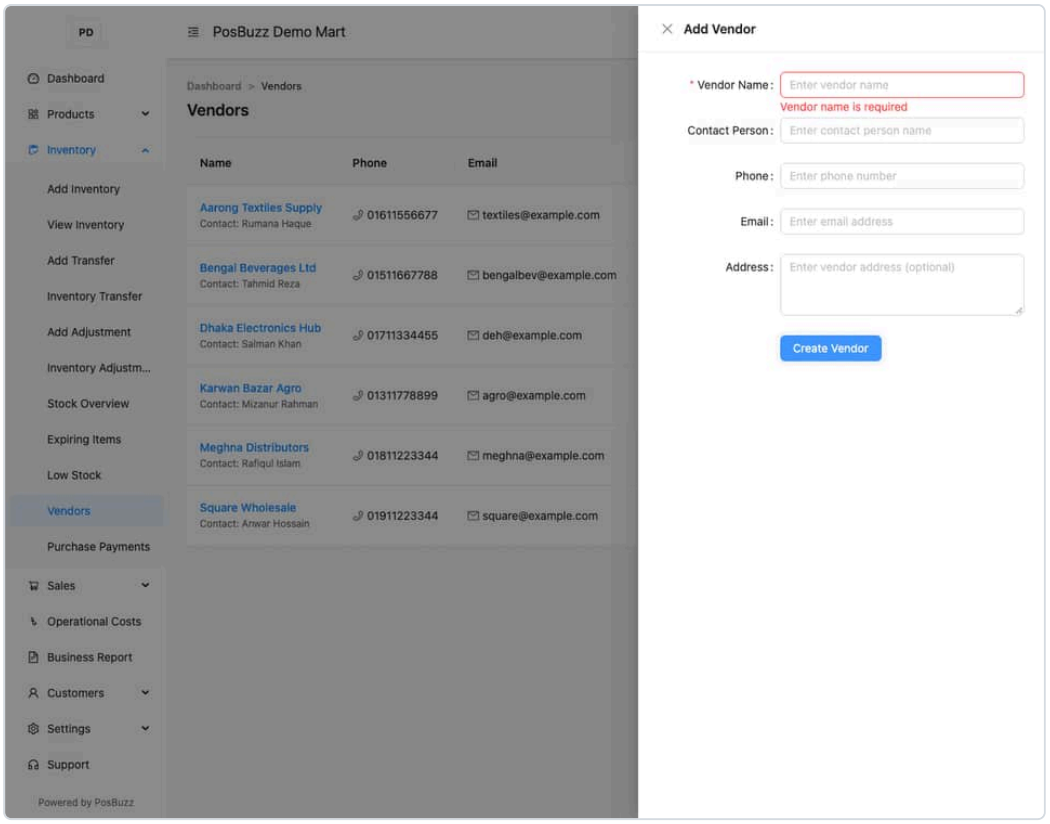

The empty Add Vendor drawer.

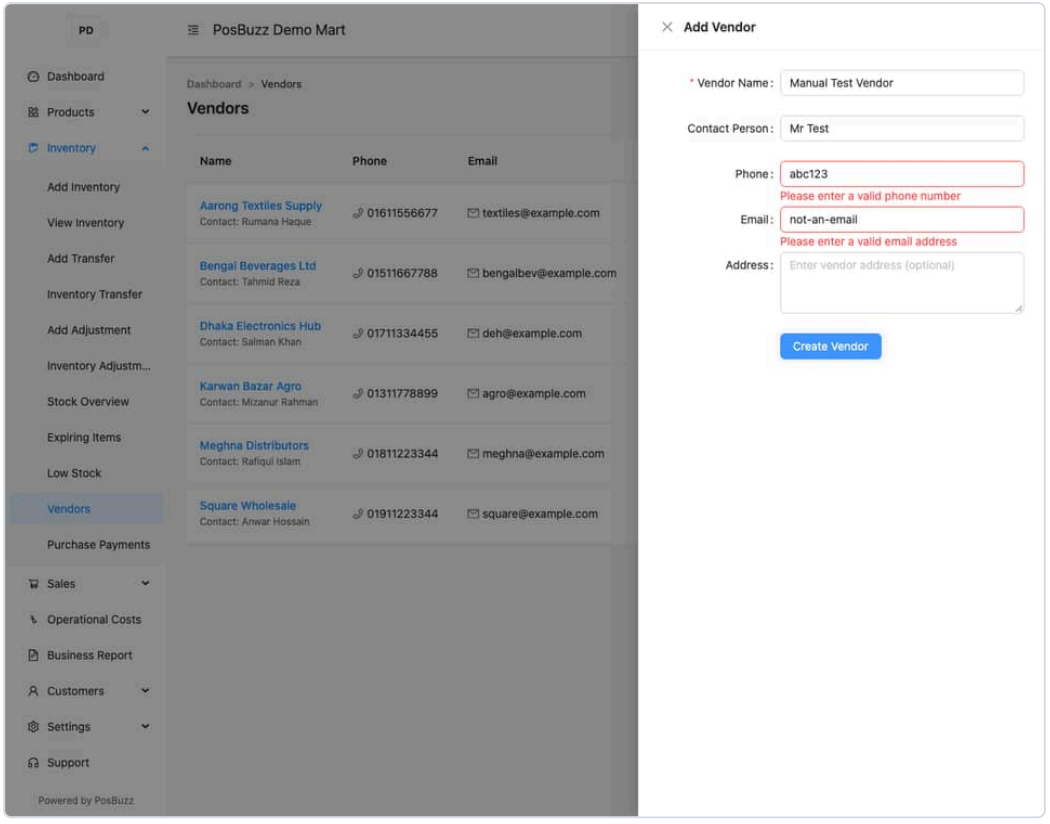

How to add a vendor

1. Open **Inventory**, then **Vendors**.
2. Press **Add New Vendor**.
3. Type the **Vendor Name** and any other details.
4. Press **Create Vendor**.

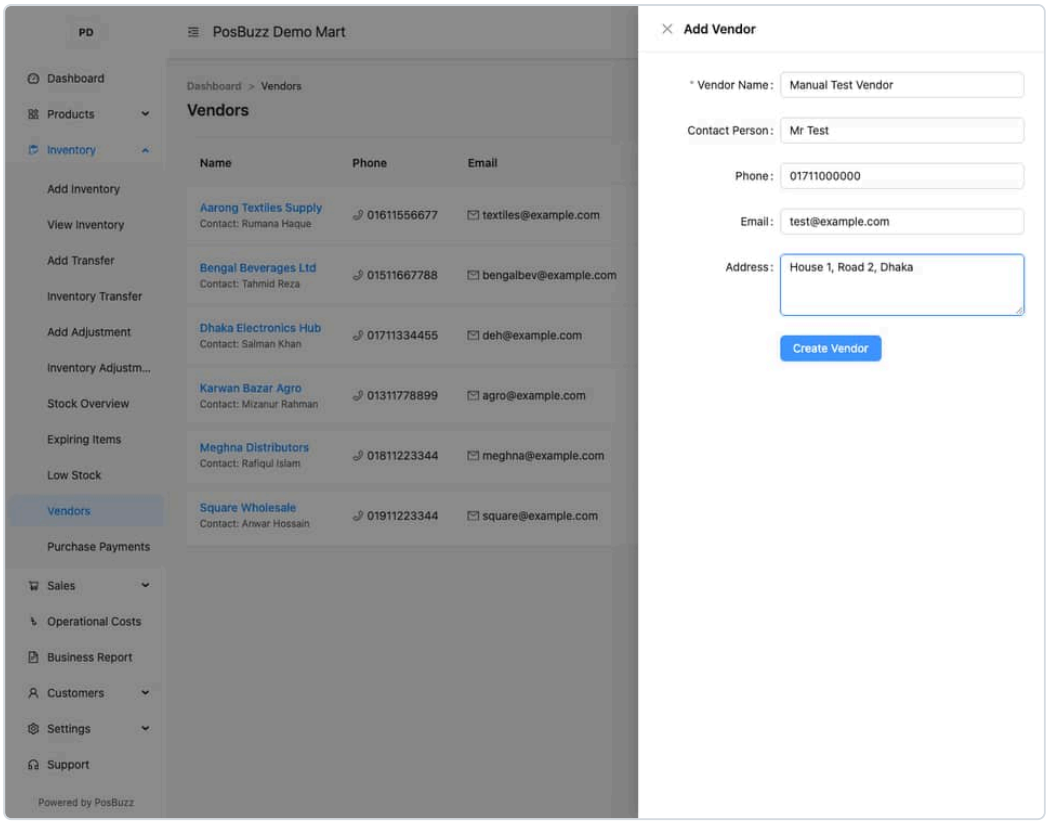

What happens next: You see "Vendor created successfully" and the vendor is in the list.

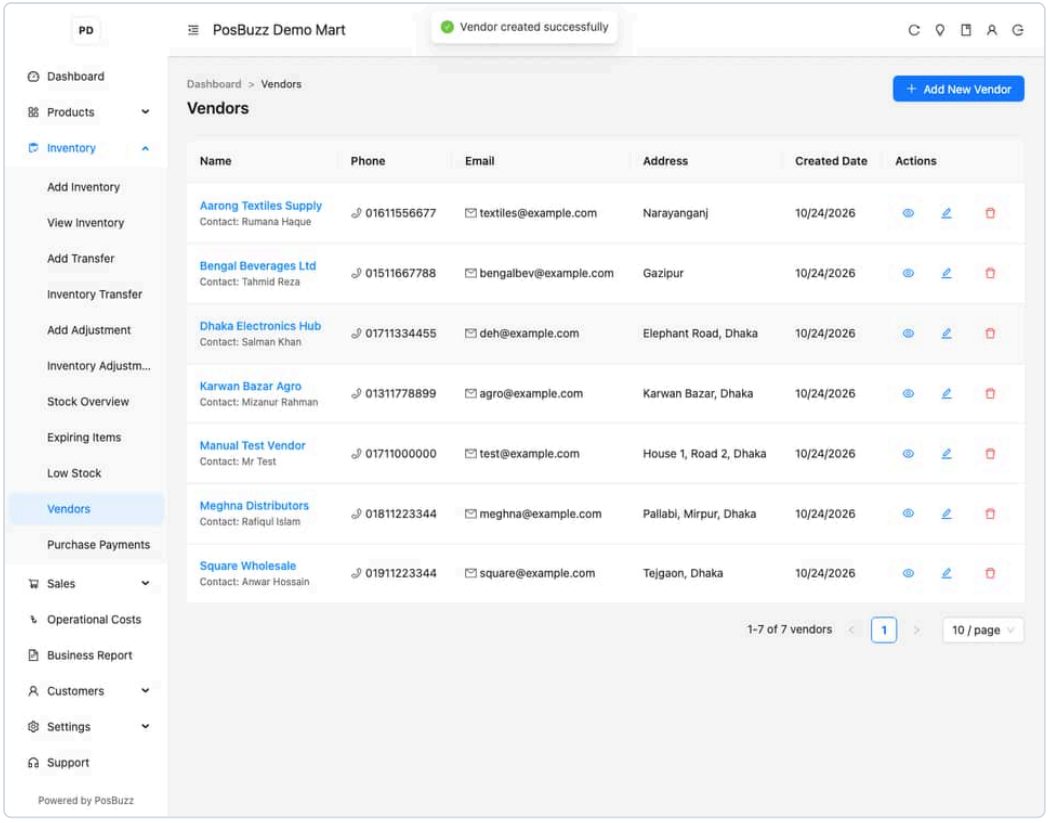

Vendor name is required.

Phone and email messages.

A filled form.

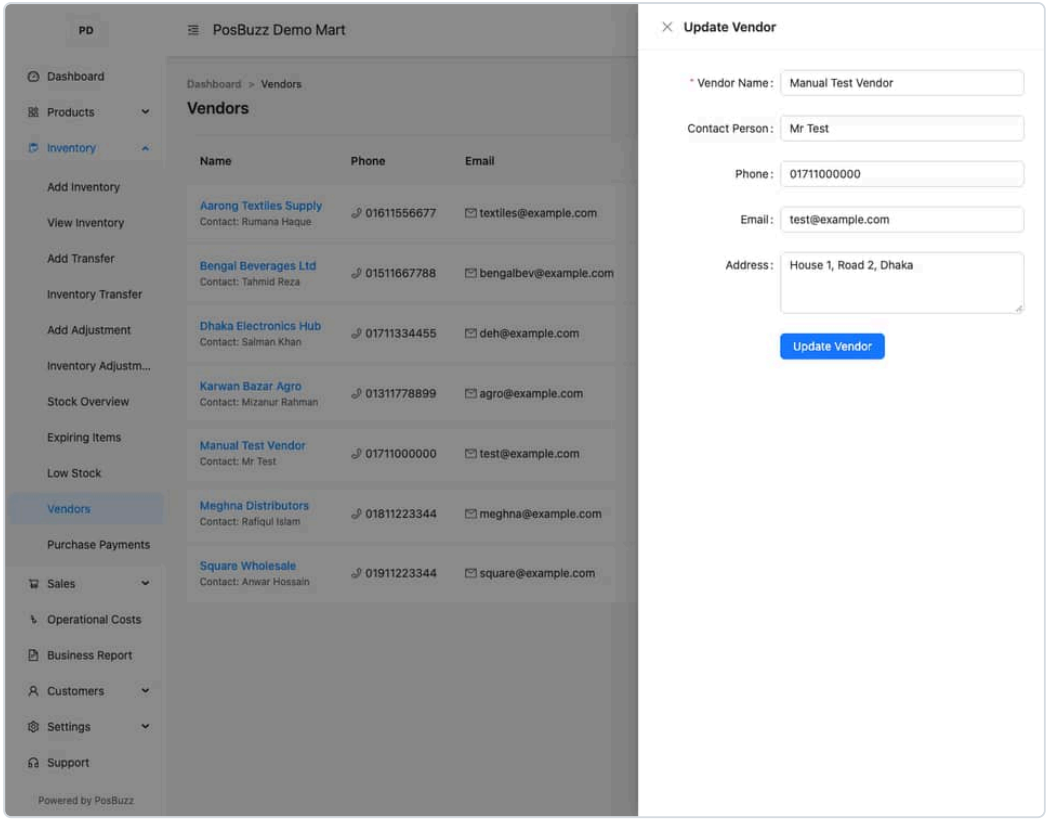

The new vendor in the list.

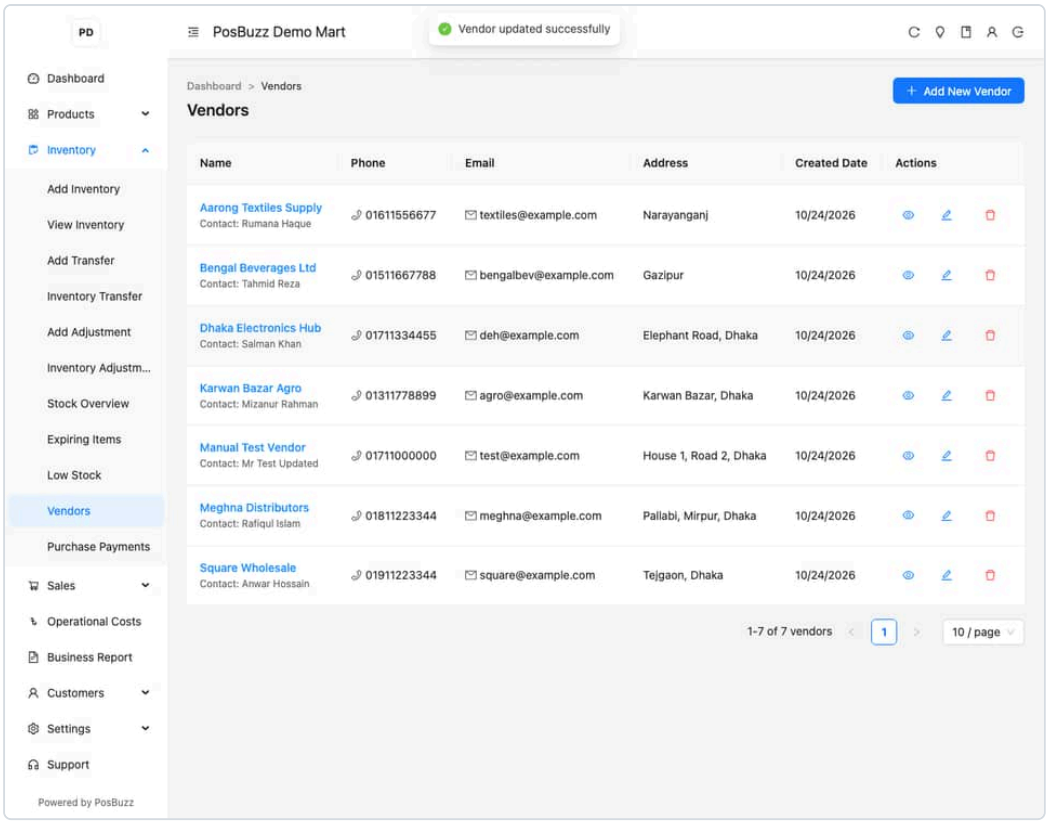

How to edit a vendor

1. Press the pencil icon on the vendor row.
2. Change the fields.
3. Press **Update Vendor**.

What happens next: You see "Vendor updated successfully".

The Update Vendor drawer.

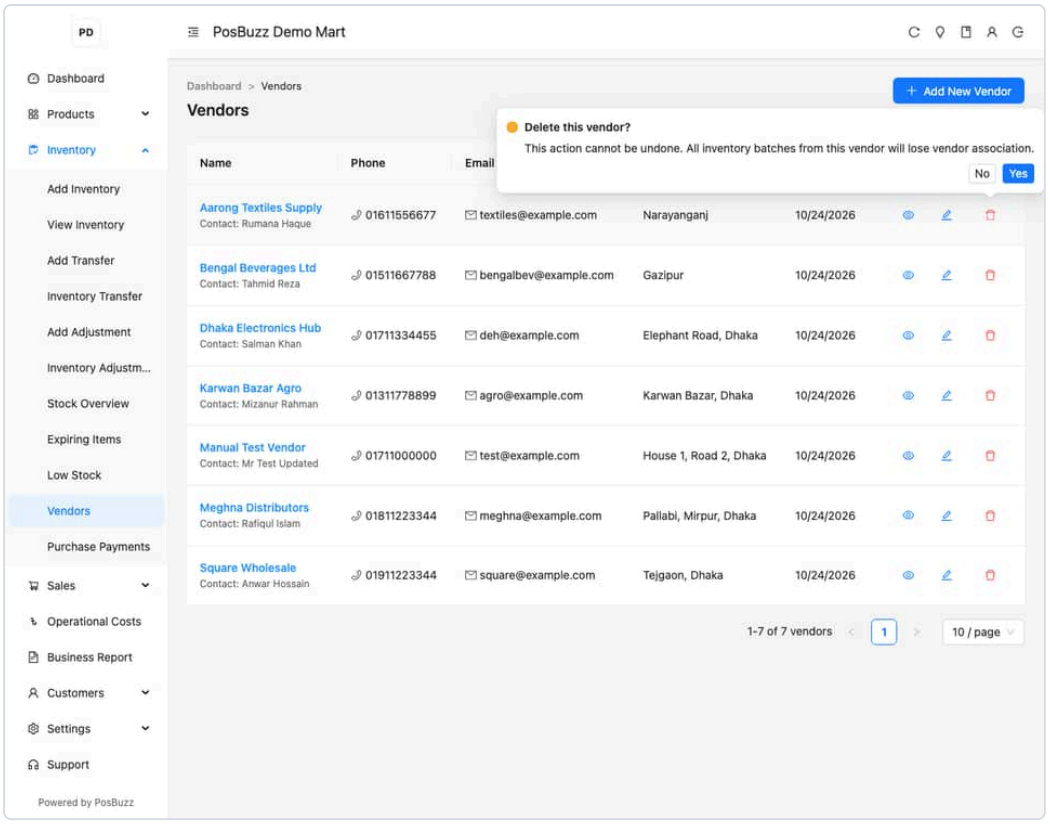

Vendor updated successfully.

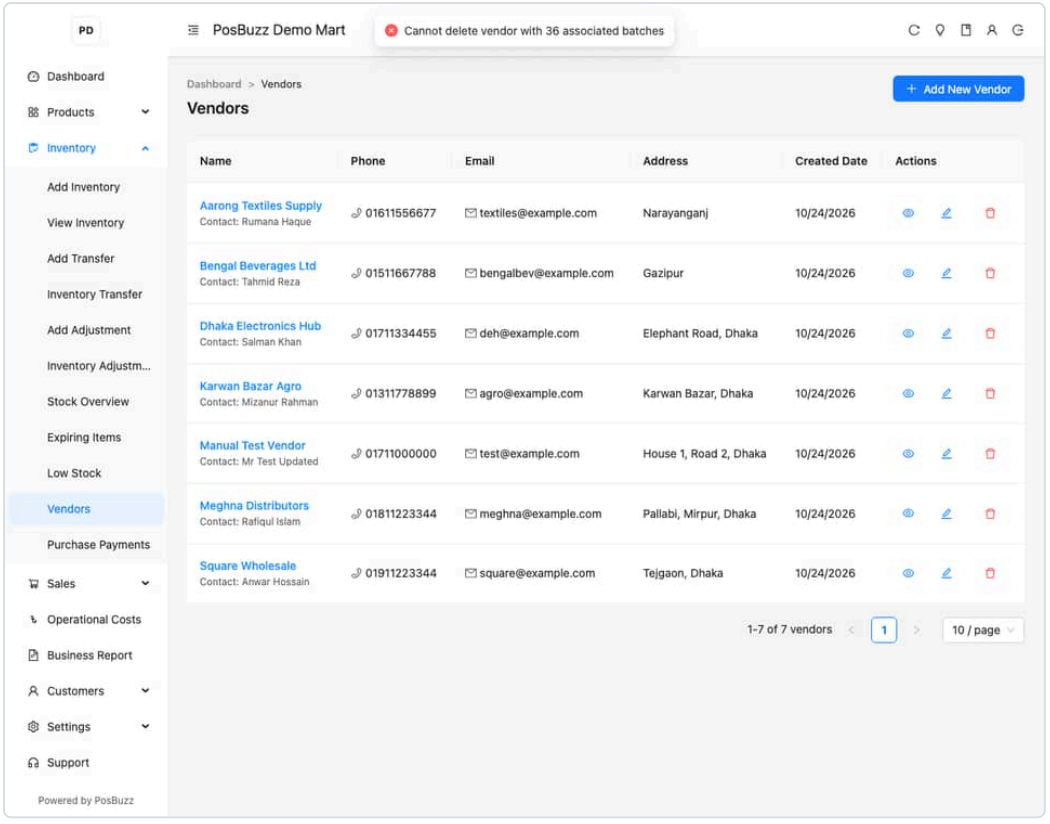

How to delete a vendor

1. Press the red bin icon on the vendor row.
2. The question "Delete this vendor?" appears with the text "This action cannot be undone. All inventory batches from this vendor will lose vendor association."
3. Press **Yes** to delete or **No** to stop.

What happens next: If the vendor can be deleted you see "Vendor deleted successfully".

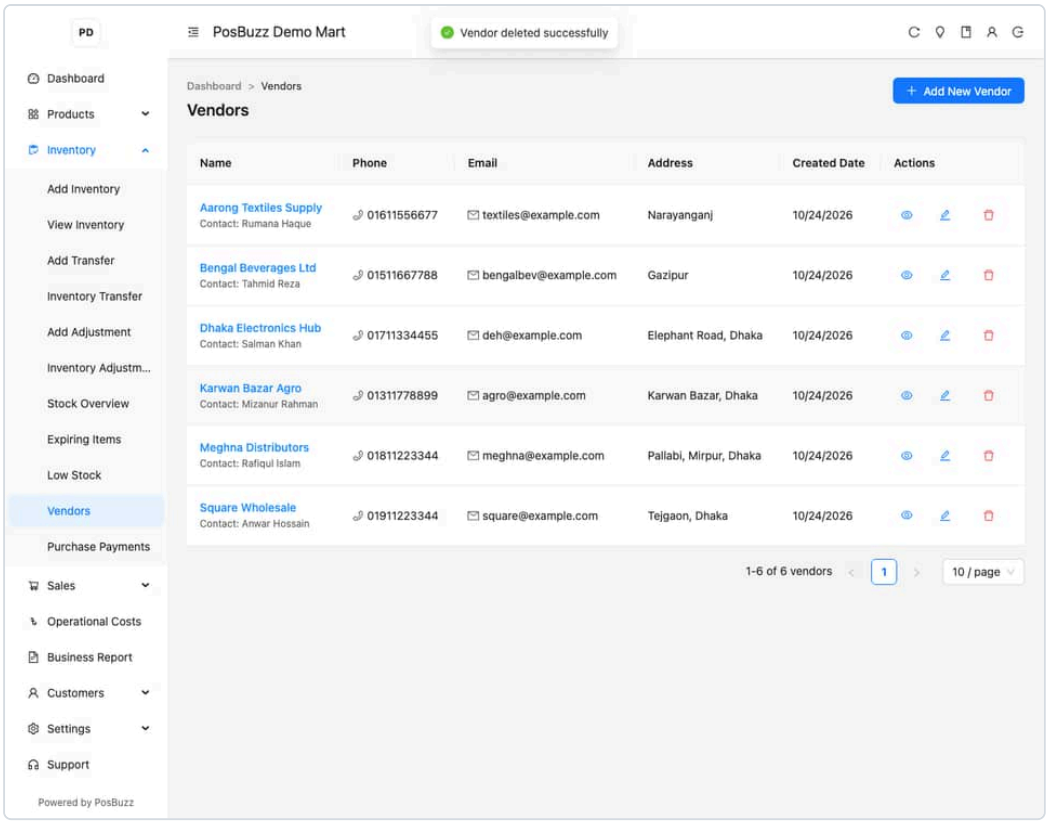

The delete question.

A vendor with batches cannot be deleted.

> **Good to know:** The warning text says batches would lose their vendor. In practice a vendor that has any stock batches cannot be deleted. You see the message "Cannot delete vendor with N associated batches". Only vendors with no batches can be removed.

A vendor with no batches was deleted.

How to open a vendor's page

1. Press the vendor's name or the eye icon.

What happens next: The Vendor Details page opens (next section).

Message	What it means	What to do
Vendor name is required	Name is empty.	Type a name.
Please enter a valid phone number	The phone has letters or other signs.	Use digits, spaces and - + ( ) only.
Please enter a valid email address	Email is not in a proper format.	Correct it or leave it empty.
Vendor created successfully / Vendor updated successfully / Vendor deleted successfully	Done.	Nothing.
Failed to create vendor / Failed to update vendor	The save did not work.	Check the fields and try again.
Cannot delete vendor with N associated batches	The vendor has stock batches.	Keep the vendor.
Failed to load vendors	The list did not load.	Reload the page.

Vendor Details

What it is

A page about one vendor: contact details, what you bought, what you paid and what you still owe.

Where to find it

On **Vendors**, press the vendor name or the eye icon. You need the Vendors permission.

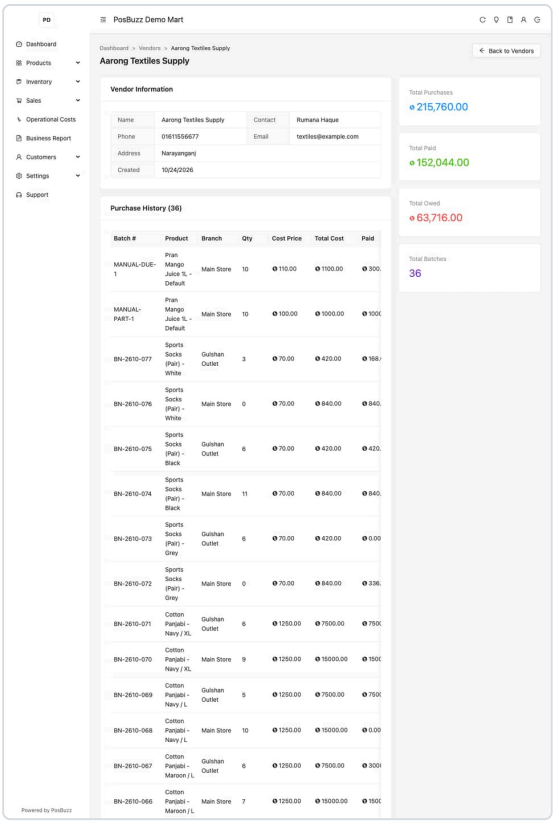

What you see

The title is the vendor name. **Back to Vendors** returns to the list. If the page cannot load you see "Failed to load vendor details" and you are sent back to Vendors.

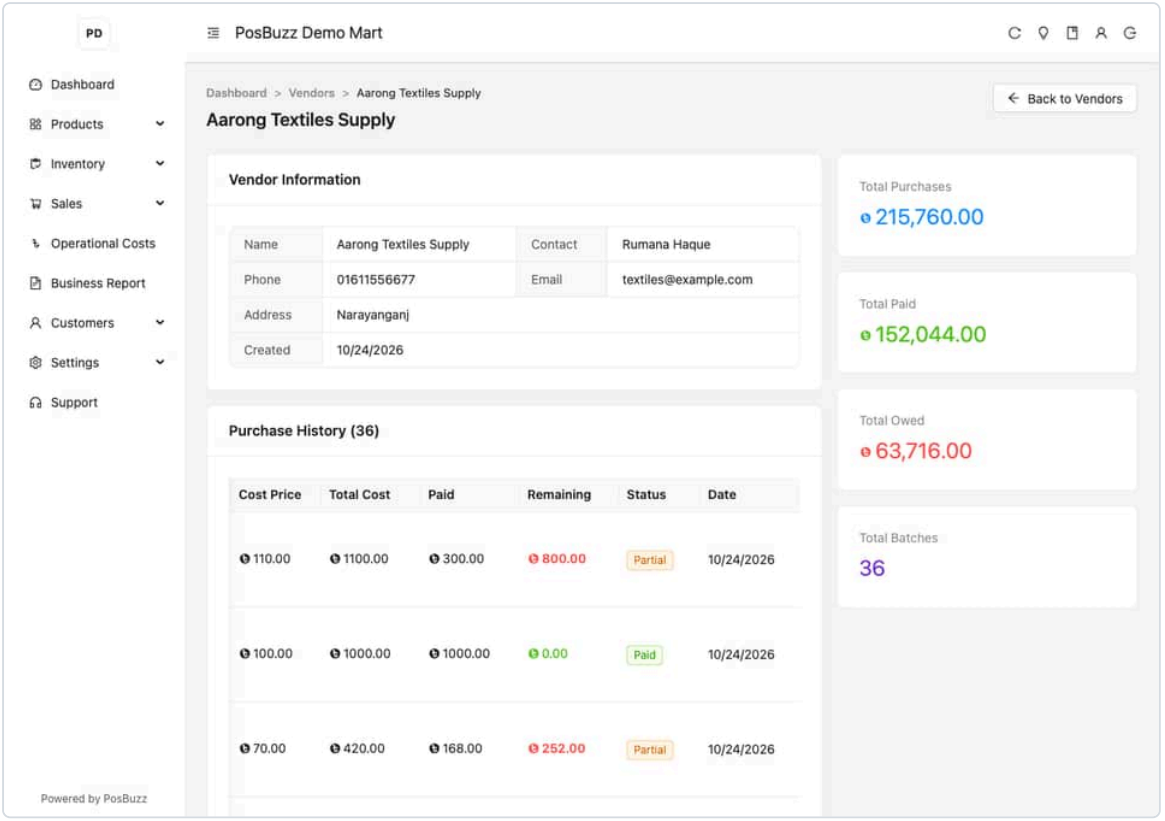

- **Vendor Information** card: Name, Contact, Phone, Email, Address and Created.
- **Purchase History (N)** card: Batch #, Product, Branch, Qty, Cost Price, Total Cost, Paid, Remaining (red if money is owed), Status (Paid, Partial or Due) and Date. By default the first 50 batches are shown.
- **Payment History (N)** card (only if payments exist): Date, Batch #, Product, Method, Amount and Reference.
- Four cards at the right: **Total Purchases**, **Total Paid**, **Total Owed** (red when above 0) and **Total Batches**.

How the amount owed is worked out: for each batch, Total Cost is the cost price times the quantity you originally bought. It is not reduced by sales, returns or adjustments. Remaining is Total Cost minus Paid. Total Owed is all total costs minus all payments. Paid includes payments entered when stock was added and payments made on the Purchase Payments screen.

> **Good to know:** For a batch created by a transfer, the current quantity is used instead of the original quantity. Small negative remaining amounts can offset other batches in Total Owed.

The Vendor Details page.

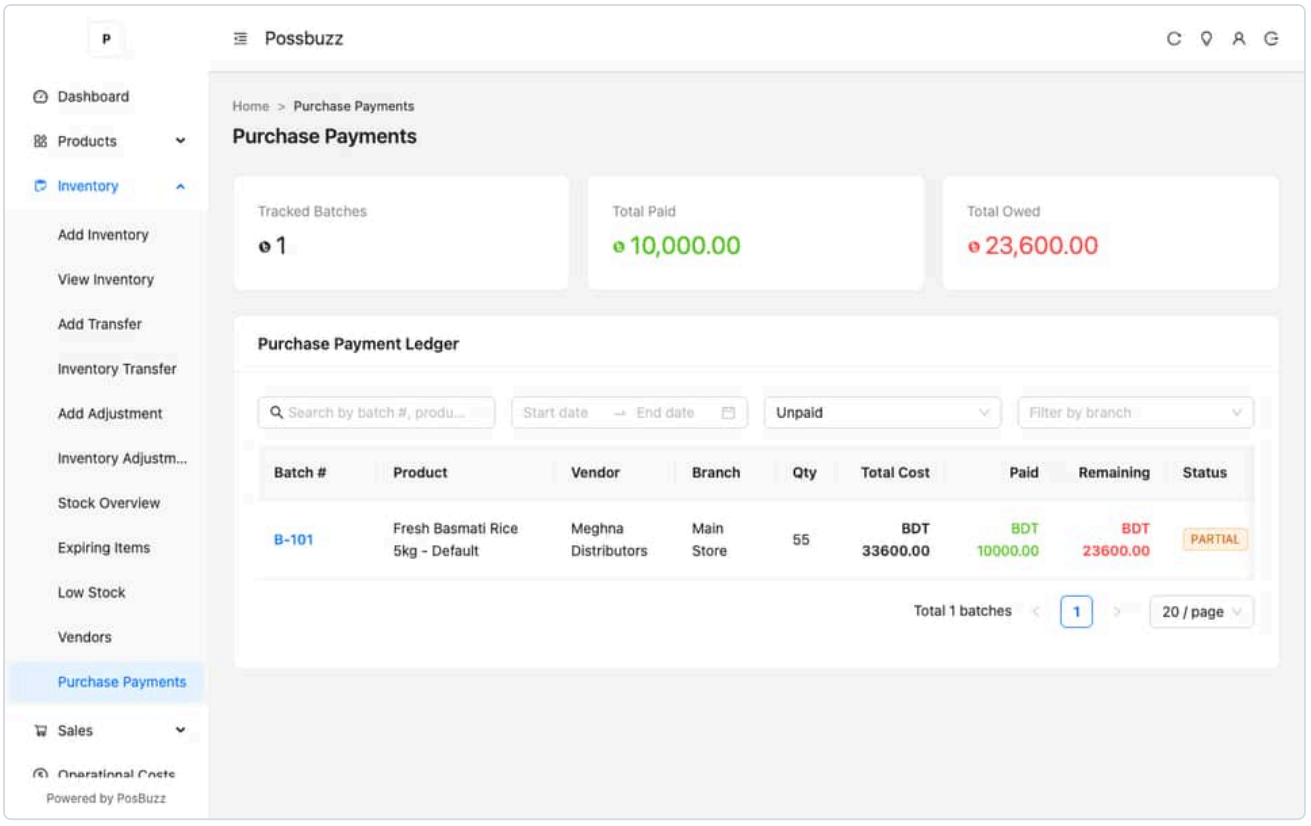

Purchase History columns Cost Price to Date.

How to see what you owe a vendor

1. Open **Vendors** and press the vendor name.
2. Read **Total Owed**, then check **Purchase History** for batches with a red Remaining.

What happens next: Nothing is changed. To pay, use Purchase Payments.

Purchase Payments

The Purchase Payment Ledger showing one partly paid batch.

What it is

A list of purchased batches with what you paid and what you still owe your supplier. You can pay from here.

Where to find it

Left menu, **Inventory**, then **Purchase Payments**. You need the Inventory Batches permission. The path at the top is Home > Purchase Payments.

What you see

The page title is **Purchase Payments** and the card is **Purchase Payment Ledger**.

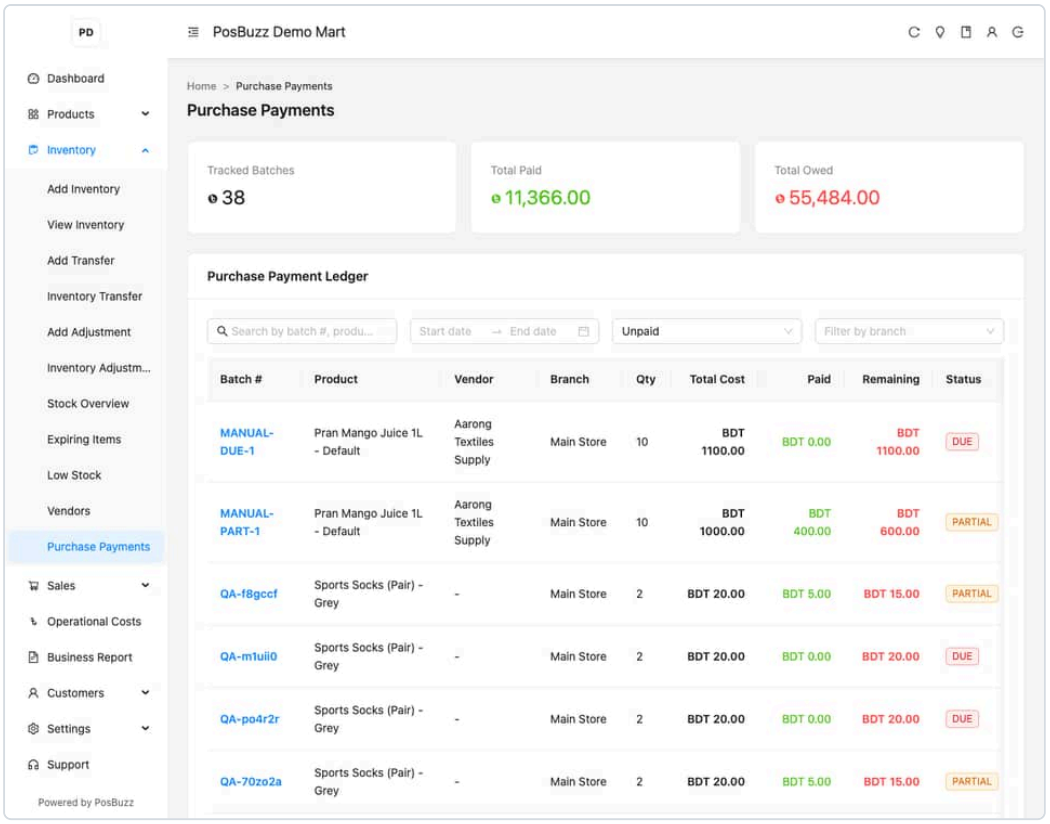

Card	Meaning
Tracked Batches	Total number of batches.
Total Paid	Total of the rows on the current page only.
Total Owed	Total of the rows on the current page only.

Filter	Notes
Search box ("Search by batch #, product")	Waits about 0.3 seconds after typing.
Date range (Start date, End date)	Filters by the date the batch was created. Dates look like "Jan 05, 2026".
Payment status	**Unpaid** (the first choice, shows Due and Partial), **All**, **Due**, **Partial**, **Paid**, **No Vendor** (batches without a vendor).
Filter by branch	Shown only if you have more than one branch.
Clear Filters link	Appears when anything is different from the start.

Column	Meaning
Batch #	The batch number.
Product	"Product - Variant".
Vendor	The supplier.
Branch	The branch.
Qty	Current quantity.
Total Cost	Full cost of the purchase.
Paid	Amount paid.
Remaining	Amount still owed (red).
Status	PAID (green), DUE (red) or PARTIAL (orange).
Actions	Blue **Pay** button, or grey **View** button when the batch is paid, has no quantity or has nothing left to pay.

At the bottom you see "Total N batches" and a page size of 10, 20, 50 or 100.

> **Good to know:** A purchase saved with no payment shows here as DUE with the full cost in Remaining. By default only unpaid batches (Due and Partial) are listed. Choose **All** or **Paid** to see paid ones. The Total Paid and Total Owed cards add up the rows on the current page only.

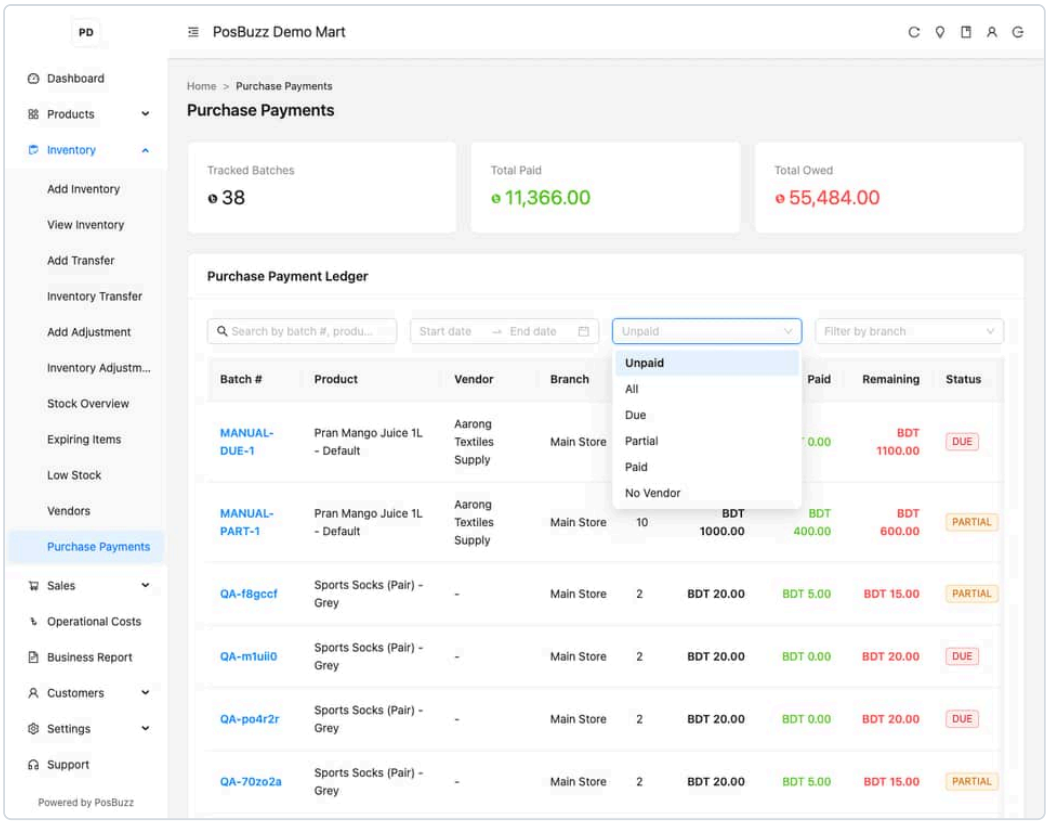

The ledger with Due and Partial batches.

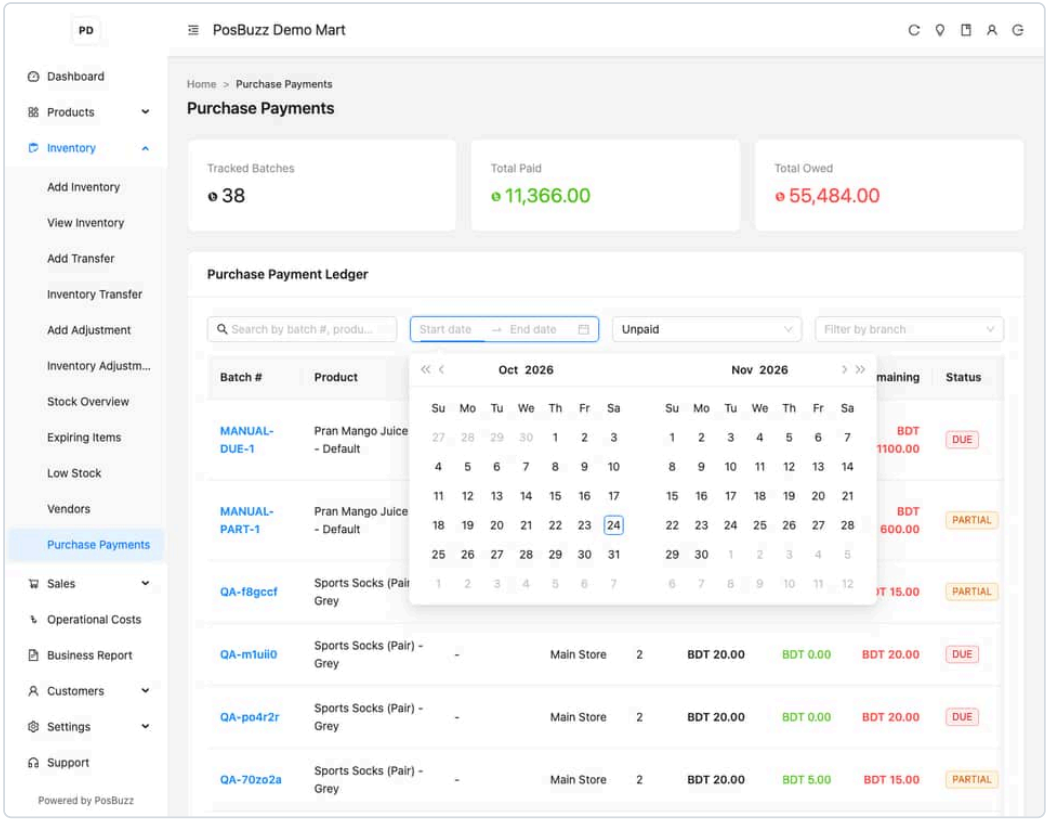

How to find what you owe

1. Open **Inventory**, then **Purchase Payments**.
2. Leave the status as **Unpaid**, or choose another.
3. Use the search box, date range or branch to narrow the list.
4. Read the **Remaining** column.

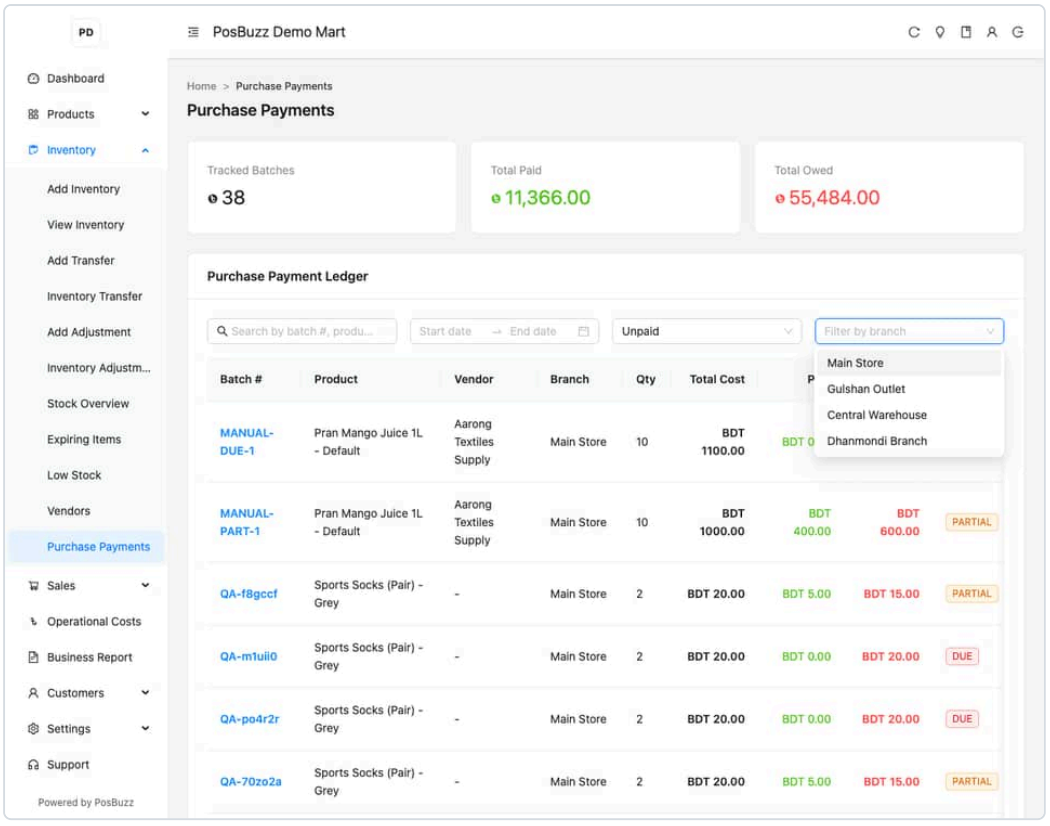

What happens next: Nothing is changed. Press **Clear Filters** to go back to the start.

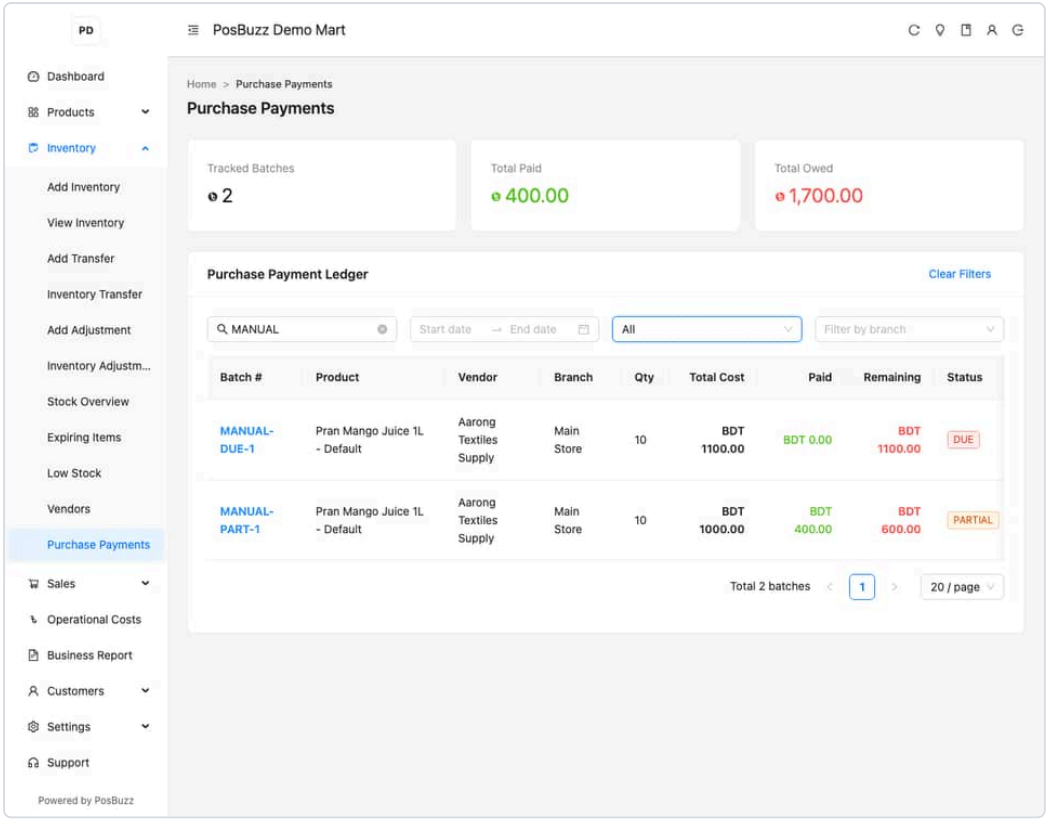

The payment status list.

The date range picker.

The branch filter.

Search with status All.

How to open a batch to pay

1. Press **Pay** on the batch row (or **View** if it is paid).

What happens next: The Make Payment page opens.

Make Payment

What it is

The page where you record a payment to your supplier for one batch.

Where to find it

On **Purchase Payments**, press **Pay** or **View** on a batch. You need the Inventory Batches permission.

What you see

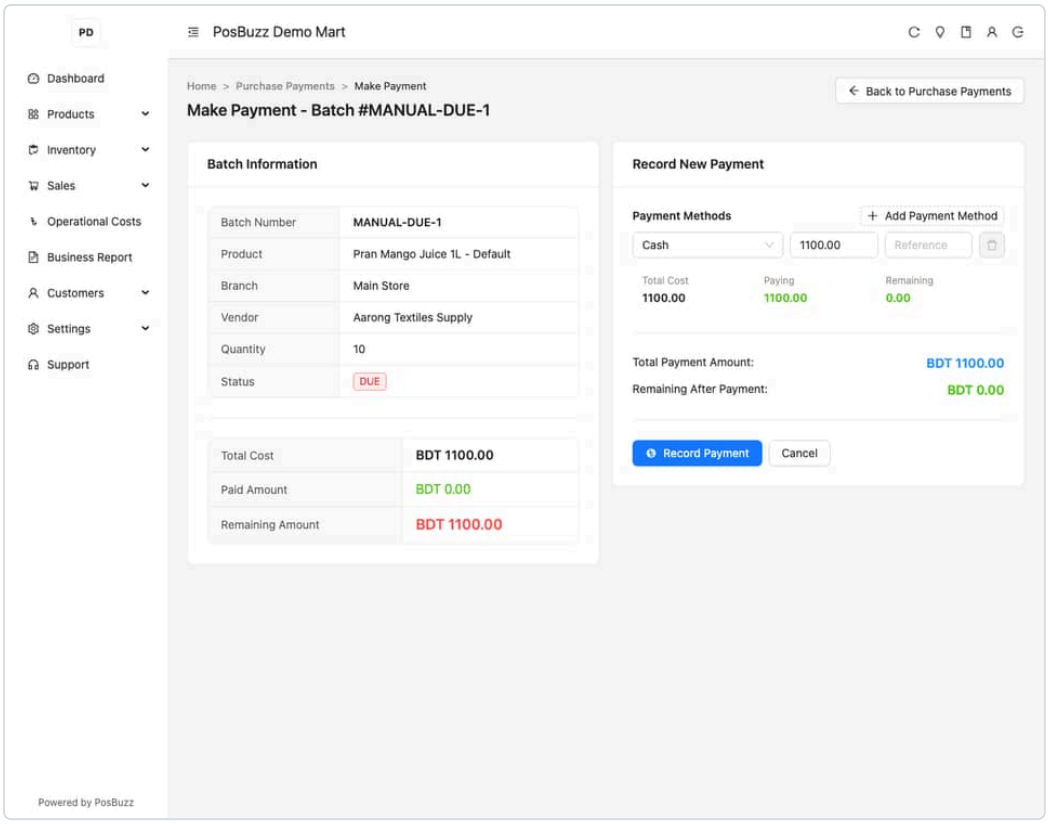

The title is "Make Payment - Batch #" followed by the batch number. **Back to Purchase Payments** is at the top. While loading you see "Loading batch details...". The last item in the path is "Make Payment", or "Payment Details" when nothing can be paid.

Left side

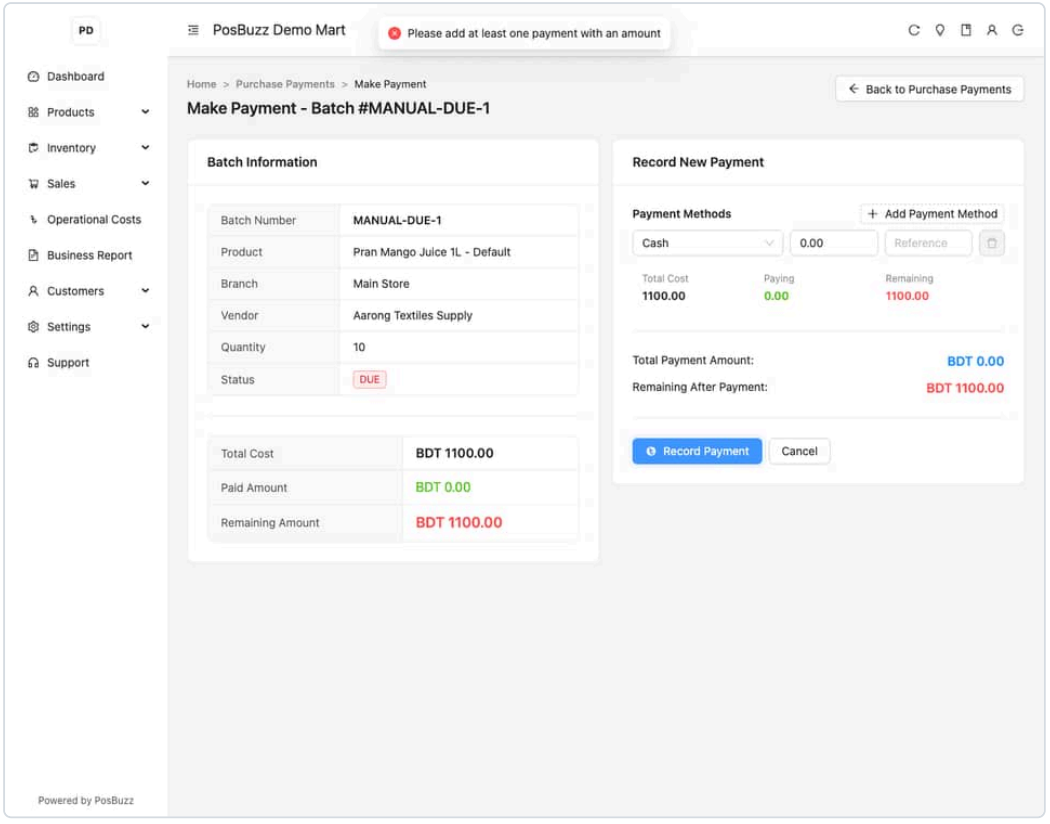

- **Batch Information** card: Batch Number, Product, Branch, Vendor ("No vendor" if none), Quantity and Status, then Total Cost, Paid Amount and Remaining Amount.
- **Payment History** card (only if payments exist): Date, Method, Amount and Reference.

Right side

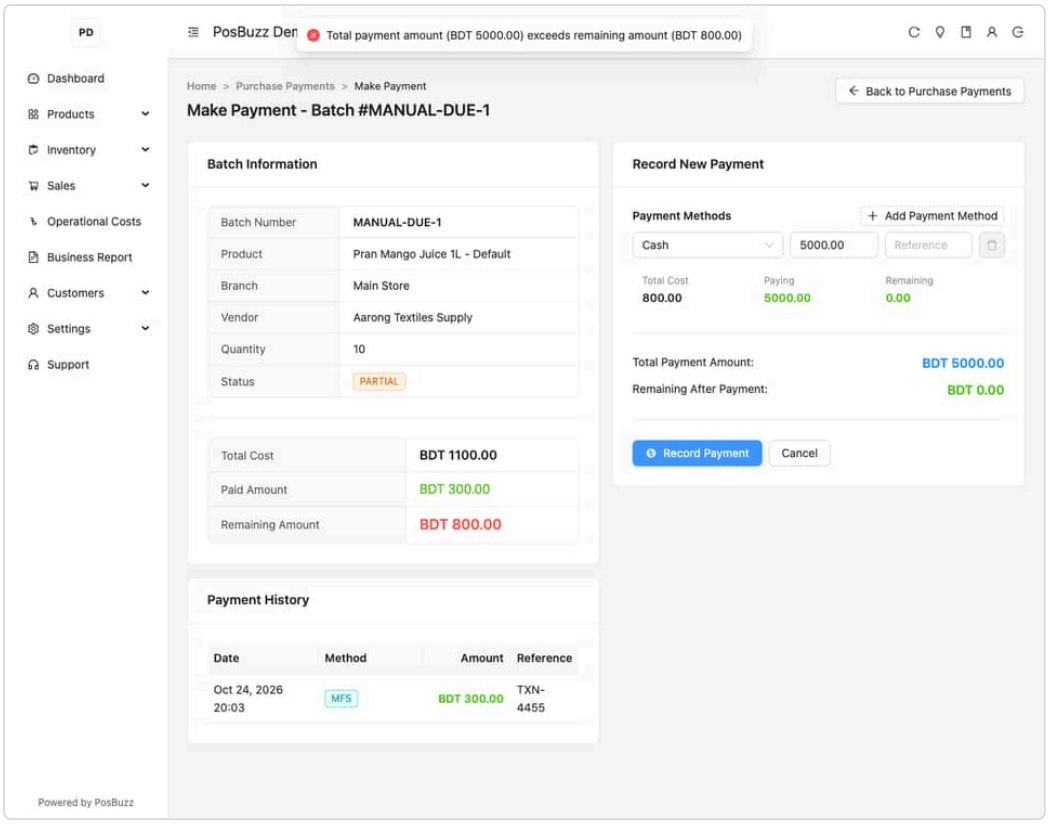

- **Record New Payment** card with the Payment Methods rows (described at the start of this part). The first row is Cash and already holds the full remaining amount. Below are **Total Payment Amount:** and **Remaining After Payment:**, and the buttons **Record Payment** and **Cancel**.
- If nothing can be paid, the card is called **Payment Details** and says "This batch has no payable quantity or balance. Review the payment history on the left."

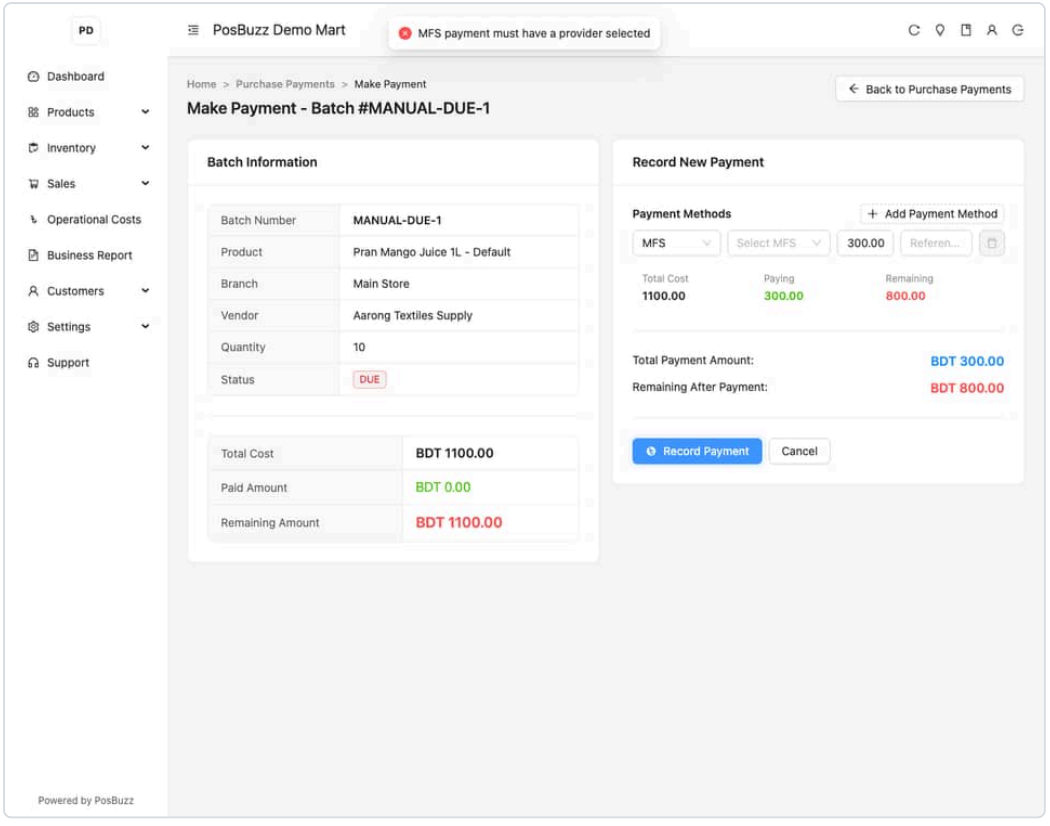

Make Payment for a Due batch.

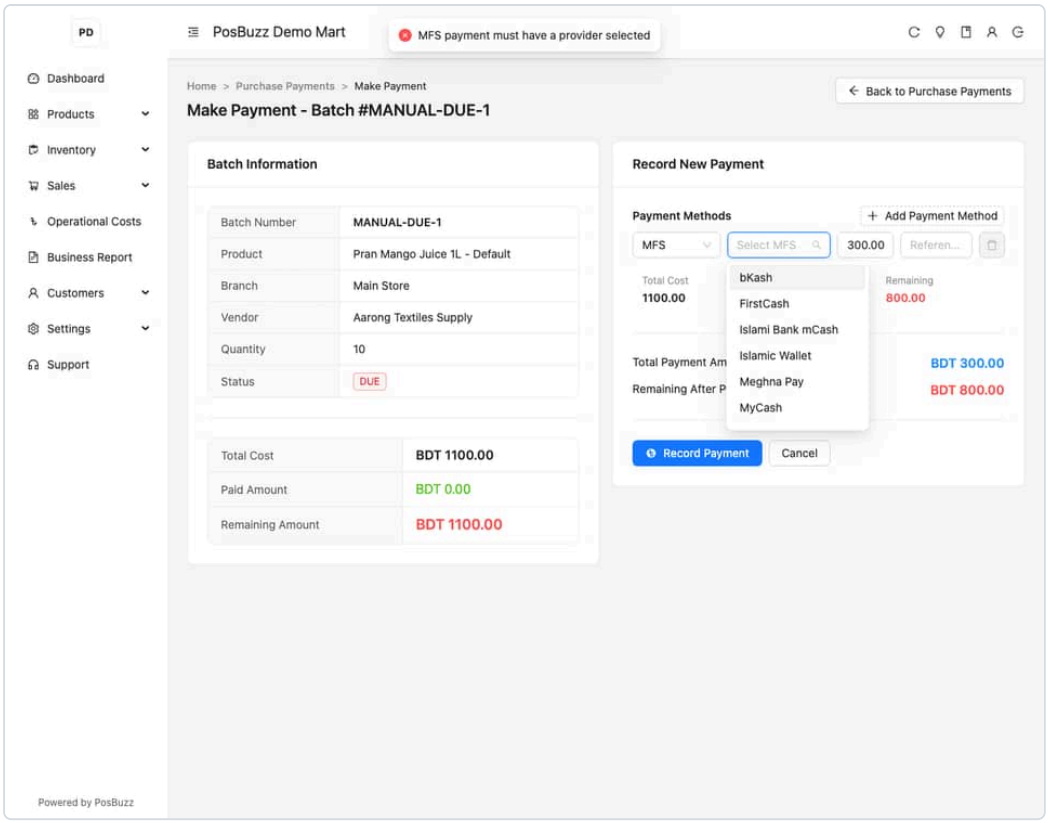

Amount 0 is refused.

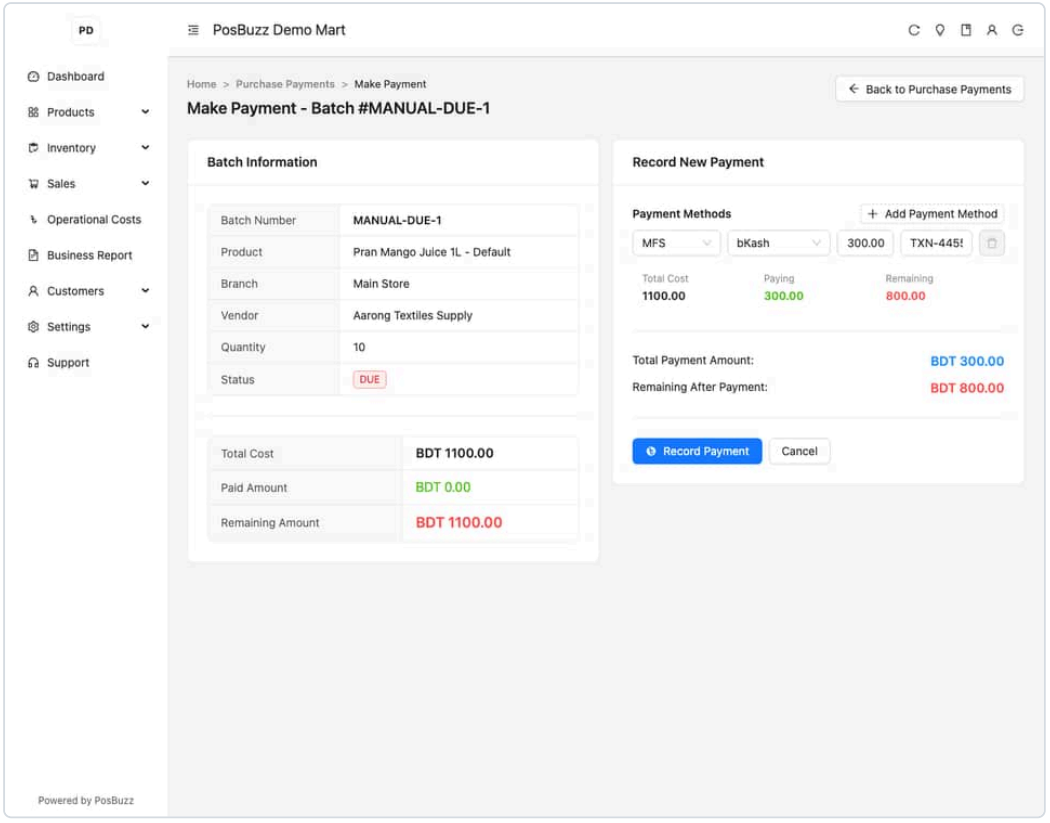

Paying more than is owed is refused.

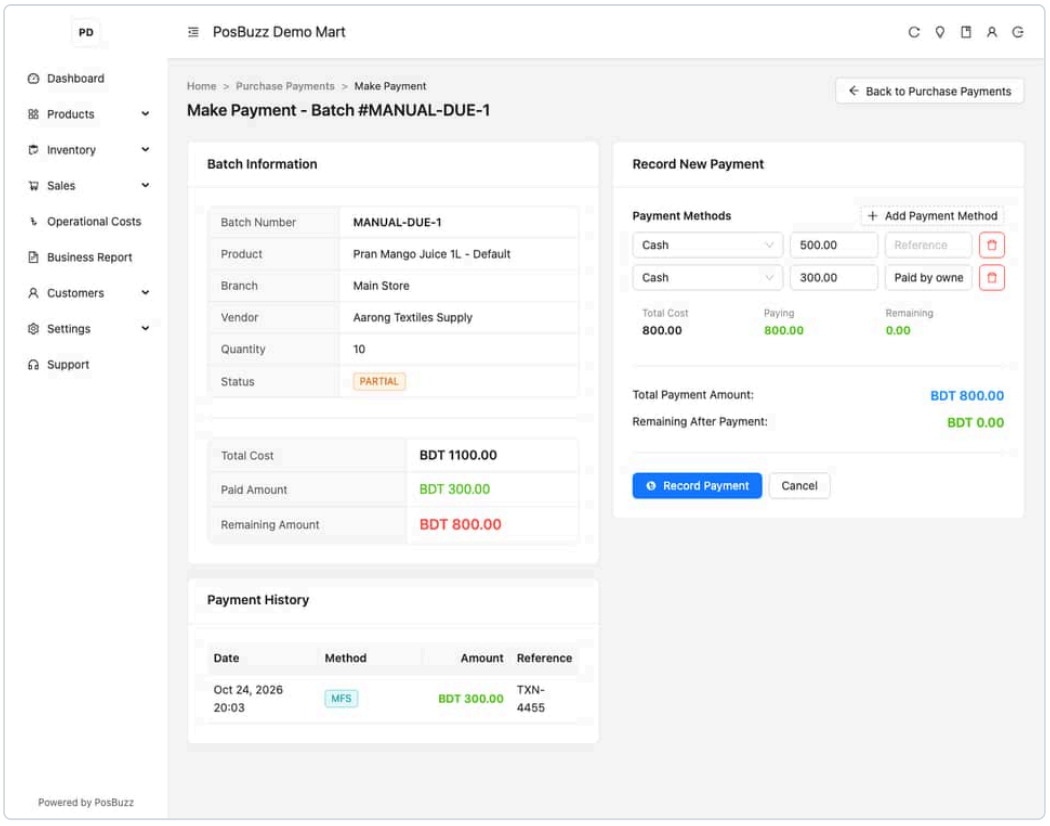

MFS with no provider chosen.

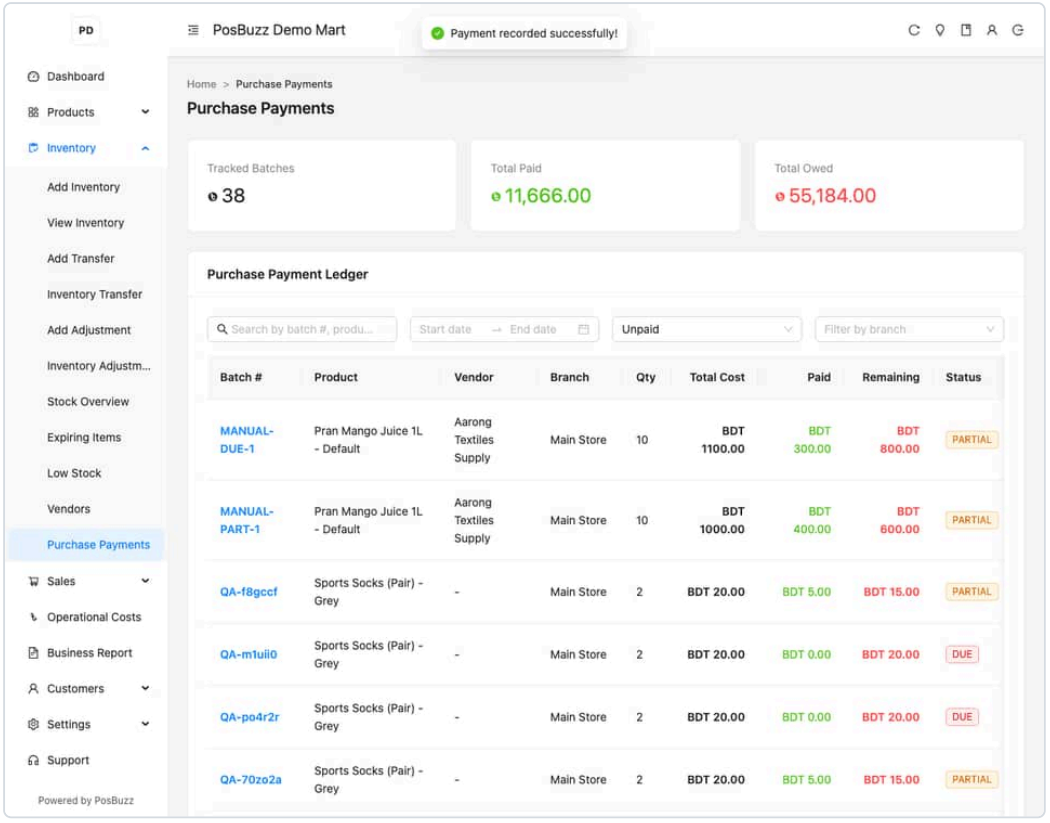

The MFS list.

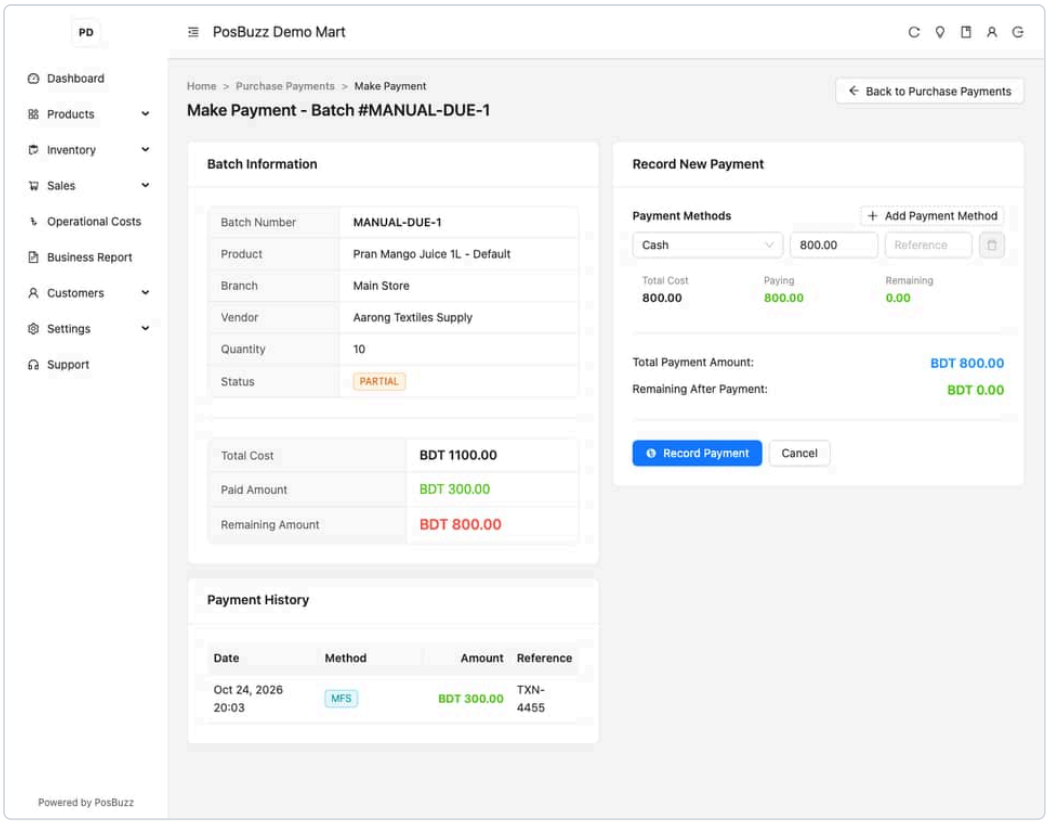

Part payment by bKash.

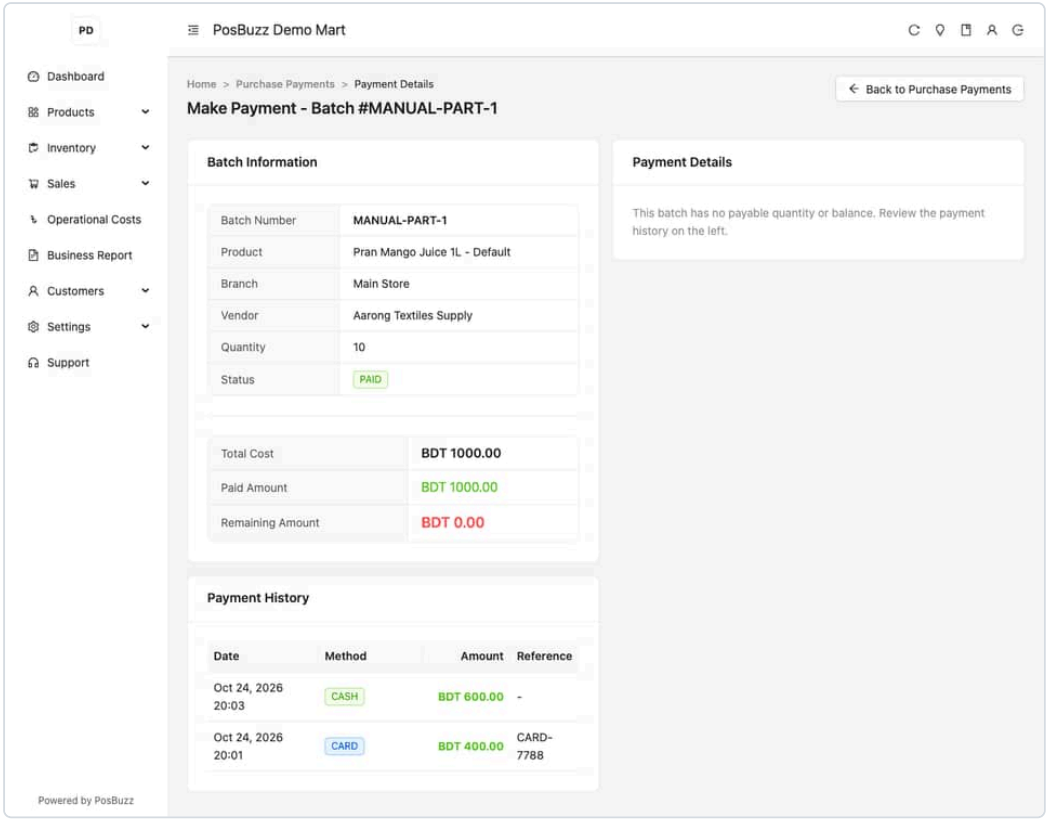

Two payment rows.

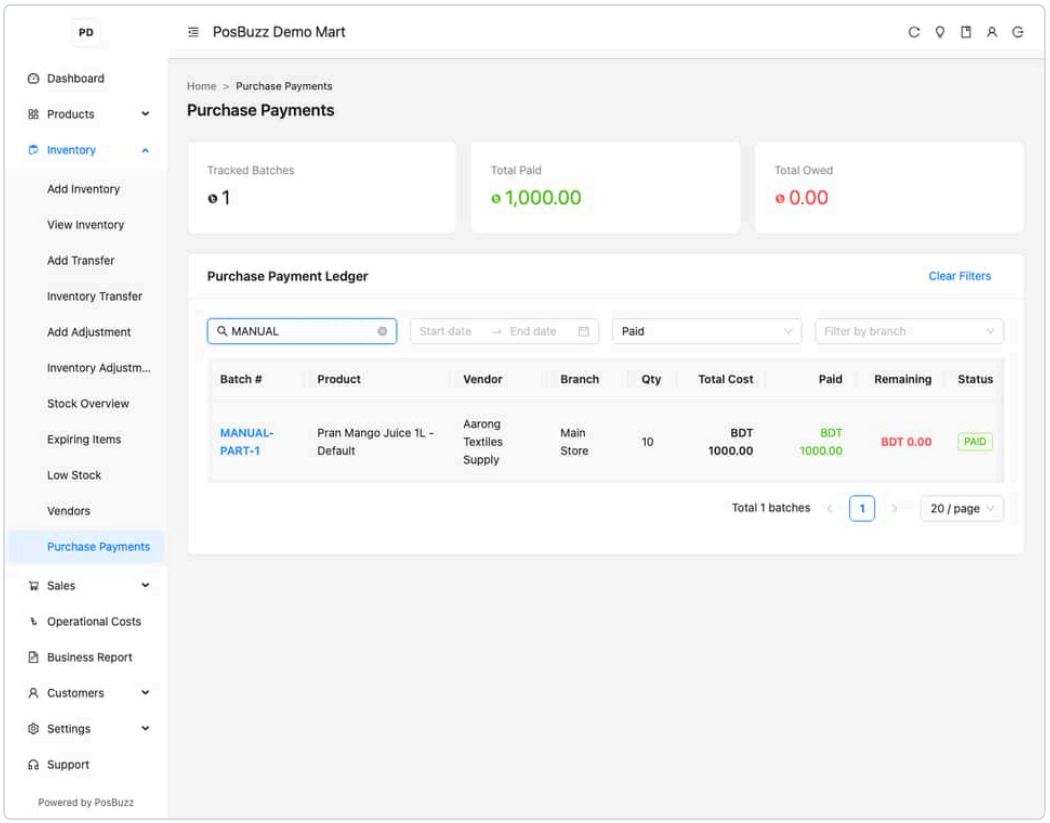

Payment recorded successfully.

Partial batch with Payment History.

A paid batch shows Payment Details only.

Filtered to Paid.

How to pay a supplier for a batch

1. Open **Inventory**, then **Purchase Payments**.
2. Press **Pay** on the batch.
3. Check the amounts under **Batch Information**.
4. In **Record New Payment**, choose the **Method**. For Card, Bank Transfer or MFS, also choose the bank or MFS.
5. Change the **Amount** if you are paying only part of it.
6. Type a **Reference** if you have one.
7. Press **Add Payment Method** if you pay in more than one way.
8. Check **Total Payment Amount:** and **Remaining After Payment:**.
9. Press **Record Payment**.

What happens next: You see "Payment recorded successfully!" and go back to Purchase Payments. The batch becomes Paid when the total paid reaches the total cost. Otherwise it is Partial. The vendor's Total Paid and Total Owed are updated.

Message	What it means	What to do
Loading batch details...	The page is loading.	Wait.
Failed to load batch details	The batch could not load. You are sent back to the ledger.	Try again.

Message	What it means	What to do
This batch has no payable quantity or balance	Nothing can be paid on this batch.	Press **Cancel** or go back.
Please add at least one payment with an amount	All amounts are empty or 0.	Type an amount.
CARD (or BANK TRANSFER, MFS) payment must have a provider selected	A bank or MFS is missing.	Choose it.
Total payment amount (BDT x) exceeds remaining amount (BDT y)	You are paying more than is owed.	Lower the amount to y or less.
Payment recorded successfully!	Done.	Nothing.
Failed to record payment (or a server message)	The payment was not saved.	Read the message and try again.
Batch is already fully paid	Nothing is left to pay.	Reload the ledger.
Cannot make a vendor payment for a batch with zero quantity	The batch has no stock left.	Nothing can be paid here.
Batch changed. Refresh and try the payment again.	The batch was changed by someone else.	Reload the page and try again.
Total payment amount must be greater than 0	The total is 0.	Type an amount above 0.

Part 4 - Selling: POS, sales, returns, quotations, dues and promotions

This part explains every screen you use to sell goods, take payment, take goods back, give price offers, collect money still owed, and run discounts. All money is in taka (BDT). Dates and times use the Asia/Dhaka time zone.

Sale numbers look like `SAL-20261024-0010`. Return numbers look like `RET-20261024-0001`. Quotation numbers look like `QUO-20261024-0001`.

Permissions in short. All screens in this part need the **sales** permission, except the quotation screens, which need the **quotations** permission. If you do not have the permission, the menu item is hidden and the page will not open for you. Ask the shop owner to give you the permission.

Good to know: The app has no "hold" or "park" sale. If you start a sale and press **Cancel**, everything is cleared. If you want to keep a price offer for later, save a quotation. If a customer will pay later, complete the sale with no payment and collect the money later in **Due Payments**.

Express Sale (Point of Sale)

What it is

Express Sale is the fast checkout screen for the counter. You tap or scan products, take payment and finish the sale in a few steps. It is also called "Point of Sale" or POS.

Where to find it

- Open the **Home** page (Dashboard) and tap the **Express Sale** card ("Sale with our POS interface").
- It is not in the left menu. It opens as a full screen without the menu.
- Permission needed: **sales**. The card only shows if you have it.

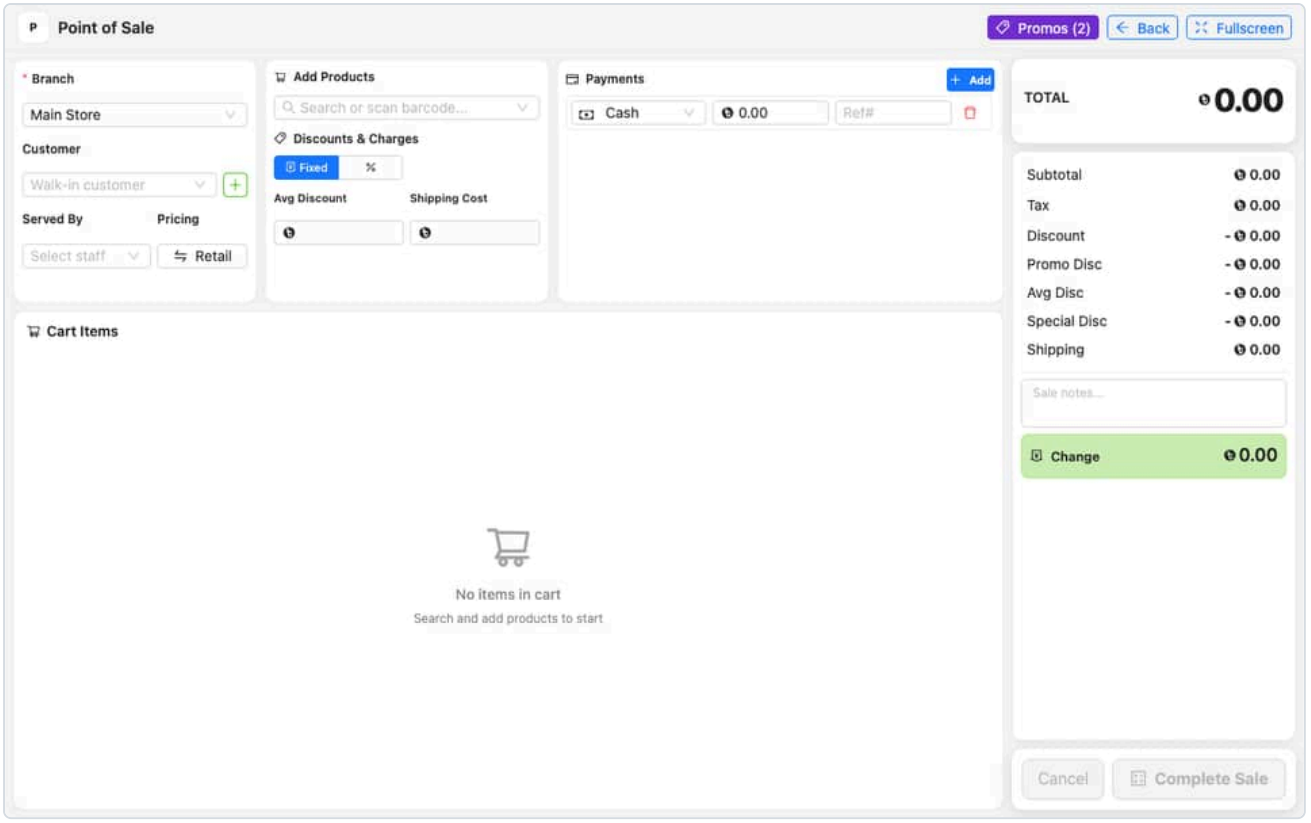

Two layouts: classic and restaurant

The POS has two layouts. Choose one in the left menu under **Settings**, then **POS Layout**. The choice is saved in the browser of that computer only, so each counter computer can have its own layout. The default is **classic**.

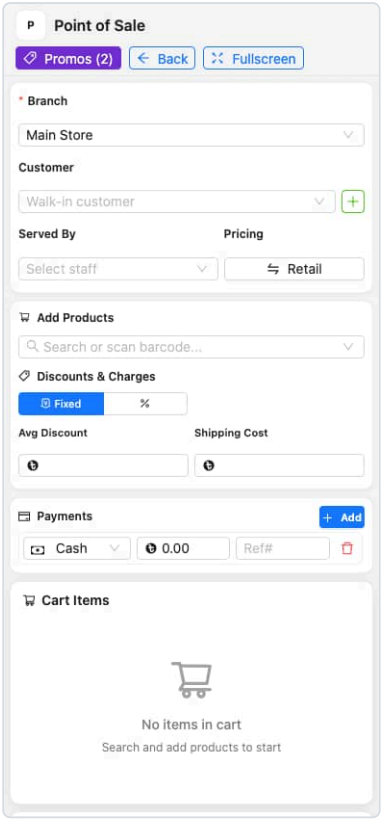

- **Classic** is a grid of cards (branch, products, payments) with a cart table. It suits shops.
- **Restaurant** shows a menu of tiles on the left and the current order on the right. It suits food shops.

Both layouts work the same way underneath. Only the buttons differ.

What you see: classic layout

Express Sale in the classic layout on a computer screen.

On a phone the cards stack one under the other. The Cart Items table and the totals are below the cards.

Top bar

Item	What it does
Company logo and **Point of Sale**	Shows which screen you are on.
N items badge	Appears once the cart has lines. It shows how many.
Promos (N) (purple)	Opens the list of active promotions. N is the number of active promotions. It is greyed out until you pick a branch.
Back	Goes back to the Home page.
Fullscreen / **Exit**	Fills the whole screen. Press **Exit** (or the Esc key) to leave full screen.

Card 1: sale details

Field	Required	Notes
Branch	Yes	Shows "Select branch" if empty. It starts with your first branch. Changing the branch clears the cart and the promotions.
Customer	No	You can search by name. Placeholder is "Walk-in customer", which means a customer with no record. Each entry shows "Name • phone". Use the clear option to remove the customer.
Green **+** button (tooltip **Add customer**)	No	Opens the **Add New Customer** window.
Served By	No	Placeholder "Select staff". You can search and clear. It lists staff of the chosen branch.
Pricing button, **Retail** / **Wholesale**	No	Tap to switch. Wholesale is shown in blue. Switching re-prices every cart line, so one sale never mixes retail and wholesale prices. If a product has no wholesale price, its retail price is used.

Card 2: products and discounts

Item	Notes
Add Products search box	Placeholder "Search or scan barcode...". It is disabled until you pick a branch. Each result shows the picture, product name, variant, SKU, barcode, shelf locations, **Stock: n unit** and the price. In the live app the second line reads like "Default • SKU-1009 • 8810000333" (variant, SKU, barcode), without the word Code. Tap a result to add 1 to the cart. Tapping the same item again adds one more.
Discounts & Charges	Holds the discount and shipping boxes below.
Green promotion tags	Promotions already applied. You can close each tag to remove it. **Clear All** removes all of them.
Fixed / **%** toggle	Chooses whether the Avg Discount is an amount in taka or a percent.

Item	Notes
Avg Discount	Minimum 0. One discount for the whole order, spread across the lines in proportion.
Shipping Cost	Minimum 0. Added to the total.

Card 3: payments

Item	Notes
Add	Adds another payment row. The new row is filled with the amount still unpaid, or the full total if nothing is left unpaid.
Method	Cash, Card, Cheque, Transfer (bank transfer), Mobile (mobile money), MFS, Credit, Exchange.
Select bank	Shown for Card and Transfer. A searchable list of Bangladesh banks.
Select MFS	Shown for MFS. Choose from bKash, Nagad, Rocket, MyCash, Islami Bank mCash, Trust Axiata Pay (TAP), FirstCash, Upay, OK Wallet, Rupali Bank, Telecash, Islamic Wallet, Meghna Pay.
Amount	Minimum 0, two decimal places.
Reference	Optional reference, for example a transaction number.
Red trash button (**Remove**)	Removes this payment row.

Payment method, provider, amount and reference fields wrap within the payment card to stay usable on narrow screens. The Express Sale branding reads **Developed by Knit Coders**.

Cart Items card

The card has a count badge. When empty it says **No items in cart** and **Search and add products to start**. Each line has these columns:

Column	Notes
Product	Picture, name, variant and **SKU:**.
Price	Unit price.
Qty	Type a whole quantity directly, or use **–** and **+**. The box can be cleared with Backspace while entering a new quantity. Enter or Escape leaves the box; a blank value restores the last quantity. Pressing **–** at 1 removes the line. The unit name is below.
Tax	The tax amount, followed by **(Inc)** if tax is already inside the price, or **(Exc)** if tax is added on top.
Avg Disc	The share of the order discount on this line.
Special Disc	A switch **Overall** / **Per qty**, an amount box, a percent text and the total.

Column	Notes
Promo Disc	The promotion amount and a promotion tag you can close.
Total	Line total.
Action	Trash button to remove the line.

Side panel on the right

- **TOTAL** in big numbers.
- Rows: **Subtotal**, **Tax**, **Discount** (highlighted if above 0, with its percent of the subtotal), **Promo Disc**, **Avg Disc**, **Special Disc**, **Shipping**.
- A notes box with the placeholder "Sale notes...".
- A red box **Due** showing the amount not yet paid, or a green box **Change** showing the amount paid over the total.
- **Cancel** (greyed out when the cart is empty) and **Complete Sale** (greyed out when the cart is empty or the sale is being saved).

Available Promotions window (opened with **Promos**)

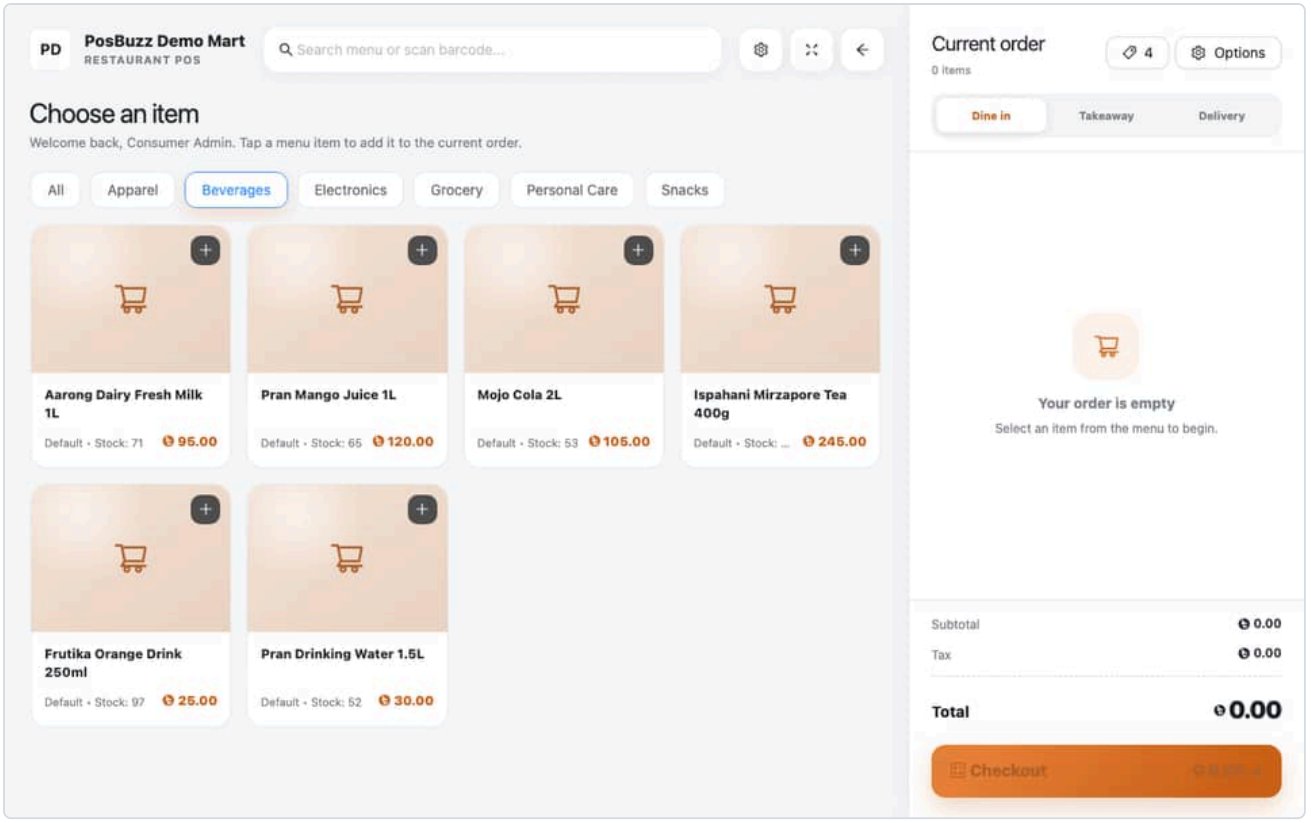

- Lists the active promotions. Each one shows a scope tag (BRAND, BUNDLE or SINGLE_PRODUCT), an **Applied** or **Available** tag, the discount ("N% discount" or "amount discount"), a description, and a reason line if the cart does not qualify (for example "Not eligible for current cart").
- Each has an **Apply** or **Remove** button.
- If there are none, it says **No active promotions found**.

Add New Customer window

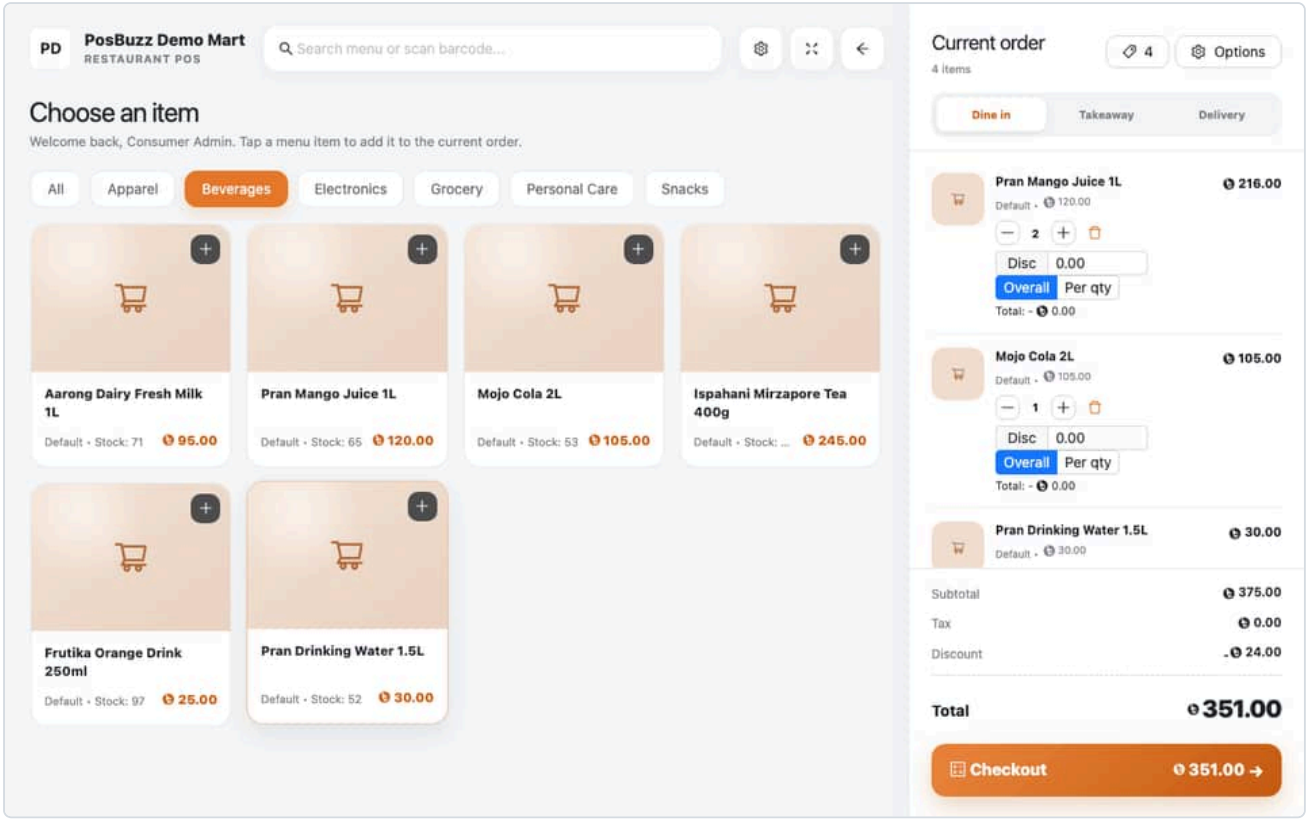

Field	Required	Notes
Customer Name	Yes	"Please enter customer name" if empty.
Customer Type	Yes	**Individual** (default) or **Business**.
Phone	Yes	"Please enter phone number" if empty.
Email	No	Must be a valid email: "Please enter valid email".
Birthday	No	Cannot be a future date.
Address	No	Free text.

Buttons: **Cancel** and **Add Customer**. The new customer is selected for the sale straight away.

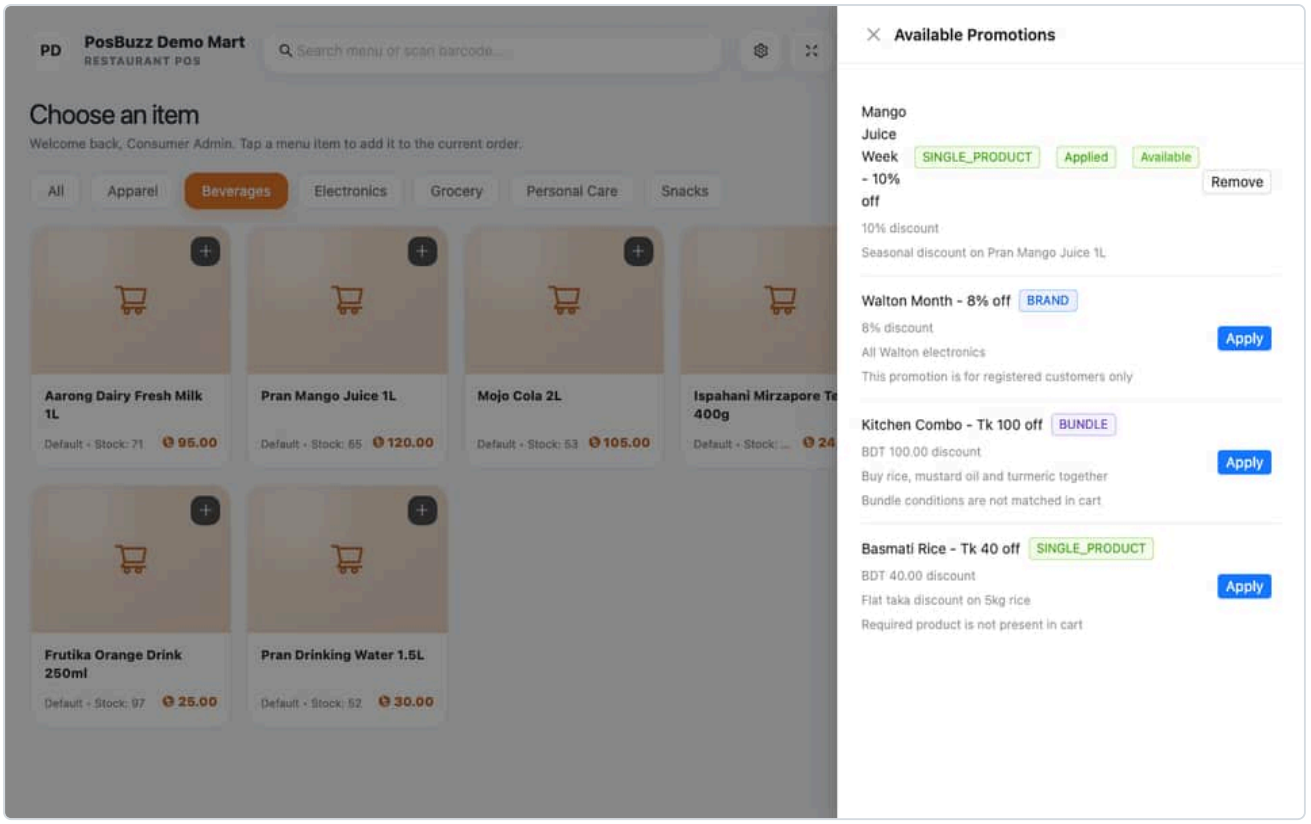

What you see: restaurant layout

Restaurant layout with the Beverages category chosen. Each tile shows the stock and the price.

The Current order panel with four items. Mango Juice Week was applied by itself and the Discount row shows the saving.

The Available Promotions window opened from the tag button.

Left side

- Logo, company name and **Restaurant POS**.
- Search box "Search menu or scan barcode...".
- Icon buttons **POS layout settings**, **Enter fullscreen** / **Exit fullscreen**, and **Back to dashboard**.
- Heading **Choose an item** and the line "Welcome back, (your name). Tap a menu item to add it to the current order."
- Category chips: **All** and one chip per product category.
- Product tiles with picture, name, variant, **Stock: n** and price. Tap a tile to add it.
- If nothing shows: **No available items found.** and **Select a branch in order options.**

Right side: Current order

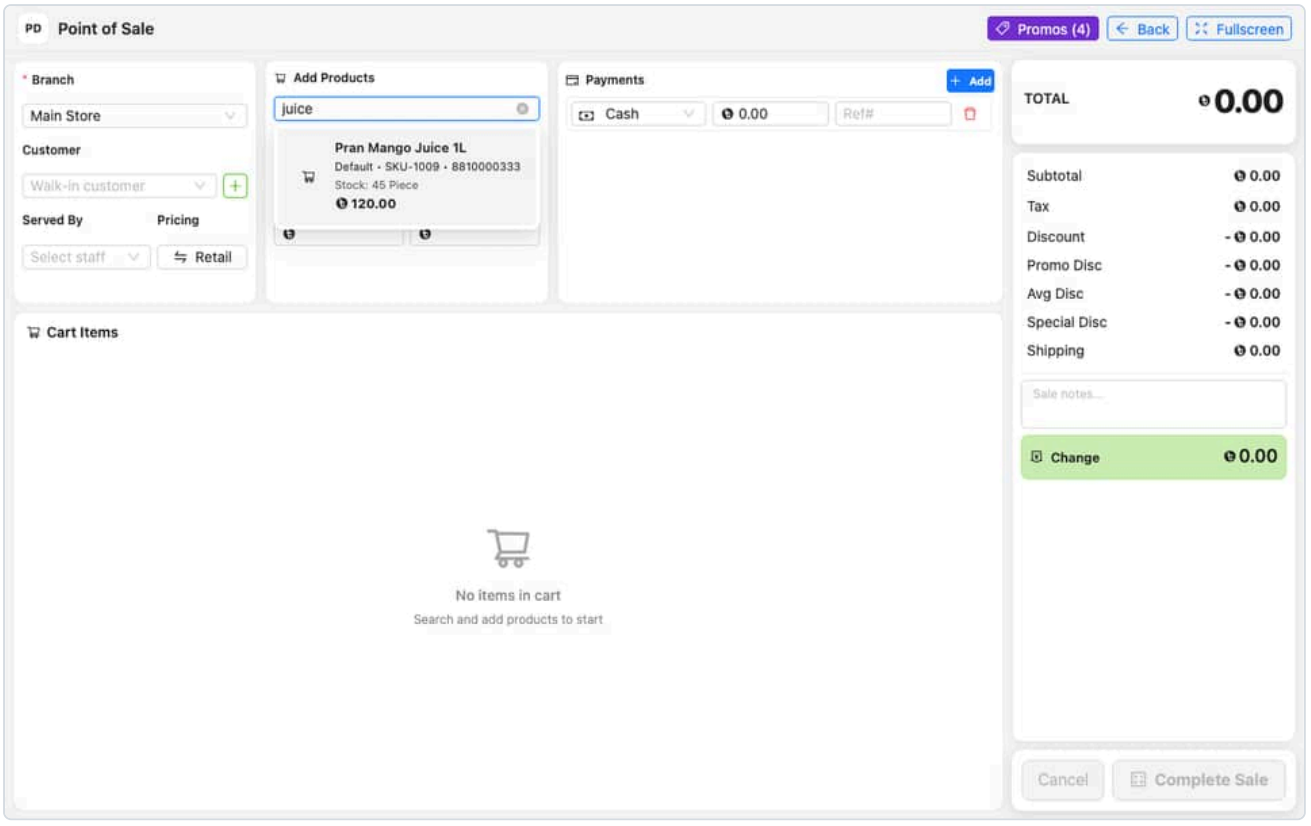

- A line "N items • customer name".
- A tag button with the promotion count. It opens **Available Promotions**.
- An **Options** button.
- Three buttons **Dine in**, **Takeaway**, **Delivery**.
- Order lines with picture, name, variant and price, the **-** and **+** buttons, a trash button, a **Disc** box with **Overall** / **Per qty**, and **Total:** with the line total.
- If empty: **Your order is empty** and **Select an item from the menu to begin.**
- Summary: **Subtotal**, **Tax**, **Discount** (only if there is one), **Delivery / shipping** (only if there is one) and **Total**.
- A big **Checkout** button that shows the total.

> **Good to know: Dine in**, **Takeaway** and **Delivery** are for display only. Tapping them changes nothing on the sale, and the choice is not saved or printed.

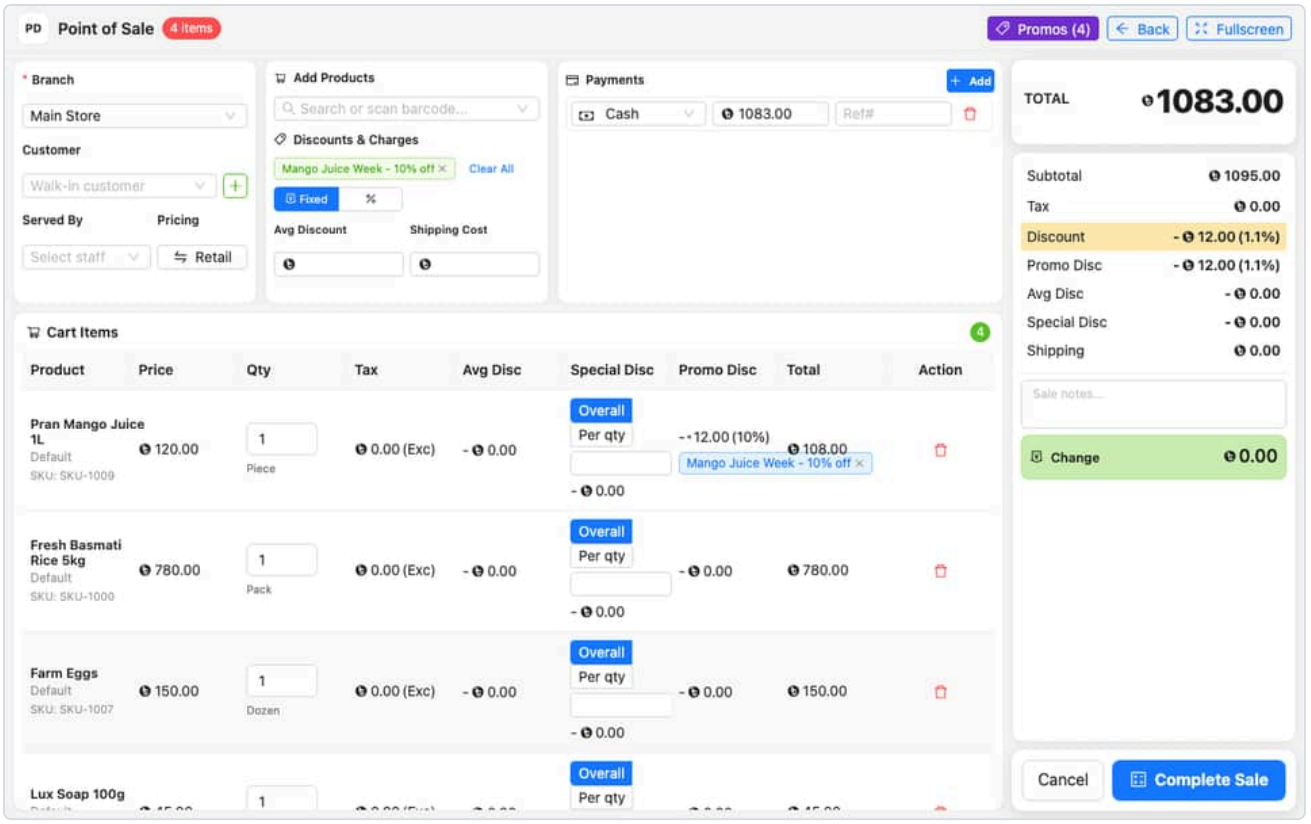

Order options window (opened with **Options**)

Section	What is in it
Order details	**Branch** (required), **Customer** with a plus button, **Served by**, **Pricing** (Retail or Wholesale).
Discounts & charges	Promotion tags, **Clear all**, **Fixed** or **Percentage**, **Order discount**, **Shipping cost**, **Order notes** (placeholder "Kitchen or sale notes...").
Payments	A list of methods: Cash, Card, MFS, Mobile Money, Bank Transfer, Cheque, Credit, Exchange. A provider list (bank or MFS) where needed, an amount box, a **Reference** box, a remove button, and **Add split payment**.
Cancel order	A red button that clears the order.

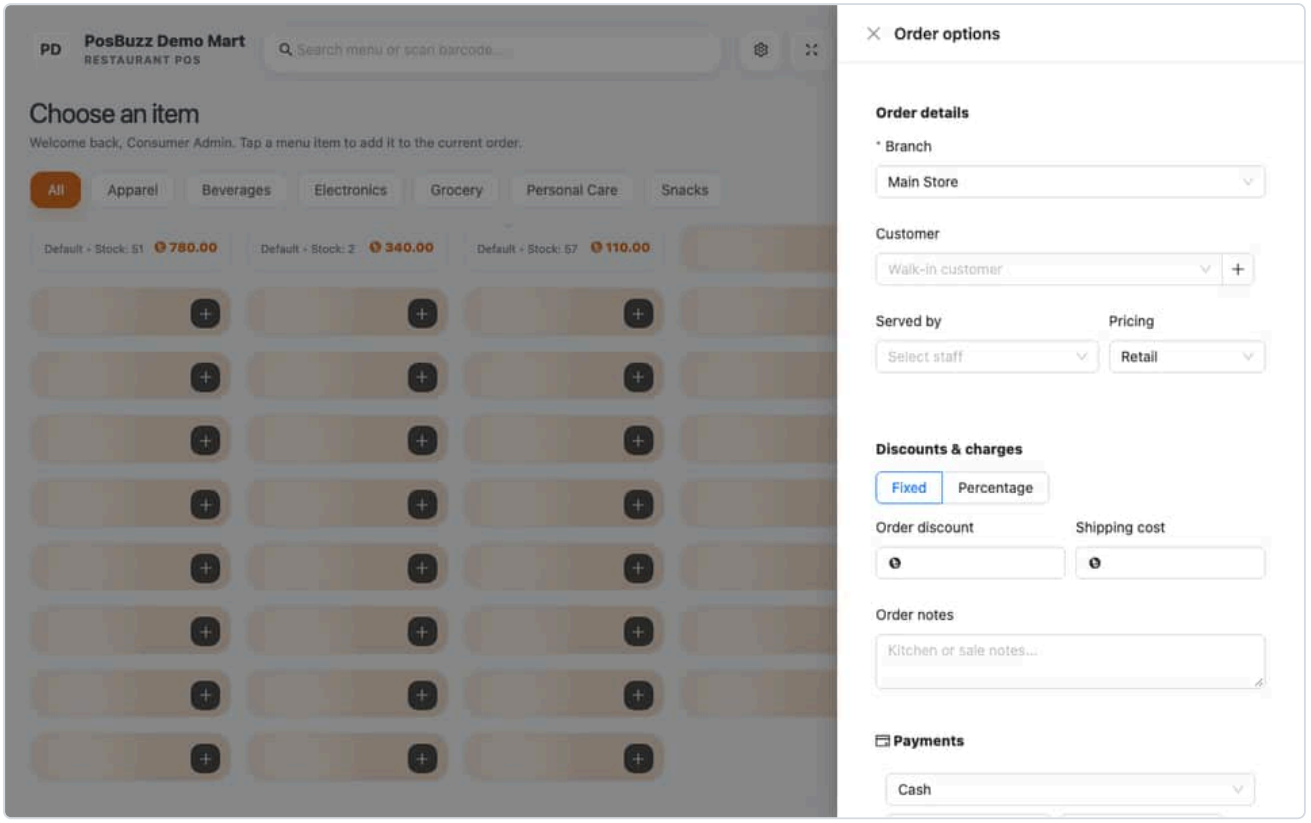

How to make a sale (both layouts)

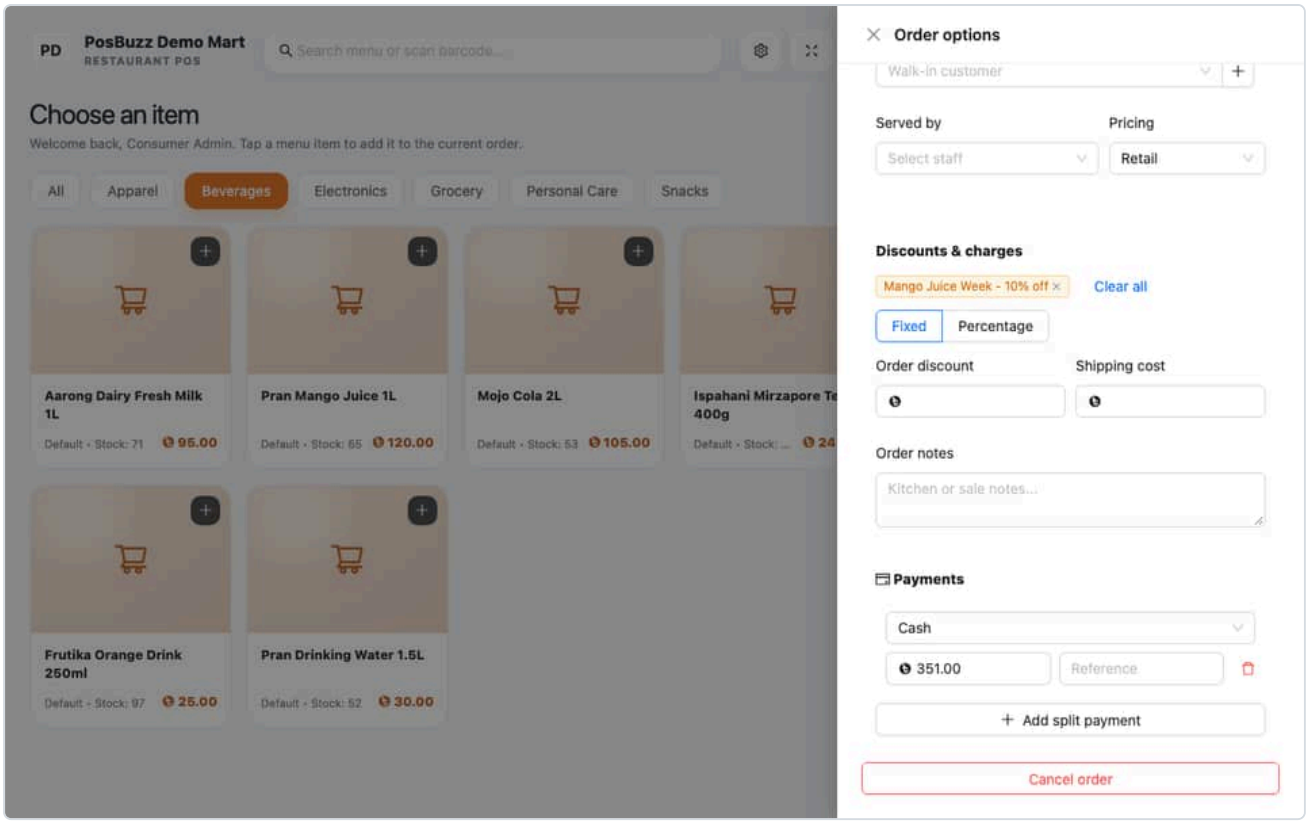

Typing in Add Products shows matching products with SKU, barcode, stock and price.

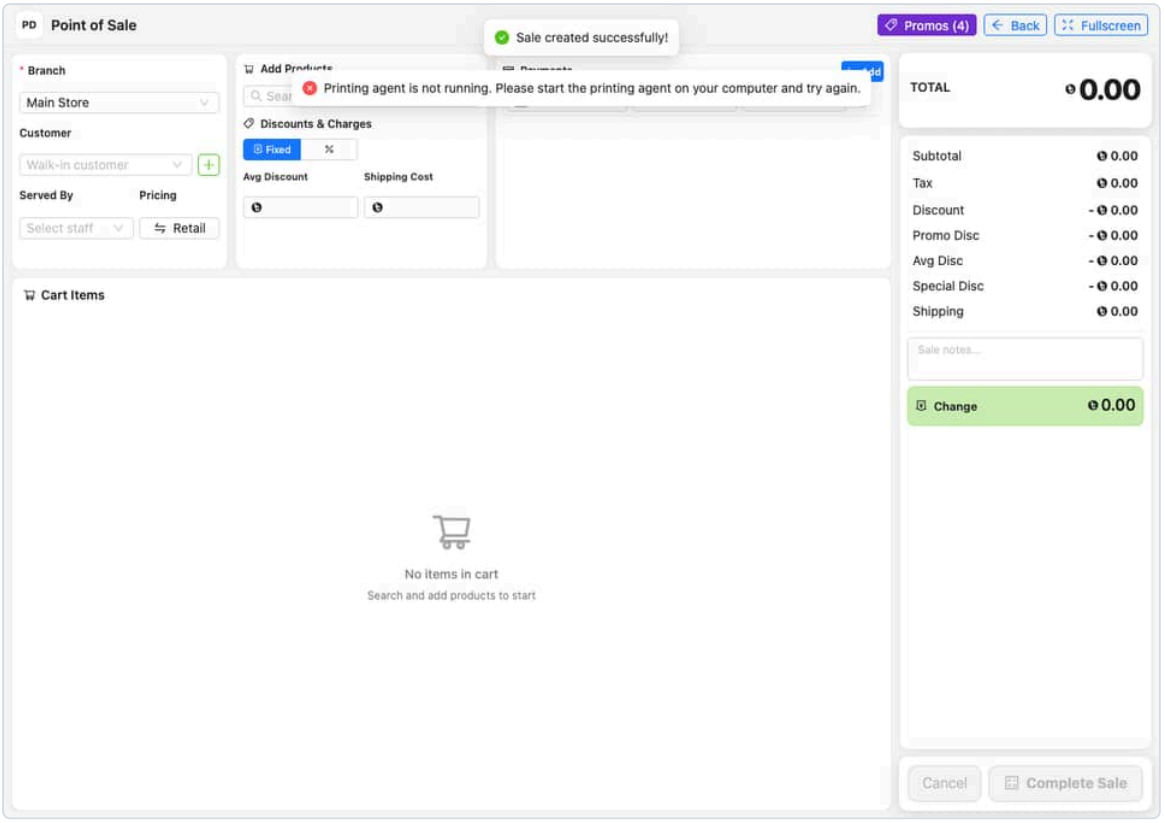

A cart with four items. Mango Juice Week was applied by itself.

Order options window in the restaurant layout: branch, customer, staff and price type.

The lower part of Order options: discounts, notes, payment and Cancel order.

After Complete Sale with Auto Print Thermal ON and no print agent: the green success message and the red print message appear together.

1. Check the **Branch**. In the restaurant layout, open **Options** to see it.

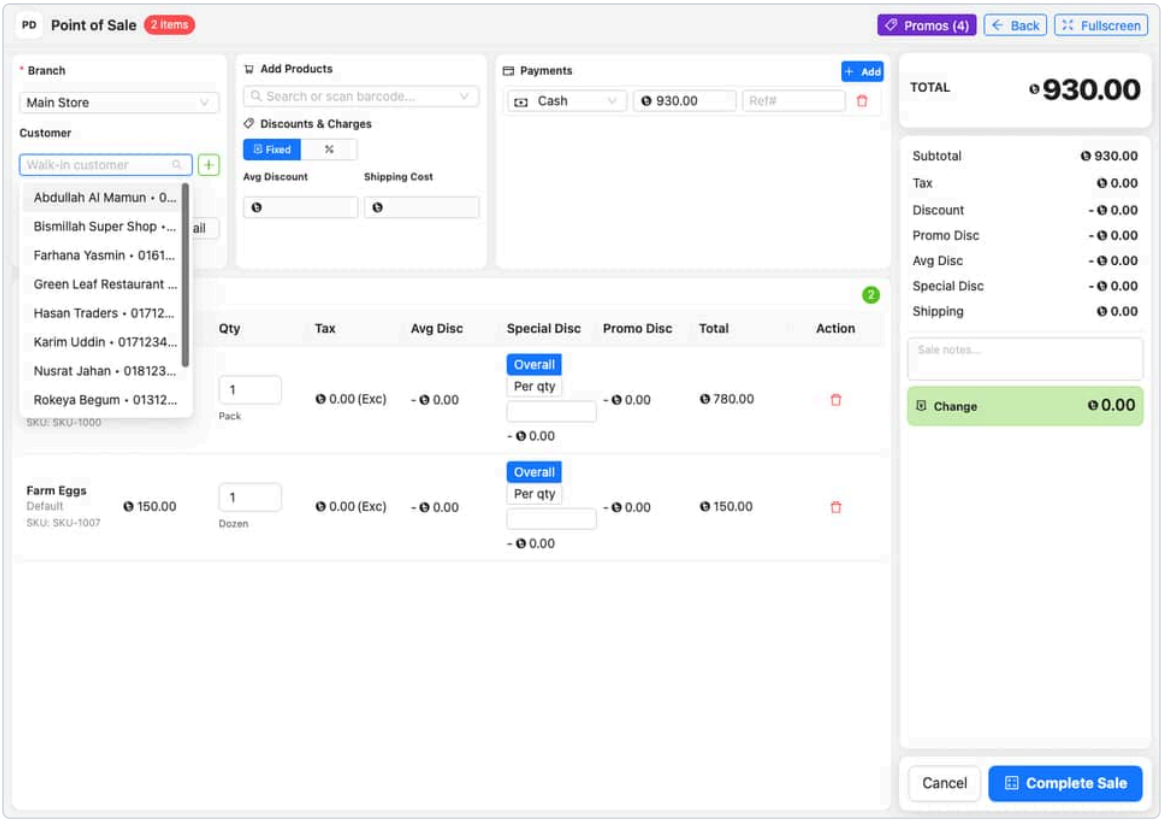

2. If you want to, choose a **Customer** (or leave "Walk-in customer"), choose **Served By**, and choose **Retail** or **Wholesale**.
3. Search or scan products and tap them to add them. Change the **Qty** if needed.
4. If you want to, add discounts (see the next task).
5. Check the payment. The first row is **Cash** and it follows the total automatically while it is the only row. Change the method or amount if the customer pays another way.
6. Tap **Complete Sale** (classic) or **Checkout** (restaurant).

If you use a barcode scanner, point it at the barcode. When no box is selected on the screen, the scanner types the code fast and ends with Enter. The app finds the product in the selected branch and adds it, and you see "Added (product) - (variant) to sale". If the code is unknown you see "Product not found for barcode: (code)".

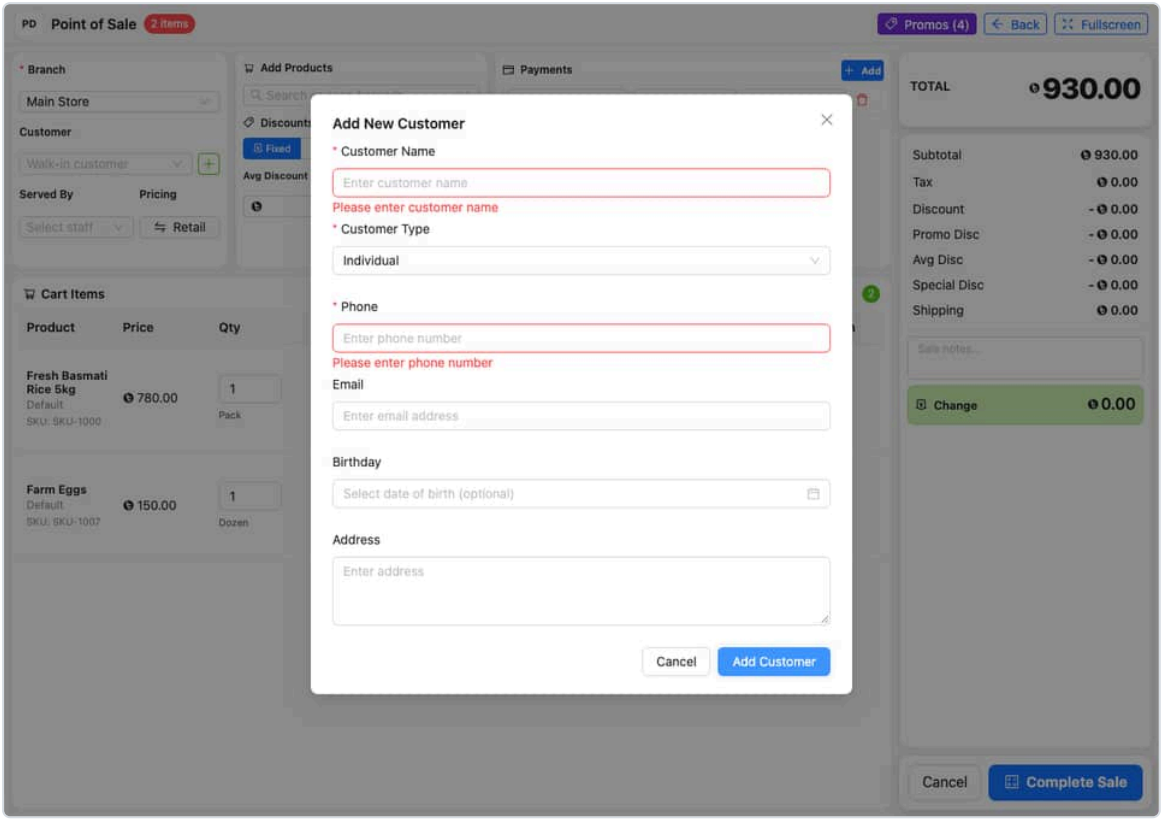

What happens next

- The message **Sale created successfully!** appears.
- The cart, customer, discounts and payments are cleared. The branch stays. The screen stays on the POS, ready for the next customer.
- **Stock** goes down by the quantities sold.
- **Customer due:** if the customer paid less than the total, the sale is saved as **PARTIAL**. If nothing was paid, it is saved as **DUE**. The unpaid amount shows in **Due Payments**.
- **Reward points:** if the sale has a customer, points are earned on the amount paid, not counting the part paid with **Credit**. Whether a part-paid sale also earns points depends on **Earn Points on Fully Paid Sales Only** in **Settings**, then **Rewards**. If it is **Yes**, only fully paid sales earn points. If it is **No**, part-paid sales also earn, on the amount already received. Quotations never earn points. The receipt shows points total, earned and redeemed.
- If **Auto Print Thermal** is **ON**, the receipt prints (see "Receipt printing" below).

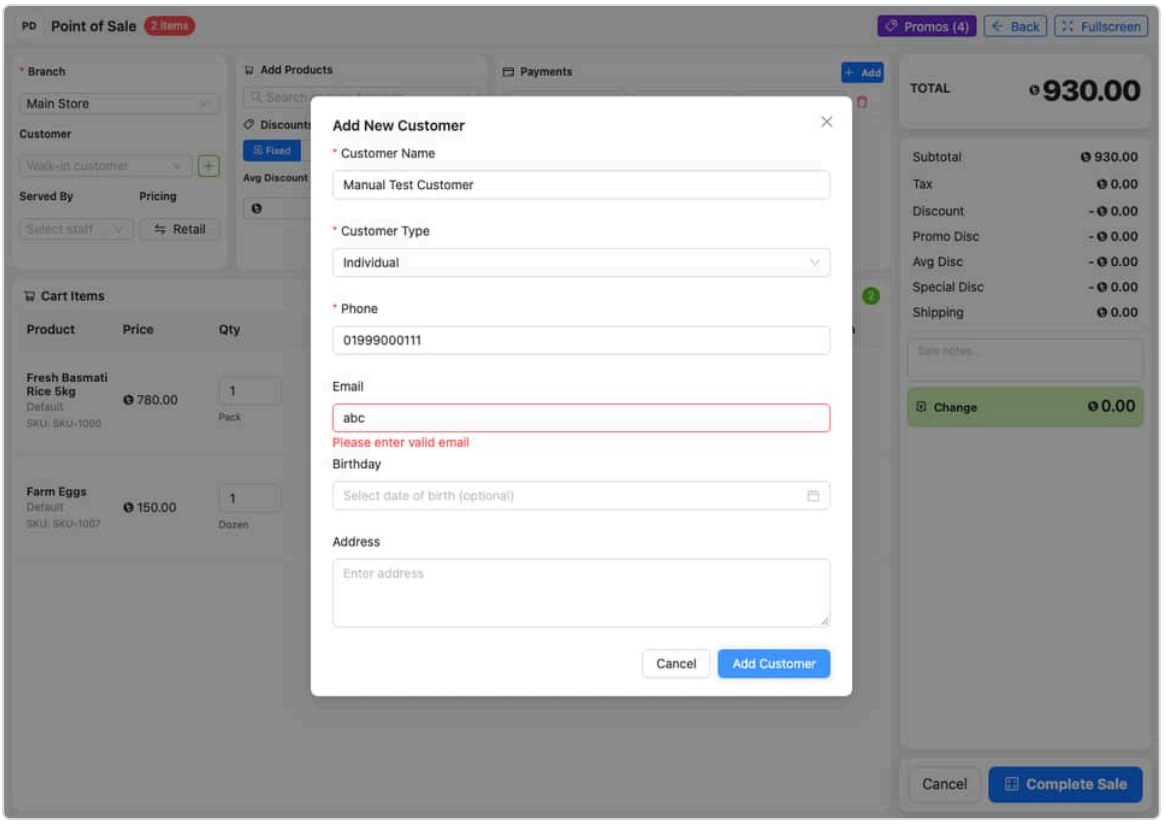

How to add a new customer during a sale

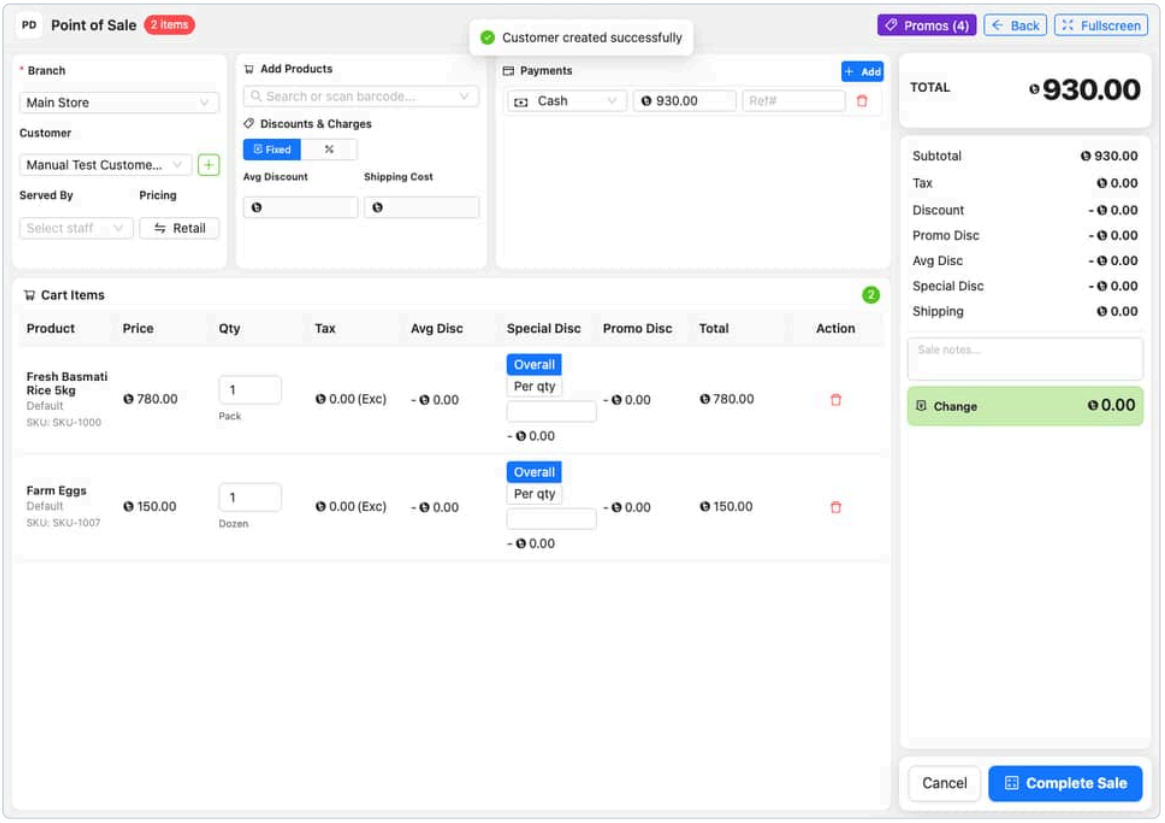

The Customer list shows name and phone.

Pressing Add Customer with the boxes empty.

An email that is not valid shows Please enter valid email.

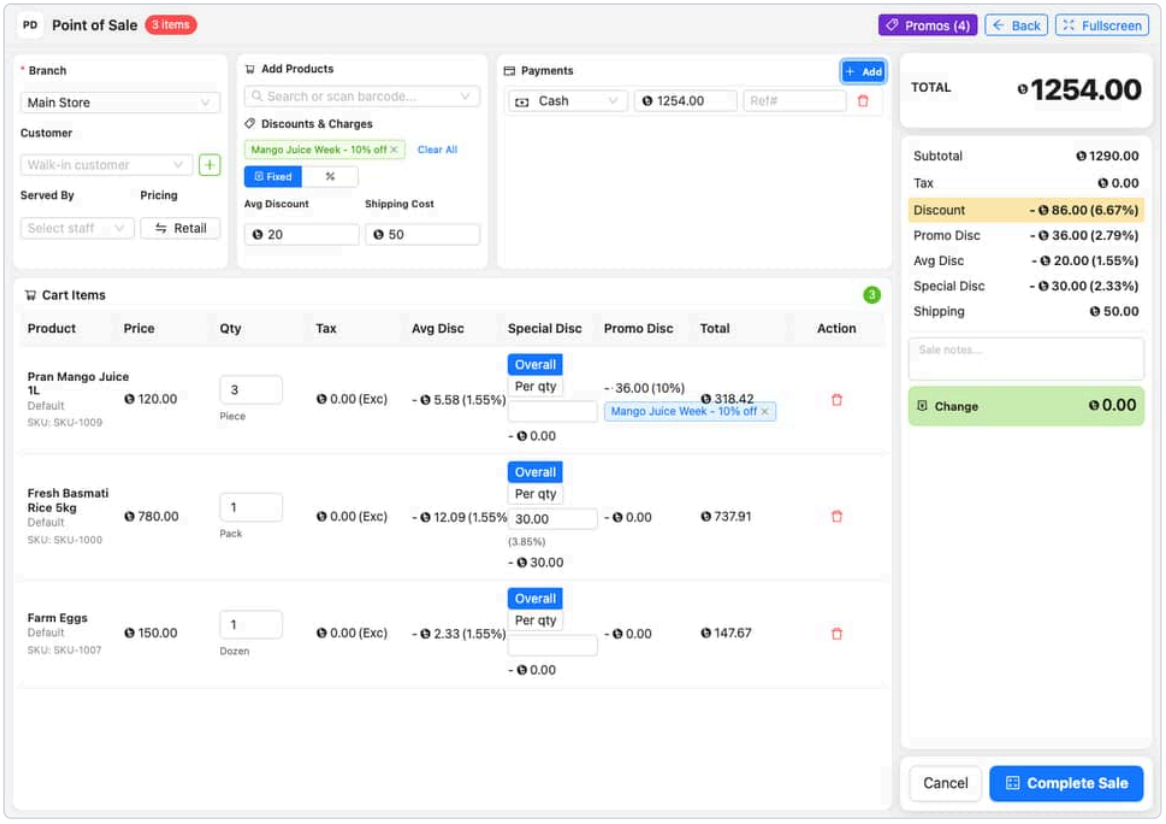

After Add Customer the new customer is selected and a success message shows.

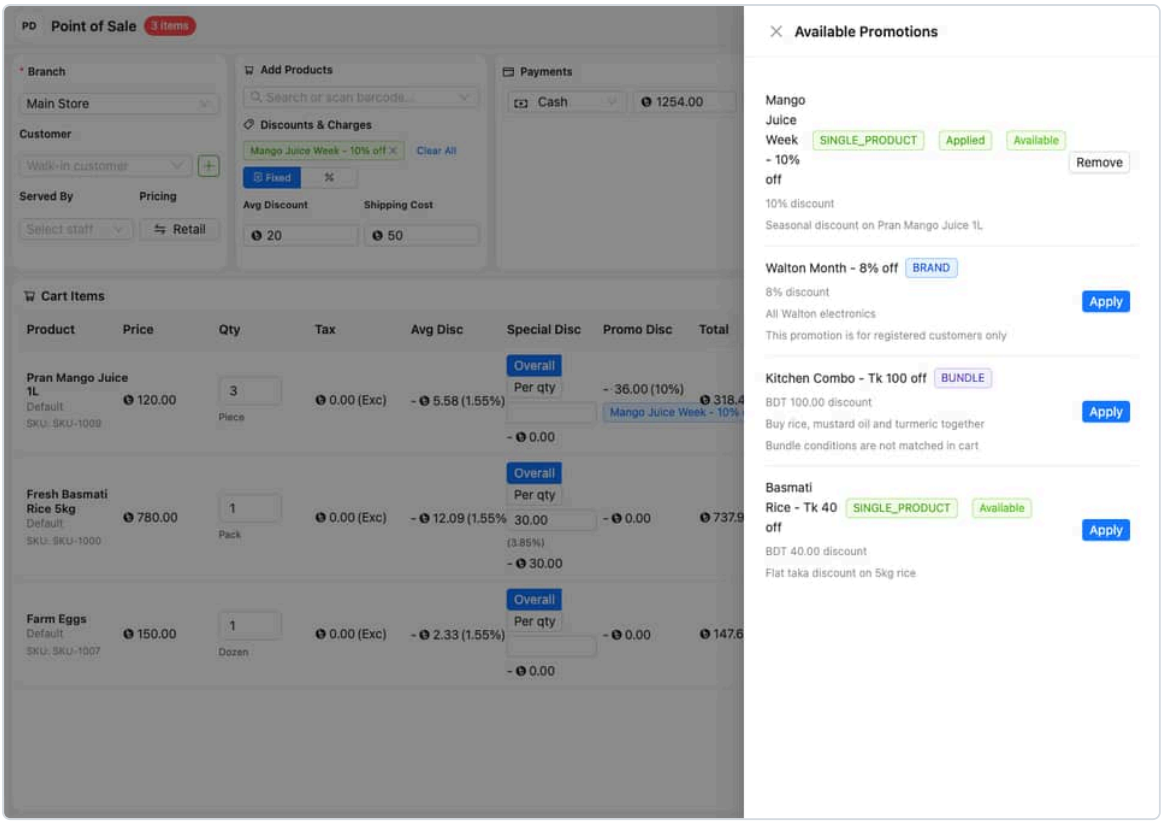

1. Tap the green **+** next to **Customer**.
2. Fill in **Customer Name**, **Customer Type** and **Phone**. Fill in the optional boxes if you want.
3. Tap **Add Customer**.

What happens next: "Customer created successfully" appears and the new customer is selected for this sale.

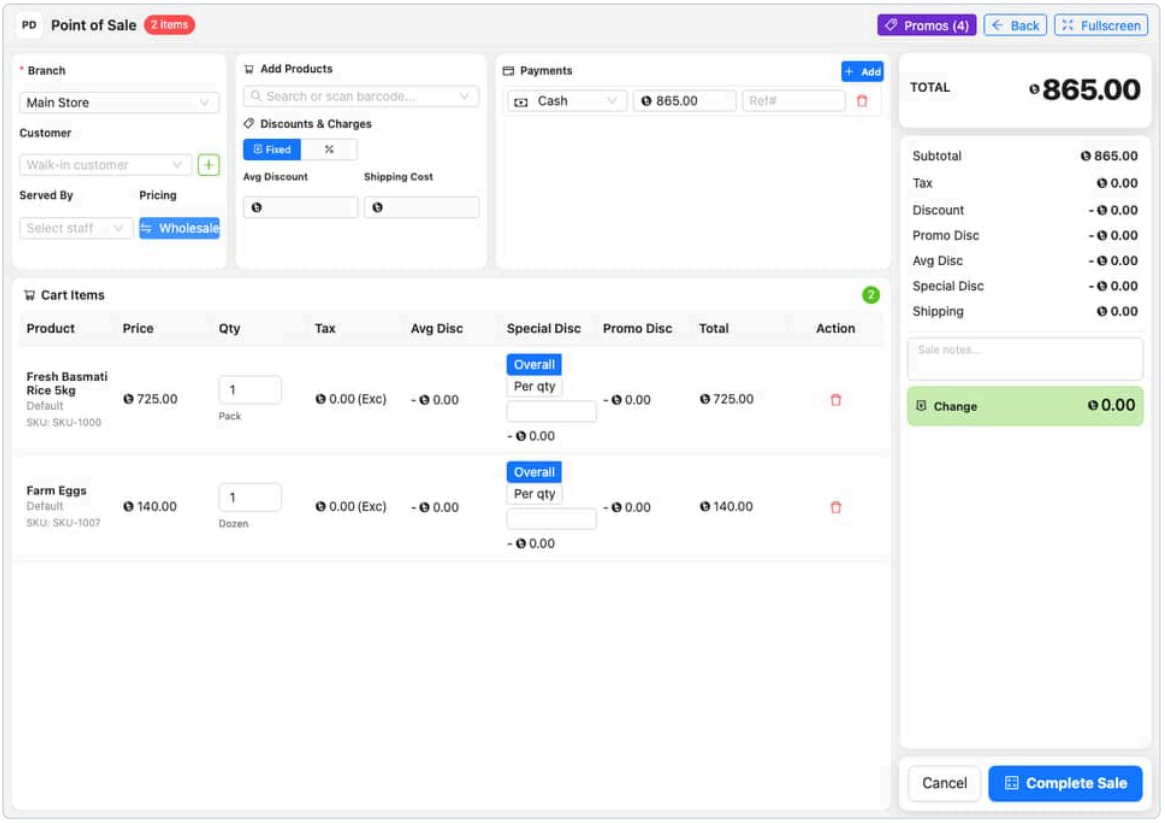

How to give a discount

Quantity 3 on the first line, a Special Disc of 30 on the second, Avg Discount 20 and Shipping Cost 50. The side panel shows each part.

Promotions list. The applied one has a Remove button. The others show why they do not apply yet.

Pricing switched to Wholesale. Prices in the cart changed.

There are three kinds. They are applied in this order: promotion first, then special, then average. Each one is limited to what is left of the line, so a line can never go below 0.

Average discount (whole order)

1. Choose **Fixed** (taka) or **%** (percent).
2. Type the amount in **Avg Discount**.

The discount is spread over the lines in proportion to their value.

Special discount (one line)

1. In the cart, find the line.
2. Type the amount in **Special Disc**.
3. Choose **Overall** (the amount is for the whole line) or **Per qty** (the amount is for each unit, so it grows if you add quantity).

Promotion

1. Tap **Promos**.
2. Find a promotion that says **Available** and tap **Apply**.
3. To take it off, tap **Remove** in the window, or close its tag.

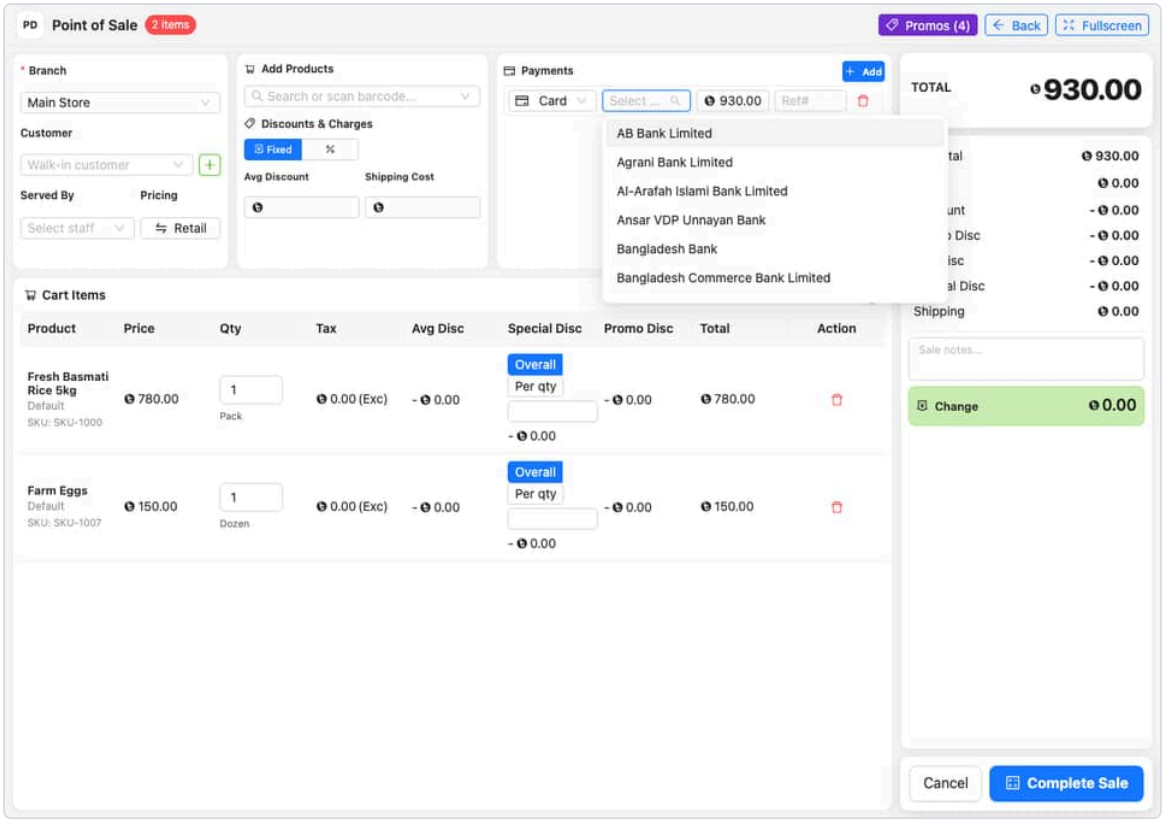

Some promotions apply on their own. You then see "(names) auto-applied". If you remove an automatic promotion, it stays off while the cart still qualifies. If you change the cart and a promotion no longer fits, you see "Removed ineligible promotions: (names)". If the cart becomes empty you see "Applied promotions removed: cart is empty".

If you apply a promotion whose products are not in the cart, the app adds the products and quantity needed to meet it. It tries up to five times.

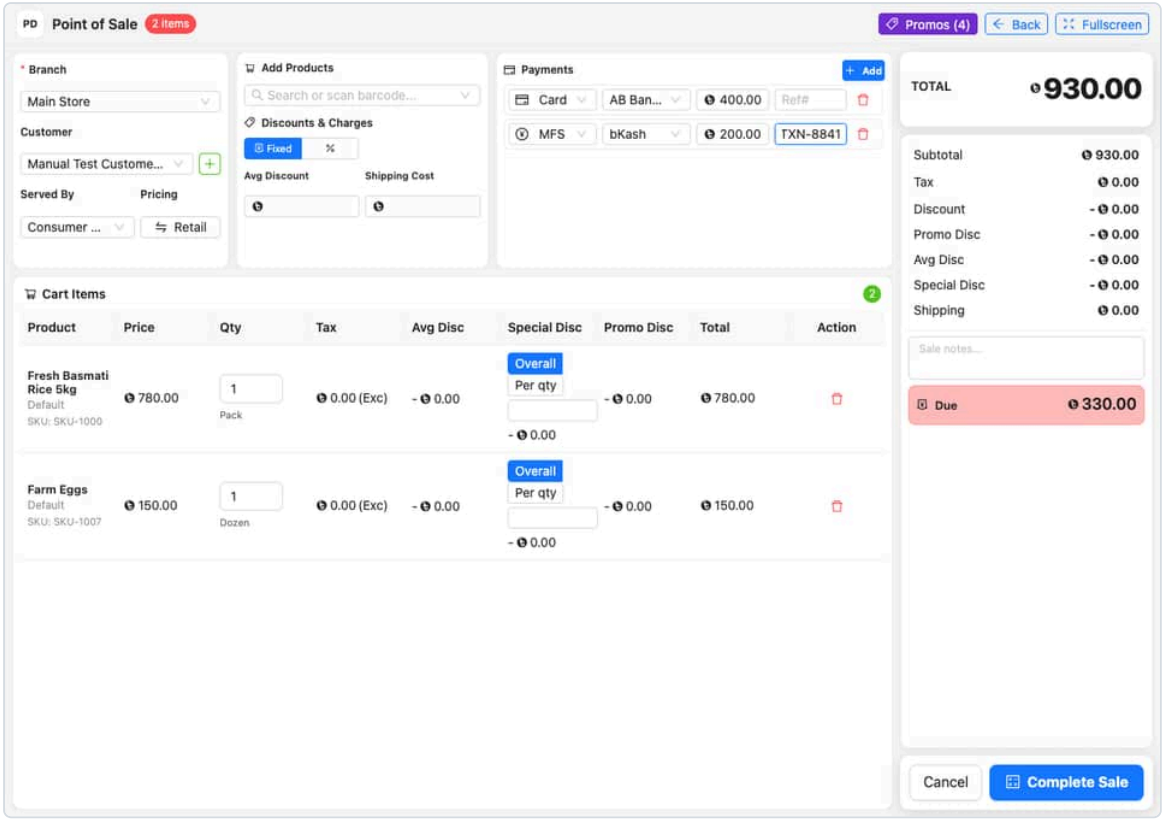

If several promotions cover one line, the one that gives the biggest discount is used.

What happens next: the discount lowers the total. It is shown in the side panel and on the receipt. It does not change stock.

How to take a split payment or an unpaid sale

Choosing Card shows a Select bank list.

Card 400 and MFS bKash 200 against a total of 930. The red Due box shows 330.

1. Tap **Add** to add a payment row.

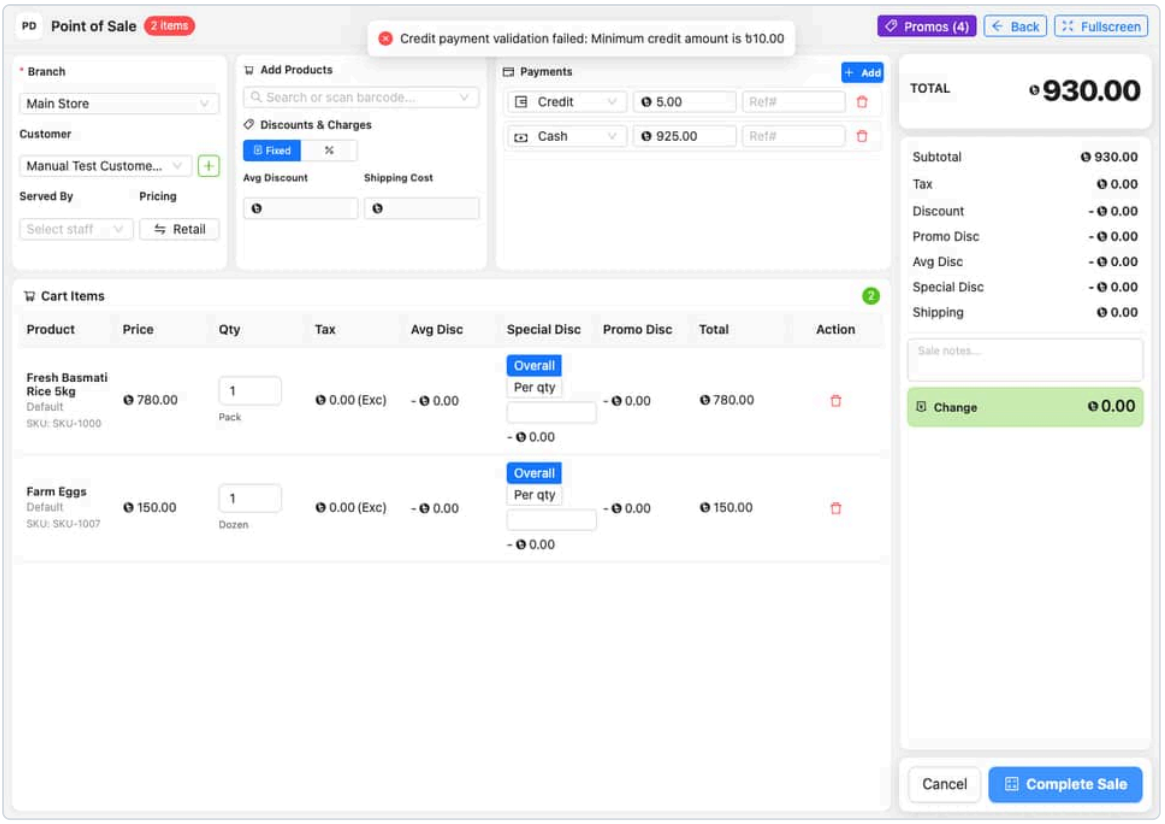

2. In each row, choose the **Method**. For Card or Transfer choose a bank in **Select bank**. For MFS choose a provider in **Select MFS**.
3. Type the **Amount**. Type a **Ref#** if you have one.
4. To delete a row, tap the red trash button.
5. Tap **Complete Sale**.

Rows with an amount of 0 are dropped when you save.

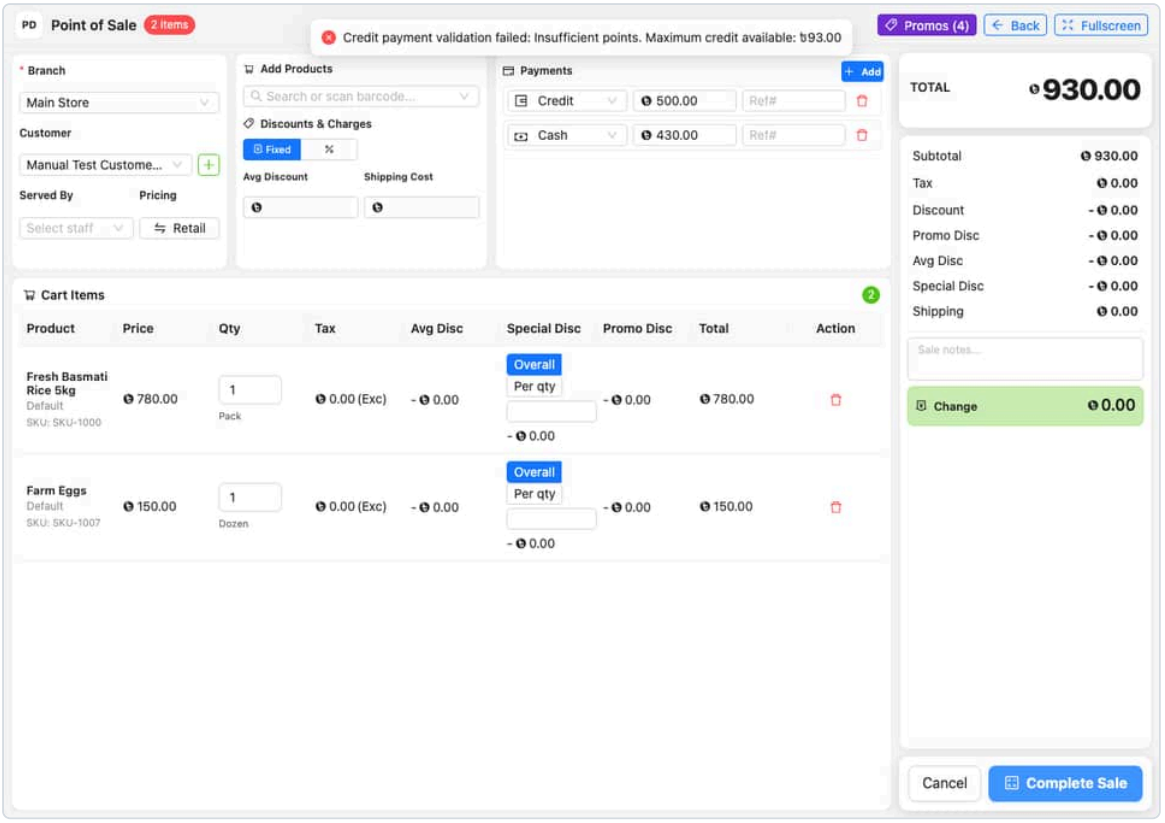

What happens next

- Paid less than the total: the sale is **PARTIAL** and the red **Due** box shows what is left.
- Paid nothing: the sale is **DUE**.
- Paid more than the total: the green **Change** box shows what to give back. The extra is not stored as income.
- **Credit** uses the customer's reward points (see the note below).

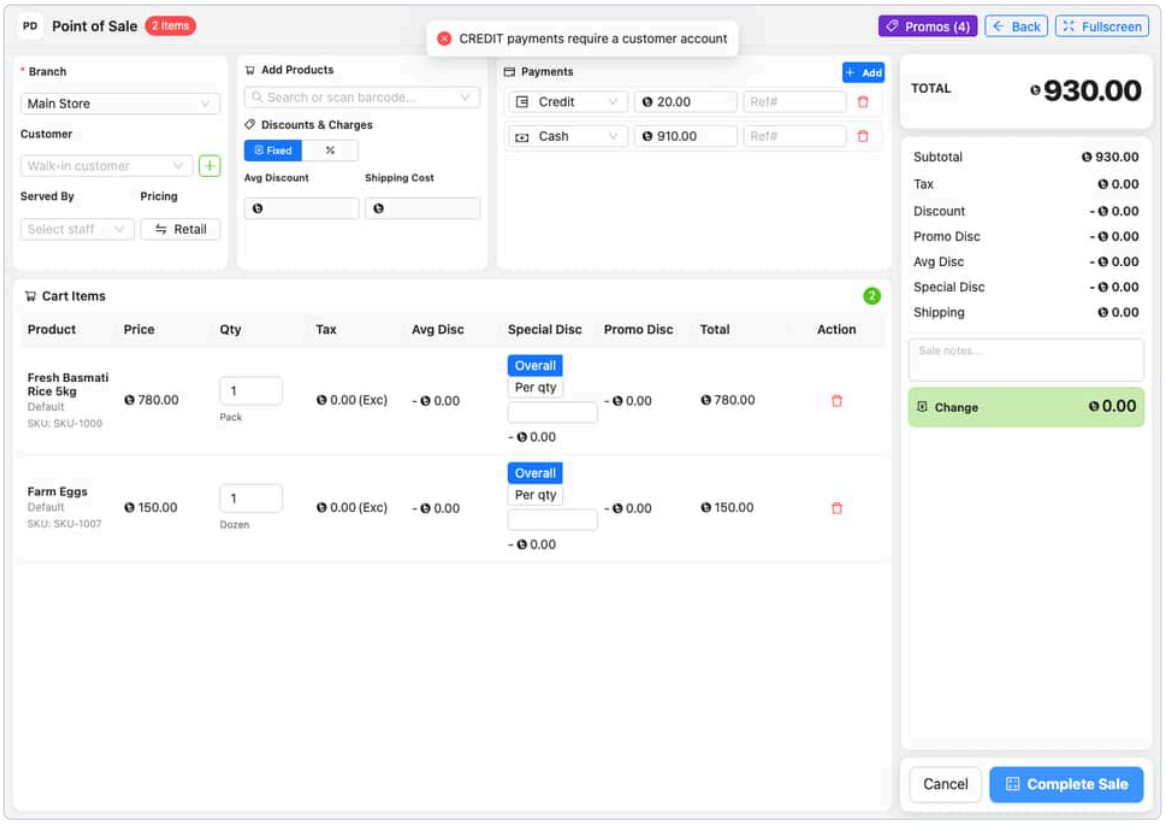

> **Good to know:** The **Credit** payment method is not a shop credit or a "pay later" option. It spends the customer's reward points. It needs a customer on the sale. The points are taken off when the sale is saved. If the customer has too few points, or the amount is below the minimum or above the maximum, or the reward system is switched off, the sale is refused. The messages show amounts in taka, for example "Credit payment validation failed: Minimum credit amount is ৳10.00" and "Credit payment validation failed: Insufficient points. Maximum credit available: ৳93.00". The minimum, maximum and point value are set in **Settings**, then **Rewards** ("Taka Value per Point"). If **Allow Partial Redemption** is **No** in that page, the points must cover the whole sale. Mixing Credit with Cash is then refused with "Partial redemption is turned off: reward points must cover the whole sale". To let a customer pay later, use no payment (DUE) or a part payment (PARTIAL) instead.

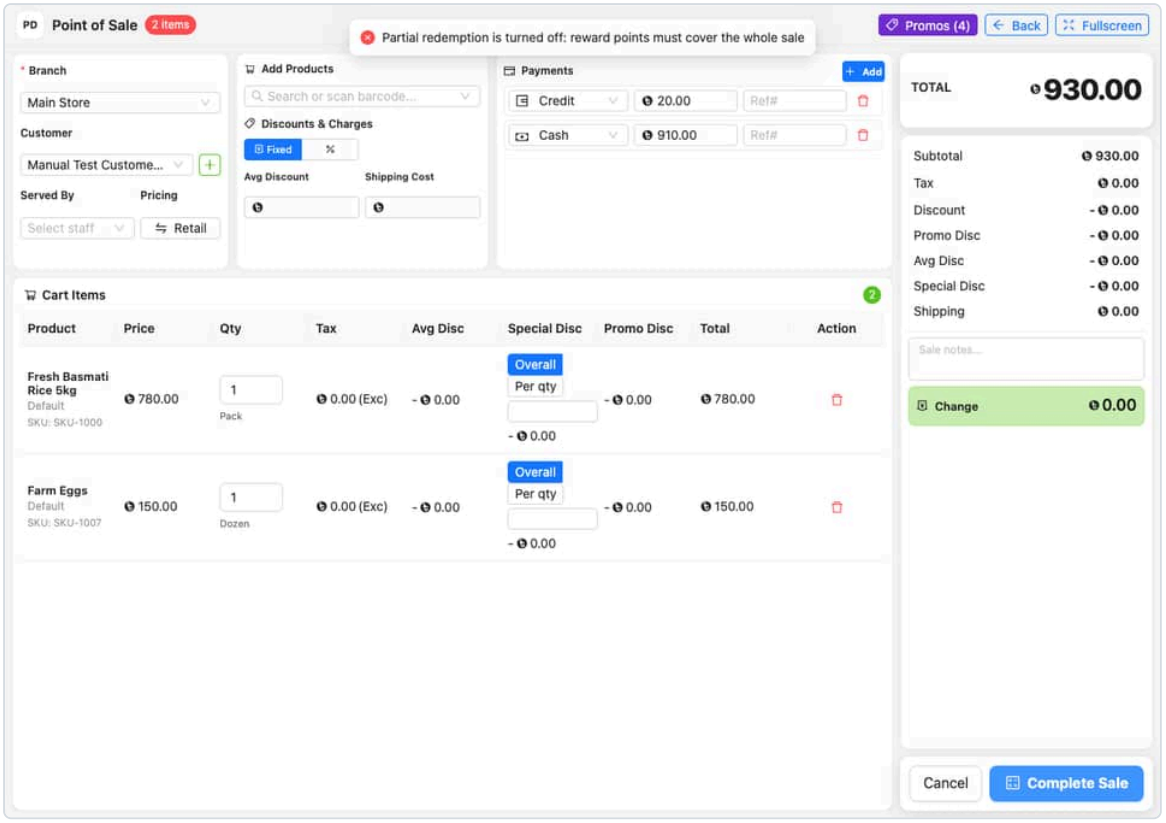

Credit of 5 is below the minimum.

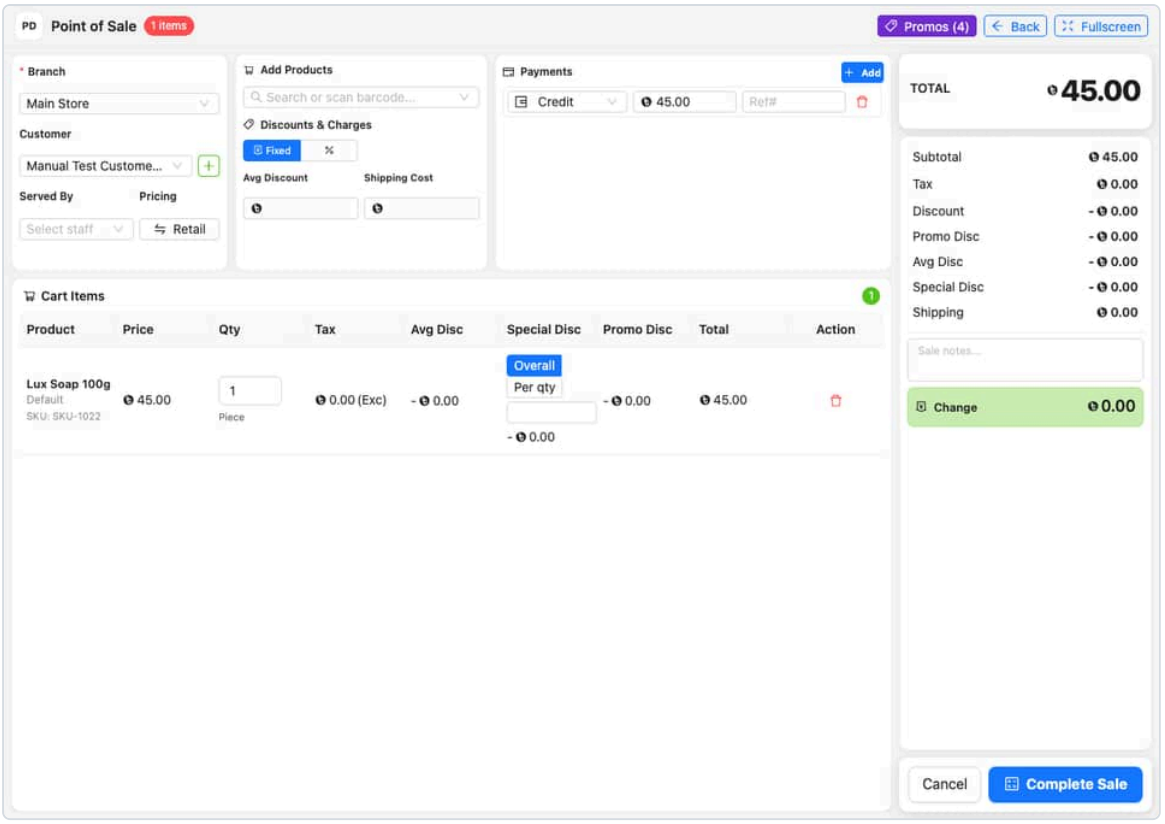

Credit of 500 when the customer has fewer points.

Credit needs a customer.

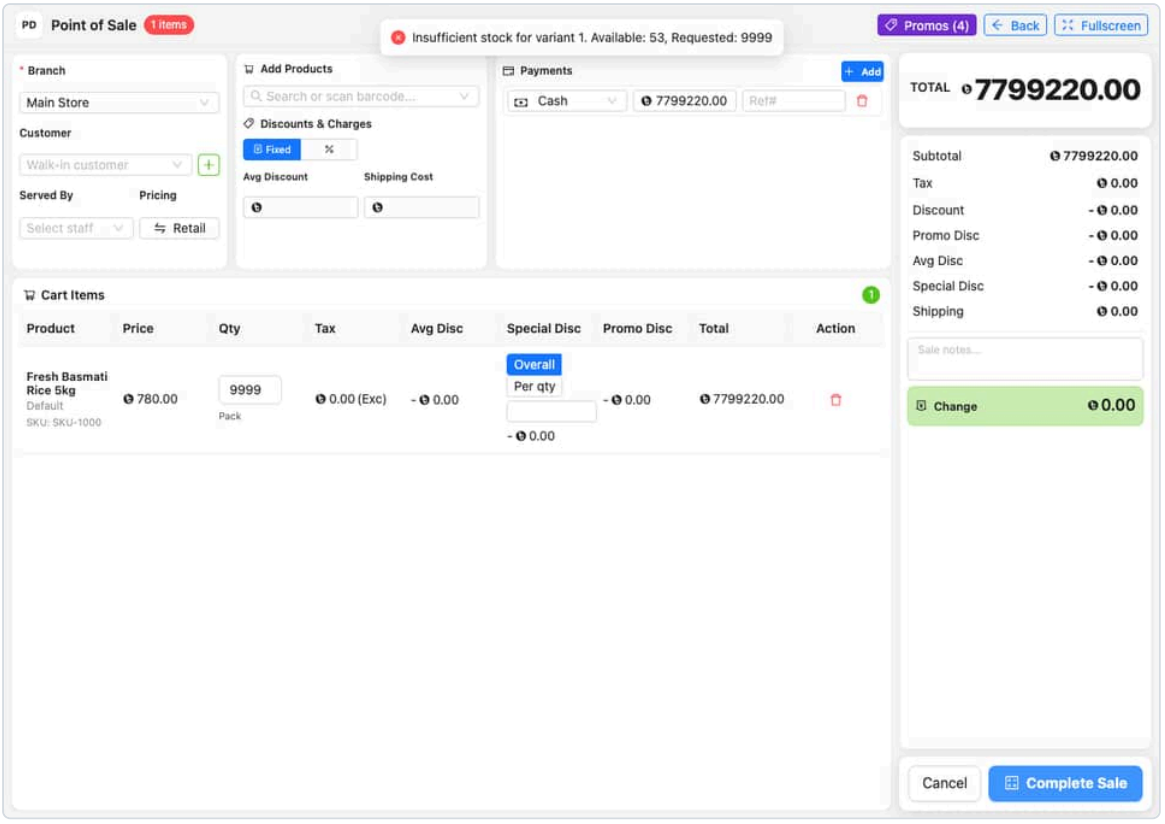

With Allow Partial Redemption set to No, Credit mixed with Cash is refused.

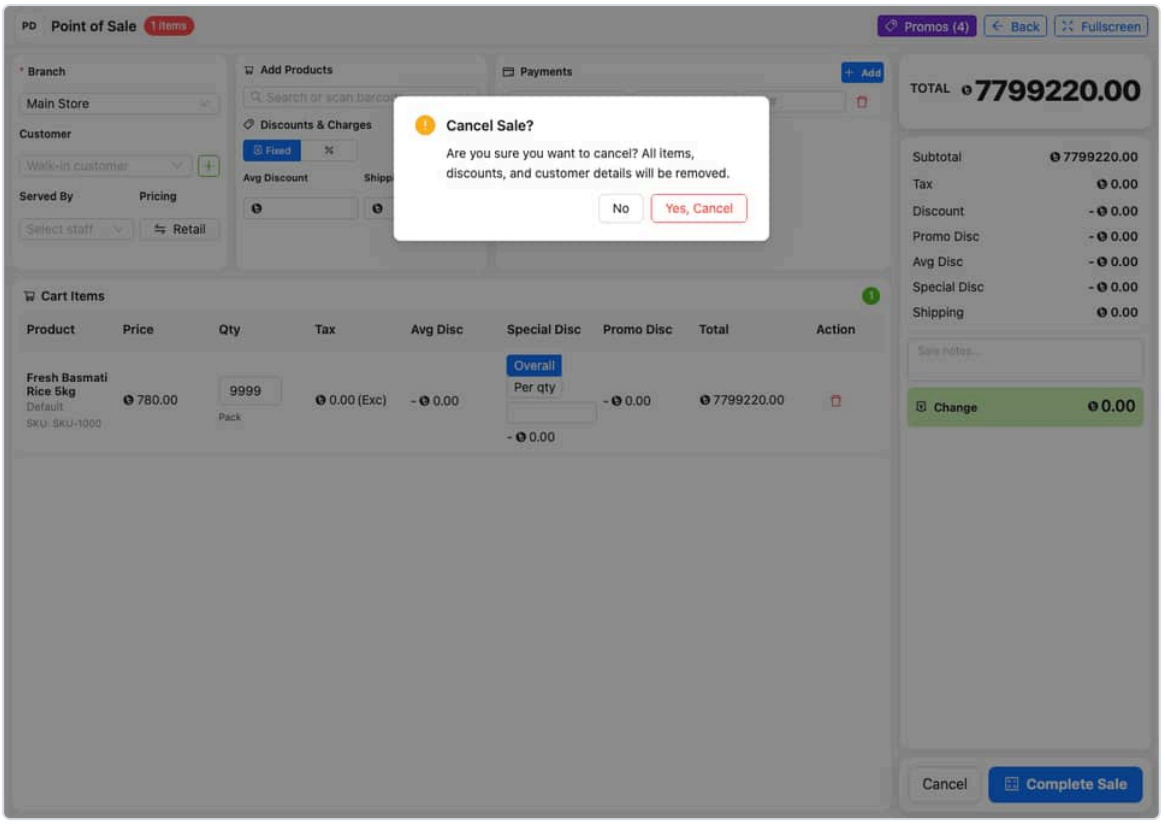

A whole sale paid with Credit only.

How to cancel a sale

Selling more than the stock shows the Insufficient stock message.

The Cancel Sale question.

1. Tap **Cancel** (or **Cancel order** in the restaurant layout).
2. A box asks **Cancel Sale?** "Are you sure you want to cancel? All items, discounts, and customer details will be removed."
3. Tap **Yes, Cancel**. Tap **No** to go back.

What happens next: "Sale cancelled and form cleared." Nothing is saved. Stock and customer balances do not change.

Receipt printing

Receipts print on a thermal printer through a small program called the **print agent**. It must be running on the same computer as the printer.

- On the POS, a receipt prints by itself only if **Auto Print Thermal** is **ON**. You find this switch (ON/OFF) on the **Receipt** settings page. It is saved in that browser only.
- You can print again later from **View Sales** (printer icon) or from the sale page (**Print Receipt**).
- For cash payments the cash drawer opens by itself, if your printer is set up for it.
- Paper width and auto cut are set in the print agent's own settings file, not in the app.
- To get the print agent, go to **Receipt** settings and tap **Download Print Server**. It downloads a zip file. To update it, close it, delete the old folder, unzip the new one, and run it. Your settings are kept.

Print messages

Message	What it means	What to do
Receipt sent to printer!	The print agent got the receipt.	Nothing. Take the receipt.

Message	What it means	What to do
Printing agent is not running. Please start the printing agent on your computer and try again.	The app cannot reach the print agent on this computer. It appears as a red message right after the green "Sale created successfully!".	Start the print agent program on the computer with the printer, then print again from **View Sales**. The sale itself is already saved.
Failed to print receipt. Please check your connection.	The print request did not go through.	Check the printer, the cable and the print agent, then print again.
Failed to print receipt: (text)	The printer or agent reported a problem.	Read the text, fix the problem, then print again.

> **Good to know:** If the print agent is not running, the sale is still saved. Only the paper receipt is missing. Start the agent and reprint from **View Sales**.

Messages you may see on the POS

Message	What it means	What to do
Sale created successfully!	The sale was saved.	Nothing.
Please add at least one item to the sale	The cart is empty.	Add a product.
Select branch	No branch is chosen.	Choose a branch.
(METHOD) payment must have a payment type selected, for example "CARD payment must have a payment type selected"	A Card or Transfer row has no bank, or an MFS row has no provider.	Choose the bank or provider.
CREDIT payments require a customer account	Credit was used with no customer.	Choose a customer, or use another method.
Credit payment validation failed: (reason)	The reward points cannot cover this. The reason may be too few points, a minimum or maximum amount, or "Rewards system is disabled".	Use another method or a smaller amount.
Partial redemption is turned off: reward points must cover the whole sale	**Allow Partial Redemption** is **No** in **Settings**, then **Rewards**, and Credit does not cover the whole sale.	Pay the whole sale with Credit, or pay without Credit.
Insufficient stock for variant (number). Available: x, Requested: y	There is less stock than you asked for.	Lower the **Qty**.
Stock changed while the sale was being saved; please try again.	Someone else sold the same stock at the same moment.	Tap **Complete Sale** again.
Failed to create sale	The sale did not save. There may be no internet.	Check the connection and try again. The POS does not work offline.
Product not found for barcode: (code)	No product in this branch has that barcode.	Search by name.

Message	What it means	What to do
Failed to scan barcode	The scan could not be read.	Scan again or search by name.
Please select a branch before applying a promotion	You tapped **Apply** with no branch.	Choose a branch first.
(name) applied / (name) is already applied	The promotion was applied, or was already on.	Nothing.
Promotion conditions not matched	The cart does not meet the promotion rules.	Read the reason line in the promotions window.
Customer created successfully / Failed to create customer	The new customer was saved, or not.	If it failed, check the phone and email and try again.

> **Good to know:** Messages that come from the server, such as the Credit and reward messages, show amounts with the taka sign (৳). They match the amounts on the screen.

Tax on the sale

Each product has a tax percent and a tax method. With **Exclusive** tax, the tax is added on top of the price. With **Inclusive** tax, the tax is already inside the price. It shows as **(Inc)** and the total does not change. Money is rounded to two decimals on each line.

New Sale

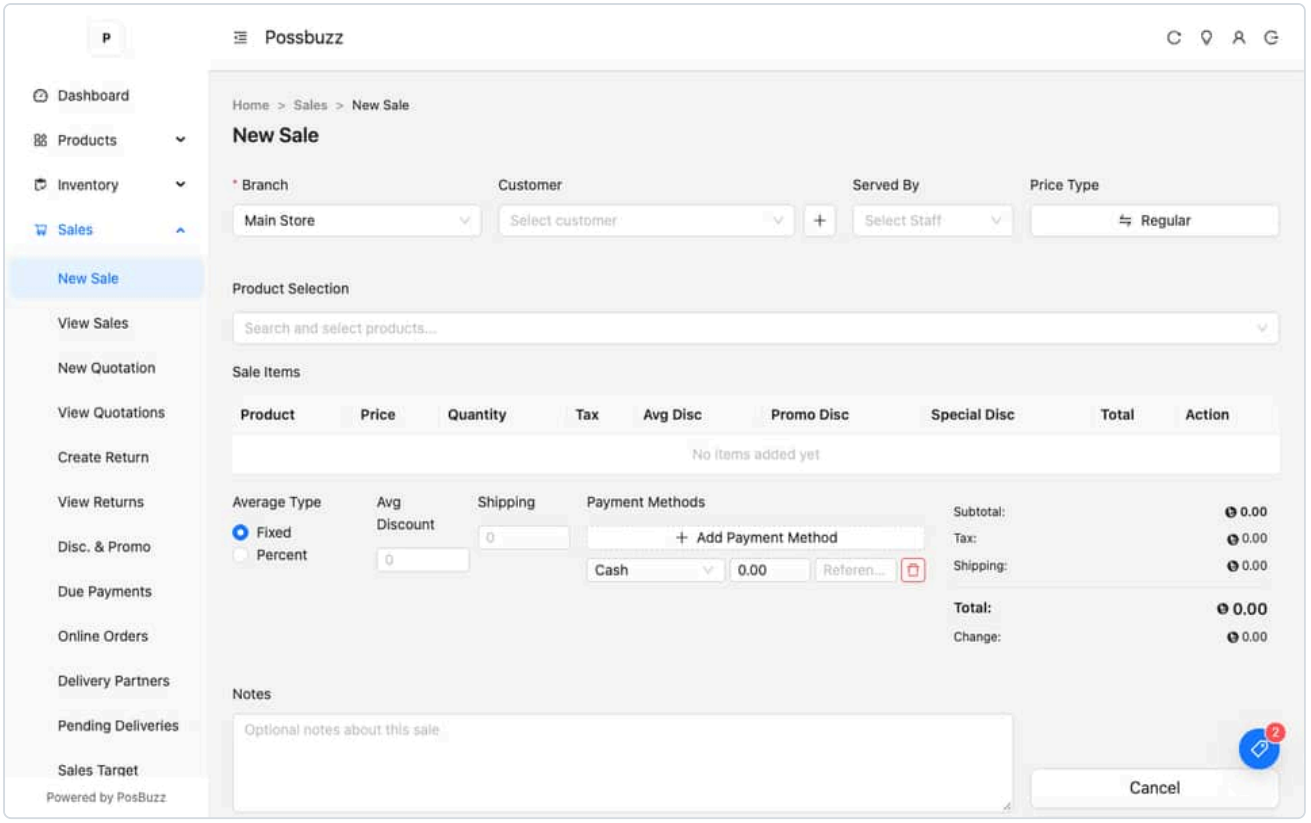

What it is

New Sale is a full page for entering a sale with more detail than the POS. After you save, the app opens the saved sale.

Where to find it

Left menu: **Sales**, then **New Sale**. Permission needed: **sales**. It also opens when you convert a quotation to a sale.

What you see

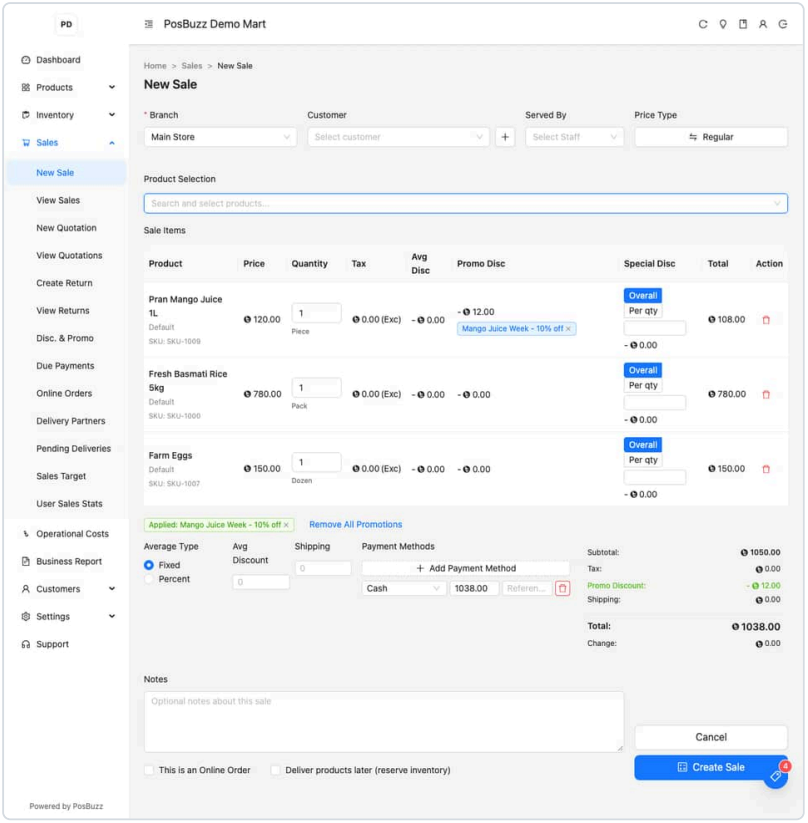

The New Sale page. The round tag button at the lower right opens the promotions list.

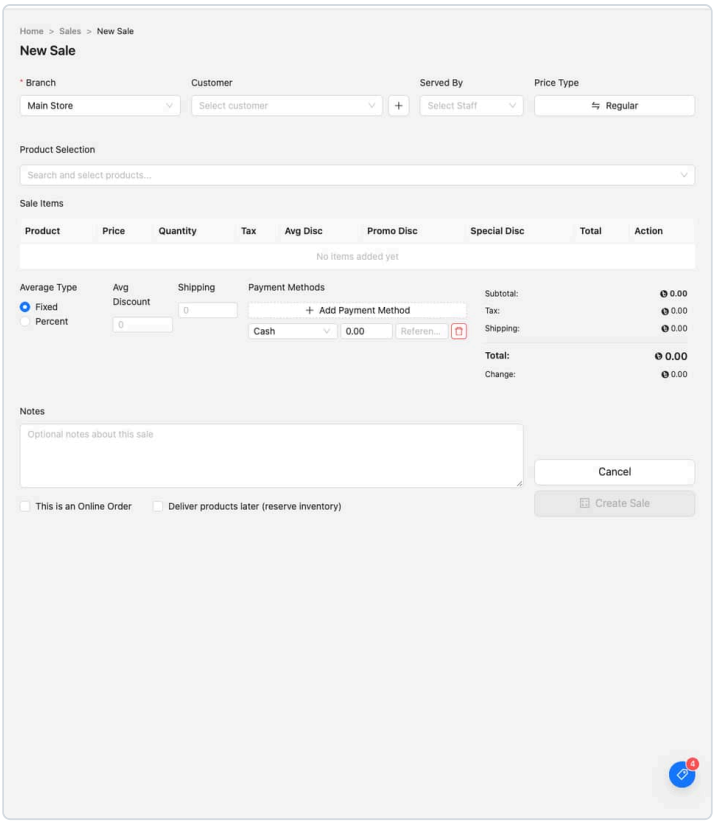

Field	Required	Notes
Branch	Yes	"Please select a branch" if empty.
Customer	No	Placeholder "Select customer". You can search. The **+** button (**Add new customer**) opens the same window as the POS.
Served By	No	Placeholder "Select Staff".
Price Type	No	A button that switches **Regular** and **Wholesale**.
Product Selection	Yes, at least one item	"Search and select products...". Each result shows Code, SKU, Barcode, locations, Stock and price.
Sale Items table		Empty text "No items added yet". Columns: **Product**, **Price**, **Quantity**, **Tax**, **Avg Disc**, **Promo Disc**, **Special Disc** (with **Overall** / **Per qty**), **Total**, **Action**.
Promotion tags		Show "Applied: (name)". The link **Remove All Promotions** removes them all.
Average Type	No	**Fixed** or **Percent**.
Avg Discount	No	The order discount.
Shipping	No	Shipping charge.

Field	Required	Notes
Payment Methods	No	Tap **Add Payment Method**. Each row has the method (Cash, Card, Cheque, Bank Transfer, Mobile Money, MFS, Credit, Exchange), a provider list where needed, an amount (shows 0.00), **Reference**, and a delete button.
Notes	No	Placeholder "Optional notes about this sale".
This is an Online Order	No	Tick it to make the sale an online order. Its status is PENDING and it appears in **Online Orders**.
Deliver products later (reserve inventory)	No	Tick it to hold the stock now and deliver later from **Pending Deliveries**.
Summary		**Subtotal**, **Tax**, **Promo Discount**, **Average Discount**, **Special Discount** (only if above 0), **Shipping**, **Total**, **Due** (if unpaid) and **Change**.
Cancel		Goes to the **Sales** list without saving.
Create Sale		Saves the sale.
Promotions (round purple tag button with a count)		Opens **Available Promotions**, the same as on the POS.

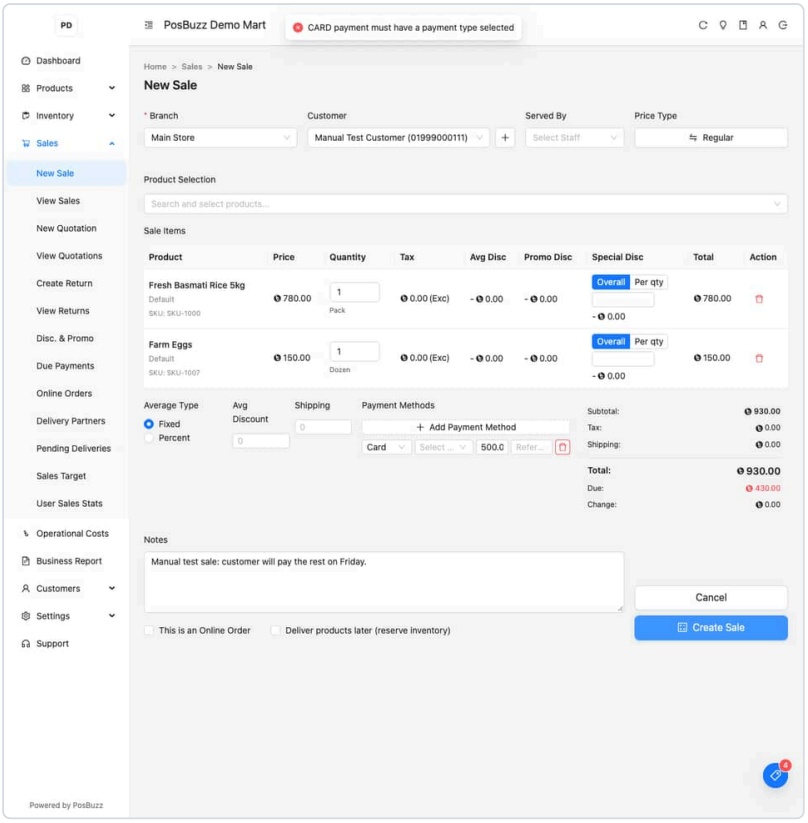

How to create a sale

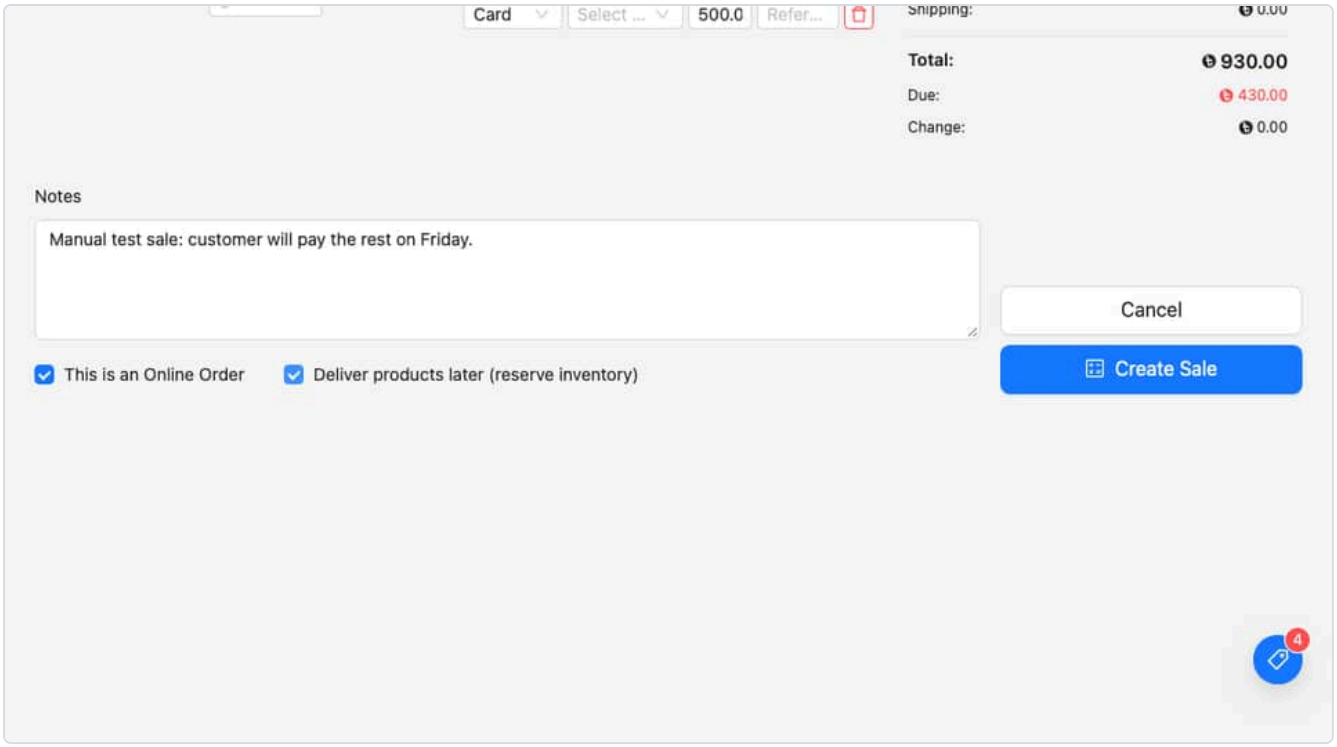

New Sale with three items and an applied promotion.

With no items, Create Sale is greyed out.

Card payment without a bank shows CARD payment must have a payment type selected.

The two checkboxes and the Due line for a part payment.

1. Choose the **Branch**.
2. Choose the **Customer**, **Served By** and **Price Type** if you want.
3. Search under **Product Selection** and pick each product. Change **Quantity** in the table.
4. Set discounts and **Shipping** if needed.
5. Tap **Add Payment Method**. Choose the method, provider and **Amount**.
6. Tick **This is an Online Order** or **Deliver products later (reserve inventory)** if they apply.
7. Write **Notes** if you want.
8. Tap **Create Sale**.

You can also scan a barcode on this page. Rules for payments, discounts, DUE, PARTIAL and PAID are the same as on the POS.

What happens next

- "Sale created successfully!" appears and the **Sale** page opens. This page does not print a receipt by itself.
- **Stock** goes down, unless you ticked **Deliver products later**, in which case it is reserved until delivery.
- **Customer due:** unpaid money shows in **Due Payments**.
- **Reward points:** the same rules as the POS.

How to turn a quotation into a sale

1. Open **View Quotations** and tap **Convert to Sale** on a pending quotation (see the Quotations section).
2. The New Sale page opens with branch, customer, served by, price type, items, discounts, promotions, shipping and notes already filled.
3. Check the prices. They are read again at the current price, and tax is worked out again, so they may differ from the quotation.
4. Add payment and tap **Create Sale**.

What happens next: the quotation is marked **Converted** and linked to the sale. Stock goes down now, using the stock you have today. If the quotation was already converted you see "This quotation has already been converted to a sale" and you are taken back to the quotation.

View Sales

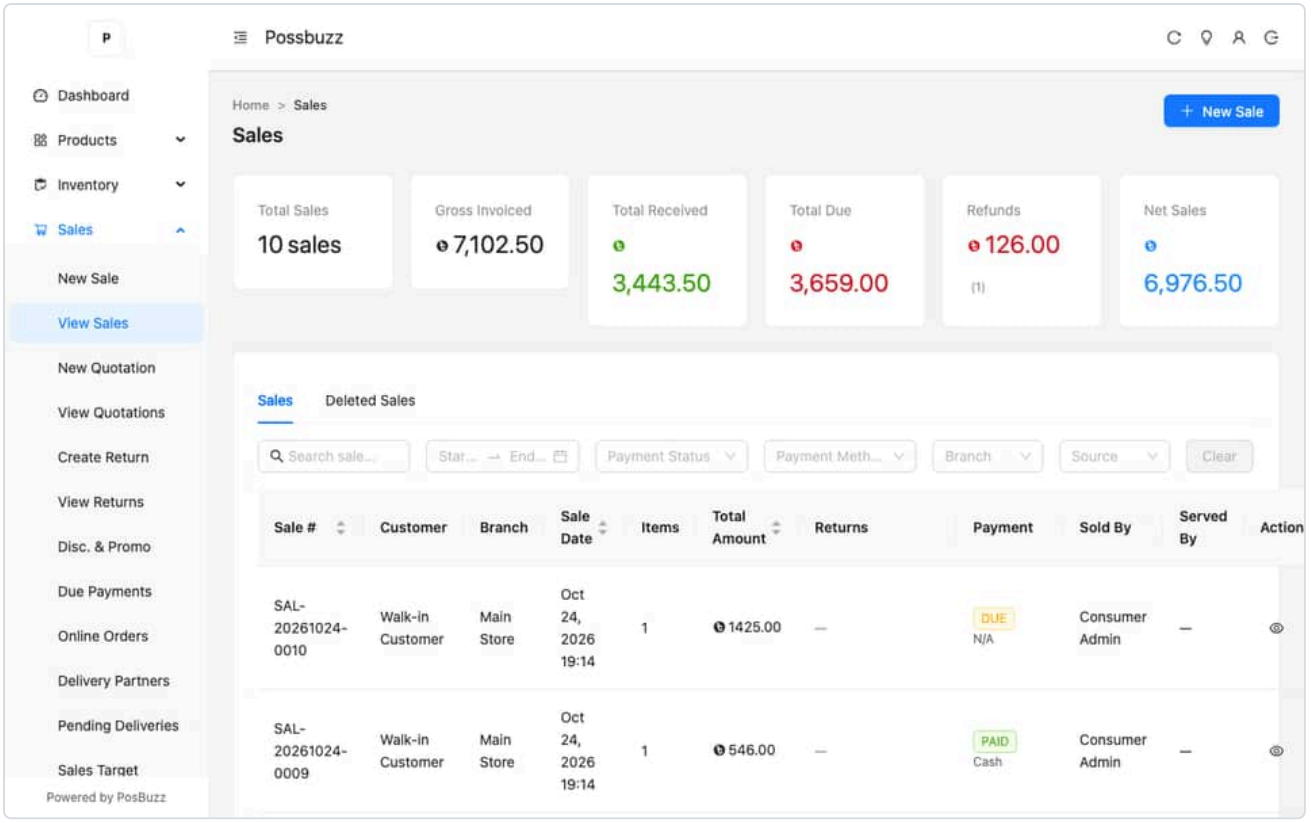

What it is

A list of all sales with totals, filters and actions for each sale. The page title is **Sales**.

Where to find it

Left menu: **Sales**, then **View Sales**. Permission needed: **sales**. The **New Sale** button at the top right opens a new sale.

What you see

The Sales list with summary cards, tabs, filters and the table.

Summary cards. They change with the filters.

Card	Meaning
Total Sales	Number of sales ("n sales").
Gross Invoiced	Total value of the sales.

Card	Meaning
Total Received	Money received.
Total Due	Money still owed. Red if above 0.
Refunds	Money refunded, with the number of returns in brackets.
Net Sales	Sales after refunds.

Tabs: Sales and **Deleted Sales**.

Filters

Filter	Options
Search "Search sales..."	Type a sale number or customer.
Date range ("Start Date", "End Date")	Presets: Today, Yesterday, This Week, Last Week, This Month, Last Month, Last 30 Days, Last 90 Days.
Payment Status	Paid, Partial, Due, Cancelled.
Payment Method	Cash, Card, Bank Transfer, Cheque, Mobile Money, MFS, Credit.
Branch	Your branches.
Source	From Quotation, Direct Sale.
Clear	Removes all filters.
Active Filters:	A strip of tags showing what is on.

Columns

Column	Notes
Sale #	A link to the sale. You can sort.
Customer	Name and phone, or "Walk-in Customer".
Branch	The branch.
Sale Date	For example "Oct 24, 2026 19:14". You can sort.
Items	Number of items.
Total Amount	You can sort.
Returns	"—" if none. Otherwise a tag **RETURNED** or **PARTIAL RETURN** and the refund amount. Hover to see "N return(s) · Net after refunds: x".
Payment	A tag **PAID**, **PARTIAL**, **DUE** or **CANCELLED**, and the method name or "N methods".
Sold By	The user who made the sale.
Served By	The staff member who served.

Column	Notes
Actions	See below.

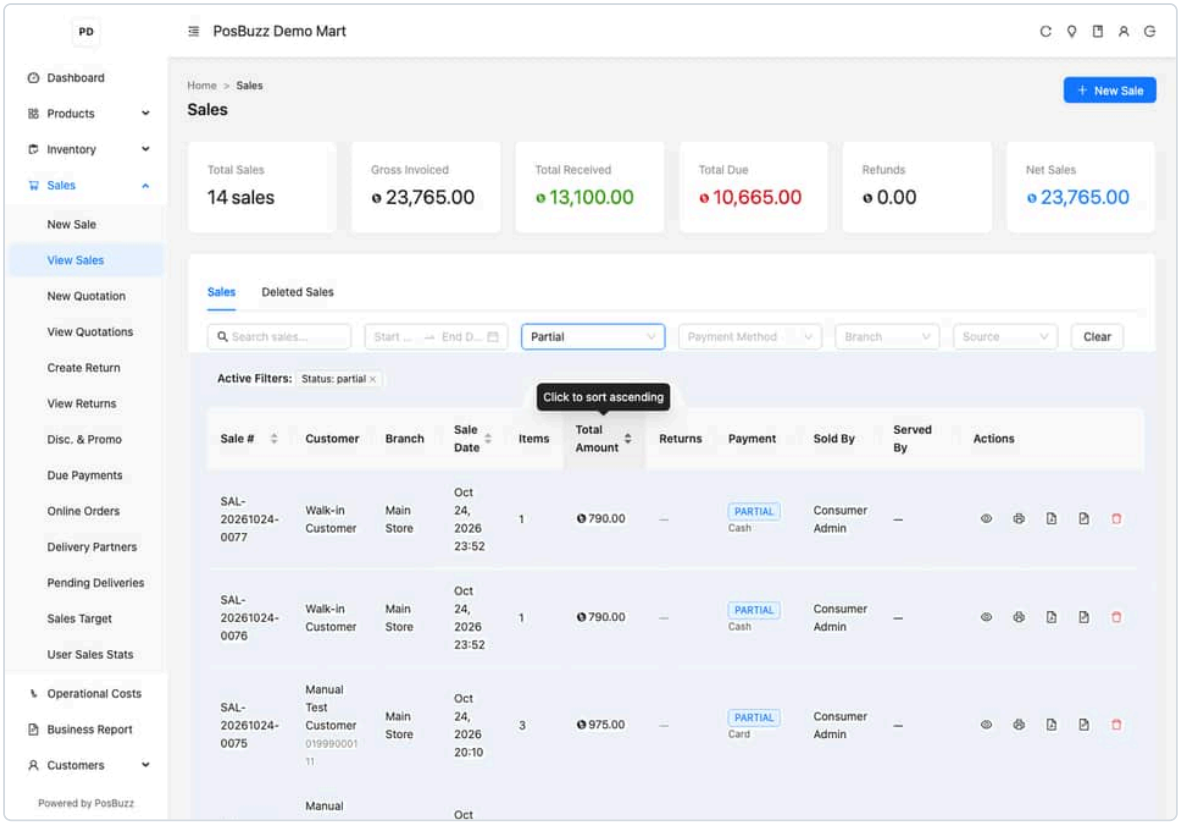

On the **Deleted Sales** tab you also see **Deleted By**, **Deleted At** and **Reason**.

At the bottom: "a-b of N sales", the page size and a quick page jump.

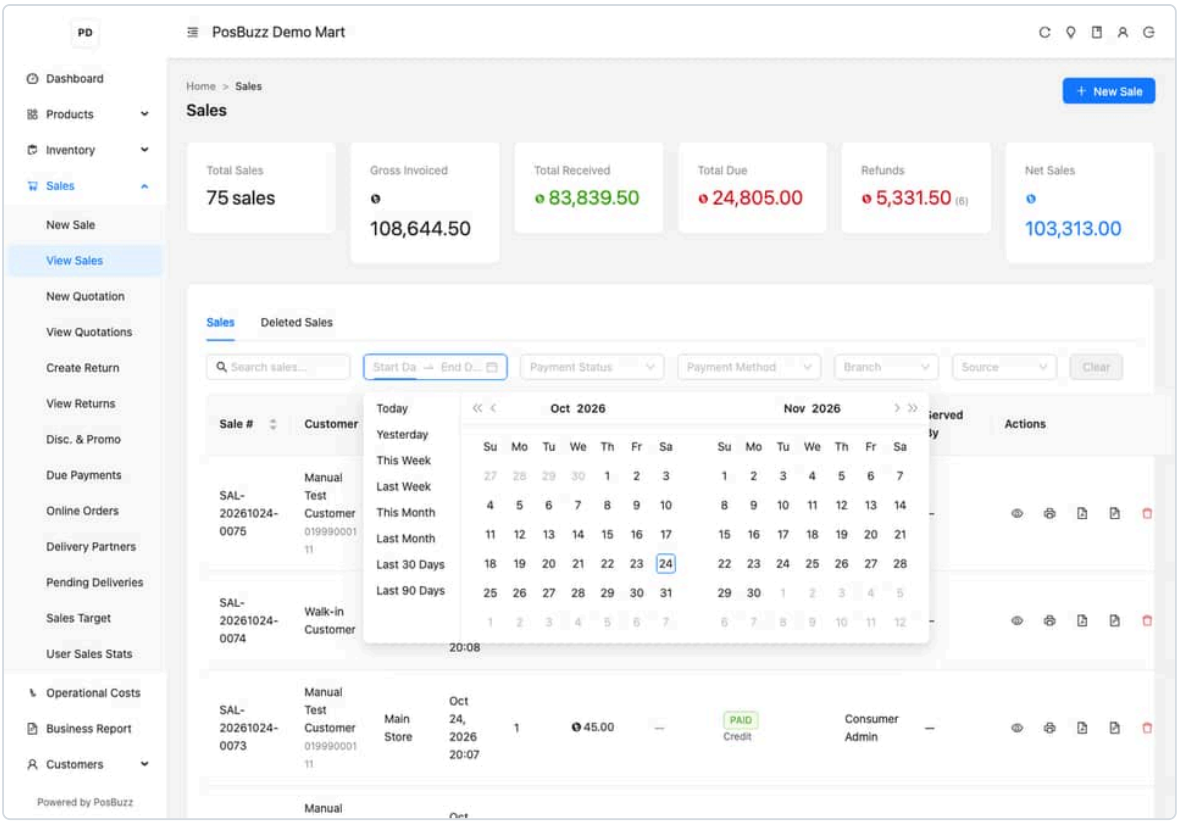

Actions on each row

Button	What it does
View Sale	Opens the sale page.
Print Receipt	Prints on the thermal printer. Needs the print agent.
Download PDF Receipt	Saves a file named with the sale number, ending in .pdf.
Other Documents menu	**Online Delivery Slip**, **Chalan Slip**, **Money Receipt**, **Delivery Slip / Sticker**. Each downloads as a file.
Delete Sale (Sales tab)	Deletes the sale.
Restore Sale (Deleted Sales tab)	Brings a deleted sale back.

How to find a sale

Sales filtered with Payment Status Partial. The Active Filters strip shows the filter.

The date range list with Today, Yesterday and the other presets.

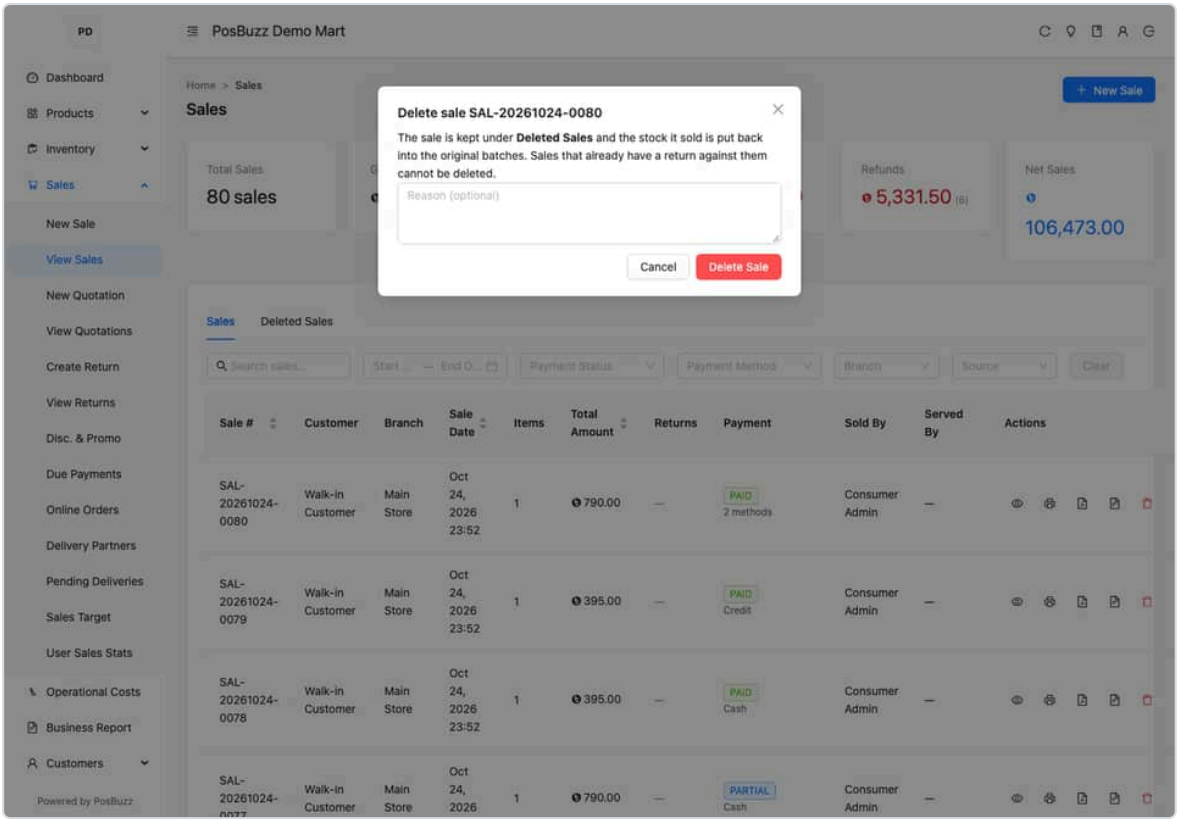

1. Type in the search box, or pick filters (date range, **Payment Status**, **Payment Method**, **Branch**, **Source**).
2. Check the **Active Filters:** strip.
3. Tap **Clear** to start again.

How to print or download a receipt for a sale

1. Find the sale.
2. Tap **Print Receipt** for the thermal printer, or **Download PDF Receipt** for a PDF, or open **Other Documents** and pick a slip.

Messages: "Receipt printed successfully!", "PDF receipt downloaded successfully!", "(slip name) downloaded successfully!", "Failed to download PDF receipt", "Failed to download (slip name)". If the print agent is not running, you see the messages in the table in the POS section above.

How to delete a sale

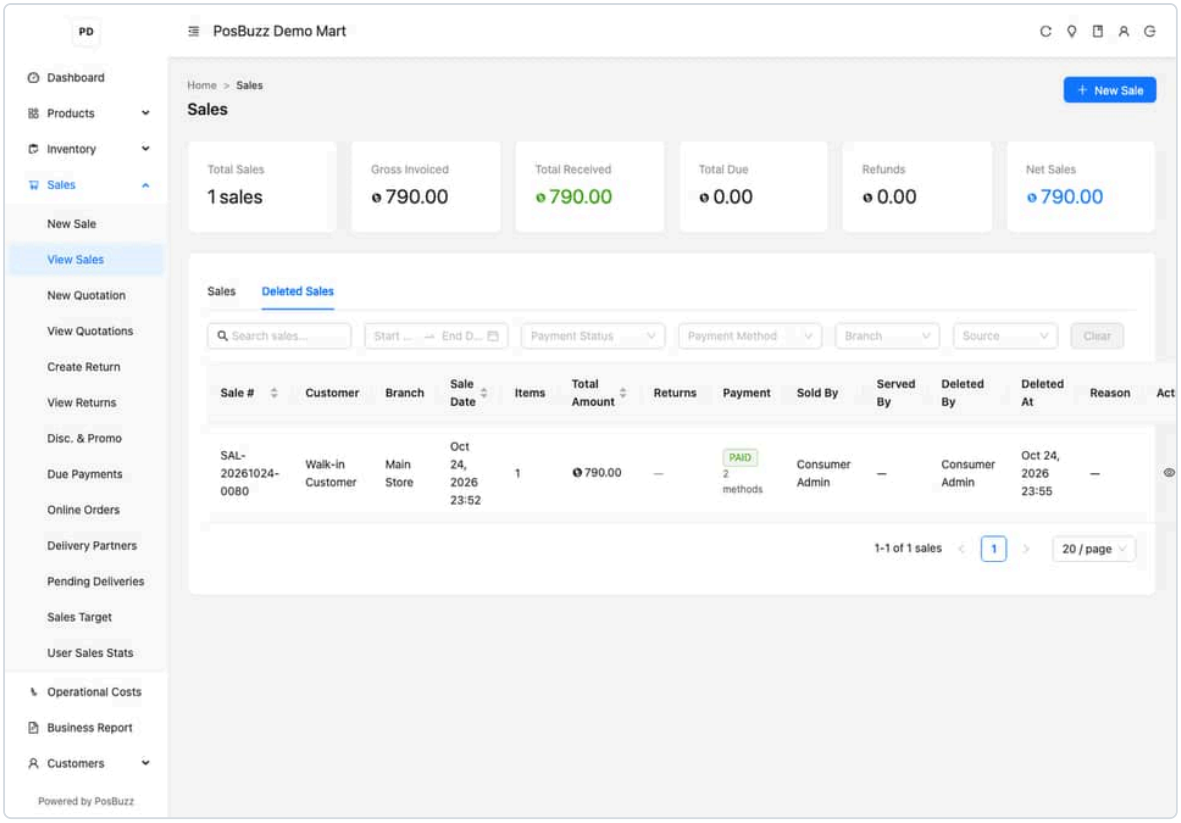

The Delete sale window with the optional Reason.

1. Tap **Delete Sale** on the row.
2. A window titled **Delete sale (number)** says the sale is kept under **Deleted Sales** and the stock it sold is put back into the original batches. It also says sales that already have a return cannot be deleted.
3. Type a **Reason (optional)**, up to 500 characters.
4. Tap **Delete Sale**, or **Cancel**.

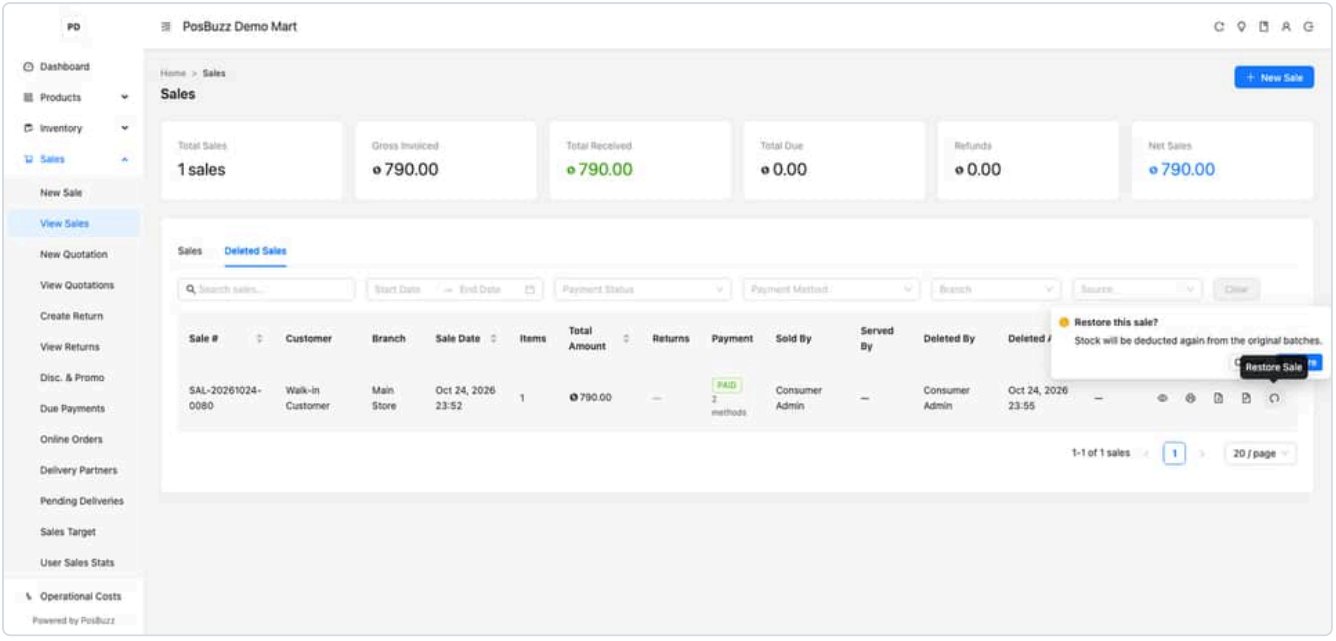

What happens next: "Sale deleted and stock restored". Stock goes back. Reward points earned on that sale are taken back. The sale no longer counts in reports.

Message	What it means	What to do
This sale has partial payments collected after it was created. Reverse those payments before deleting.	Money was collected later on this sale.	Reverse those payments first.
This sale was created as an exchange for a return and cannot be deleted.	It belongs to a return.	Leave it.
A quotation-converted record cannot be deleted from here.	It is the record of a converted quotation.	Leave it.
Sale has already been deleted	It was deleted before.	Check the **Deleted Sales** tab.

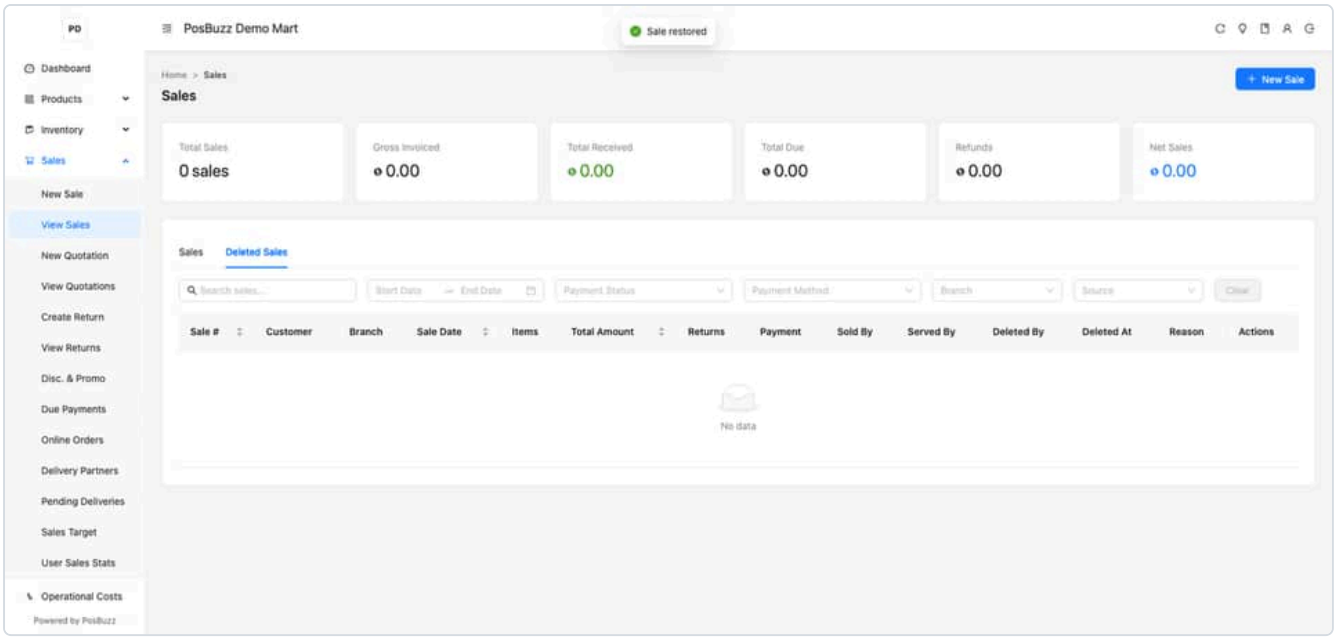

How to restore a deleted sale

The Deleted Sales tab with Deleted By, Deleted At and Reason columns.

The Restore this sale? question. Restore is the blue button.

After Restore the message Sale restored shows and the sale leaves this tab.

1. Open the **Deleted Sales** tab.
2. Tap **Restore Sale**.
3. A box asks **Restore this sale?** "Stock will be deducted again from the original batches." Tap **Restore** or **Cancel**.

What happens next: "Sale restored" and stock goes down again. If the stock is no longer there you see "Cannot restore this sale: the stock it consumed is no longer available in the original batch(es)." You cannot restore it until that stock is back.

Sale page (Sale #number)

What it is

The full detail of one sale, with printing and a notes box.

Where to find it

From **View Sales**, tap the sale number or **View Sale**. Permission needed: **sales**. Right after **Create Sale** on the New Sale page, this page opens by itself. If it cannot load, you see "Failed to load sale details" and go back to the list.

What you see

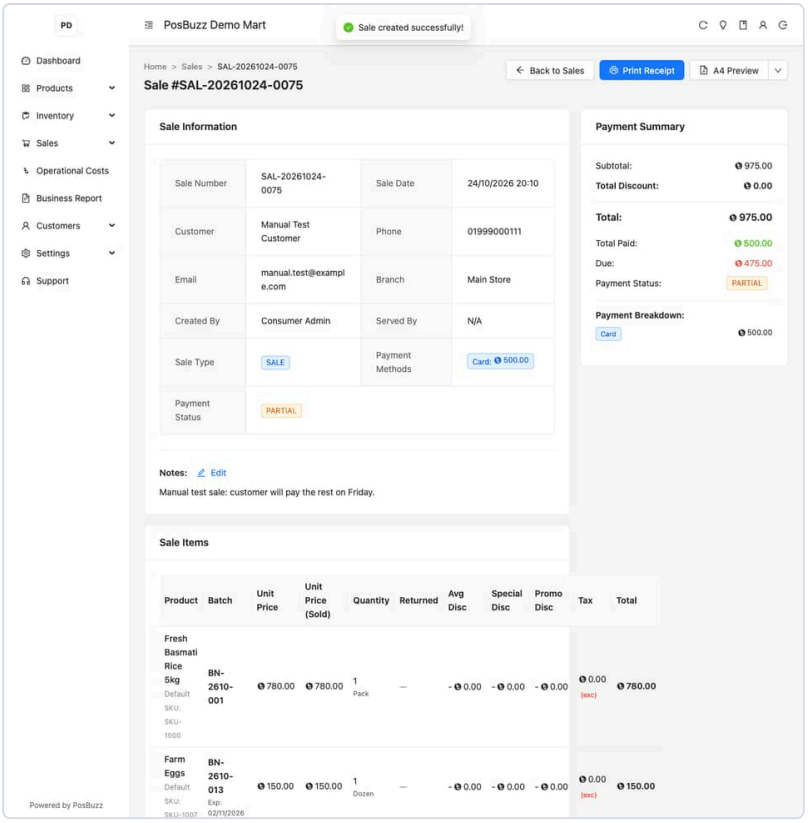

Buttons

Button	What it does
Back to Sales	Goes to the list.
Print Receipt	Prints on the thermal printer. "Receipt printed successfully!"
A4 Preview (split button)	Click it for the normal A4 receipt. The arrow opens a menu: **Print as Online Delivery Slip**, **Chalan Slip**, **Money Receipt**, **Delivery Slip / Sticker**. A window **A4 Receipt Preview - (number)** says "Generating preview..." and then shows the page, with **Close** and **Download PDF**. If it fails: "Failed to generate A4 receipt preview".

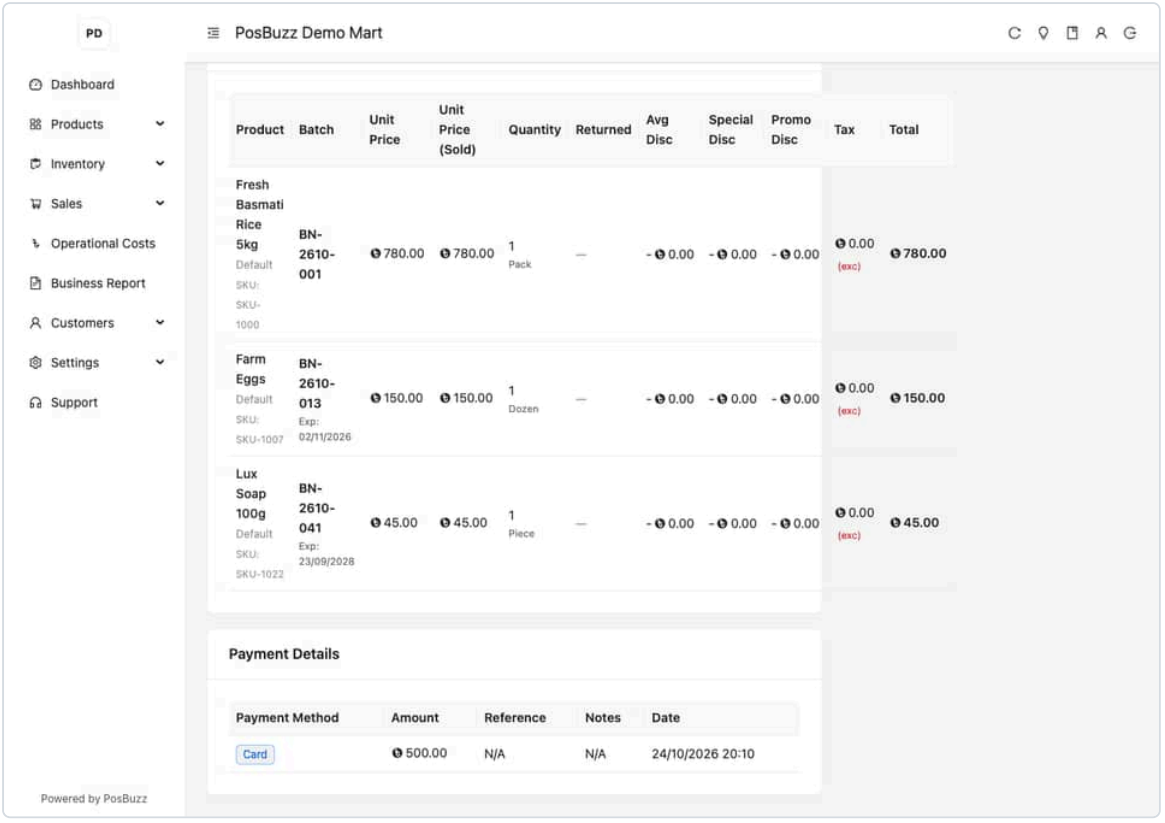

Cards

- Red banner for a deleted sale: "This sale has been deleted - Deleted by (name) on (date) - (reason). Its stock has been returned to inventory and it is excluded from all reports."
- **Returns against this sale** (only if there are returns): a tag **FULLY RETURNED** or **PARTIALLY RETURNED**, then **Sale Total**, **Refunded**, **Net After Returns**, and a table with **Return #** (link), **Date**, **Refund**, **Exchange**, **Reason**.
- **This sale was converted from a quotation** (only for converted sales): **Original Quotation**, **Quotation Date** and a link **View Original Quotation** →.
- **Sale Information**: **Sale Number**, **Sale Date**, **Customer** (shows "Walking Customer" if none), **Phone**, **Email**, **Branch**, **Created By**, **Served By**, **Promotion Applied**, **Sale Type**, **Payment Methods** (tags), **Payment Status**.
- **Notes:** with **Edit** or **Add note**. This is the only part of a sale you can change.
- **Sale Items** table: **Product**, **Batch** (batch number and **Exp**), **Unit Price**, **Unit Price (Sold)**, **Quantity**, **Returned** (a tag such as "x of y"), **Avg Disc**, **Special Disc**, **Promo Disc** (tag), **Tax** (inc or exc), **Total**.
- **Payment Details**: **Payment Method**, **Amount**, **Reference**, **Notes**, **Date**.
- **Payment Summary** on the right: **Subtotal**, **Promo Discount**, **Average Discount**, **Special Discount**, **Total Discount**, **Shipping**, **Tax**, **Total**, **Total Paid**, **Due** or **Change**, **Payment Status**, and **Payment Breakdown:**.

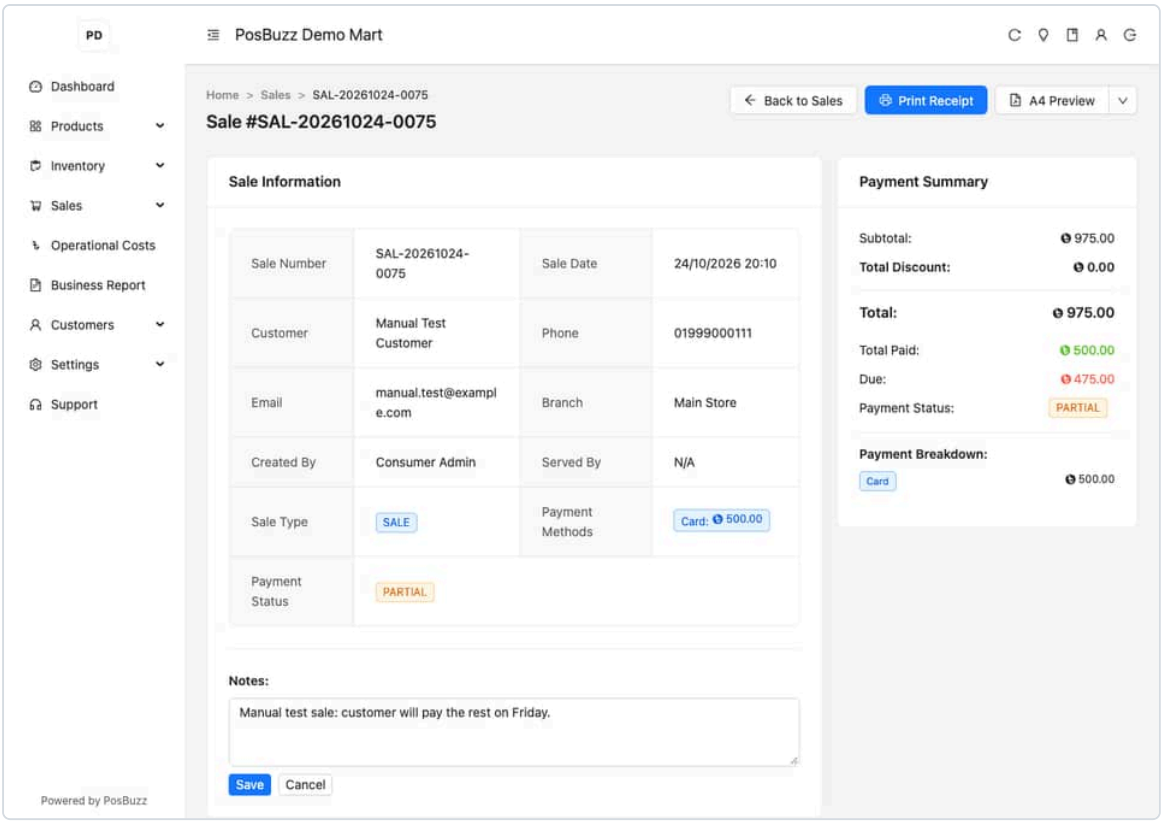

How to add or change the note on a sale

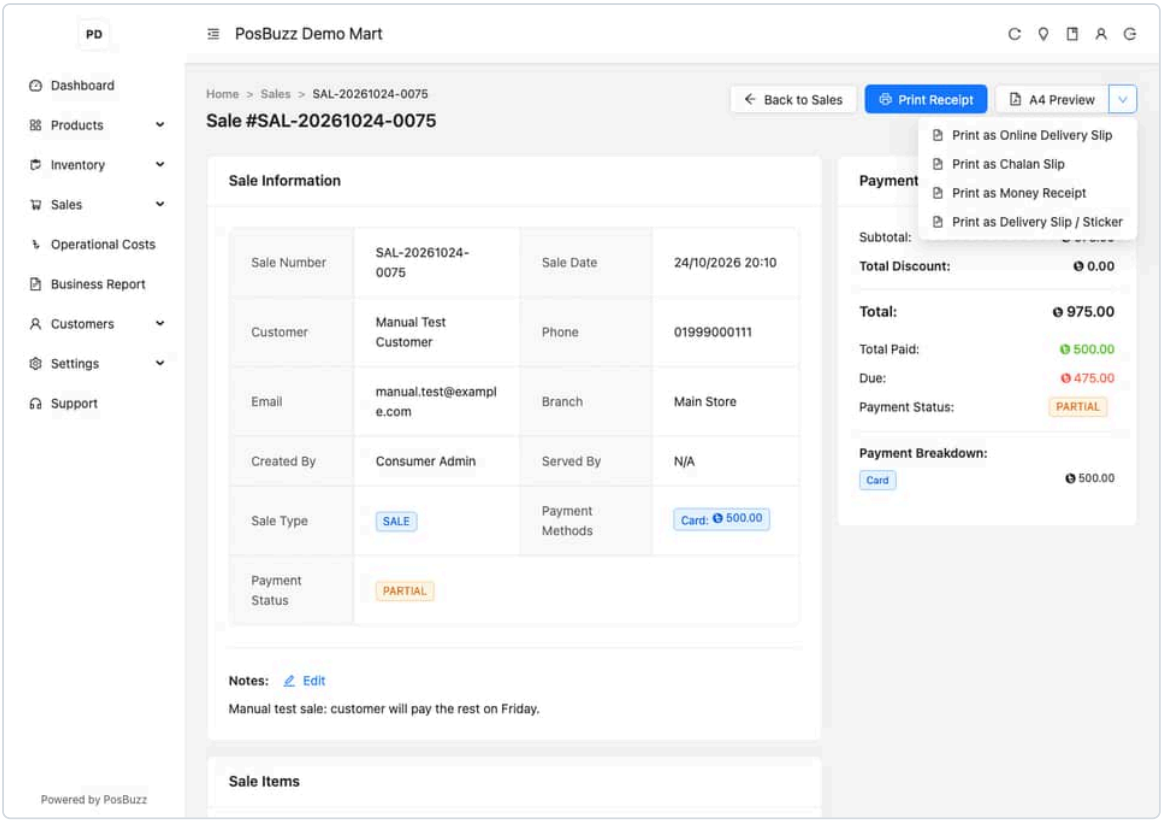

A part-paid sale. Payment Summary shows Total Paid, Due and Payment Status.

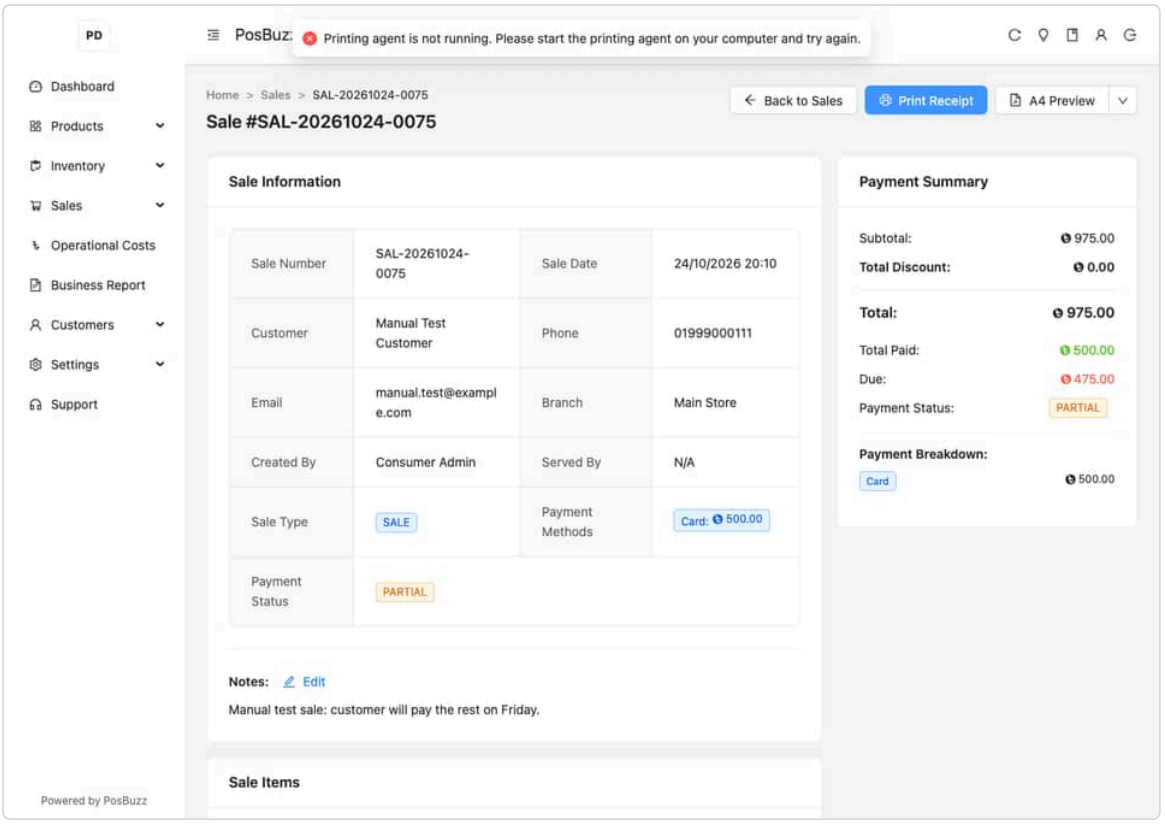

Sale Items with batch numbers, and Payment Details.

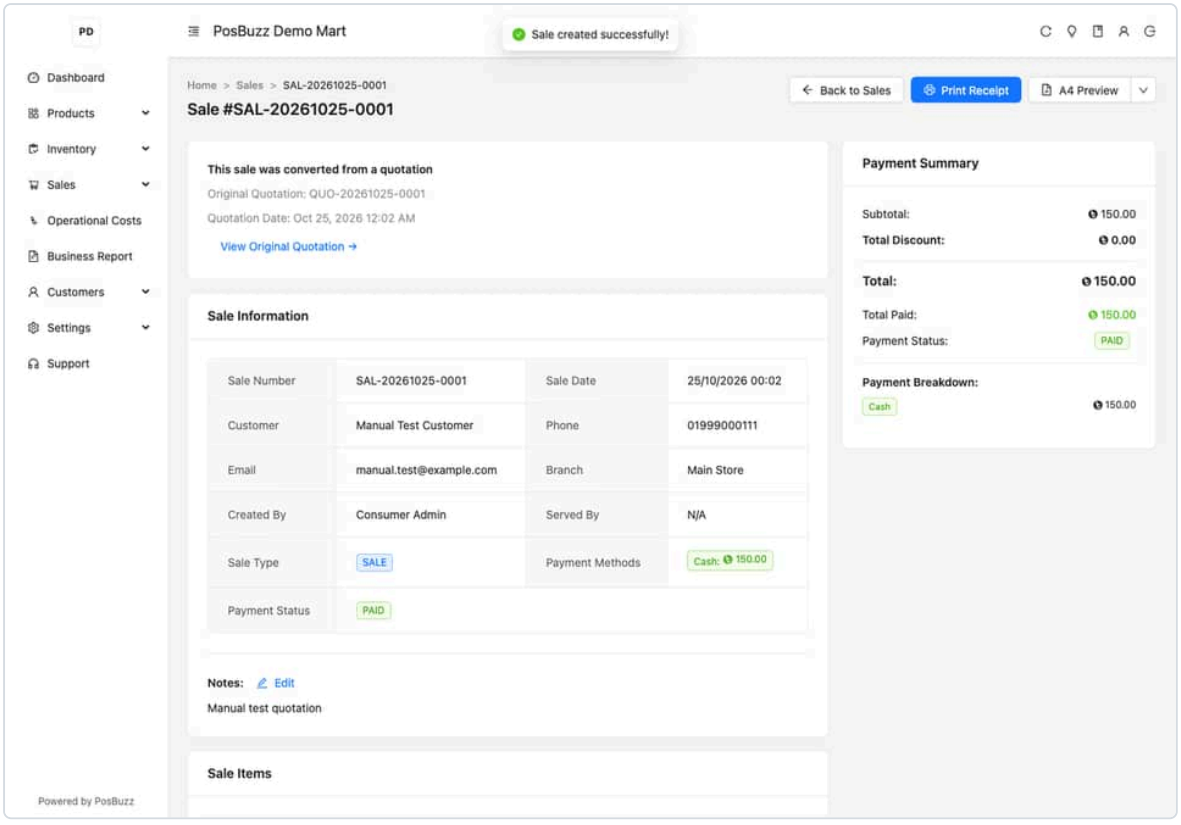

The note box with Save and Cancel.

The arrow next to A4 Preview opens the slip menu.

Print Receipt with the print agent not running.

A sale created from a quotation shows a card with a link to the quotation.

1. Next to **Notes:**, tap **Edit** (or **Add note** if there is none; it says "No note added").
2. Type in the box (placeholder "Add a note for this sale"). The limit is 2000 characters.
3. Tap **Save**, or **Cancel**.

What happens next: "Note updated". If it fails you see "Failed to update the note". You cannot edit the note of a deleted sale.

How to fix a mistake on a sale

A saved sale cannot be edited, except for the note. To fix a mistake, either make a return (see **Create Return**) or delete the sale (see **View Sales**).

View Returns

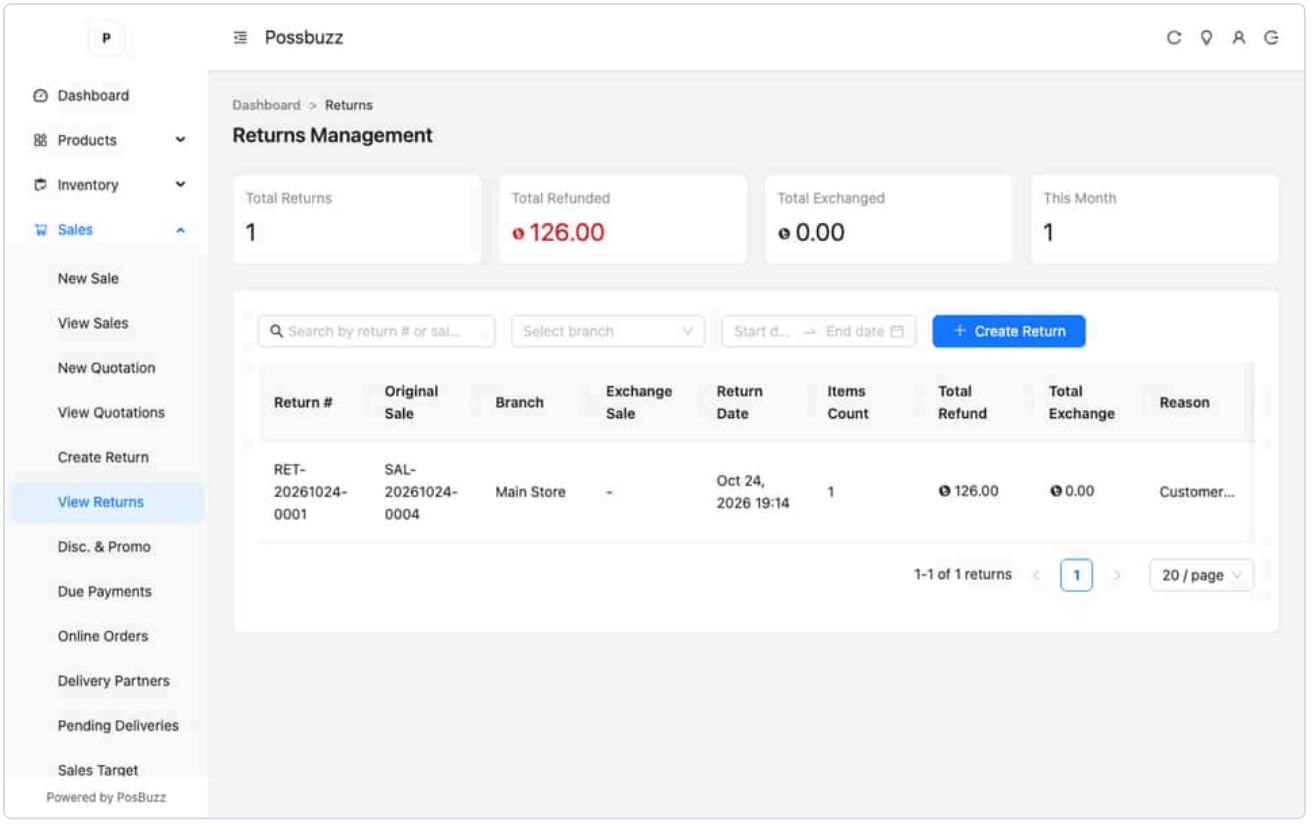

What it is

The list of all returns, titled **Returns Management**.

Where to find it

Left menu: **Sales**, then **View Returns**. Permission needed: **sales**.

What you see

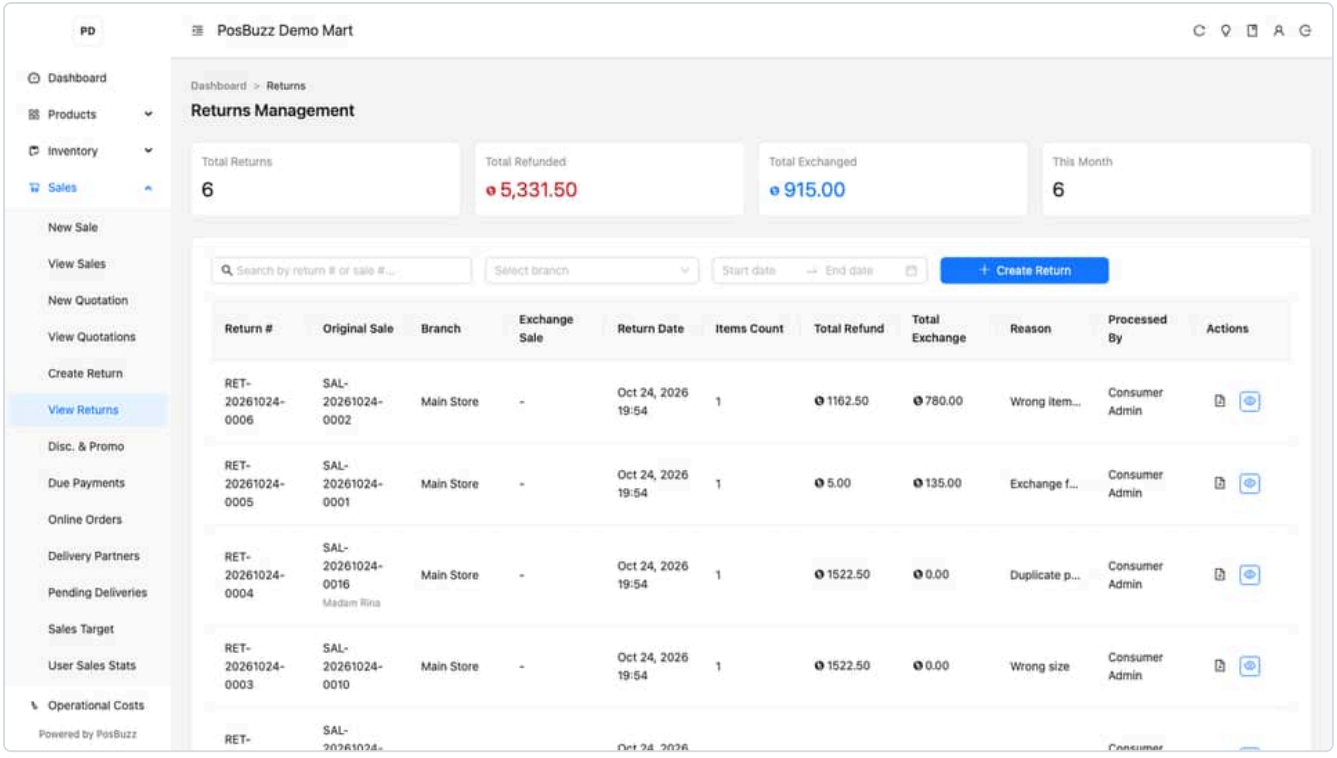

The Returns Management list.

- Cards: **Total Returns**, **Total Refunded**, **Total Exchanged**, **This Month**.
- Filters: a search box "Search by return # or sale #...", a branch list "Select branch", and a date range. **Clear Filters** appears when a filter is on.

- Button **Create Return**.
- Columns: **Return #**, **Original Sale** (a link, with the customer), **Branch**, **Exchange Sale**, **Return Date**, **Items Count**, **Total Refund**, **Total Exchange**, **Reason**, **Processed By**, **Actions**.
- Actions: a PDF icon (tooltip **Preview PDF Receipt**) and a blue eye (opens the return).
- At the bottom: "a-b of N returns".

PDF window (titled "Return (number)"): **Close**, **Print** and **Download** (the file is named return- followed by the number, ending in .pdf). If it cannot load: "Failed to load the PDF".

How to find a return and see its receipt

The returns list with refund and exchange amounts.

1. Type the return or sale number in the search box, or set the branch and dates.
2. Tap the PDF icon to preview the receipt. Tap **Print** or **Download** in the window.
3. Tap the eye to open the full return.

Create Return

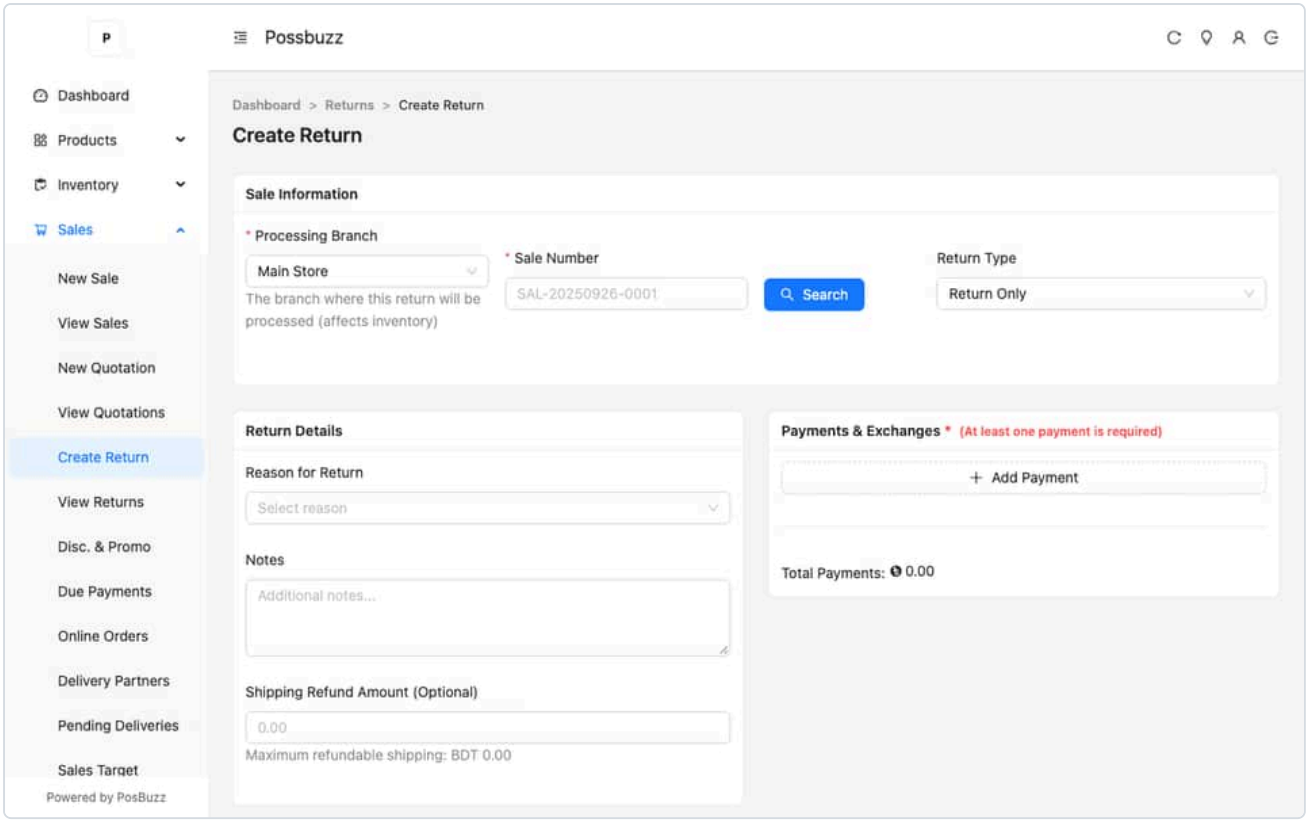

What it is

Use it when a customer brings goods back, or swaps them for other goods.

Where to find it

Left menu: **Sales**, then **Create Return**. Or tap **Create Return** on the **Returns Management** page. Permission needed: **sales**.

What you see

The Create Return page before a sale is loaded.

Sale Information

Field	Required	Notes
Processing Branch	Yes	"Please select branch". Help text: the branch where this return will be processed (affects inventory). Returned goods go back into this branch's stock.
Sale Number	Yes	"Please enter sale number". Example format SAL-20250926-0001. Tap **Search** to load it.
Return Type	No	**Return Only** (default) or **Exchange**.
Exchange Sale Number	Yes, for Exchange	"Exchange Sale Number is required when return type is Exchange". Tap **Search Exchange** to load it. When it is loaded you see **✓ Exchange Sale Loaded**.

For an exchange, first make the exchange sale as a normal separate sale, at the same branch as the return.

After you load a sale

- A blue box shows **Sale**, **Customer** and **Date**.
- **Financial Summary (For Manual Calculation)**: **Subtotal**, **Discount**, **VAT**, **Shipping**, **Final Total**, **Available Amount**, **Received (Tendered)** with methods, **Change Given**, **Net Paid (Used in Sale)**.

- **Previous Returns for this Sale**: **Total Returns**, **Already Refunded**, **Already Exchanged**, **Total Returned** and a **Return History** list.
- A green box **Exchange Sale Summary** once the exchange sale is loaded.

Sale Items table

Column	Notes
Product	The item.
Sold Qty	Quantity sold.
Available	Sold, minus already returned, minus what you selected now.
Unit Price	Price per unit.
Tax	Tax.
Discount	Shown as A (average), S (special) and P (promo).
Line Total	The line total.
Add to Return	**-** and **+** buttons. You cannot go above Available.

Items to Return table: **Product**, **Quantity** (you can edit), **Tax**, **Discount**, **Net Return**, **Actions** (trash). Under it, **Return Calculation Summary**: **Gross**, **Tax**, **Avg Disc**, **Special Disc**, **Promo Disc**, **Net Return**, **Shipping Refund**, **Total Return Value**. The refund for each item is its share of the original line total (with tax, after its discounts) for the quantity you return.

Return Details

Field	Required	Notes
Reason for Return	No	Placeholder "Select reason". Options: Defective, Wrong Item, Customer Request, Quality Issue, Other.
Notes	No	Placeholder "Additional notes...".
Shipping Refund Amount (Optional)	No	Help text "Maximum refundable shipping: (amount)". You can return shipping alone. Then you see "No item selected. This return will refund shipping only."

Payments & Exchanges (marked "At least one payment is required")

Tap **Add Payment**. A window **Add Payment** opens:

Field	Required	Notes
Payment Method	Yes	"Please select payment method". Options: CASH, CARD, CHEQUE, BANK TRANSFER, MOBILE MONEY, MFS, CREDIT, EXCHANGE.
Provider	Yes, for Card, Bank Transfer and MFS	"Please select a provider".

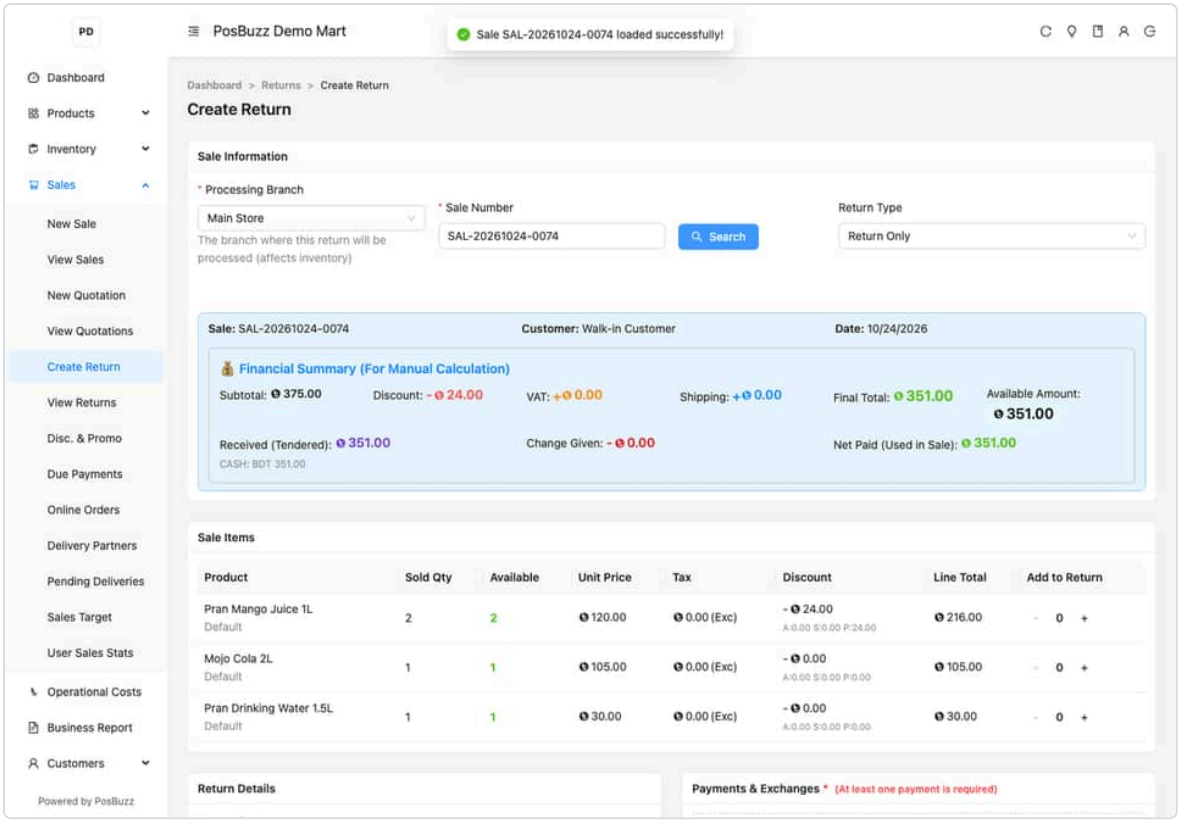

Field	Required	Notes
Amount	Yes	"Please enter amount". "Amount must be greater than 0". It starts with the amount still left.
Reference	No	Placeholder "Transaction reference...".

Buttons **Cancel** and **Add Payment**. The panel shows **Total Payments**, **Item return value**, **Shipping refund value**, **Selected return value**, **Available sale balance**, and a red line "Payment total must exactly match selected return value." until the amounts match. Use the method **EXCHANGE** for the part that is settled by the exchange sale.

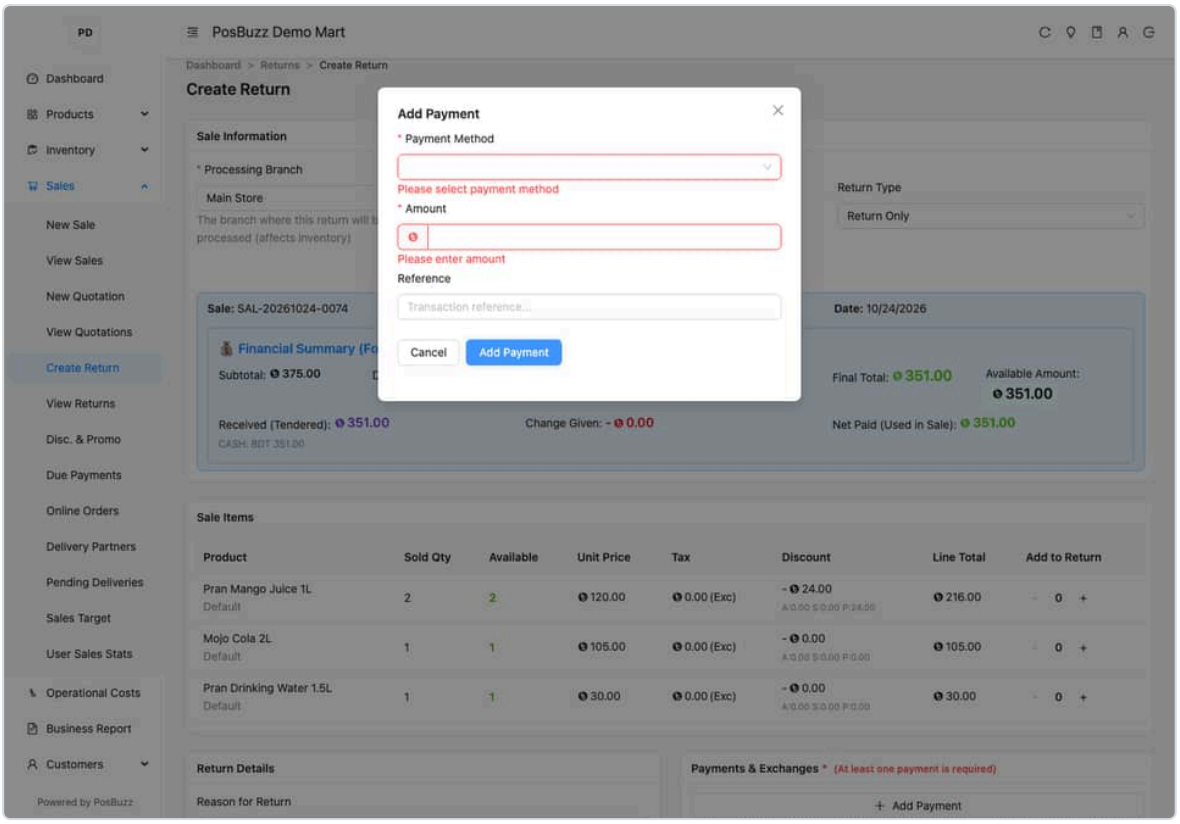

Checklist and buttons

The page shows a checklist: "Sale selected and loaded", "At least one item selected or shipping refund entered", "Processing branch selected", "At least one payment method added", "Payment amount matches selected return value (x)" (or "Payment amount must match selected return value. Entered x, expected y"), and for exchanges "Exchange sale loaded (required for Exchange returns)". **Create Return** stays greyed out until every line is ticked. **Cancel** leaves the page.

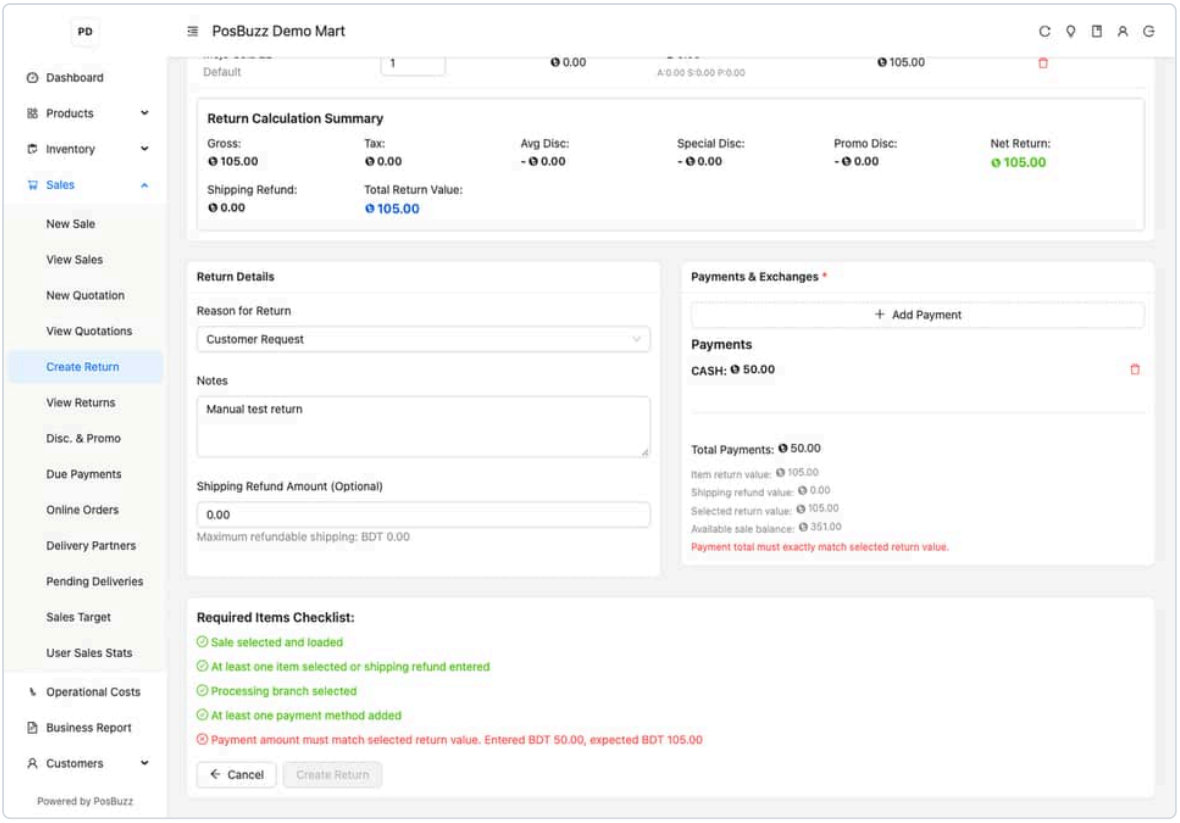

How to return goods and refund the customer

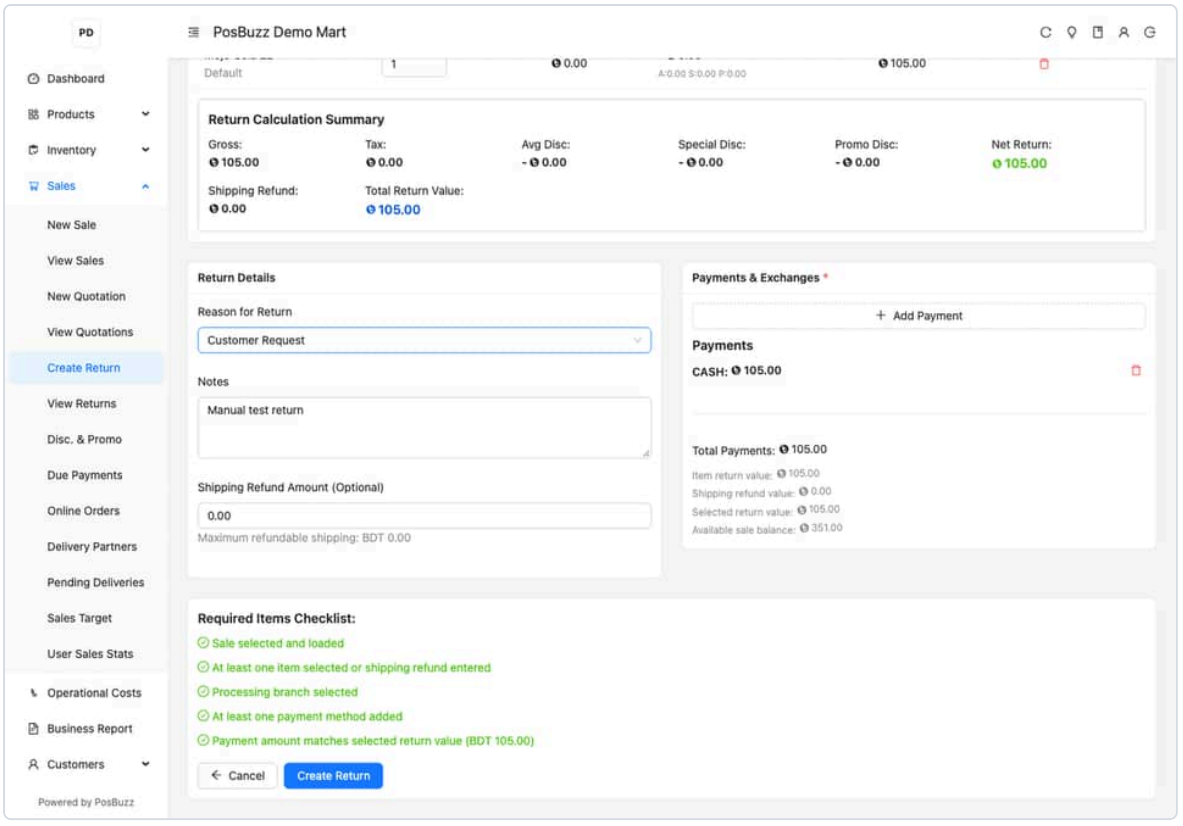

After Search the sale, the Financial Summary and the Sale Items show.

Add Payment pressed with empty boxes.

A payment of 50 against a return value of 105 keeps Create Return greyed out.

Every checklist line is ticked and Create Return is blue.

1. Choose the **Processing Branch**.
2. Type the **Sale Number** and tap **Search**. You see "Sale (number) loaded successfully!".
3. Leave **Return Type** as **Return Only**.
4. In **Sale Items**, tap **+** under **Add to Return** for each item and quantity coming back.
5. Choose a **Reason for Return** and write **Notes** if you want.
6. If shipping is also refunded, type **Shipping Refund Amount (Optional)**.
7. Tap **Add Payment**. Choose the **Payment Method**, the provider if asked, and the **Amount**. The amounts must add up exactly to the **Selected return value** (a difference of 0.01 is allowed).
8. Check that every line in the checklist is ticked.
9. Tap **Create Return**.

What happens next

- "Return created successfully!" appears and the return opens.
- **Stock:** the returned goods go back into stock at the **Processing Branch**.
- The sale stays in the list and gets a **RETURNED** or **PARTIAL RETURN** tag. The sale itself is not changed.
- A return is final. You cannot edit or delete it in the app.
- **Reward points:** this was not checked, so do not count on points being changed by a return.

How to do an exchange

1. First make the new sale for the goods the customer takes. Use **New Sale** or the POS, at the same branch.
2. Open **Create Return** and choose the **Processing Branch**.
3. Enter the original **Sale Number** and tap **Search**.

4. Set **Return Type** to **Exchange**.
5. Type the **Exchange Sale Number** and tap **Search Exchange**. You see "Exchange Sale (number) loaded successfully!" and ✓ **Exchange Sale Loaded**.
6. Pick the returned items, as above.
7. Tap **Add Payment**, choose **EXCHANGE** for the part covered by the exchange sale, and add any other method for a cash refund. The total must match the selected return value.
8. Tap **Create Return**.

What happens next: the return shows the exchange sale and the **Total Exchange** value. Stock of returned goods goes back in.

Messages on Create Return

Message	What it means	What to do
Please enter a sale number	The Sale Number box is empty.	Type it.
Sale not found. Please check the sale number.	No such sale.	Check the number.
Error searching for sale: (text)	The search failed.	Try again.
Please enter an exchange sale number	The Exchange Sale Number box is empty.	Type it.
Please select a processing branch first	No branch chosen.	Choose a branch.
Exchange sale is from a different branch. Please select an exchange sale from the same processing branch.	The exchange sale was made at another branch.	Use an exchange sale from the same branch.
Exchange sale not found. Please check the sale number.	No such exchange sale.	Check the number.
Please select a sale first	You have not loaded a sale.	Search a sale first.
Please select at least one item or add a shipping refund amount	Nothing is selected.	Pick an item or enter a shipping refund.
Please add at least one payment method to process the return	No payment row.	Tap **Add Payment**.
All payment amounts must be greater than 0	A payment row is 0.	Remove it or fix the amount.
Selected return amount must be greater than zero	The return is worth nothing.	Pick items to return.
Total payment amount must exactly match selected return value. Expected x, got y.	The payments do not add up.	Change the amounts.
Total payment amount (x) exceeds selected return value (y). Please adjust your payment amounts.	Payments are too high.	Lower them.
Selected return value (x) exceeds available amount (y). Reduce return quantities.	You are returning more than the sale allows.	Lower the quantities.

Message	What it means	What to do
Shipping refund amount (x) cannot exceed remaining refundable shipping (y).	Too much shipping refund.	Lower it.
Return quantity exceeds available quantity for item N. Available: a, Requested: b	You asked to return more than was sold less earlier returns.	Lower the quantity.
Another return was recorded for this sale at the same time. Please reload the sale and try again.	Someone else returned goods on this sale a moment ago.	Reload the sale and try again.
Insufficient stock for exchange item (...)	The exchange goods are not in stock.	Check stock of the exchange sale.
Return created successfully!	The return was saved.	Nothing.

A line can only be returned up to the quantity sold minus earlier returns. The total returned cannot be more than the sale amount.

Return page (Return #number)

What it is

The full detail of one return.

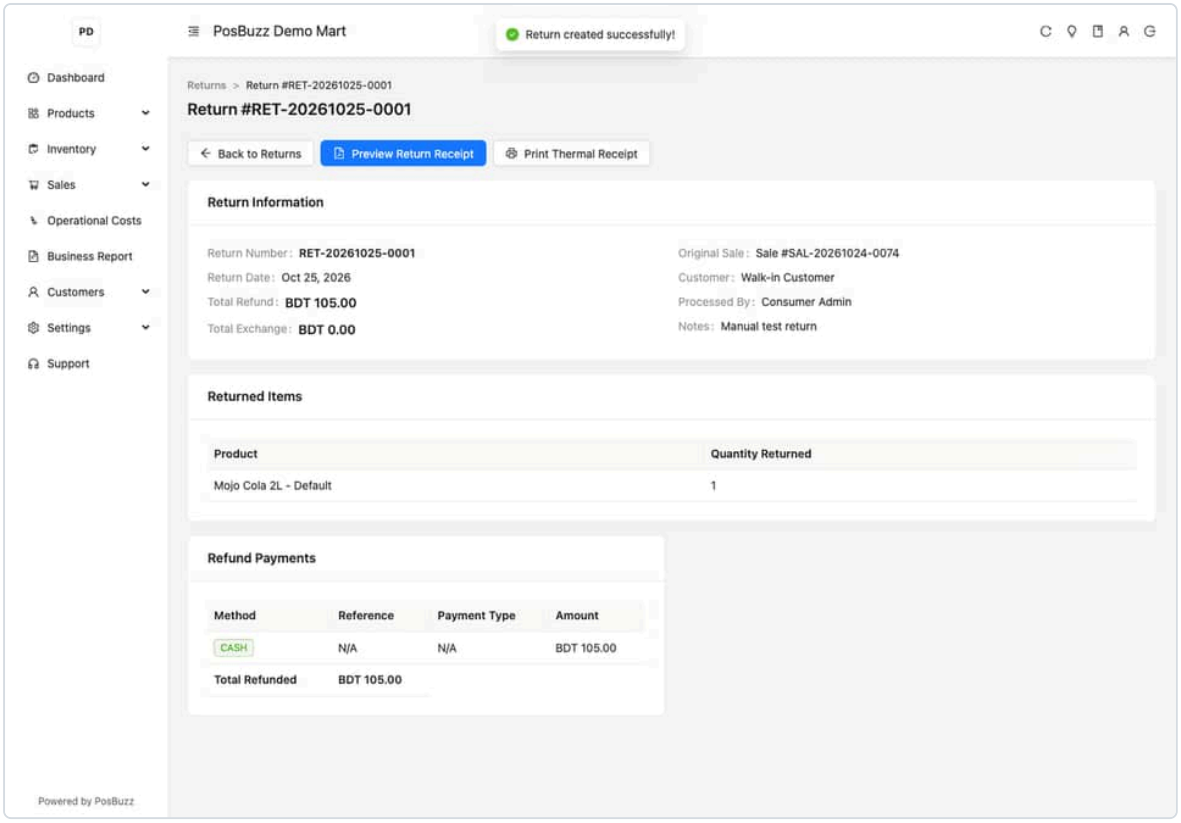

Where to find it

On **View Returns**, tap the eye. It also opens after you create a return. Permission needed: **sales**. If the return does not exist you see a red **Return not found**.

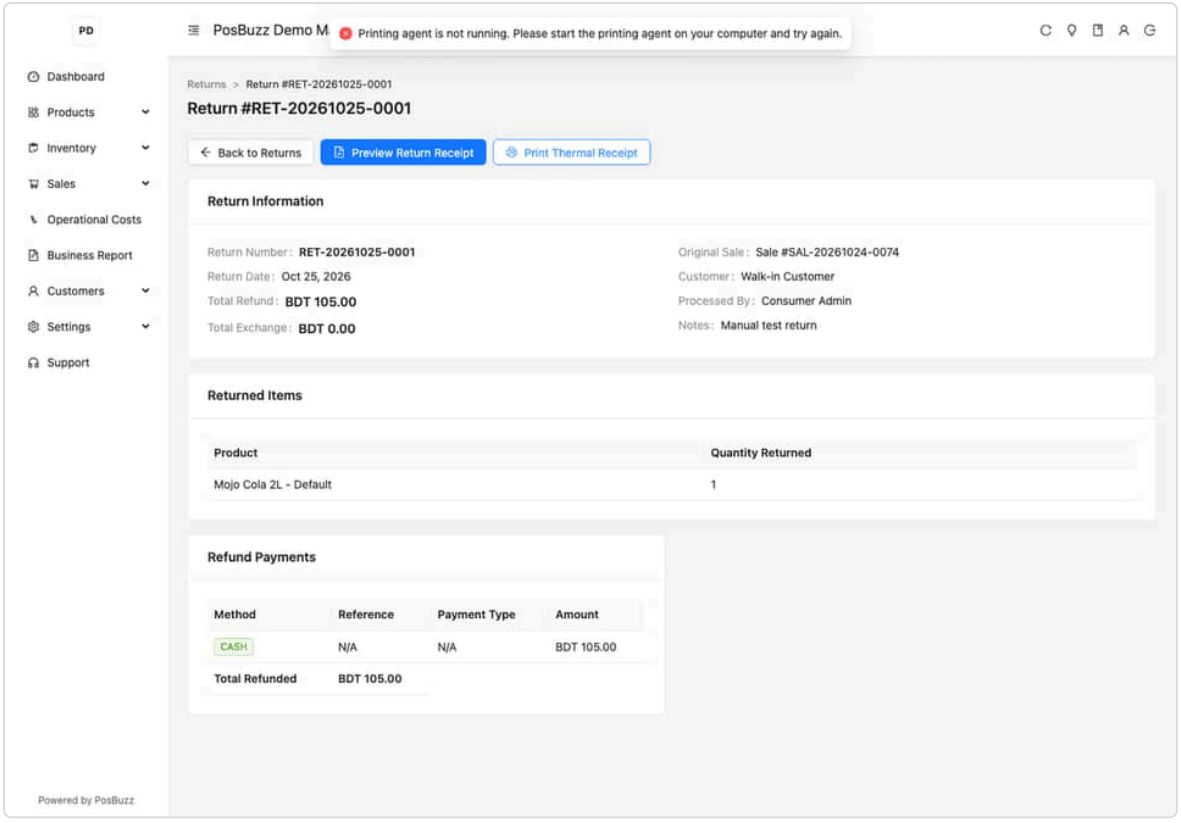

What you see

- Buttons: **Back to Returns**, **Preview Return Receipt** (opens the PDF window) and **Print Thermal Receipt** (uses the print agent).
- **Return Information**: **Return Number**, **Return Date**, **Total Refund**, **Total Exchange**, **Original Sale** (link), **Exchange Sale** (link), **Customer**, **Processed By**, **Notes**.
- **Returned Items**: **Product**, **Quantity Returned**.
- **Refund Payments**: **Method**, **Reference**, **Payment Type**, **Amount**, and **Total Refunded**.
- **Exchange Items**: **New Product**, **Quantity**, **Unit Price**, **Total**, and **Total Exchange Value**.

How to print a return receipt

A return with its refund payment.

Print Thermal Receipt with the print agent not running.

1. Open the return.

2. Tap **Preview Return Receipt** and then **Print** or **Download** in the window, or tap **Print Thermal Receipt**.

Messages: "Return receipt sent to printer!" means it worked. If the print agent is not running you see the "Printing agent is not running" message from the POS section. "Failed to print return receipt. Please check your connection." means the request did not go through.

View Quotations

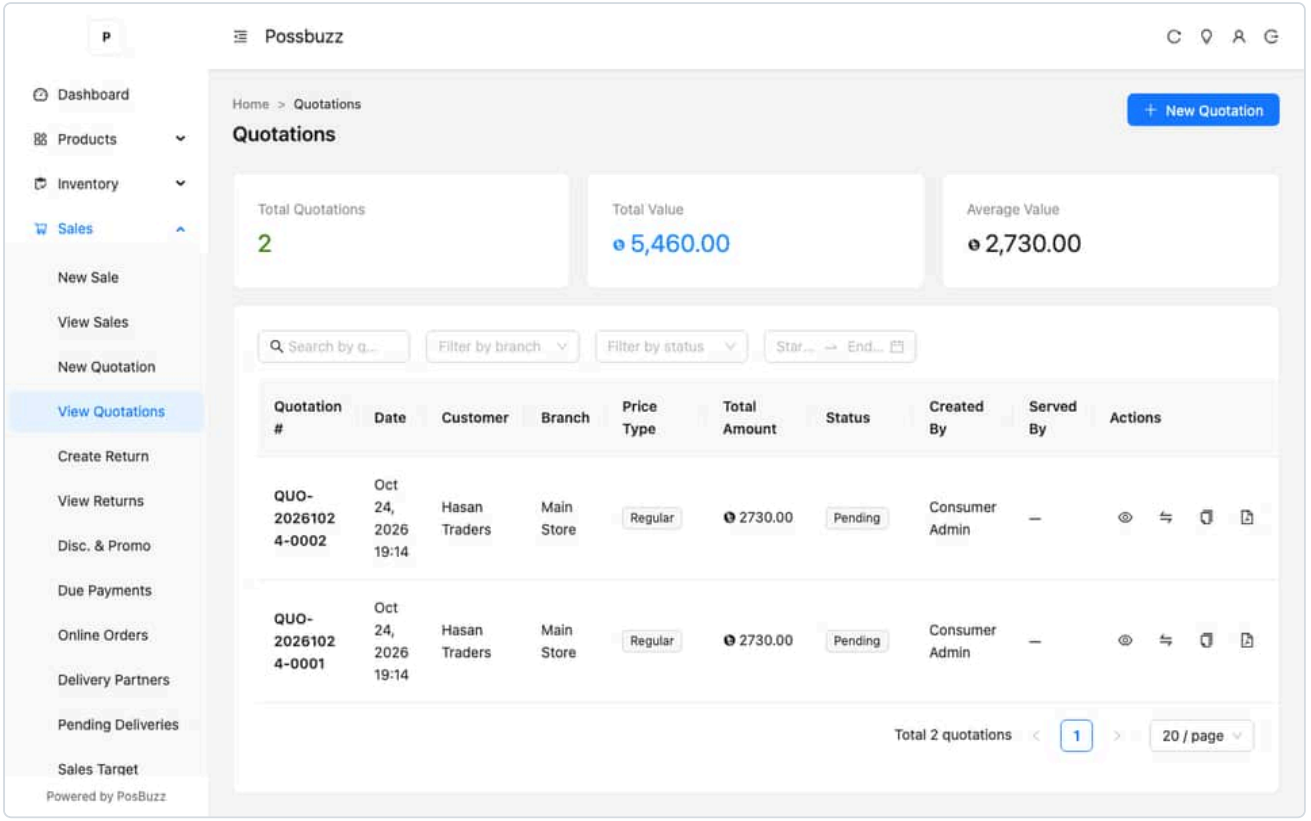

What it is

A quotation is a price offer for a customer. Saving one does not touch stock, take payment or give points. The list is titled **Quotations**.

Where to find it

Left menu: **Sales**, then **View Quotations**. Permission needed: **quotations**. The **New Quotation** button at the top right starts a new one.

What you see

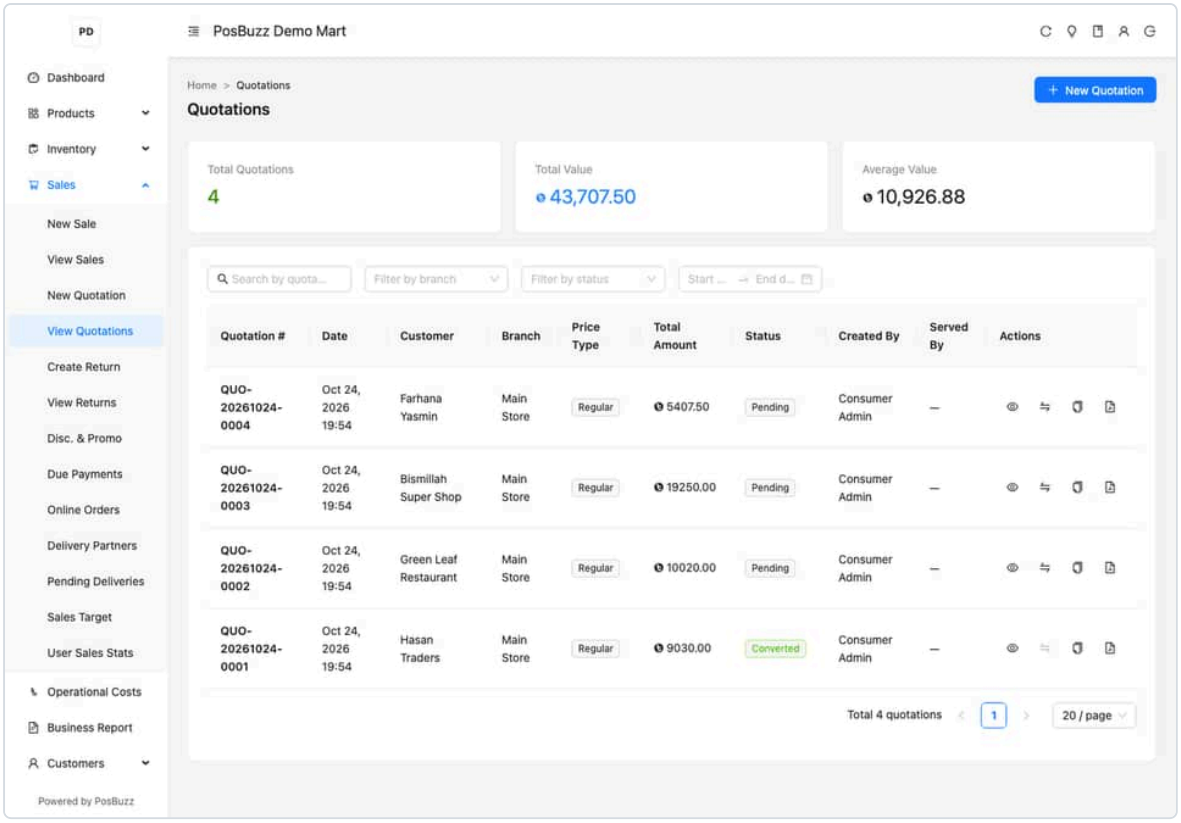

The Quotations list.

- Cards: **Total Quotations**, **Total Value**, **Average Value**.

- Filters: search "Search by quotation number, customer...", **Filter by branch**, **Filter by status** (Pending, Converted), a date range, and **Clear All Filters**.
- Columns: **Quotation #** (link), **Date**, **Customer** (or "Walk-in"), **Branch**, **Price Type** (Regular or Wholesale), **Total Amount**, **Status** (Pending or Converted), **Created By**, **Served By**, **Actions**.
- Actions: **View Quotation**, **Convert to Sale** (it says **Already Converted** and is greyed out if done), **Copy Quotation**, **Preview PDF Quotation** (a window with **Close**, **Print**, **Download**; the file is named quotation- followed by the number, ending in .pdf).
- Bottom: "Total N quotations".

How to find, preview or copy a quotation

The quotations list. A converted quotation has its Convert button greyed out.

1. Use the search box or filters.
2. Tap **Preview PDF Quotation** to see the PDF. Use **Print** or **Download**.
3. Tap **Copy Quotation** to start a new quotation from this one.

New Quotation

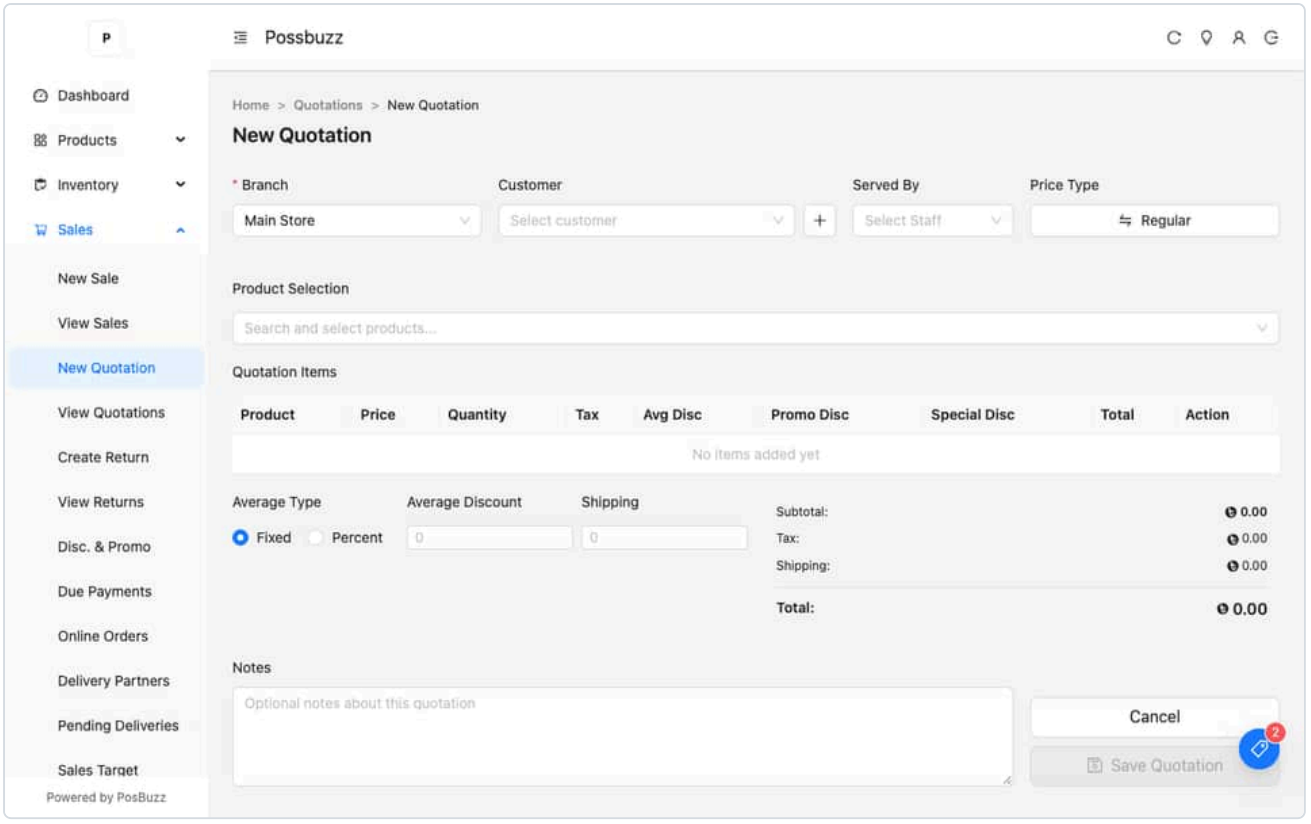

What it is

A page to write a price offer. The same page is used to copy an old quotation. When you copy, the title is **Copy Quotation**.

Where to find it

Left menu: **Sales**, then **New Quotation**. Permission needed: **quotations**.

What you see

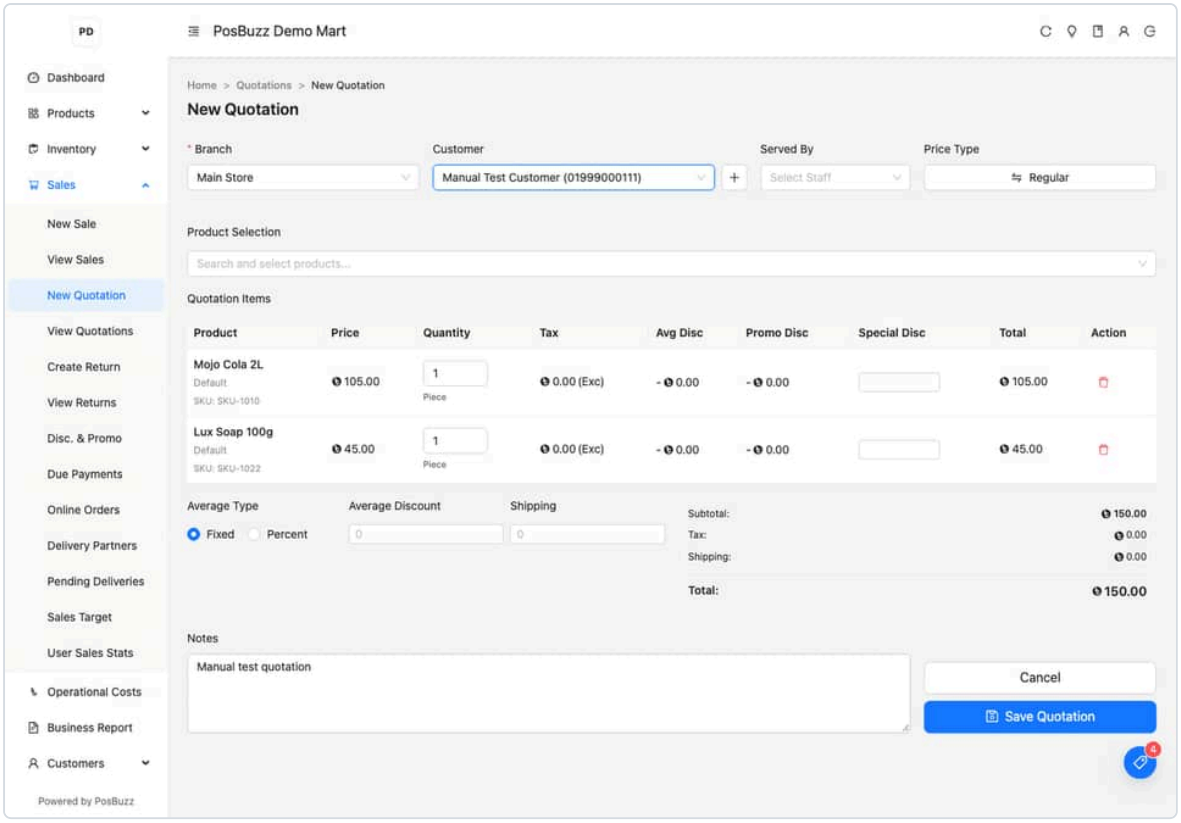

The New Quotation page. It looks like New Sale, without payments.

Field	Required	Notes
Branch	Yes	The branch.
Customer	No	With a **+** button to add one.
Served By	No	Staff.
Price Type	No	**Regular** or **Wholesale**.
Product Selection	Yes, at least one item	Search and pick products.
Quotation Items table		**Special Disc** here is a plain number box. There is no **Per qty** switch.
Average Type	No	**Fixed** or **Percent**.
Average Discount	No	Order discount.
Shipping	No	Shipping charge.
Totals		**Subtotal**, **Tax**, **Promo Discount**, **Average Discount**, **Special Discount**, **Shipping**, **Total**.

Field	Required	Notes
Notes	No	Placeholder "Optional notes about this quotation".
Cancel		Leaves without saving.
Save Quotation		Greyed out until there is at least one item.
Promotions		The round tag button opens **Available Promotions**.

How to create a quotation

A quotation with two items and a customer.

1. Choose the **Branch**.
2. Choose the **Customer**, **Served By** and **Price Type** if you want.
3. Add products under **Product Selection**.
4. Set discounts and **Shipping** if needed.
5. Write **Notes** if you want.
6. Tap **Save Quotation**.

What happens next: "Quotation created successfully!" and the quotation opens. Stock does not change. No payment is taken and no points are earned. It is kept as due with 0 paid. If you forget items you see "Please add at least one item to the quotation". If it fails you see "Failed to create quotation".

How to copy a quotation

1. On **View Quotations** or on the quotation page, tap **Copy Quotation**.
2. The items and discounts of the old one load, at today's prices and with tax worked out again.

3. Change what you need and tap **Save Quotation**.

Quotation page (Quotation #number)

What it is

The full detail of one quotation. A quotation cannot be edited. Copy it instead.

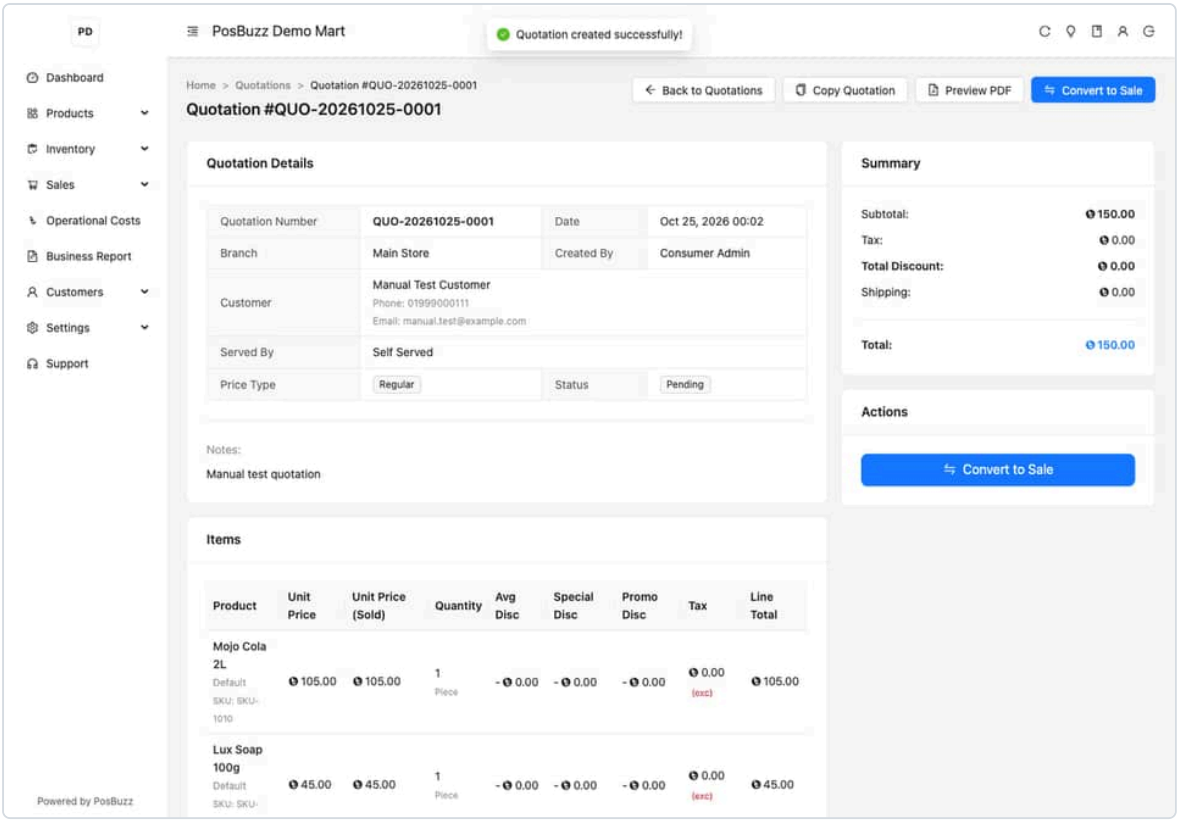

Where to find it

On **View Quotations**, tap the quotation number or **View Quotation**. Permission needed: **quotations**. If it cannot load, you see "Failed to load quotation details".

What you see

- Buttons: **Back to Quotations**, **Copy Quotation**, **Preview PDF**, **Convert to Sale** (**Already Converted**, greyed out, if done).
- For a converted quotation, a card "This quotation has been converted to a sale" with "Converted on: (date)" and **View Sale** →.
- **Quotation Details**: **Quotation Number**, **Date**, **Branch**, **Created By**, **Customer** (with phone and email), **Served By** ("Self Served" if none), **Price Type**, **Status** (Converted or Pending), **Notes**.
- **Items** table: **Product**, **Unit Price**, **Unit Price (Sold)**, **Quantity**, **Avg Disc**, **Special Disc**, **Promo Disc**, **Tax**, **Line Total**.
- **Summary**: **Subtotal**, **Tax**, the discounts, **Total Discount**, **Shipping**, **Total**.
- **Actions** card with a large **Convert to Sale** button.

How to convert a quotation to a sale

A new quotation with Convert to Sale at the top and in the Actions card.

1. Tap **Convert to Sale**.
2. The **New Sale** page opens with everything filled in.
3. Take payment and tap **Create Sale**.

What happens next: the quotation shows **Converted**. Stock goes down now, using current stock and current prices. See **New Sale** for more.

Due Payments

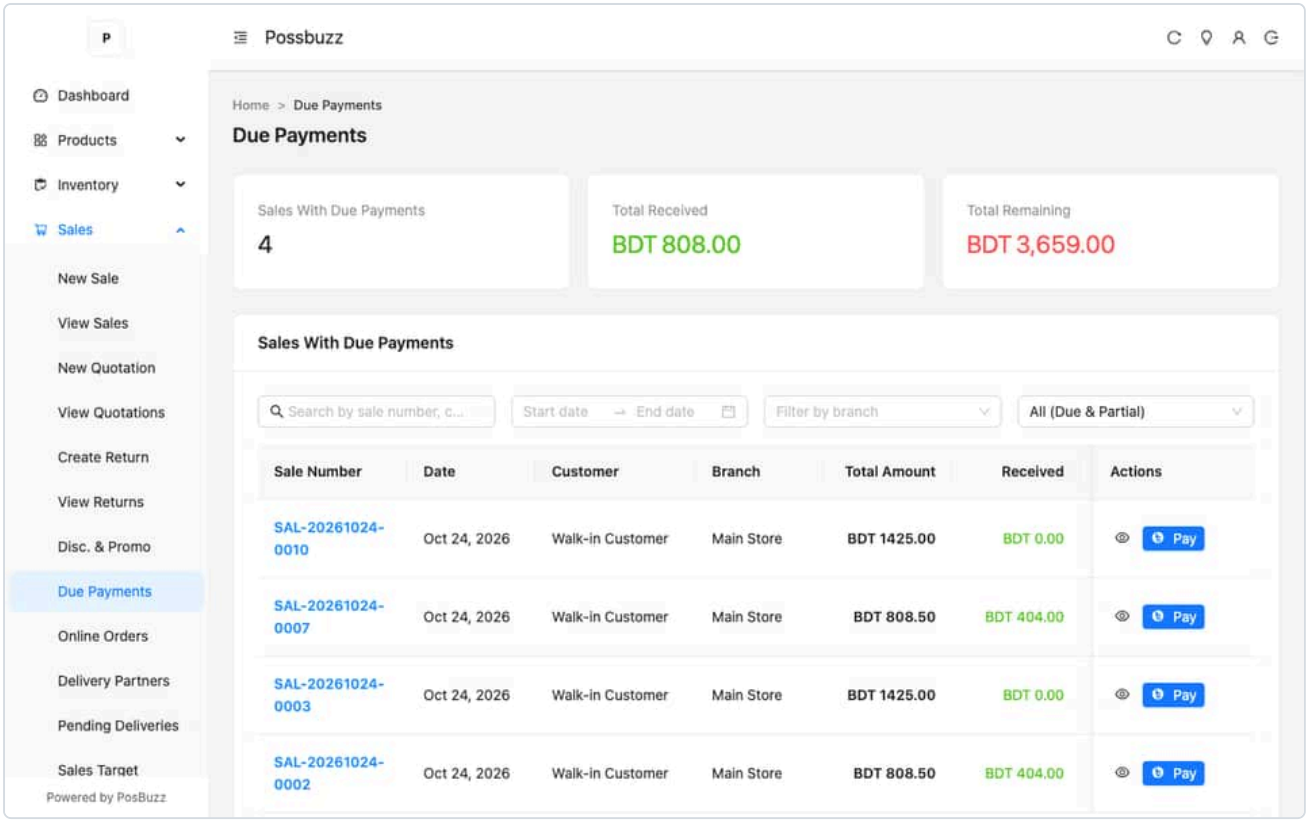

What it is

The list of sales that are not fully paid. You collect the rest here.

Where to find it

Left menu: **Sales**, then **Due Payments**. Permission needed: **sales**. A sale appears here when a POS or New Sale sale was saved with less than the total paid.

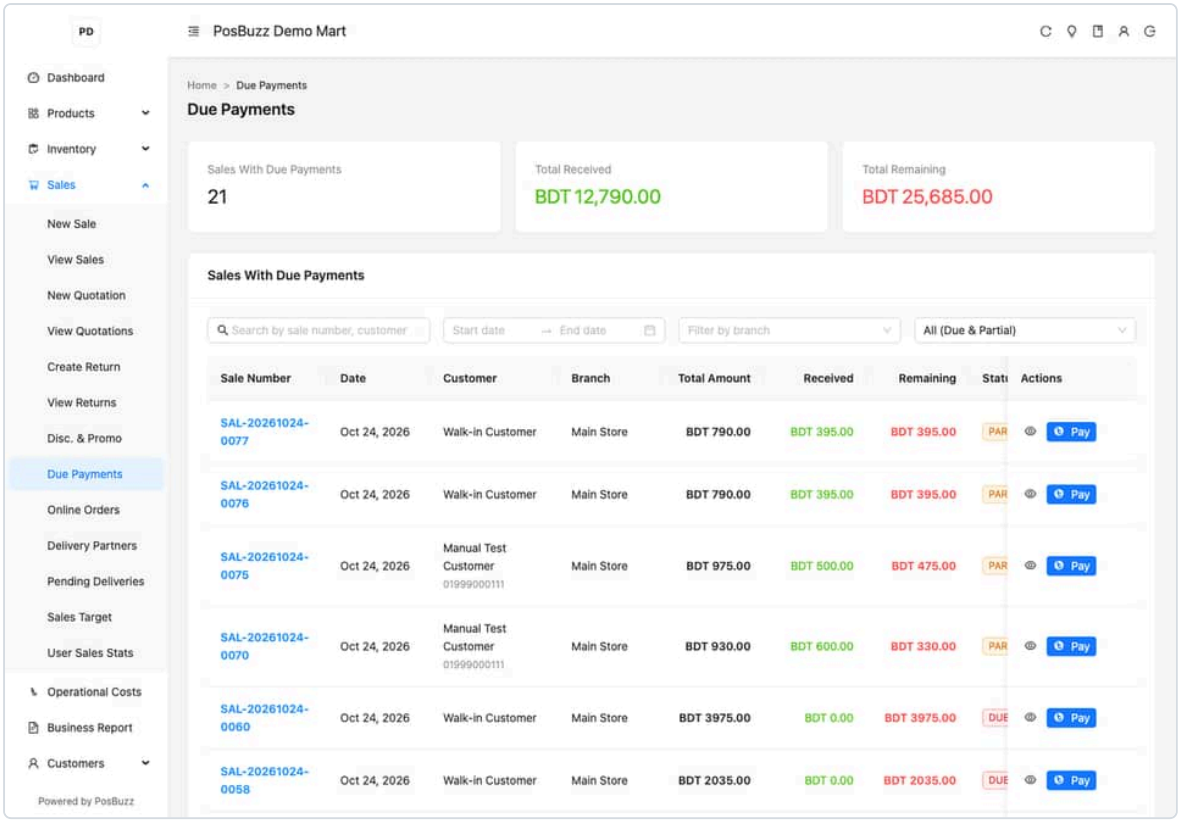

What you see

*The Due Payments list. Each row has a **Pay** button.*

- Cards: **Sales With Due Payments** (count), **Total Received**, **Total Remaining** (in BDT). These add up the rows on the current page only.
- A card titled **Sales With Due Payments** with **Clear Filters**.
- Filters: search "Search by sale number, customer", a date range, **Filter by branch** (only if you have more than one branch), and **Payment Status** with **All (Due & Partial)**, **Due Only**, **Partial Only**.
- Columns: **Sale Number**, **Date**, **Customer**, **Branch**, **Total Amount**, **Received**, **Remaining**, **Status** (**DUE** in red, **PARTIAL** in orange), **Actions**.
- Actions: **View Sale** (eye) and **Make Payment** (a **Pay** button).
- Bottom: "Total N sales" and page sizes 10, 20, 50, 100.

How to find a sale that owes money

Sales still owing money. DUE sales have nothing received yet.

1. Type a sale number or customer name, or set dates, branch and **Payment Status**.
2. Tap **Clear Filters** to reset.

Make Payment (Make Payment - Sale #number)

What it is

The page where you record money received on an unpaid sale.

Where to find it

On **Due Payments**, tap **Pay**. Permission needed: **sales**. Tap **Back to Due Payments** to leave.

What you see

Left

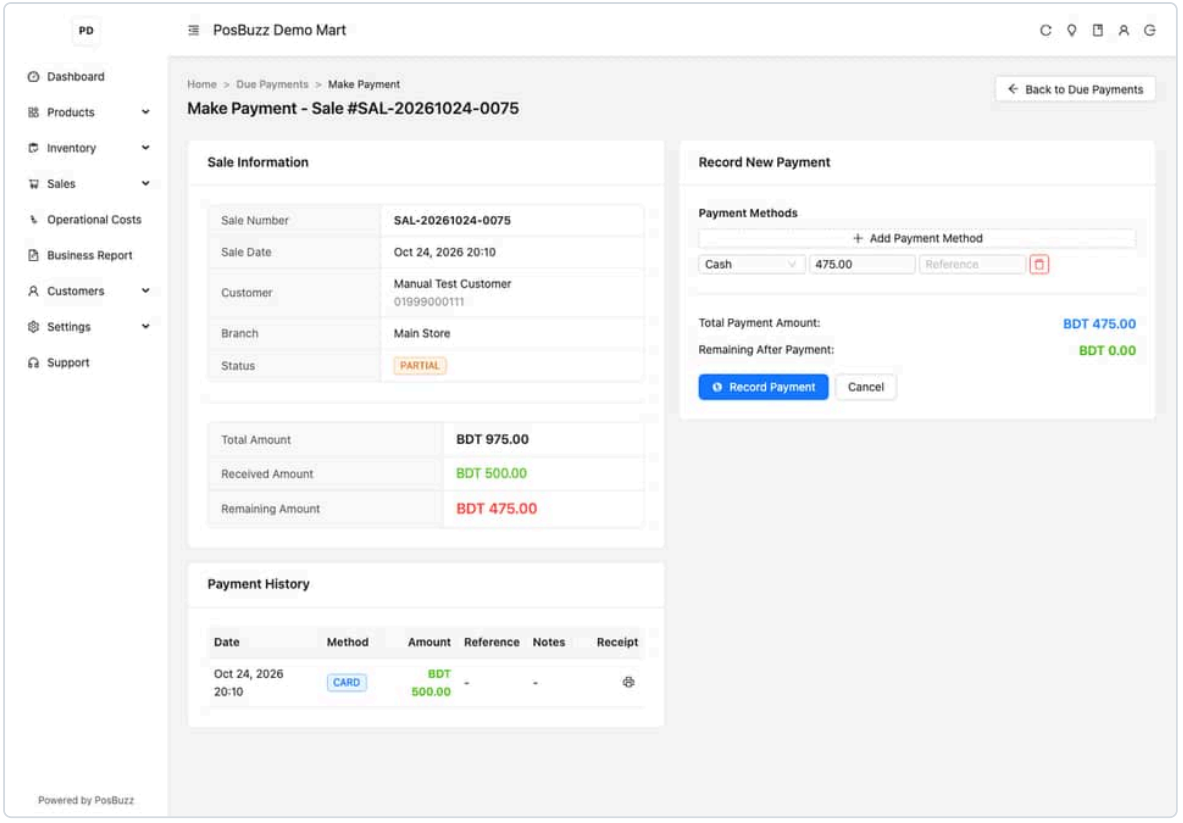

- **Sale Information**: **Sale Number**, **Sale Date**, **Customer**, **Branch**, a status tag, **Total Amount**, **Received Amount**, **Remaining Amount**.
- **Payment History**: **Date**, **Method**, **Amount**, **Reference**, **Notes**, and a printer icon (tooltip **Download money receipt for this payment**). The file is named money-receipt, the sale number and the payment number, ending in .pdf. If it fails: "Failed to download money receipt".

Right: Record New Payment

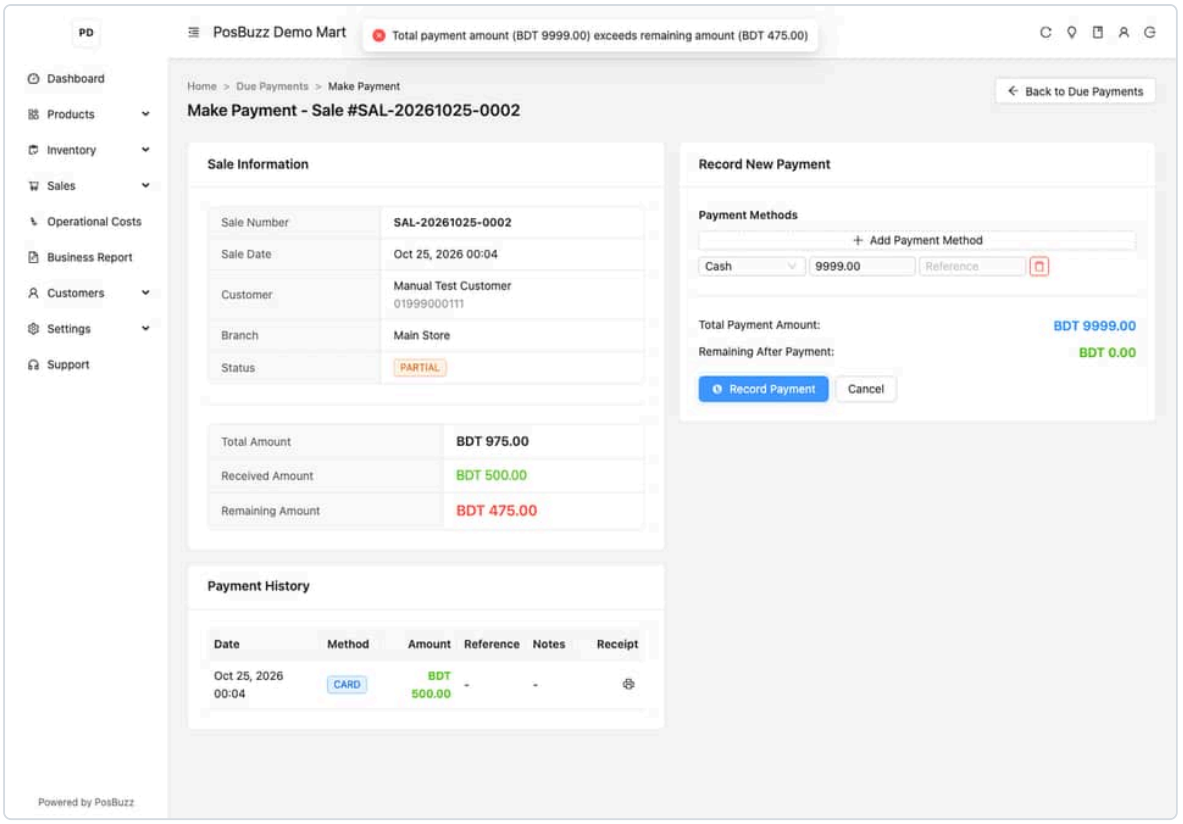

- **Payment Methods** with **Add Payment Method**.
- Each row: **Method** (Cash, Card, Cheque, Bank Transfer, Mobile Money, MFS, Credit, Exchange), **Amount** (starts at the remaining amount), **Reference**, and a delete button.
- **Total Payment Amount** and **Remaining After Payment**.
- Buttons **Record Payment** and **Cancel**.

> **Good to know:** On this page the status tag always says **PARTIAL**, even when nothing has been paid yet and the list shows **DUE**. Trust the **Received Amount** and **Remaining Amount** numbers. Also, this page has no bank or MFS list. Pick the method and type the **Reference** (for example the transaction number) yourself.

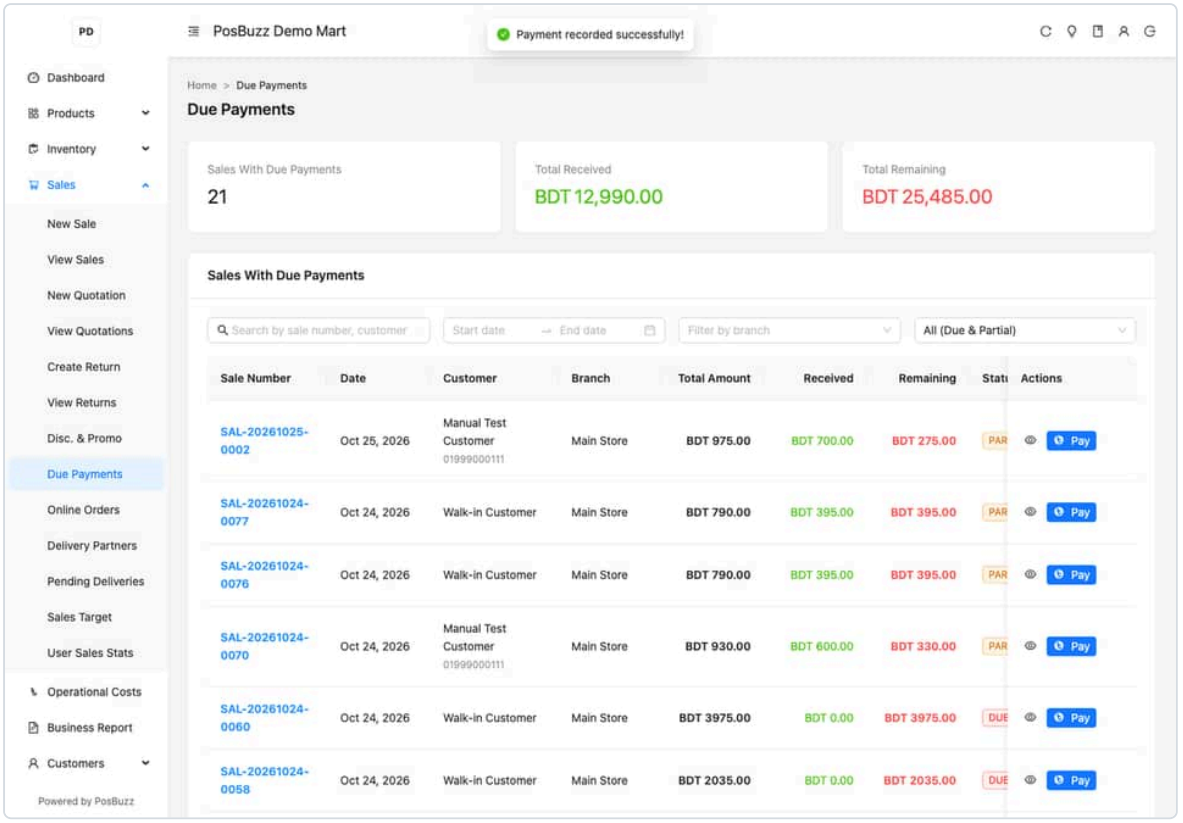

How to collect a payment on a due sale

The Make Payment page. Amount starts at the remaining amount.

An amount above the remaining amount is refused.

After Record Payment the list shows again with the success message.

1. On **Due Payments**, find the sale and tap **Pay**.
2. Check **Remaining Amount**.
3. Tap **Add Payment Method** if there is no row yet.

4. Choose the **Method** and check the **Amount**. Change it if the customer pays only part.
5. Type a **Reference** if you have one.
6. Check **Remaining After Payment**.
7. Tap **Record Payment**.

What happens next

- "Payment recorded successfully!" appears and you go back to the list.
- **Customer due:** the **Remaining** amount goes down. When it reaches 0, the sale becomes **PAID** and leaves the list.
- The collected figures on the dashboard and end of day update.
- You can download a money receipt for each payment from **Payment History**.
- Overpaying is not allowed.

Message	What it means	What to do
Please add at least one payment method	No payment row.	Tap **Add Payment Method**.
Total payment amount must be greater than 0	The amount is 0.	Type an amount.
Total payment amount (x) exceeds remaining amount (y)	More than is owed.	Lower the amount.
Sale is already fully paid	Someone already paid it all.	Go back to the list.
Cannot make payment on cancelled sale	The sale is cancelled.	Nothing can be paid.
Failed to record payment	The payment did not save.	Check the connection and try again.
Failed to load sale details	The sale could not load.	Go back and open it again.
Payment recorded successfully!	It worked.	Nothing.

Disc. & Promo

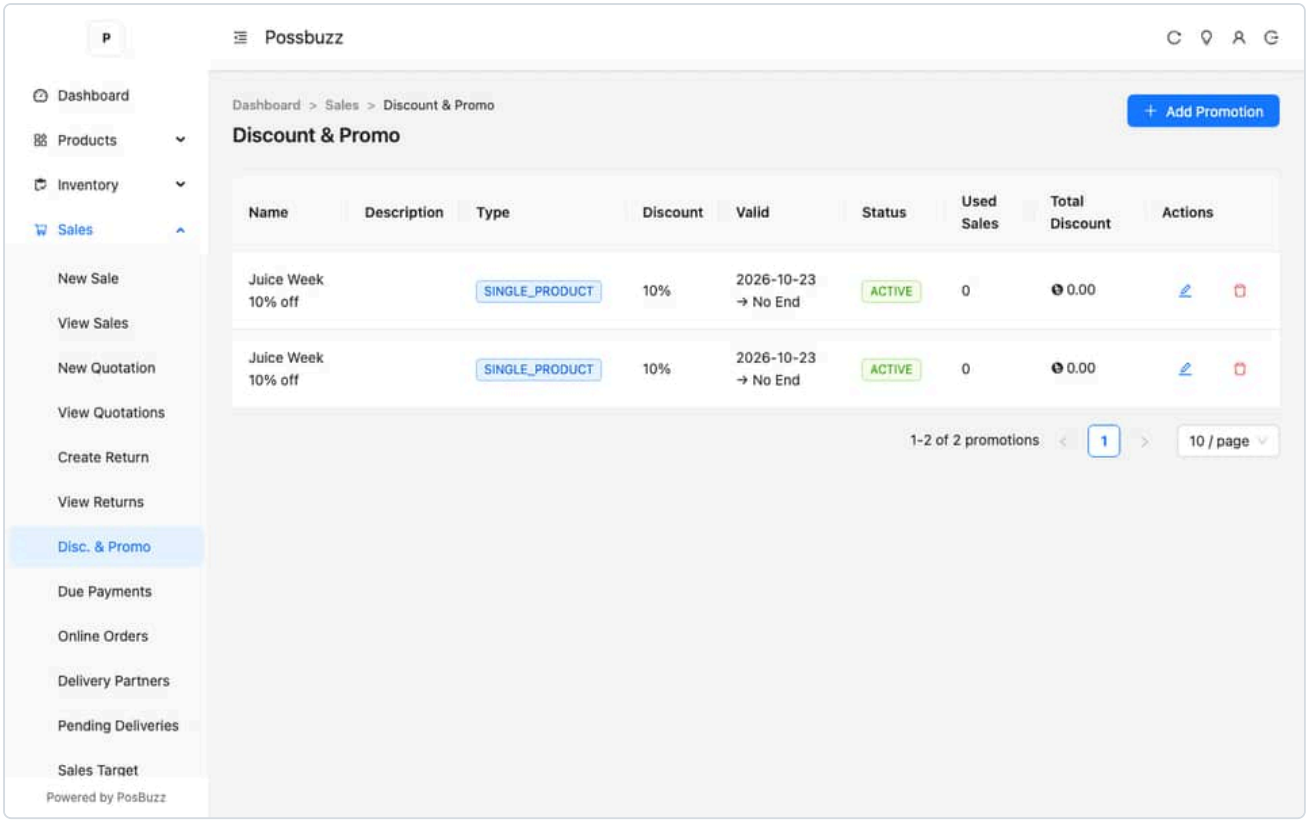

What it is

The screen where you create and manage promotions (discount offers). Its page title is **Discount & Promo**. Cashiers then apply them on the POS or New Sale.

Where to find it

Left menu: **Sales**, then **Disc. & Promo** (hover to see "Discount & Promotions"). Permission needed: **sales**.

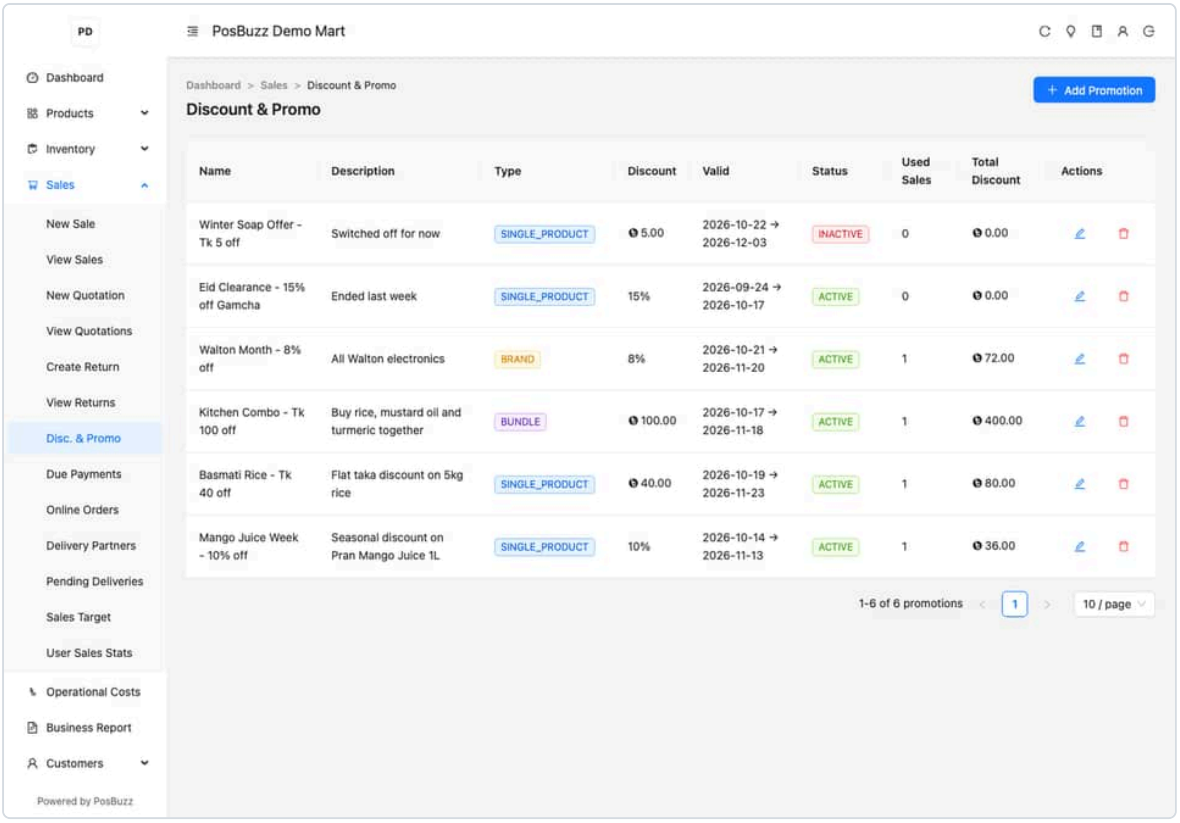

What you see

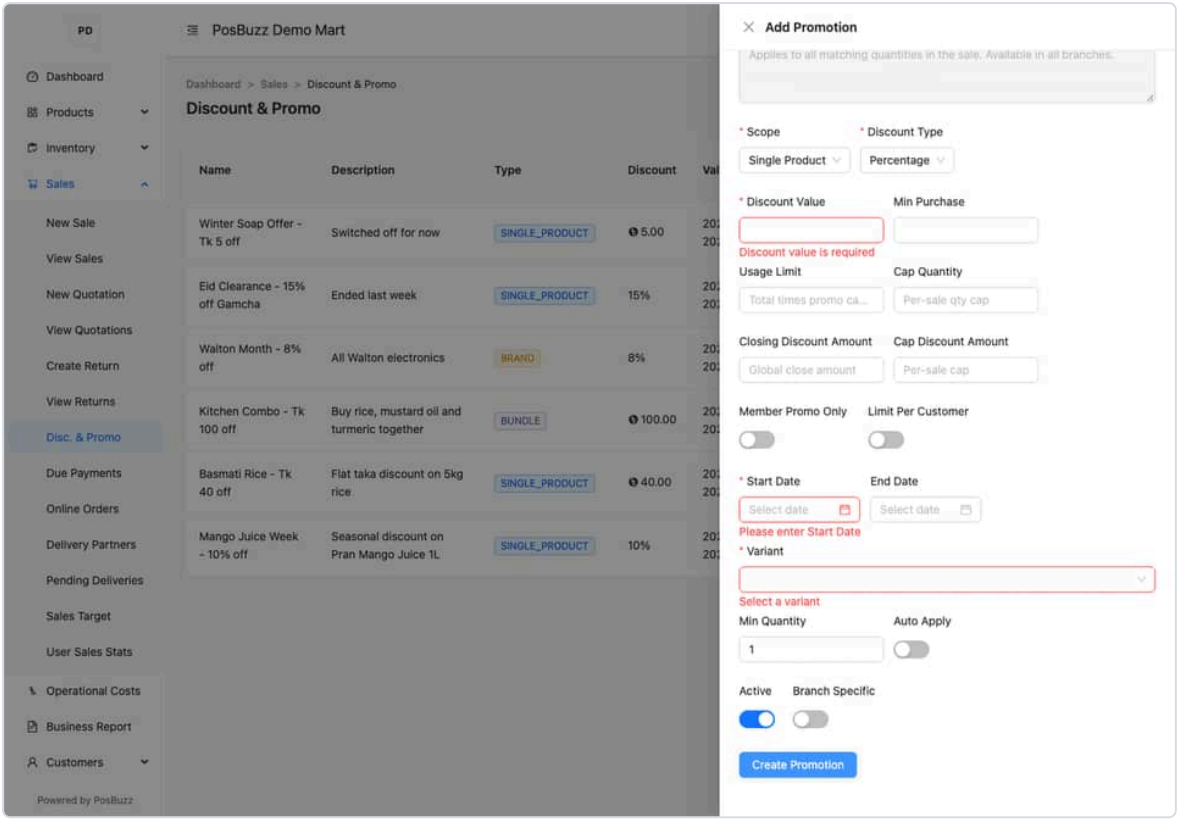

The promotions list.

- Button **Add Promotion**.
- Table columns: **Name**, **Description**, **Type** (SINGLE_PRODUCT in blue, BUNDLE in purple, BRAND in gold), **Discount** (a percent or an amount), **Valid** (start date to end date, or "No End"), **Status** (ACTIVE or INACTIVE), **Used Sales**, **Total Discount**, **Actions**.
- Actions: a pencil to edit and a trash button to delete.
- Bottom: "a-b of N promotions". If it cannot load: "Failed to load promotions".

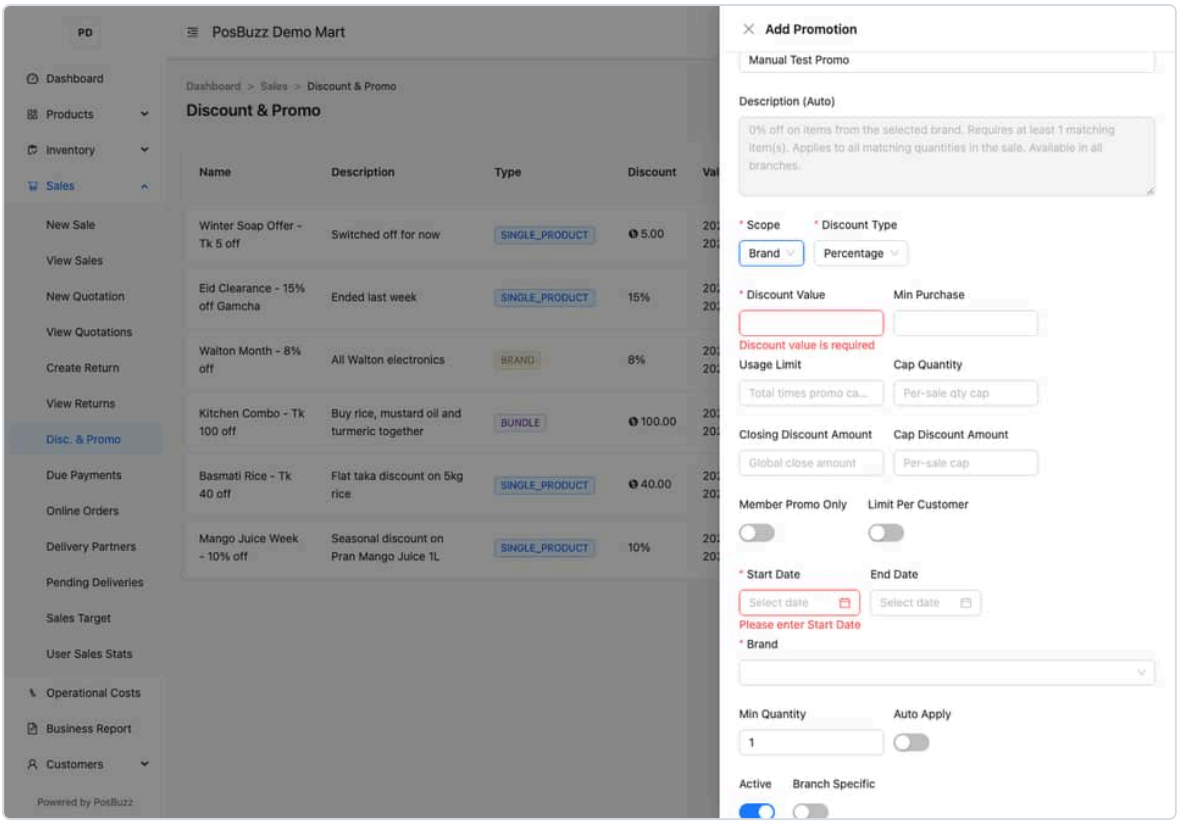

The promotion form

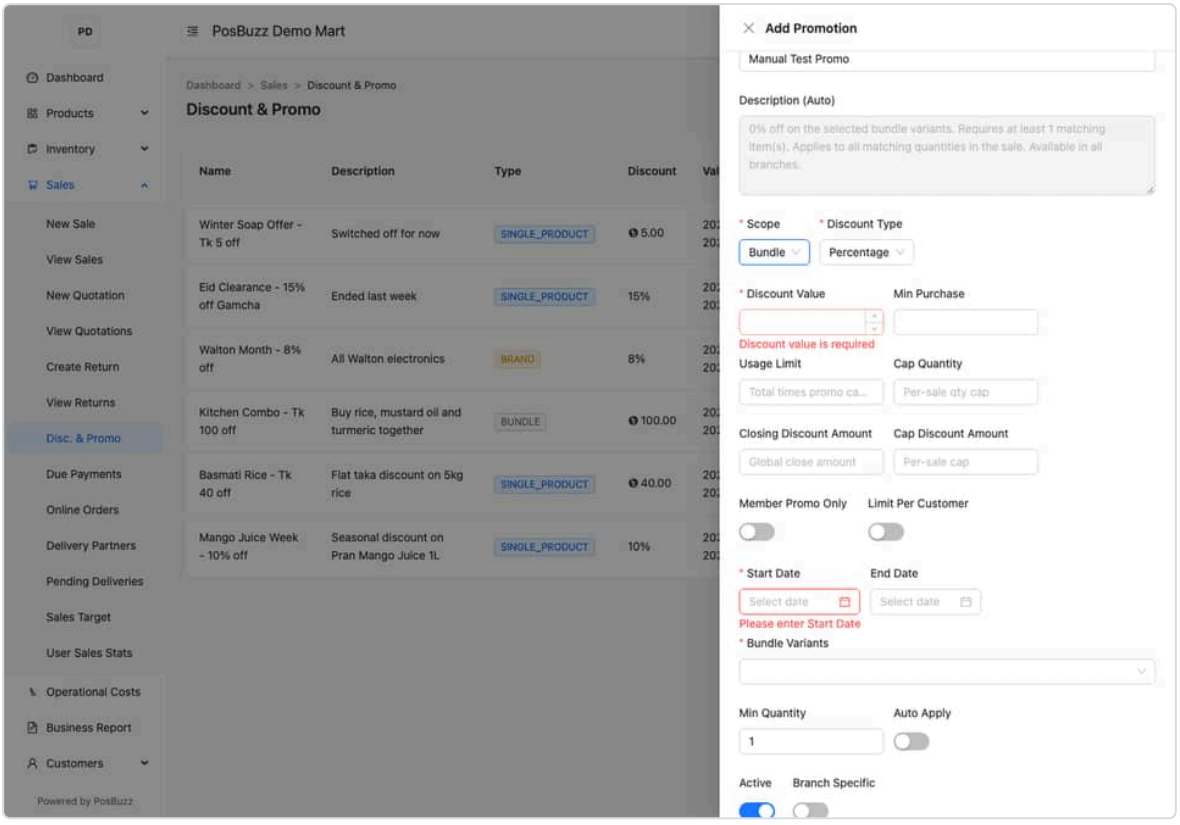

The promotion list with active, inactive and expired promotions.

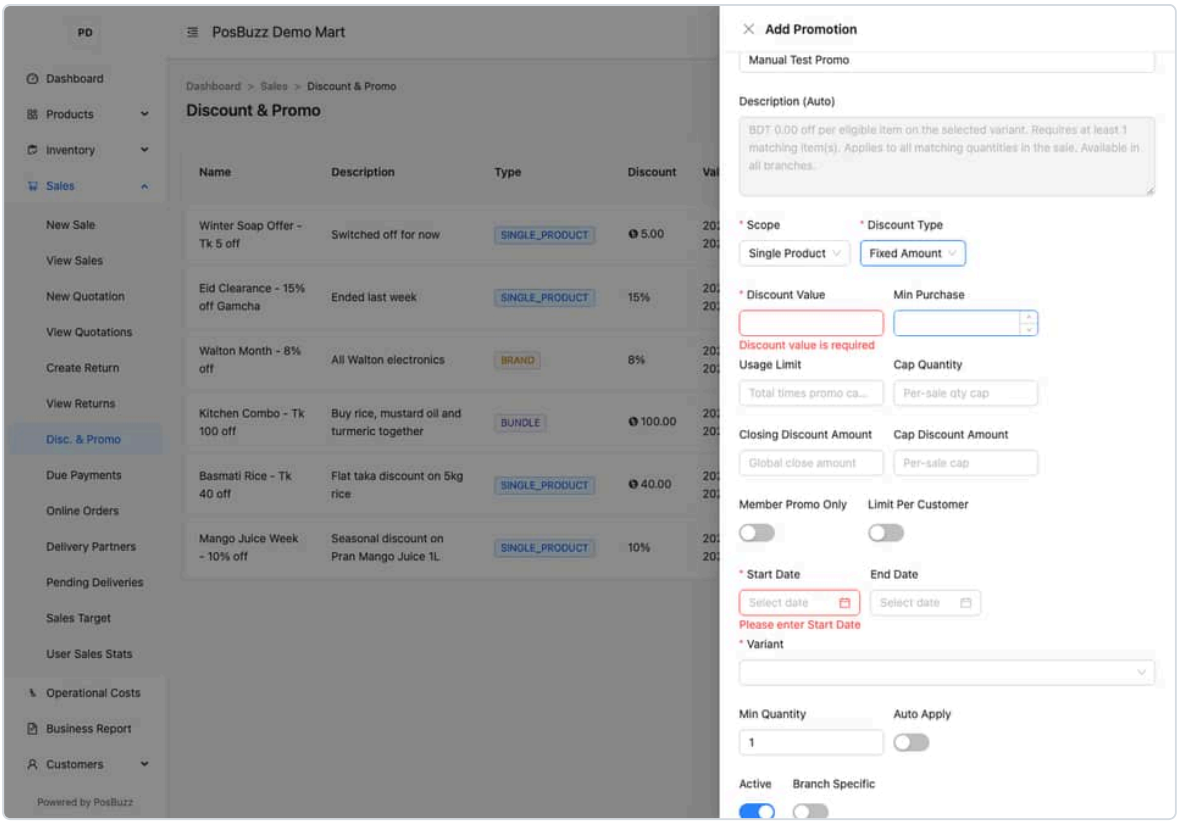

Create Promotion pressed with empty required boxes.

Scope Brand shows a Brand list instead of Variant.

Scope Bundle shows Bundle Variants.

Discount Type Fixed Amount. The automatic description says BDT off per eligible item.

Tap **Add Promotion** (or the pencil, which shows **Update Promotion**). A side window opens.

Field	Required	Notes
Promotion Name	Yes	"Name is required". Example: "Weekend Combo Offer".
Description (Auto)	No	Read-only. The app writes a sentence that sums up your rules.
Scope	Yes	**Single Product** (default), **Bundle**, **Brand**.
Discount Type	Yes	**Percentage** (default) or **Fixed Amount**. A fixed amount is taken off each eligible item.
Discount Value	Yes	Minimum 0.01. "Discount value is required".
Min Purchase	No	The cart value needed.
Usage Limit	No	How many times in total the promotion can be used.
Cap Quantity	No	The most units in one sale that get the discount ("Per-sale qty cap").
Closing Discount Amount	No	"Global close amount". The promotion closes once the total discount given reaches it.
Cap Discount Amount	No	"Per-sale cap".
Member Promo Only	No	A switch. Only registered customers get it.

Field	Required	Notes
Limit Per Customer	No	A switch.
Customer Usage Limit	Yes, if **Limit Per Customer** is on	"Usage limit is required".
Daily Reset	No	A switch. Needs **Limit Per Customer**.
Start Date	Yes	The first day.
End Date	No	Leave empty for no end.
Brand	Yes, for Brand scope	"Select a brand".
Variant	Yes, for Single Product scope	"Select a variant".
Bundle Variants	Yes, for Bundle scope	"Select bundle variants". You can pick many.
Min Quantity	No	Starts at 1.
Auto Apply	No	A switch. The promotion is applied by itself when the cart qualifies.
Active	No	A switch, on by default.
Branch Specific	No	A switch.
Branches	Yes, if **Branch Specific** is on	"Select at least one branch".

Button: **Create Promotion** or **Update Promotion**.

How to create a promotion

1. Tap **Add Promotion**.
2. Type the **Promotion Name**.
3. Choose the **Scope**, **Discount Type** and **Discount Value**.
4. Pick the **Brand**, **Variant** or **Bundle Variants** that match the scope.
5. Set the **Start Date** and, if you want, the **End Date**.
6. Set any limits and switches you need.
7. Tap **Create Promotion**.

What happens next: "Promotion created successfully" and it shows in the list. Cashiers can then see it under **Promos** on the POS and New Sale. If **Auto Apply** is on, it is applied by itself when the cart qualifies. Stock and customer balances do not change.

How to edit a promotion

1. Tap the pencil on the row.
2. Change the fields.
3. Tap **Update Promotion**. You see "Promotion updated successfully".

How to delete a promotion

1. Tap the trash button.
2. A box asks **Delete this promotion?** "This action cannot be undone." Tap **Yes** or **No**.
3. You see "Promotion deleted successfully".

How the discount is worked out

- A percentage is taken from the product base price, which does not include tax.
- A fixed amount is taken off each eligible item.
- A discount never goes above the value of the line.
- When there is a quantity cap, it applies to the highest priced units first.

Messages on promotions

Message	What it means	What to do
Promotion created successfully / Promotion updated successfully / Promotion deleted successfully	It worked.	Nothing.
Failed to create promotion / Failed to update promotion / Failed to delete promotion	It did not save.	Check the fields and the connection, then try again.
Please select product variant(s)	No variant chosen.	Pick a variant or bundle variants.
Please select a brand	No brand chosen.	Pick a brand.
The end date must be after the start date.	Dates are wrong.	Fix the dates.
The cap quantity must be at least the minimum quantity.	Cap is below the minimum.	Raise the cap or lower the minimum.
The cap discount amount cannot be greater than the maximum discount amount.	Per-sale cap is too high.	Lower it.
A customer usage limit is required when the promotion is limited per customer.	**Limit Per Customer** is on with no limit.	Type a **Customer Usage Limit**.
Daily reset of customer usage requires the promotion to be limited per customer.	**Daily Reset** is on without **Limit Per Customer**.	Turn on **Limit Per Customer** or turn off **Daily Reset**.
Select at least one product for a single-product or bundle promotion.	No product chosen.	Pick products.
Select a brand for a brand promotion.	No brand.	Pick a brand.
Brand promotions apply to a whole brand; remove the selected products.	Products are chosen on a brand promotion.	Remove the products.

Reasons a cashier may see when a promotion will not apply

Message	What it means
Promotion is inactive	**Active** is off.
Promotion has not started yet	Before the **Start Date**.
Promotion has already expired	After the **End Date**.
Promotion is not available for selected branch	The promotion is limited to other branches.
Promotion usage limit reached and promo closed	The **Usage Limit** is used up.
Promotion max discount reached and promo closed	The **Closing Discount Amount** is reached.
This promotion is for registered customers only	**Member Promo Only** is on.
Select a registered customer to apply this promotion	The sale has no customer. Choose one.
Cart is empty	Add products first.
Minimum purchase amount condition not met	The cart is below **Min Purchase**.
Minimum quantity N not met	The quantity is below **Min Quantity**.
No matching brand products found in cart	No product of that brand in the cart.
Required product is not present in cart	The promoted product is not in the cart.
Bundle conditions are not matched in cart	Not all bundle products are in the cart.

Part 5 - Online orders, delivery, customers, rewards, reports and printing

This part covers the screens you use after a sale is made: online orders and couriers, goods delivered later, sales targets, staff sales figures, the Business Report, shop costs, customers, reward points, and printing.

Some notes that apply to every screen in this part:

- Money is in taka (BDT). On screen it shows a small round taka icon followed by the number with two decimals. A few older labels write "BDT" as text.
- Times and dates follow Bangladesh time (Asia/Dhaka). "Today" means midnight to midnight in Dhaka.
- You only see a menu entry if your role has the permission for it. A group such as **Sales** or **Customers** disappears when you can see none of the entries inside it. If you open a page you have no permission for, the app blocks it.
- Error messages appear as a small message at the top of the screen. Where the server gives a clear reason, you see that reason. Otherwise you see the fallback text listed in the tables below.

Online Orders

*Page title: **Online Orders**. Menu name: **Online Orders**.*

What it is

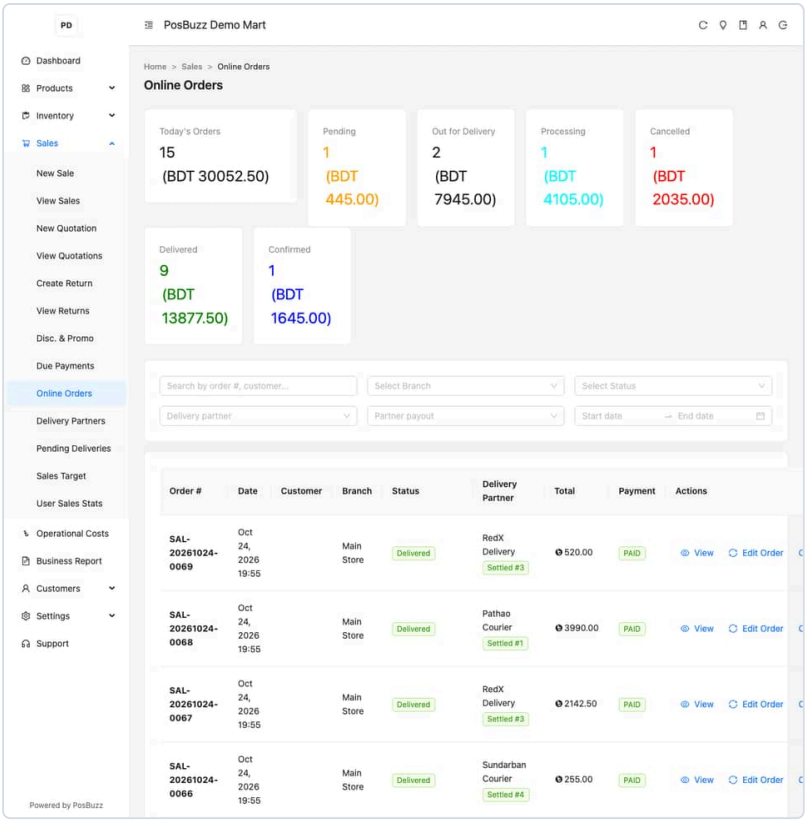

A list of every sale that was marked as an online order. You use it to move each order through its delivery stages, give it to a courier (delivery partner), and print a delivery slip.

Where to find it

Menu: **Sales** > **Online Orders**. You need the **Sales** permission.

An order appears here when the cashier ticks **This is an Online Order** on **Sales** > **New Sale** before completing the sale. A different tick box on that screen, **Deliver products later (reserve inventory)**, sends the sale to **Pending Deliveries** instead (see that section).

What you see

The Online Orders page with the summary cards, the filters and the first orders. The Customer column is empty because these demo orders have no customer.

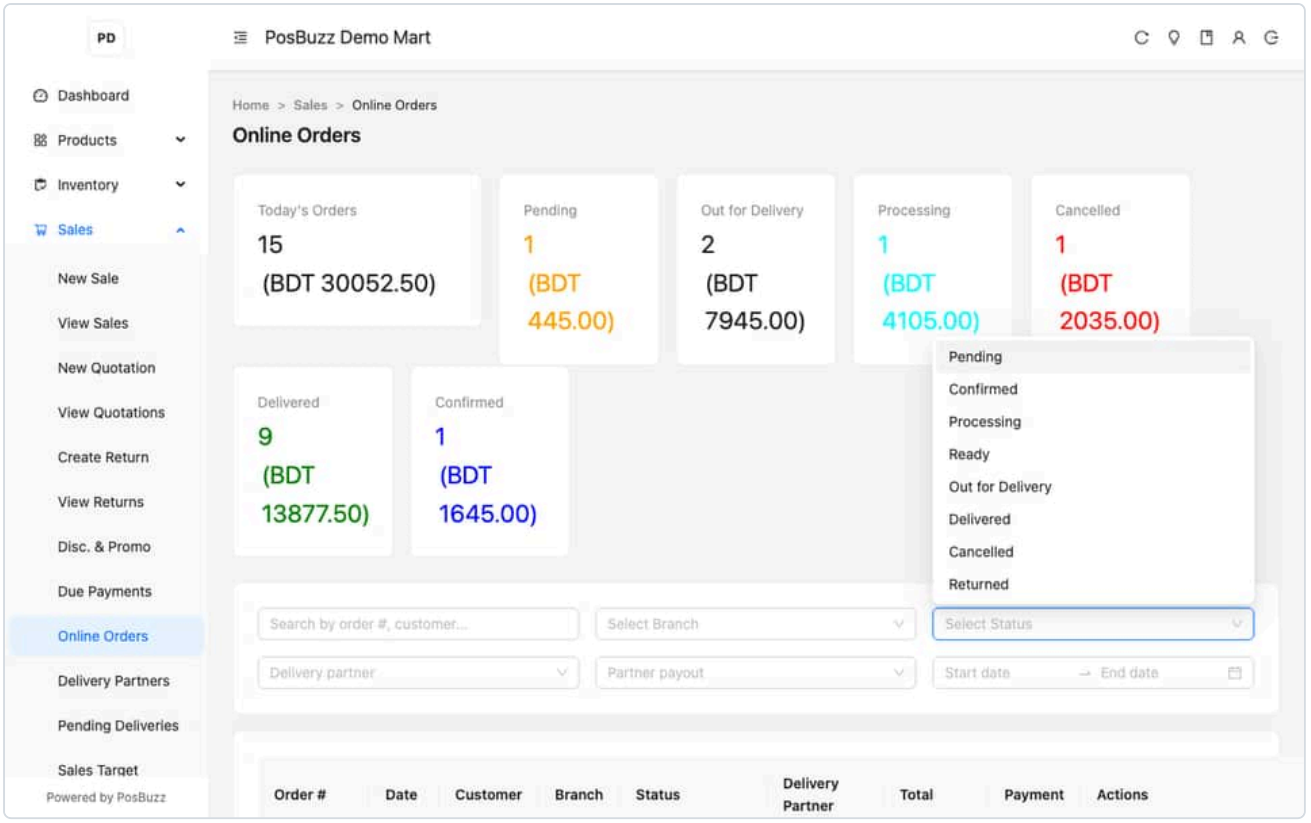

Summary cards (top row). They appear after the figures load. They follow the **Select Branch** filter only. The search box, status, partner, payout and date filters do not change them.

- **Today's Orders**: how many online orders were made today, with the money total in brackets, for example `2 (BDT 2850.00)`. Refunds given today on online orders are taken off this total.
- One more card for each status that has at least one order: Pending, Confirmed, Processing, Ready, Out for Delivery, Delivered, Cancelled or Returned. Each shows the number of orders and the total in brackets. These totals are before refunds. A status with no orders has no card. An order with no status is counted as Pending.

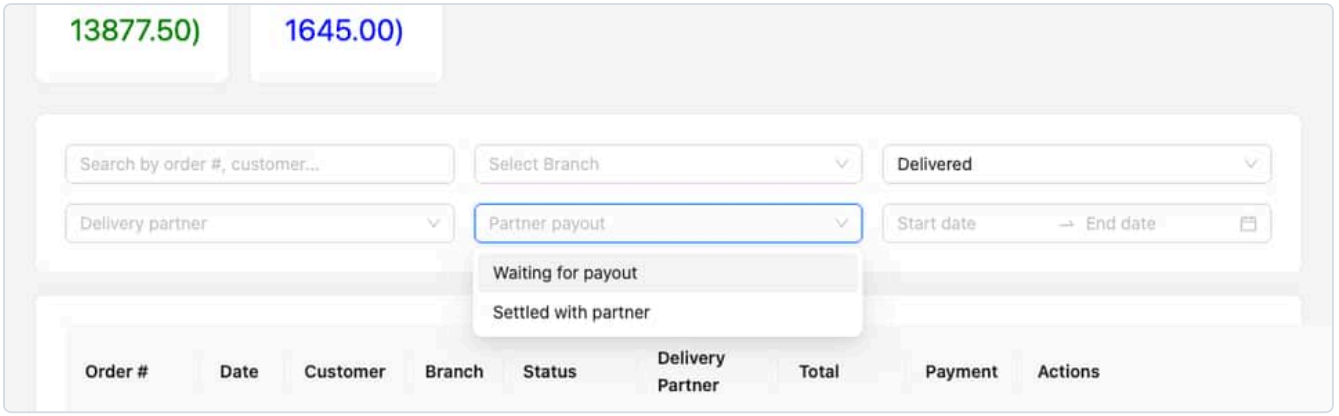

Filters.

Filter	What it does
Search box ("Search by order #, customer...")	Finds orders by order number or customer as you type. A small x clears it.
Select Branch	Shows one branch. It lists the branches you belong to. You can clear it.
Select Status	Pending, Confirmed, Processing, Ready, Out for Delivery, Delivered, Cancelled, Returned. You can clear it.
Delivery partner	One of your couriers, active or inactive. Changing it takes you back to page 1.

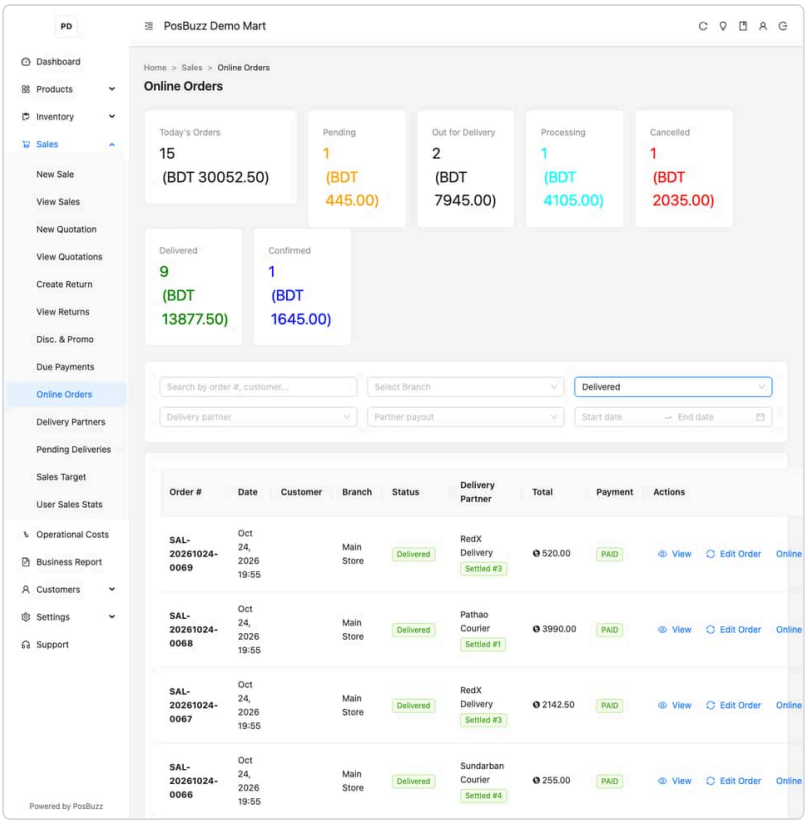

Filter	What it does
Partner payout	**Waiting for payout** or **Settled with partner**. Changing it takes you back to page 1.
Start date / End date	Shows orders made between the two dates, whole days.

*The **Select Status** list showing the eight statuses.*

*The **Partner payout** list, with the status already set to Delivered.*

The list after choosing Delivered. Orders paid out show a green Settled tag.

The orders table.

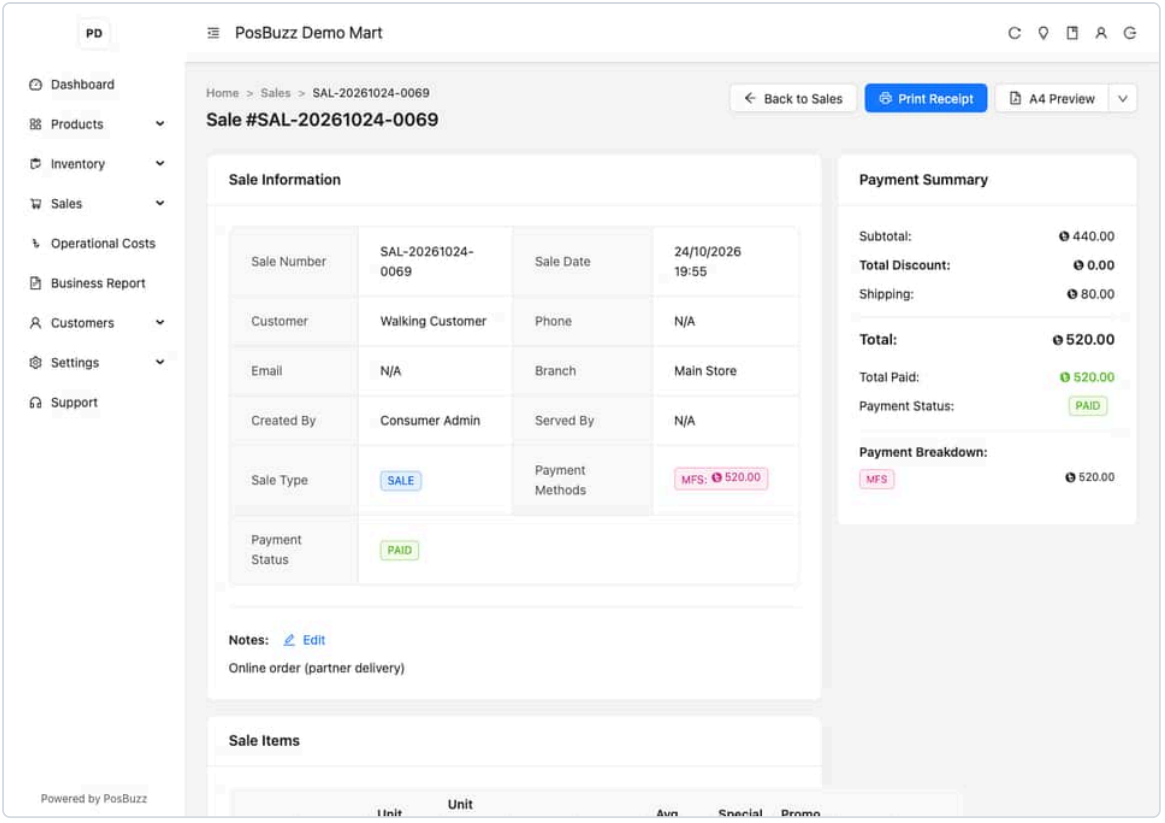

Column	What it shows
Order #	The sale number, in bold.
Date	For example "Oct 24, 2026 14:05".
Customer	The customer name, with the phone number under it in small grey text.
Branch	The branch name.
Status	A coloured tag: Pending (orange), Confirmed (blue), Processing (cyan), Ready (purple), Out for Delivery (blue-violet), Delivered (green), Cancelled (red), Returned (magenta).
Delivery Partner	The courier name as a link to that courier's page. A green tag **Settled #N** under it means this order is already paid out in payout number N. If only an old typed-in courier name was saved, that text shows. Otherwise you see a dash.
Total	The order total.
Payment	**PAID** (green), **PARTIAL** (orange) or **DUE** (red).
Actions	**View**, **Edit Order**, **Online Delivery Slip**.

At the bottom you see a page-size changer and the text "Total N orders". The page shows 20 rows at a time.

How to open an order

1. Go to **Sales** > **Online Orders**.
2. Find the order. Use the search box or a filter if the list is long.
3. Click **View** (eye icon) on its row.

What happens next: the sale detail page opens.

The sale detail page for an online order, with the sale information and the payment summary.

How to print the delivery slip

1. Click **Online Delivery Slip** on the order's row.
2. A window titled "Online Delivery Slip - " followed by the order number opens. At the bottom it shows "A4" and the file name.
3. Click **Print** to print, or **Download** to save the PDF. Click **Close** to leave.

What happens next: the slip prints or is saved on your computer. If the slip cannot be made you see "Failed to load the PDF".

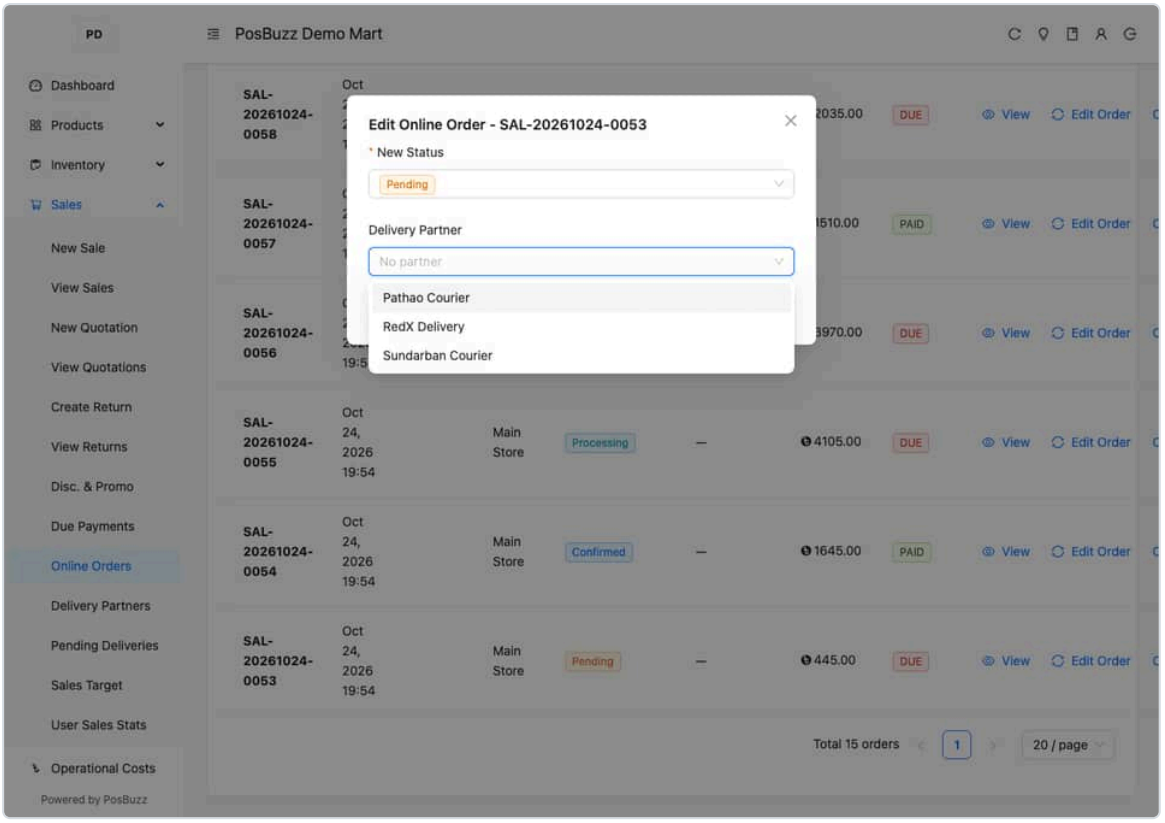

How to move an order to the next stage

1. Go to **Sales** > **Online Orders** and find the order.
2. Click **Edit Order** (sync icon). The window "Edit Online Order - " and the order number opens.
3. In **New Status**, choose the new stage. The current stage is already selected.
4. Click **OK**. A spinner shows while it saves.

What happens next: the window closes and you see "Order updated successfully". The Status tag in the list changes. The summary cards, courier balances and sales reports refresh.

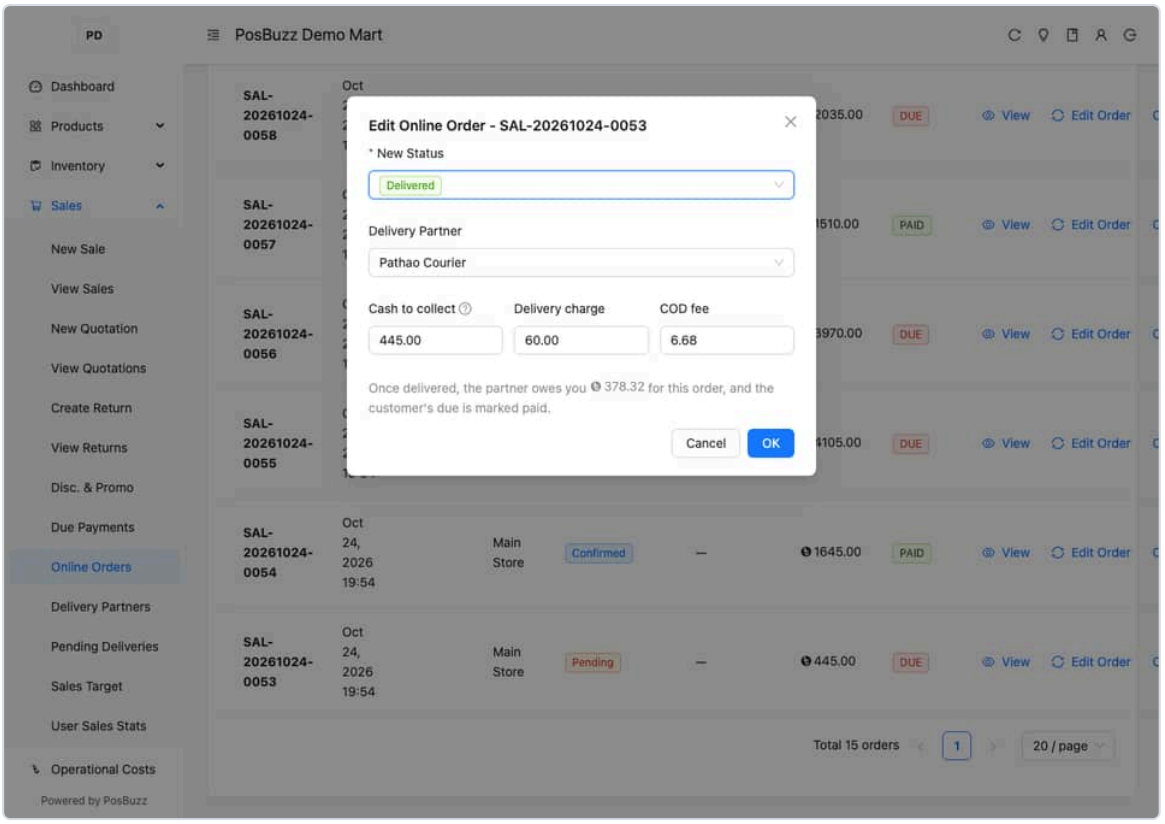

How to give an order to a courier and record what the courier collects

1. Click **Edit Order** on the order.
2. In **Delivery Partner**, choose the courier. **Cash to collect**, **Delivery charge** and **COD fee** fill in by themselves. Change any of them if this order is different. For an order the customer has already paid in full, set **Cash to collect** to 0.

*The Edit Online Order window with the **Delivery Partner** list open (three couriers).*

3. In **New Status**, choose the stage, for example **Out for Delivery**. Click **OK**.
4. When the courier confirms delivery, open **Edit Order** again. Set **New Status** to **Delivered**. Check the amounts and click **OK**.

Status Delivered with Pathao Courier chosen. The grey line shows what the courier owes you.

5. If the parcel came back, open **Edit Order**, set **New Status** to **Returned**, enter the **Return charge**, and click **OK**.

What happens next:

- On **Delivered**, the courier now owes you the cash to collect, and you owe the courier the delivery charge and the COD fee. The customer's remaining due on that sale is marked as paid by "Delivery Partner (COD)".
- On **Returned**, you owe the courier the return charge only.
- Any other status (Pending up to Out for Delivery, and Cancelled) does not change what a courier owes.
- If you change a delivered order later, the courier's account gets correcting lines. Old lines are never edited.

Fields in the Edit Online Order window

Field	Required	Notes
New Status	Yes	Placeholder "Select new status". Shows the eight statuses as coloured tags. If you leave it empty you see "Please select a status".
Delivery Partner	No	Placeholder "No partner". You can clear it. It lists active couriers, plus the courier already on the order if it was made inactive later (shown as "name (inactive)"). If you have no couriers, the list shows a link **Add delivery partners first** that opens the Delivery Partners page.

Field	Required	Notes
Cash to collect	Only when a courier is chosen	Hover the help mark: "What the partner collects from the customer. 0 for a prepaid order." Hidden when the status is Returned. It cannot be more than the customer still owes. It fills in as the order total minus payments already taken.
Delivery charge (named **Return charge** when status is Returned)	Only when a courier is chosen	Fills in from the courier's default delivery charge.
COD fee	Only when a courier is chosen	Hidden when the status is Returned. Fills in as the courier's default COD percentage of the cash to collect, rounded to the paisa.

Under the amounts a grey line explains the result:

- Delivered: "Once delivered, the partner owes you" the cash to collect minus the delivery charge minus the COD fee, "for this order, and the customer's due is marked paid."
- Returned: "A returned order costs you the return charge only."
- Any other status: "Nothing is owed until the order is delivered or returned."

Two banners can appear in the window:

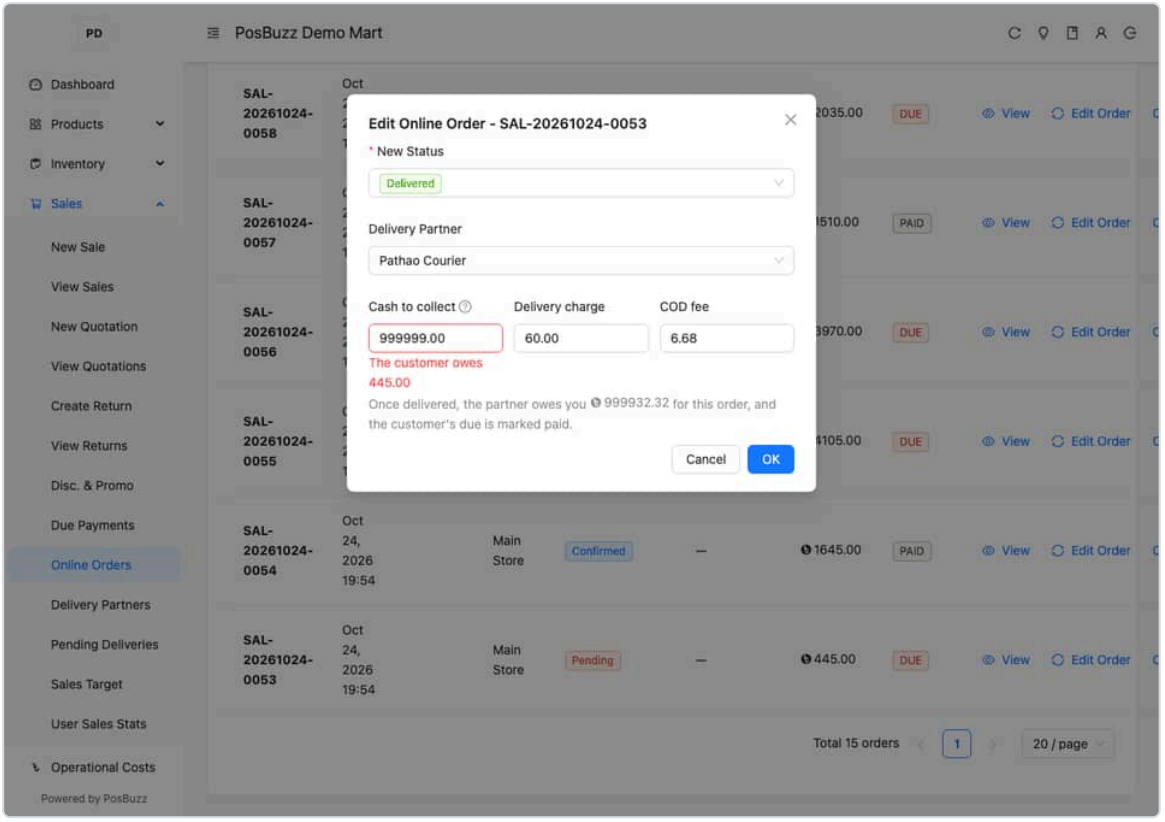

- If the order is already in a payout: "Settled with the partner in payout #N. Void that payout on the partner's page to change the partner or amounts." The courier and the three amounts are greyed out.
- If the order has an old typed-in courier name that is not in your list: "Recorded as "name", which is not in your partner list. Choose a partner to track what is owed."

If you only change the status, an old typed-in courier name is kept.

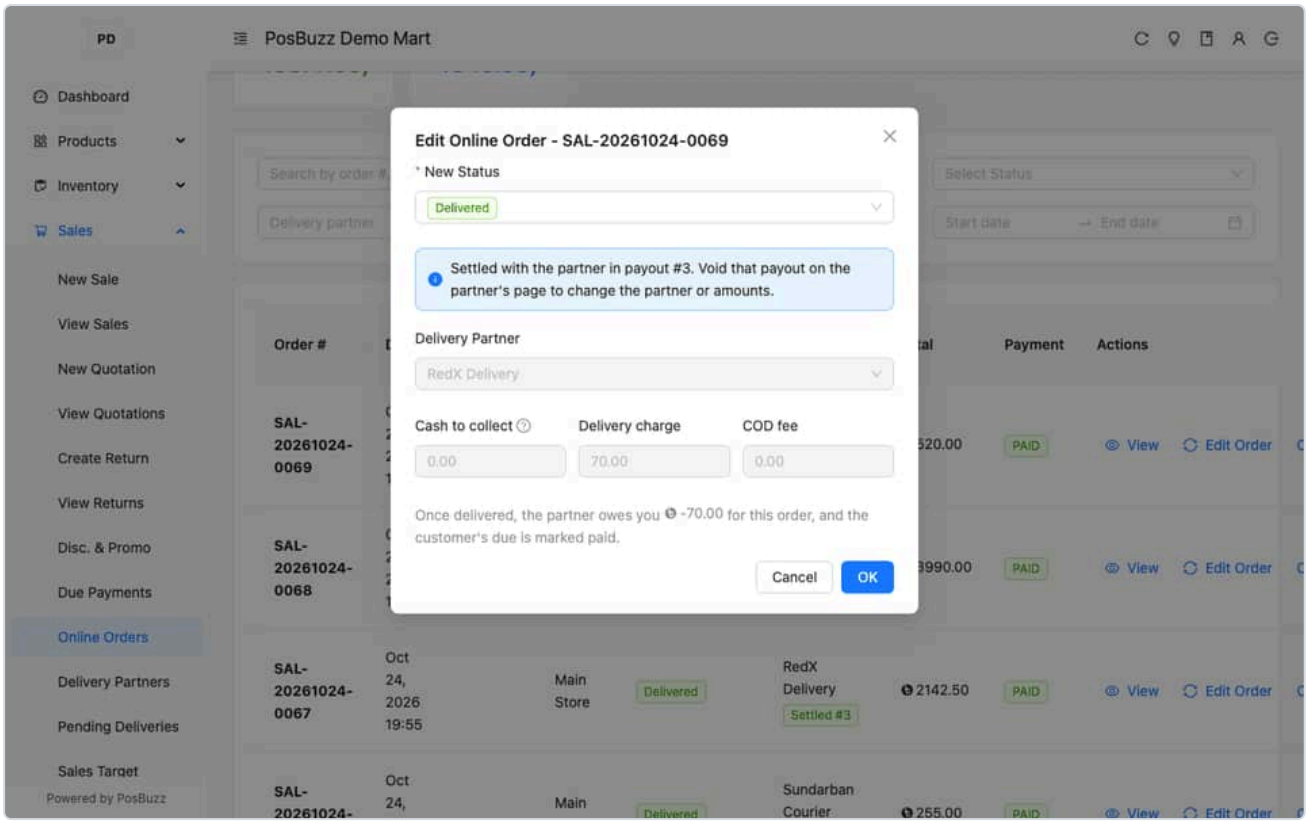

Messages on this screen

Message	What it means	What to do
Order updated successfully	The order was saved.	Nothing.
Please select a status	You left **New Status** empty.	Choose a status.
The customer owes (amount)	**Cash to collect** is more than the customer still owes.	Enter an amount up to the figure shown.
Failed to update order status	The save failed and the server gave no reason.	Try again. If it repeats, tell your manager.
(name) is inactive. Activate the partner first.	The courier was switched off.	Activate the courier on the Delivery Partners page, or choose another.
Cash to collect (X) is more than the customer still owes (Y)	Same as above, from the server.	Lower the amount.

Message	What it means	What to do
The amount the partner collects is more than the customer still owes on this order	Same problem.	Lower the amount.
This order has returns against it, so the cash the partner collected can no longer change	A return was made on this order.	Leave the cash amount as it is.
This order is settled in payout #N. Void that payout first to change it.	The order is already paid out.	Void the payout on the courier's page, then edit the order.
Online order not found / Delivery partner not found	The record was removed.	Refresh the page.
Failed to load the PDF	The delivery slip could not be made.	Try again.

*Typing too large a **Cash to collect** shows "The customer owes 445.00" in red.*

An order already paid out. The blue banner explains it, and the courier and amounts are greyed out.

> **Good to know:** Once an order is part of a payout, its courier and amounts are locked until you void that payout.

Delivery Partners

*Page title: **Delivery Partners**. Menu name: **Delivery Partners**.*

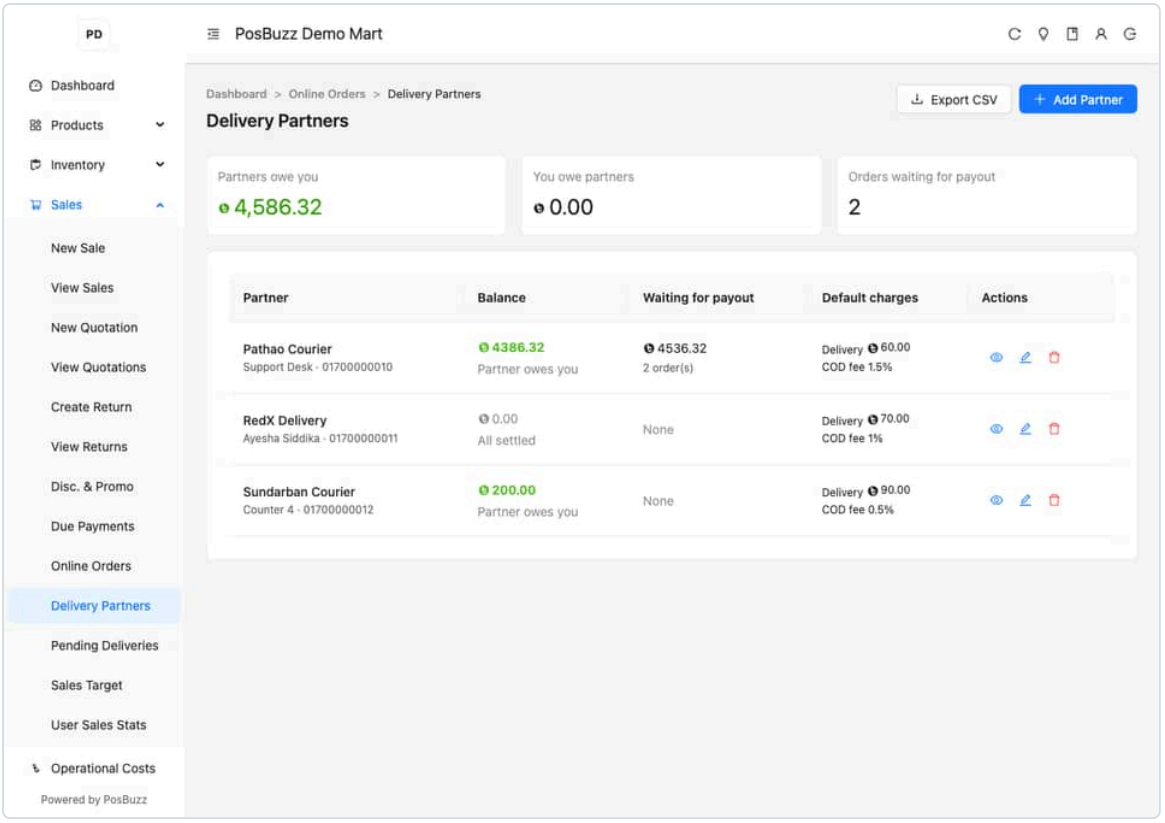

What it is

Your list of courier companies, such as Pathao, Steadfast or RedX, with their default charges. It shows how much each courier owes you (cash they collected and have not paid over) or how much you owe them.

Where to find it

Menu: **Sales** > **Delivery Partners**. You need the **Sales** permission. You can also reach it from the **Add delivery partners first** link in the Edit Online Order window.

What you see

The Delivery Partners list with the three summary cards and three couriers.

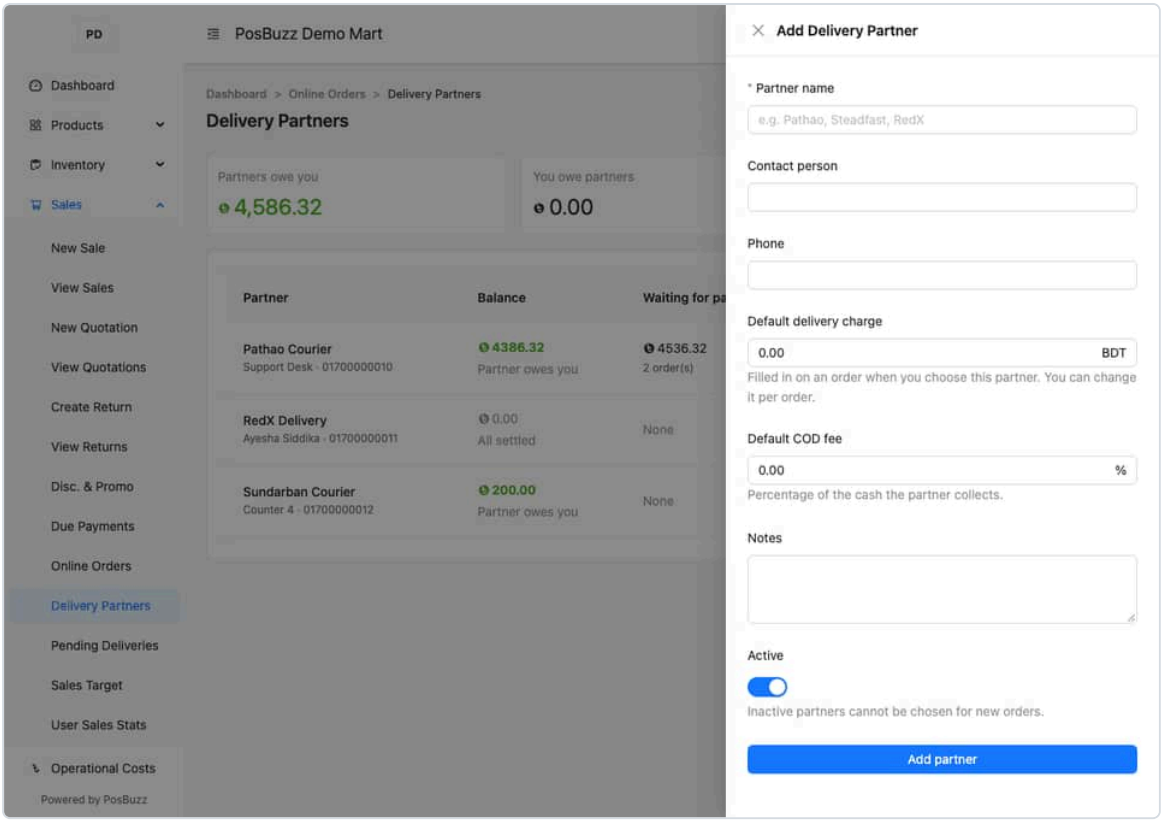

- Top-right buttons: **Export CSV** (greyed out when you have no partners) and **Add Partner**.
- Summary cards:
  - **Partners owe you**: the total of all couriers who owe you money (green).
  - **You owe partners**: the total of all couriers you owe money to (red when not zero).
  - **Orders waiting for payout**: the number of delivered or returned orders that are not yet in a payout.
- Table columns:

Column	What it shows
Partner	The name as a link to the courier's page. A grey **Inactive** tag if switched off. The contact person and phone under it.
Balance	The amount without a sign, with a line under it: "Partner owes you" (green), "You owe partner" (red) or "All settled" (grey).
Waiting for payout	The net amount of orders not yet paid out, with "N order(s)" under it. Shows "None" when there are none.
Default charges	"Delivery" with an amount, and "COD fee" with a percentage.
Actions	Eye icon (view), pencil icon (edit), red bin icon (delete).

There are 20 rows per page. Page buttons are hidden when everything fits on one page. If the list cannot load you see "Failed to load delivery partners".

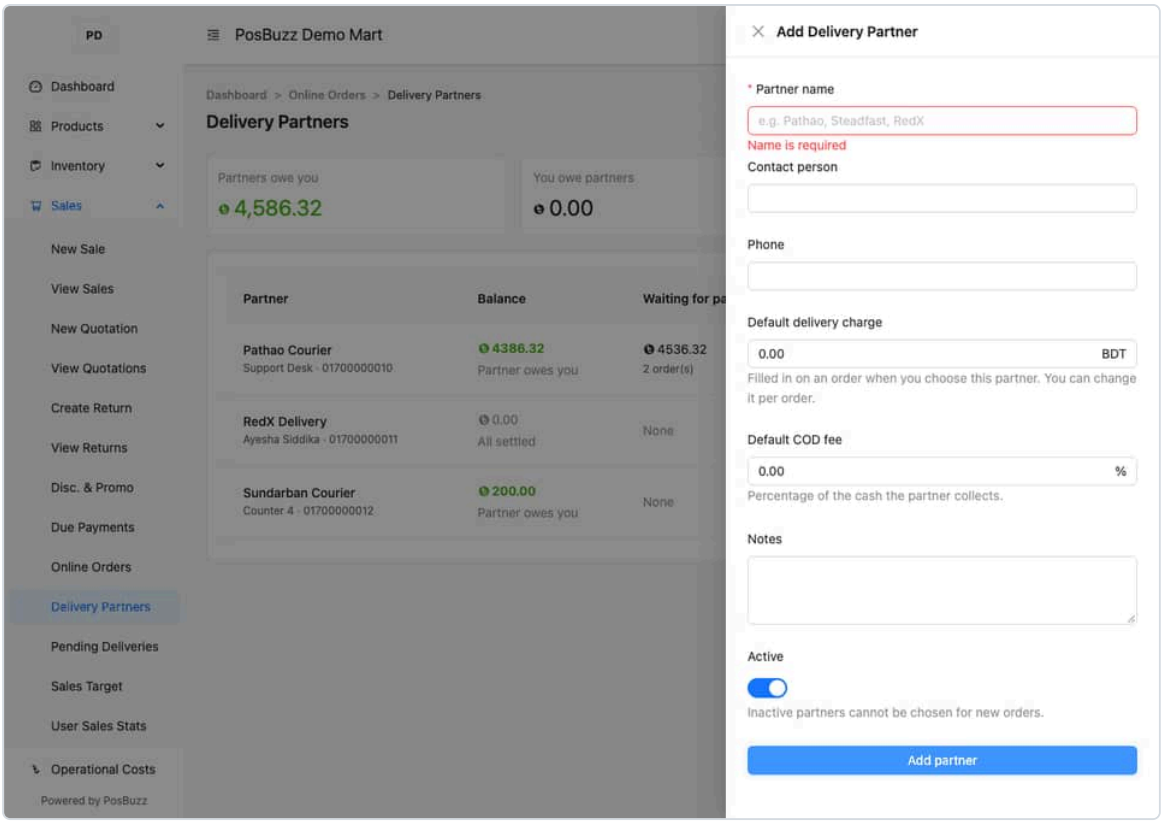

How to add a courier

1. Go to **Sales** > **Delivery Partners**.
2. Click **Add Partner**. A drawer titled "Add Delivery Partner" opens on the right.

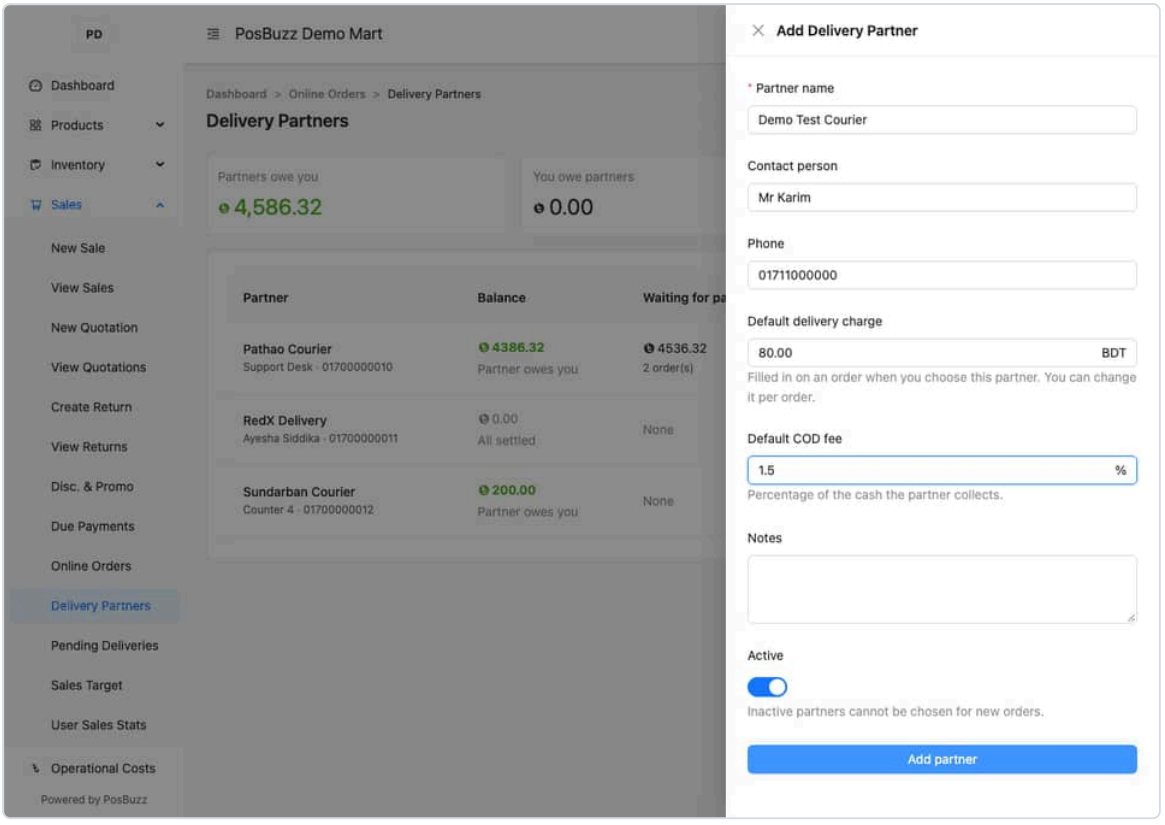

The empty Add Delivery Partner drawer.

3. Fill in the fields in the table below.
4. Click **Add partner**.

*Clicking **Add partner** with the name empty shows "Name is required".*

The drawer filled in, ready to save.

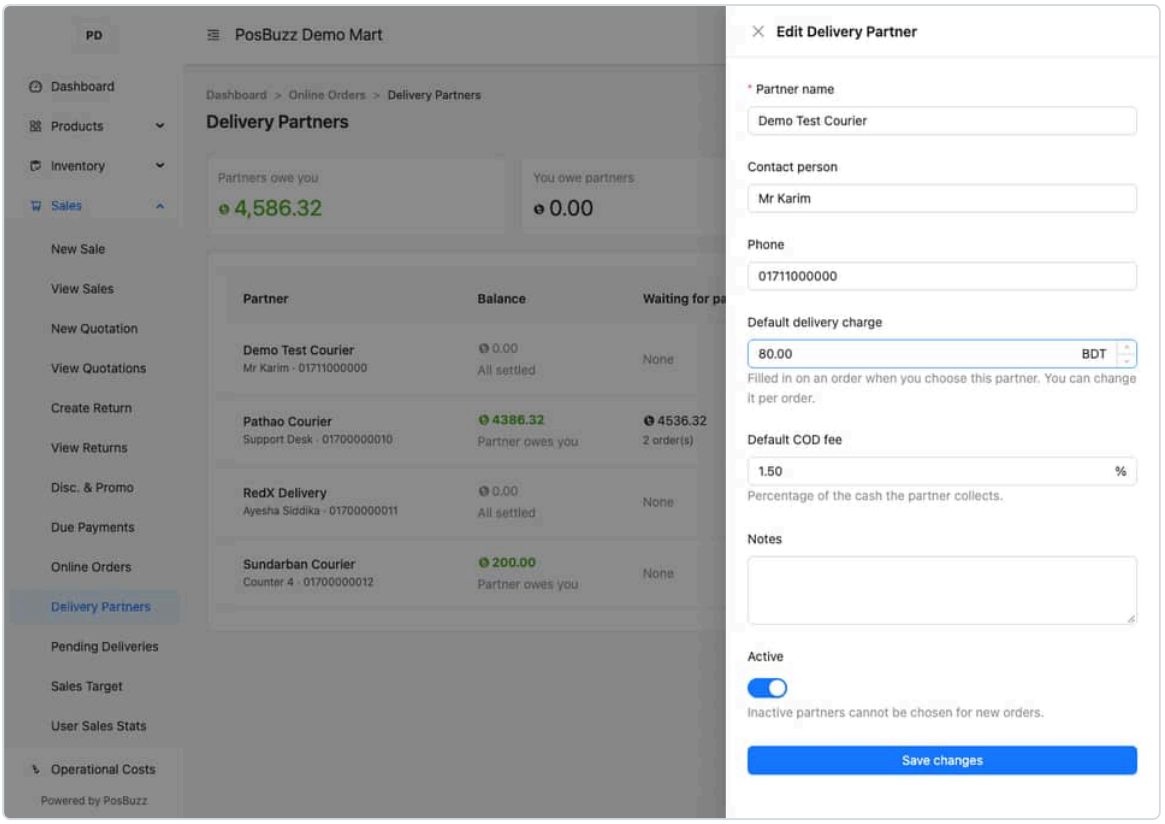

What happens next: the drawer closes, you see "Delivery partner added", and the courier appears in the list.

Field	Required	Notes
Partner name	Yes	Up to 200 characters. Example shown: "e.g. Pathao, Steadfast, RedX". It cannot be blank or only spaces ("Name is required"). Each name can be used once.
Contact person	No	Up to 200 characters.
Phone	No	Up to 50 characters. Only digits, spaces and - + ( ). Otherwise "Enter a valid phone number".
Default delivery charge	No	Starts at 0. Taka. Help: "Filled in on an order when you choose this partner. You can change it per order."
Default COD fee	No	Starts at 0. A percentage from 0 to 100. Help: "Percentage of the cash the partner collects."
Notes	No	Up to 1000 characters.
Active	-	A switch, on by default. Help: "Inactive partners cannot be chosen for new orders."

How to change a courier or its default charges

1. Click the pencil icon on the courier's row. The drawer "Edit Delivery Partner" opens.
2. Change what you need.
3. Click **Save changes**.

What happens next: you see "Delivery partner updated". Orders that already have amounts keep them. Only orders where you choose this courier afterwards use the new defaults.

*The Edit Delivery Partner drawer, with the button **Save changes**.*

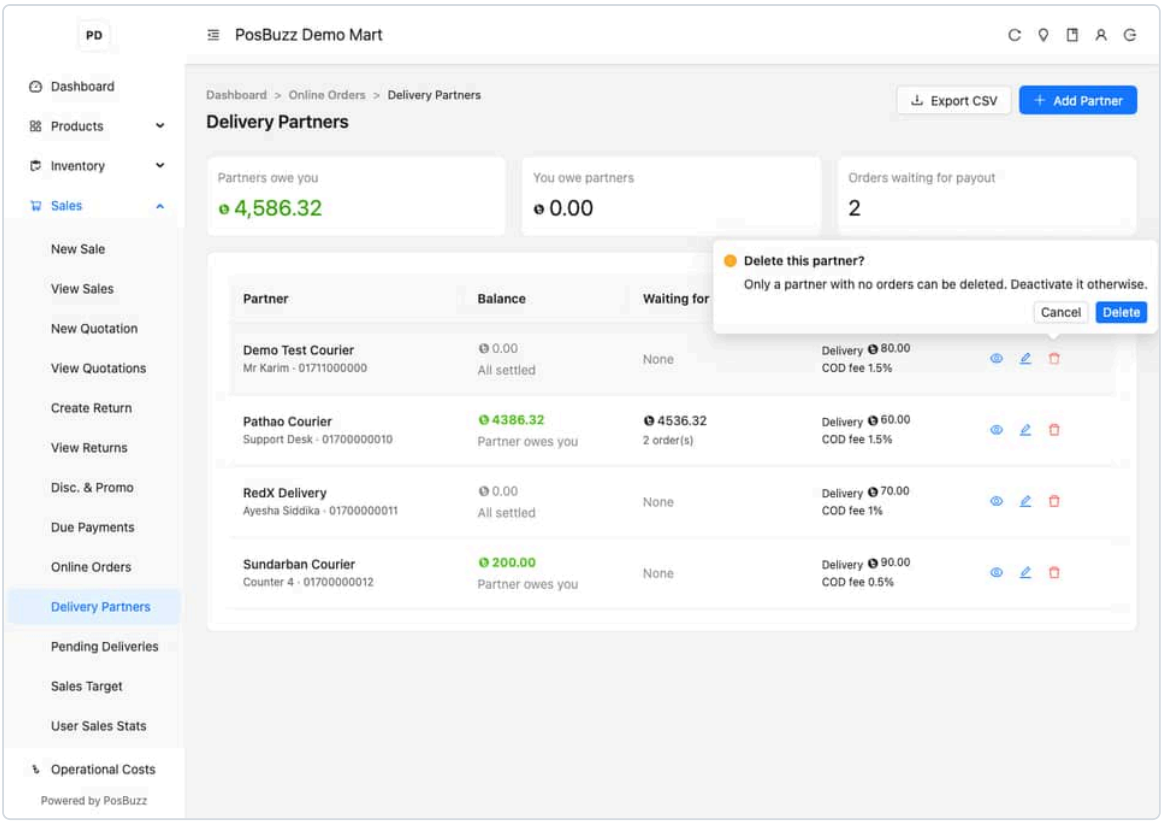

How to stop using a courier

1. Click the pencil icon on the courier's row.
2. Switch **Active** off.
3. Click **Save changes**.

What happens next: the courier cannot be chosen for new orders. Its history and balance stay.

How to delete a courier

1. Click the red bin icon on the courier's row.
2. The question "Delete this partner?" appears with the text "Only a partner with no orders can be deleted. Deactivate it otherwise."

The delete question appears next to the bin icon.

3. Click **Delete**. Click **Cancel** to keep it.

What happens next: you see "Delivery partner deleted" and the row disappears.

How to download the list

1. Click **Export CSV**.

What happens next: a file named `delivery-partners-` followed by today's date is saved. It opens in Excel and has these columns: Partner, Phone, Active (Yes or No), Balance (BDT), Who owes, Unsettled orders and Unsettled amount (BDT).

Messages on this screen

Message	What it means	What to do
Delivery partner added / Delivery partner updated / Delivery partner deleted	The action worked.	Nothing.
Name is required	The name is empty or only spaces.	Type a name.
Enter a valid phone number	The phone has letters or odd characters.	Use digits, spaces, - + ( ) only.
A delivery partner named "name" already exists	The name is taken.	Use a different name.

Message	What it means	What to do
This partner has N order(s) and M ledger row(s). Deactivate it instead so its history is kept.	The courier has been used, so it cannot be deleted.	Switch **Active** off instead.
Failed to save partner / Failed to delete partner	The action failed with no reason given.	Try again.
Failed to load delivery partners	The list did not load.	Refresh the page.

Delivery Partner page

Page title: the courier's name. The browser tab reads "Delivery Partner - name".

What it is

One courier's account. It shows what they owe you, which delivered or returned orders are not yet paid out, every money movement, and the payouts you recorded. You record money received, money paid and corrections here.

Where to find it

Menu: **Sales** > **Delivery Partners**, then click a courier's name or the eye icon. You can also click the courier's name in the Online Orders list. You need the **Sales** permission.

What you see

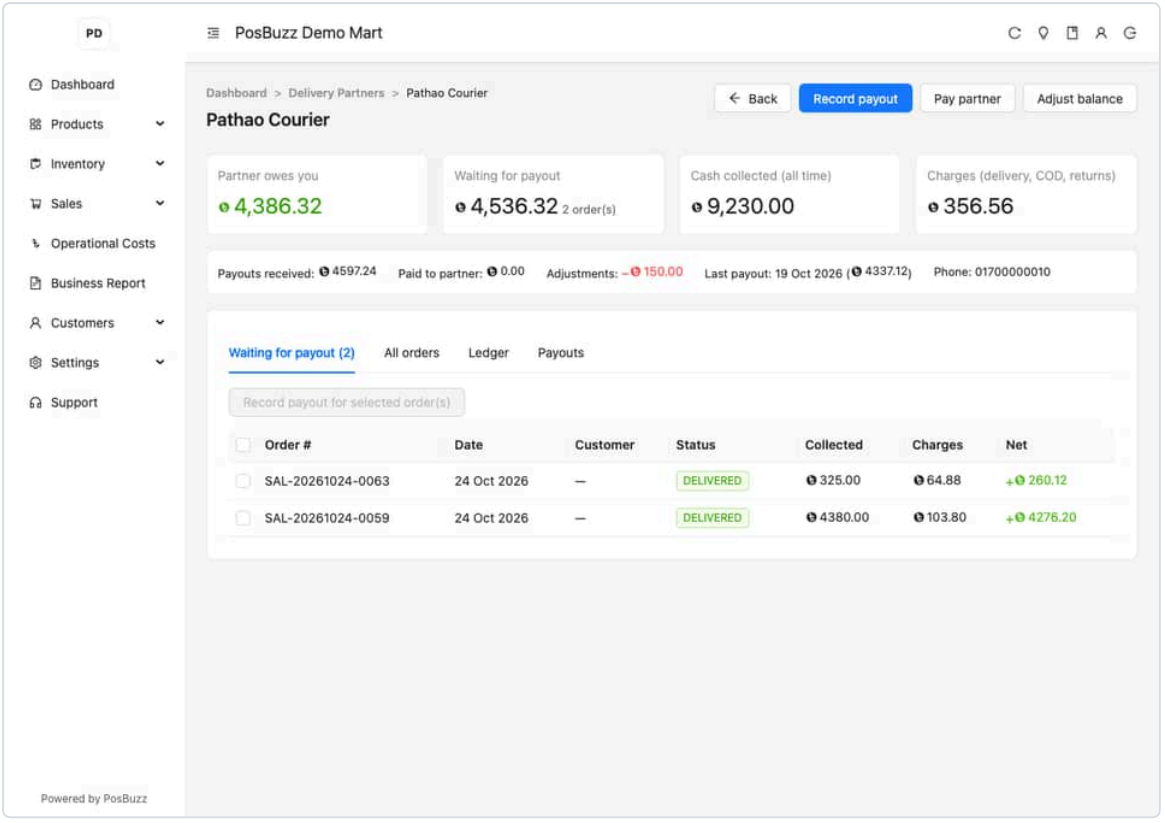

- Top-right buttons: **Back** (returns to Delivery Partners), **Record payout**, **Pay partner**, **Adjust balance**.
- For an inactive courier, a blue banner: "This partner is inactive and cannot be chosen for new orders."
- Four cards:
  1. The balance card. Its title is "Partner owes you" (green figure), "You owe partner" (red figure) or "All settled". The figure has no minus sign.
  2. **Waiting for payout**: the net amount of orders not yet paid out, with "N order(s)".
  3. **Cash collected (all time)**: all the cash the courier collected on delivered orders.
  4. **Charges (delivery, COD, returns)**: delivery charges, COD fees and return charges added together.
- A line of small text: "Payouts received", "Paid to partner", "Adjustments" (green plus or red minus), "Last payout" with date and amount (only if there is one), and "Phone" (only if saved).
- Four tabs:

Tab	What it shows
Waiting for payout (N) (opens first)	The button **Record payout for N order(s)** (it reads "Record payout for selected order(s)" and is greyed out until you tick a row). Grey text "Selected net: amount" when rows are ticked. A table with tick boxes and columns **Order #** (link to the sale), **Date**, **Customer**, **Status**, **Collected** (cash collected, only for Delivered), **Charges** (delivery charge plus COD fee for Delivered, return charge for Returned), **Net** (green plus or red minus). Up to 50 rows per page. Empty text: "No delivered or returned orders are waiting for a payout".

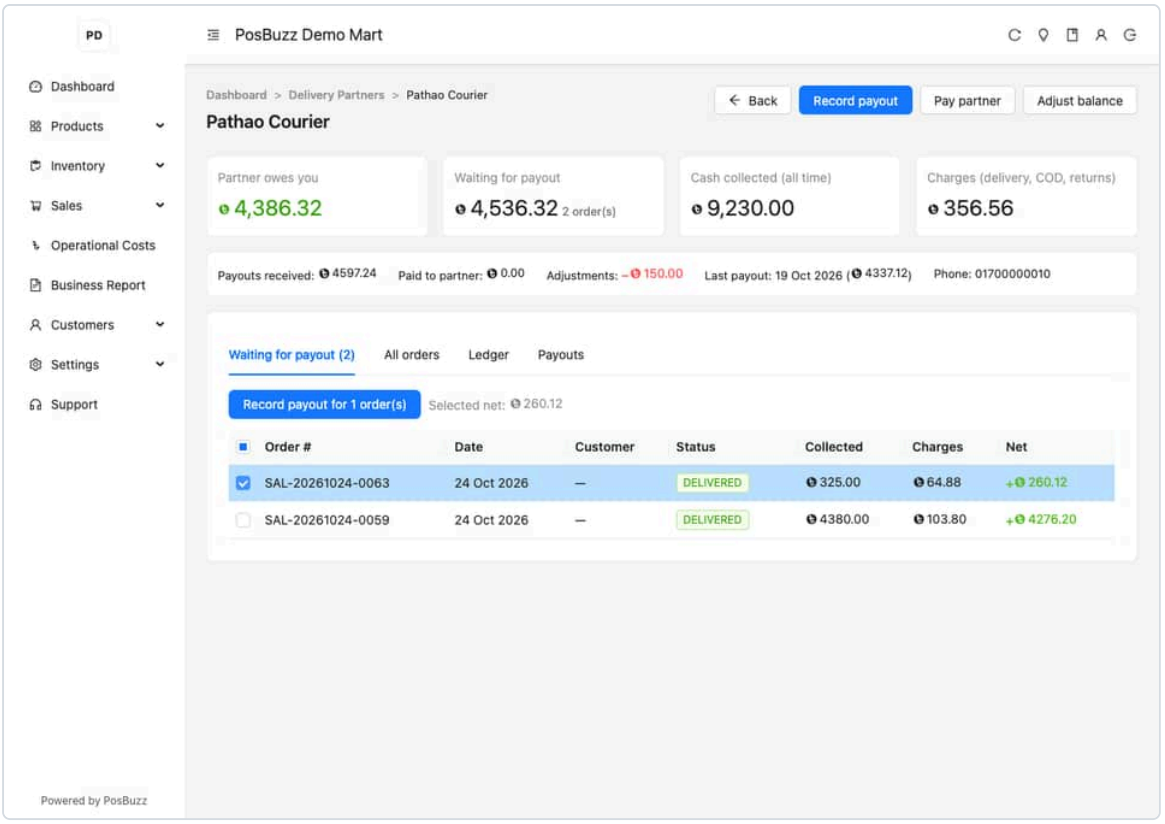

Tab	What it shows
All orders	Every order ever given to this courier, with the same columns plus **Payout** (a green tag "#N" if paid out, or grey "Unsettled"). 20 per page.
Ledger	Every money line: **Date** (with time), **Entry**, **Order**, **Amount** (green plus or red minus) and **Balance** (running balance after that line). 20 per page.
Payouts	Columns **#** (payout number), **Date**, **Type**, **Amount**, **Method** (with "Ref" and the reference under it), **Orders** (how many it covers) and **Status**. Status shows a red **Voided** tag with the reason, or a red **Void** button.

Ledger entry names are: Cash collected, Delivery charge, COD fee, Return charge, Payout received, Paid to partner, Adjustment, Payout voided. The note under an entry reads like "Cash collected for order #S-1001", or "Delivery charge for order #S-1001: corrected, order is returned".

If the courier cannot be loaded, a red banner shows the reason ("Failed to load delivery partner") with a **Back** button.

The Pathao Courier page. The four cards, the totals line and the four tabs show at the top.

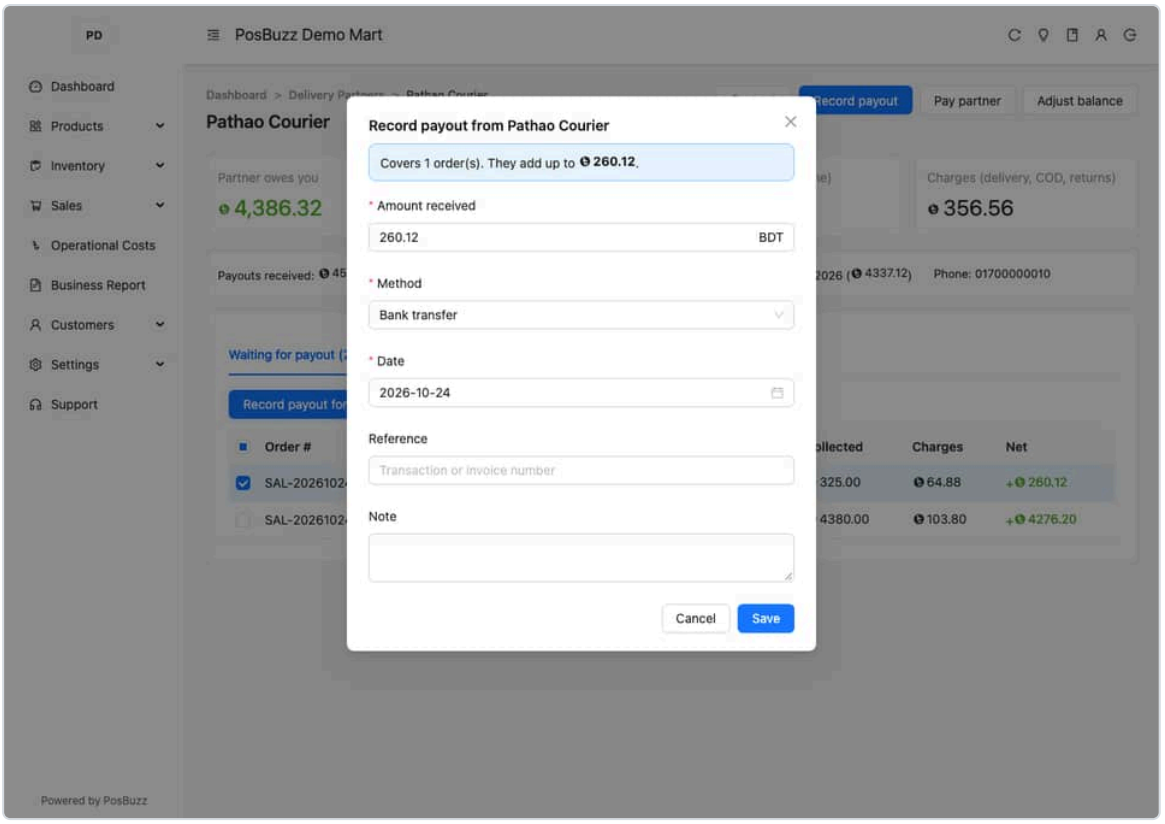

*One order ticked. The button reads **Record payout for 1 order(s)** and **Selected net** shows 260.12.*

How the balance works

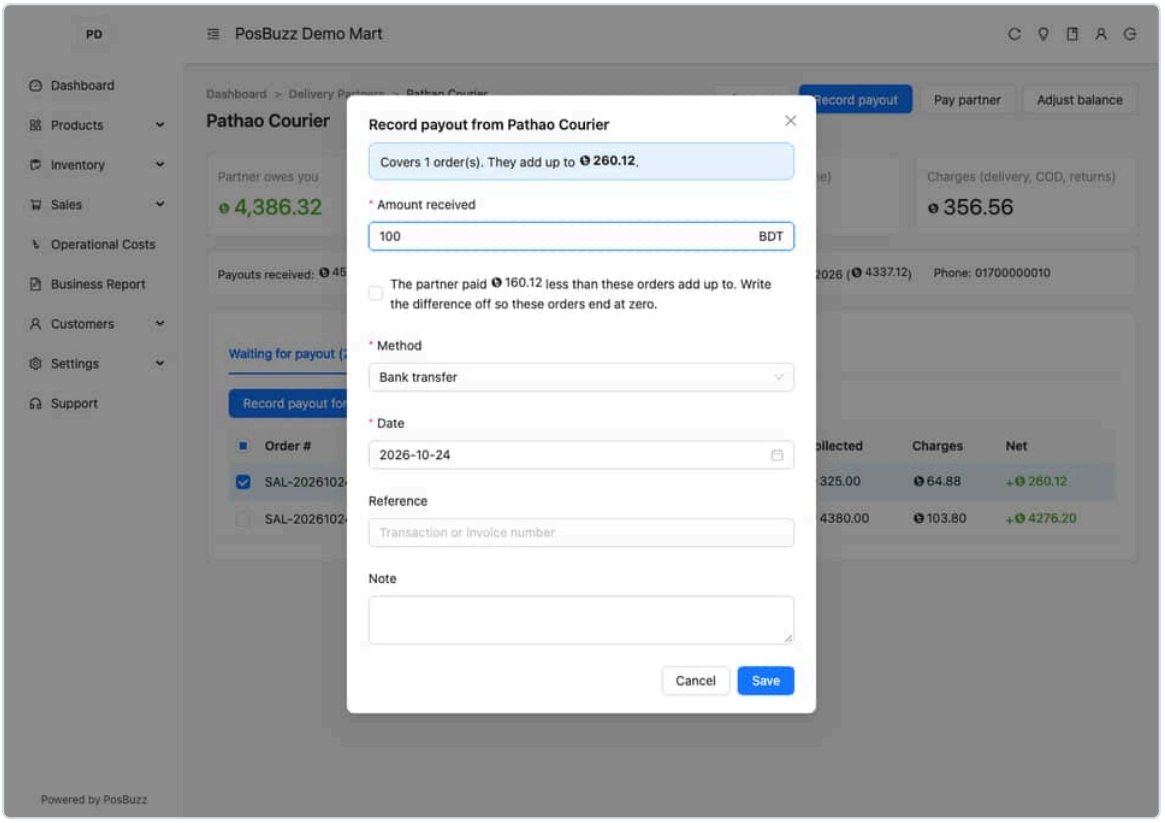

- The balance is everything the courier owes you minus everything you owe them. A positive balance means the courier owes you. A negative balance means you owe the courier.
- A **Delivered** order adds the cash collected and takes off the delivery charge and the COD fee. The net of one order is cash collected minus delivery charge minus COD fee.
- A **Returned** order takes off the return charge.
- A payout received lowers the balance by its amount. A payment to the courier raises it by its amount. An adjustment raises or lowers it as you choose. Voiding a payout adds its amount back.
- Example: an order totals 1,000 taka and is unpaid. The courier's default delivery charge is 60 and the COD fee is 1%. Cash to collect is 1,000. The COD fee is 10.00. The net is +930. Another order comes back with a return charge of 60, so the net is -60. The balance is 870. The courier sends 870 by bank. You tick both orders, record the payout, and the balance becomes 0 ("All settled").

How to record a payout from a courier

1. Open the courier. Stay on the **Waiting for payout** tab.
2. Tick the orders that the courier's statement covers. Compare with their invoice. **Selected net** shows the total.
3. Click **Record payout for N order(s)**. The window "Record payout from" and the courier name opens.
4. Check **Amount received**. It is filled with the total of the ticked orders. If the courier paid a different amount, type what you really received.

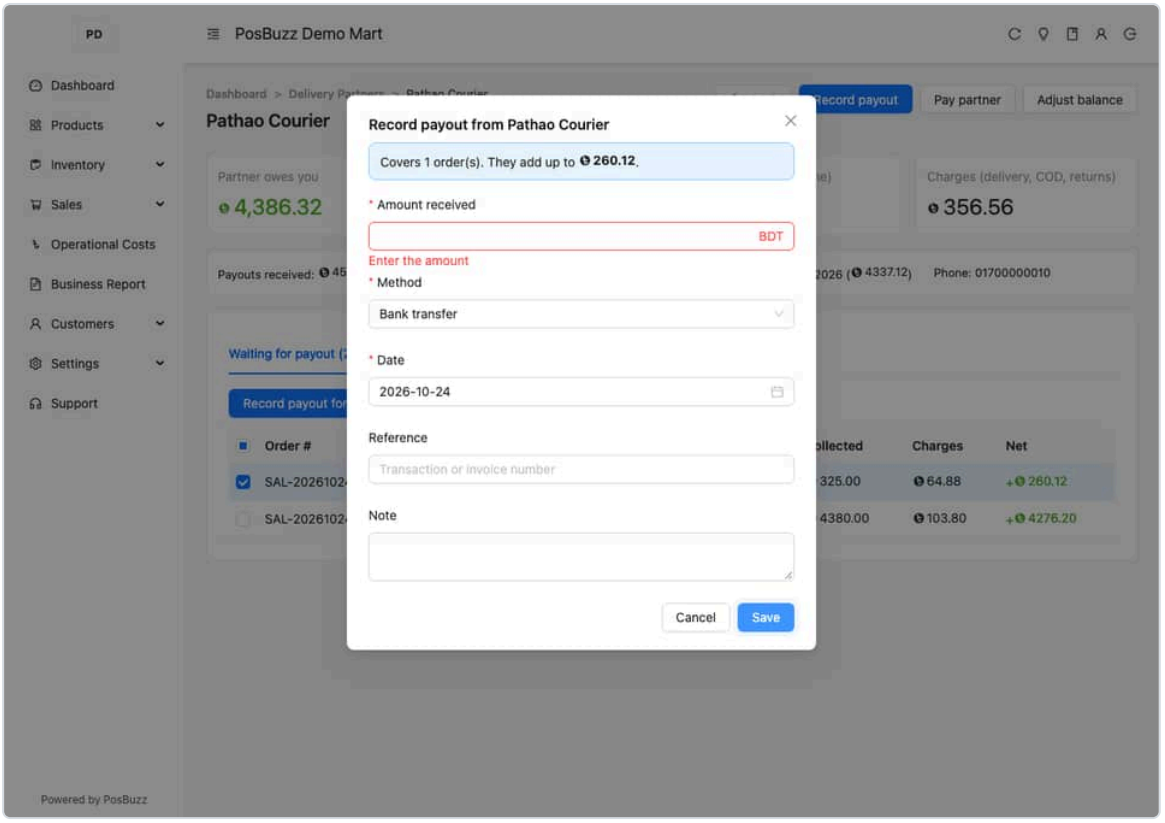

The Record payout window.

After typing 100, the write-off tick box appears and says the courier paid 160.12 less.

5. If the amount is different and you accept the gap, tick the write-off box.
6. Choose the **Method**, check the **Date**, and add the courier's **Reference** if they gave one.
7. Click **Save**.

What happens next: you see "Payout recorded". The orders leave the **Waiting for payout** tab. They show "Settled #N" in Online Orders. The balance goes down by the amount.

*Clearing **Amount received** and clicking **Save** shows "Enter the amount".*

How to record money received without choosing orders

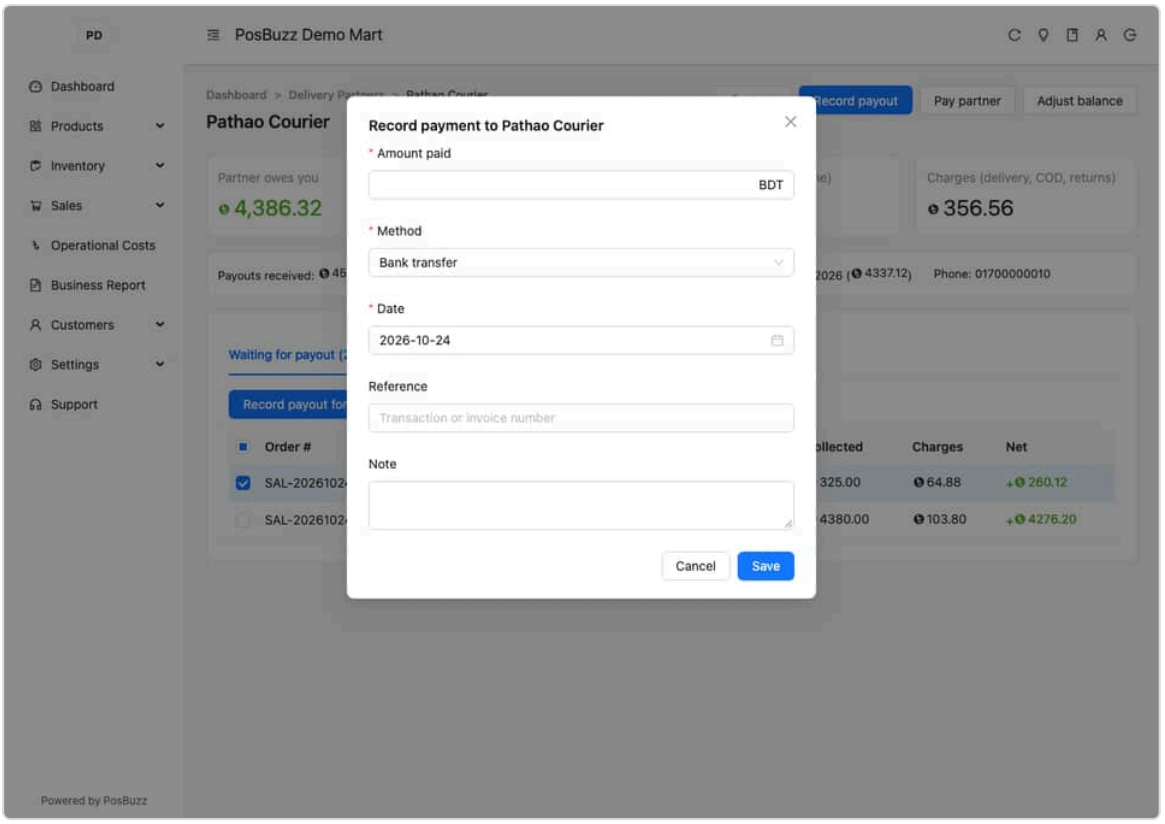

1. Click **Record payout** at the top, with no rows ticked.
2. A banner says: "No orders chosen: the payout lowers the balance but no order is marked settled. To settle orders, pick them in the 'Waiting for payout' tab first."
3. Enter **Amount received** and click **Save**.

What happens next: the balance goes down but no order is marked as settled.

How to record that you paid the courier

Use this when you owe the courier money, for example return charges.

1. Click **Pay partner**. The window "Record payment to" and the courier name opens.
2. Enter **Amount paid**. It is filled with the amount you owe, if you owe them.

*The Record payment window. **Amount paid** is empty here because this courier owes you money, not the other way round.*

3. Choose **Method** and **Date**. Add a **Reference** or **Note** if you wish.
4. Click **Save**.

What happens next: you see "Payment to partner recorded". The balance moves up toward zero.

Fields in the payout and payment windows

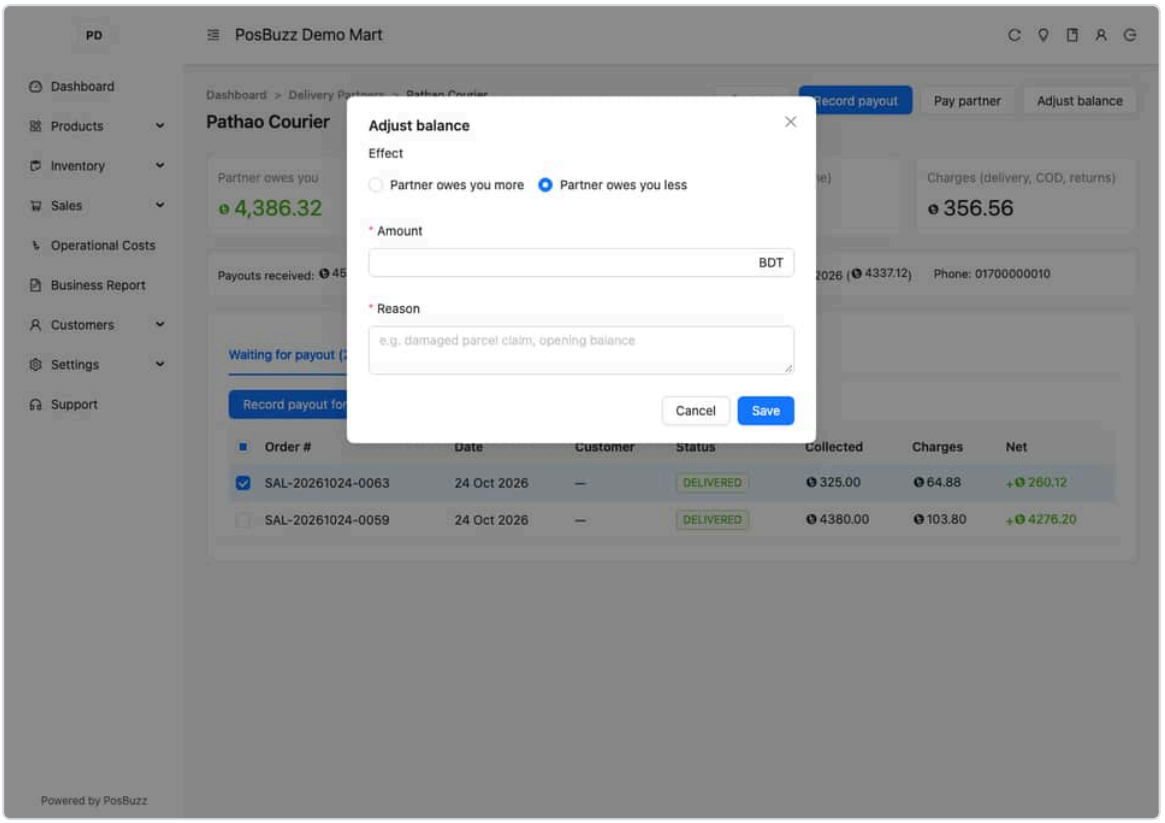

Field	Required	Notes
Amount received (payout) or **Amount paid** (payment)	Yes	Minimum 0.01, two decimals. If empty: "Enter the amount". With orders ticked it starts as their net total. Otherwise it starts as the balance the courier owes you (payout) or the amount you owe them (payment).
Write-off tick box	No	Appears only when orders are ticked and the amount differs from their total. Text: "The partner paid (difference) less/more than these orders add up to. Write the difference off so these orders end at zero." Not ticked at the start.
Method	Yes	Bank transfer (the start choice), MFS (bKash / Nagad), Cash, Cheque, Card, Mobile money.
Date	Yes	Starts as today.
Reference	No	Up to 200 characters. Placeholder "Transaction or invoice number".
Note	No	Up to 1000 characters.

With orders ticked, a banner reads "Covers N order(s). They add up to (amount)."

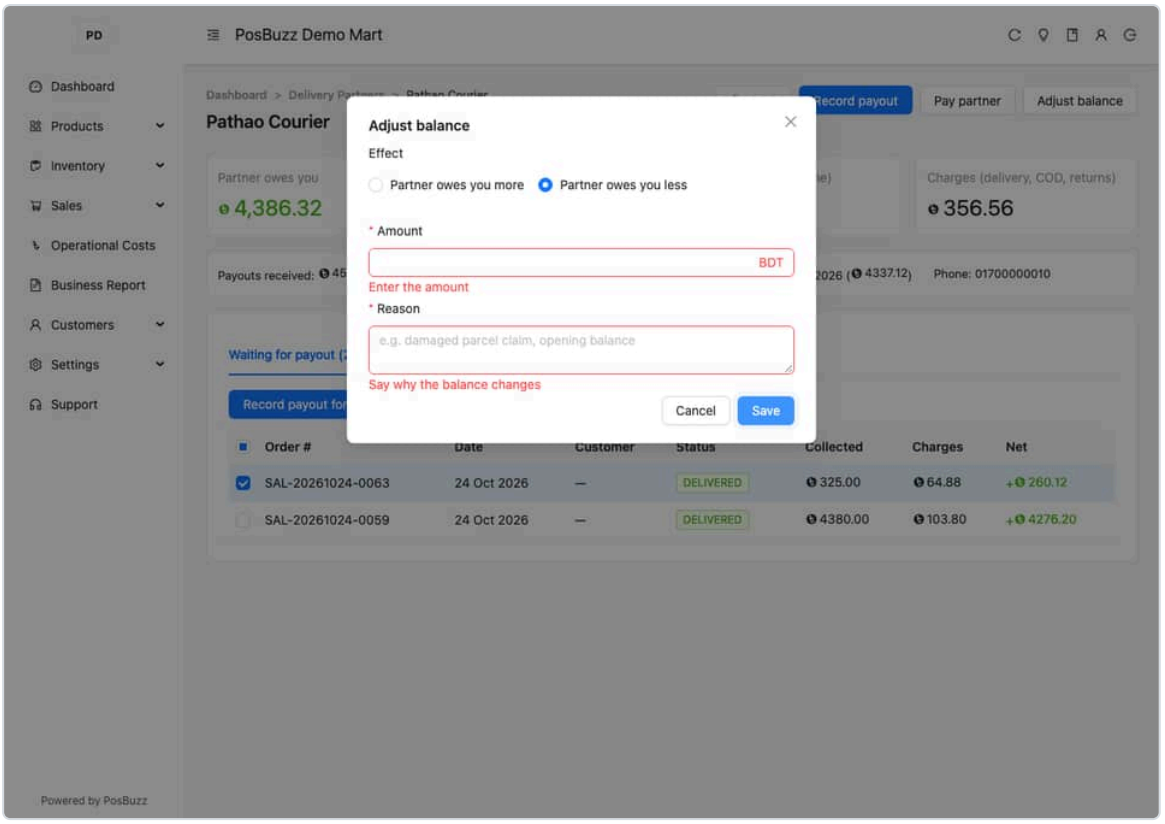

How to correct the balance

1. Click **Adjust balance**.
2. Under **Effect**, choose "Partner owes you more" or "Partner owes you less" ("less" is chosen at the start).
3. Enter the **Amount**.
4. Type the **Reason**.
5. Click **Save**.

What happens next: you see "Adjustment recorded" and the balance changes. The change shows in the **Ledger** tab as "Adjustment".

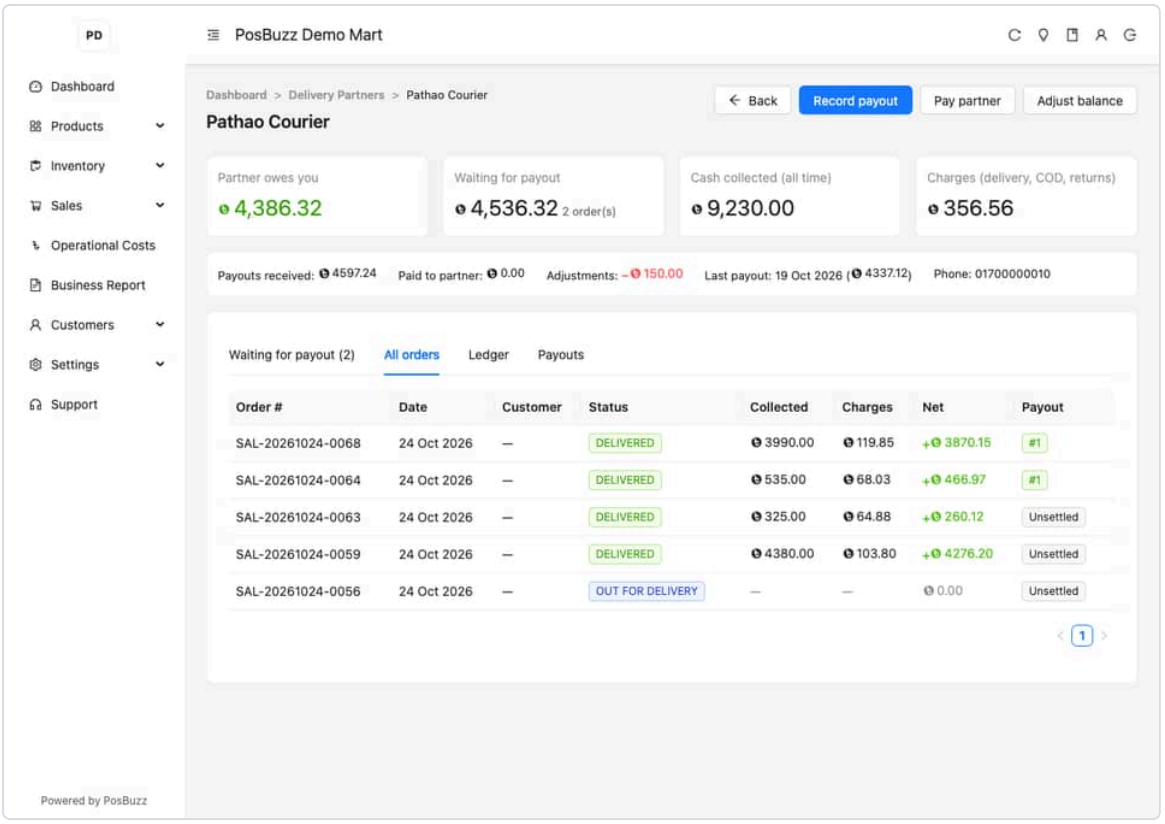

The Adjust balance window.

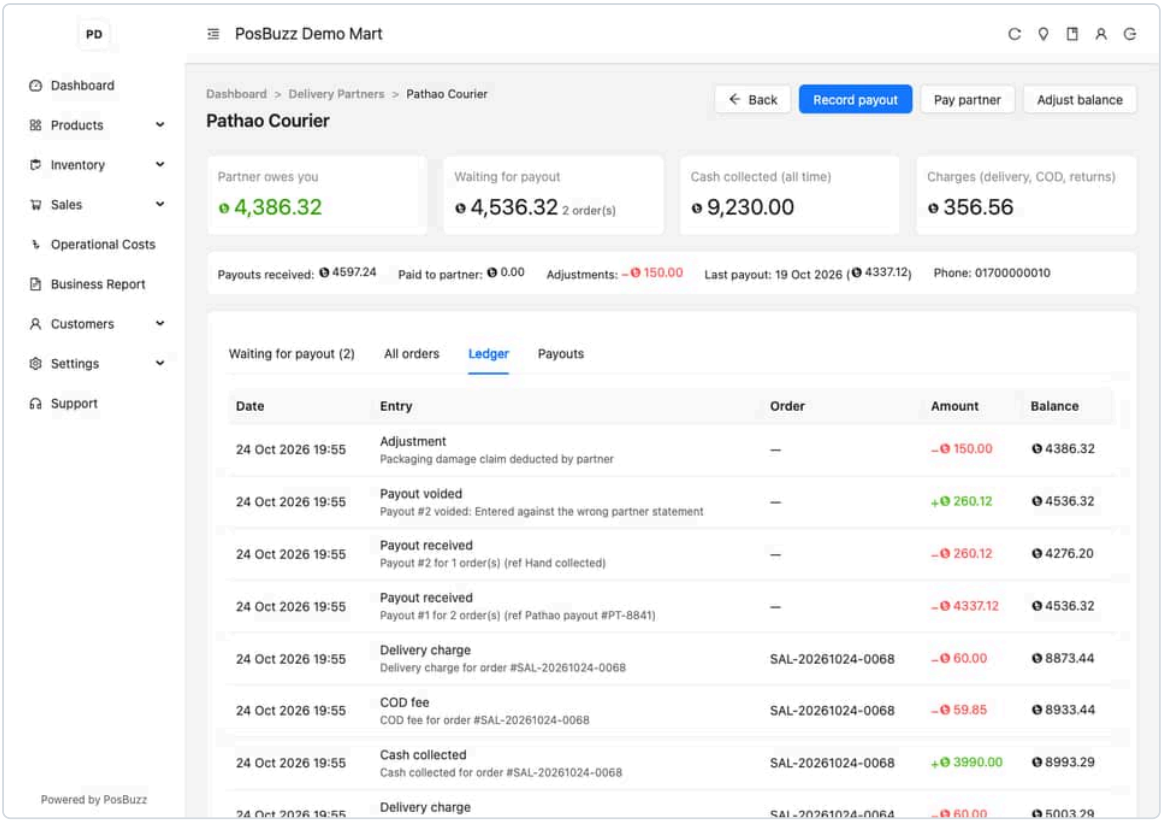

*Clicking **Save** with nothing filled in shows "Enter the amount" and "Say why the balance changes".*

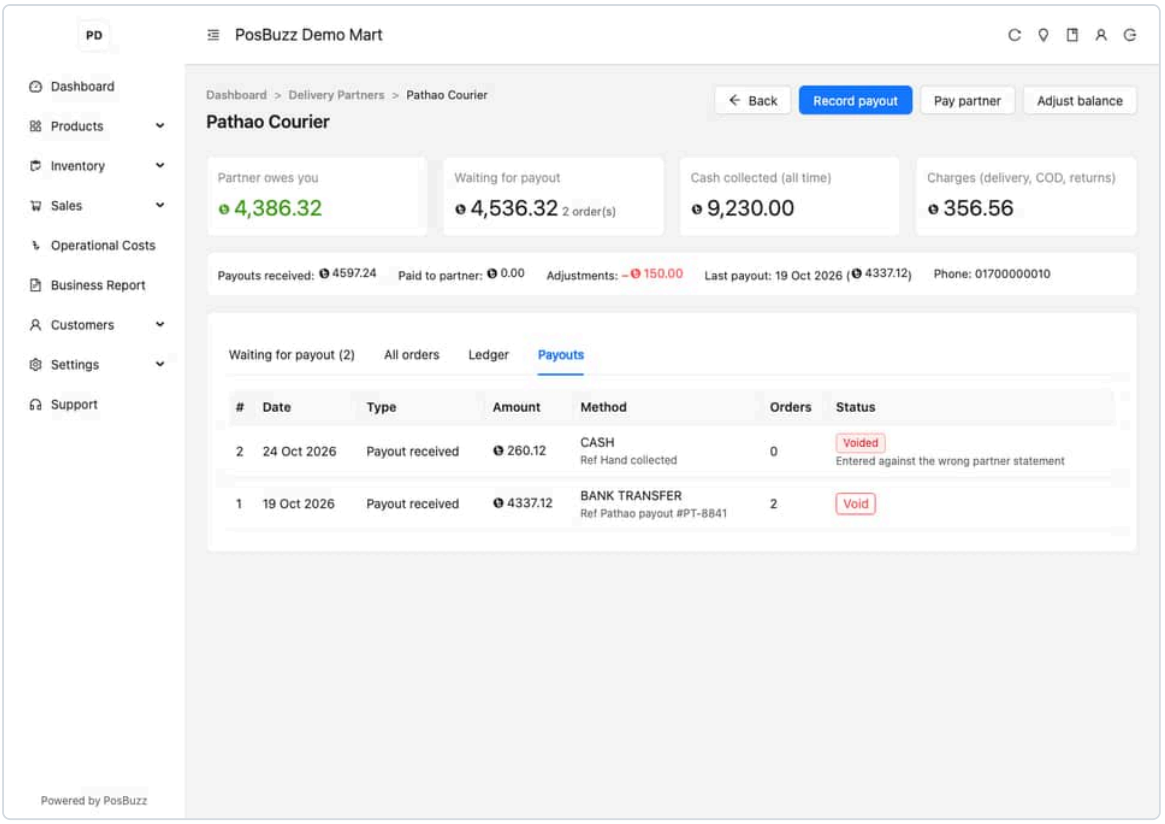

Field	Required	Notes
Effect	-	Two choices, as above.
Amount	Yes	Minimum 0.01. If empty: "Enter the amount".
Reason	Yes	Up to 500 characters. Placeholder "e.g. damaged parcel claim, opening balance". If empty or only spaces: "Say why the balance changes".

*The **All orders** tab, with the **Payout** column.*

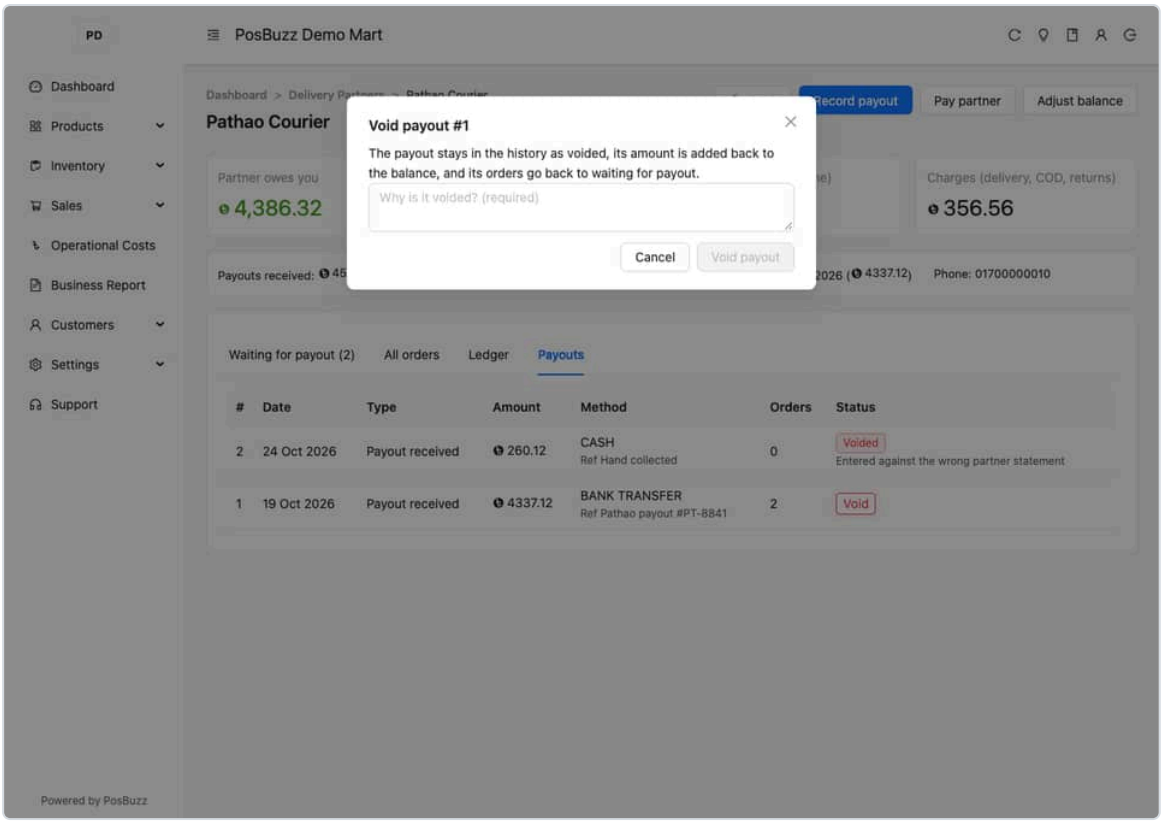

*The **Ledger** tab with each money line and the running balance.*

*The **Payouts** tab. Payout 2 is voided and shows its reason. Payout 1 still has a red **Void** button.*

How to undo a wrong payout

1. Open the **Payouts** tab.
2. Click the red **Void** button on the payout. The window "Void payout #N" opens. It says: "The payout stays in the history as voided, its amount is added back to the balance, and its orders go back to waiting for payout."
3. Type the reason in the box "Why is it voided? (required)". Up to 500 characters.
4. Click the red **Void payout** button. It stays greyed out until you type a reason.

The Void payout window. The red button is greyed out until a reason is typed.

What happens next: you see "Payout voided. Its orders are unsettled again." The payout stays in the list as **Voided** with the reason. Record the payout again correctly.

Messages on this screen

Message	What it means	What to do
Payout recorded / Payment to partner recorded / Adjustment recorded	The action worked.	Nothing.
Enter the amount	The amount is empty.	Type an amount of at least 0.01.
Say why the balance changes	The reason is empty.	Type a reason.
Choose the orders this payout covers to write off a difference	You ticked the write-off box without choosing orders.	Tick orders in the **Waiting for payout** tab first.
Some chosen orders are not unsettled delivered or returned orders of this partner. Refresh and choose again.	The order list changed since you opened the page.	Refresh the page and tick the orders again.
Failed to record payout / Failed to record adjustment	The save failed with no reason given.	Try again.
This payout is already voided / Payout not found	The payout was already undone or removed.	Refresh the page.

Message	What it means	What to do
Payout voided. Its orders are unsettled again.	The void worked.	Record the correct payout if needed.
Failed to void payout	The void failed.	Try again.
Failed to load delivery partner	The courier page did not load.	Click **Back** and open it again.

Pending Deliveries

*Page title: **Pending Deliveries**. Menu name: **Pending Deliveries**.*

What it is

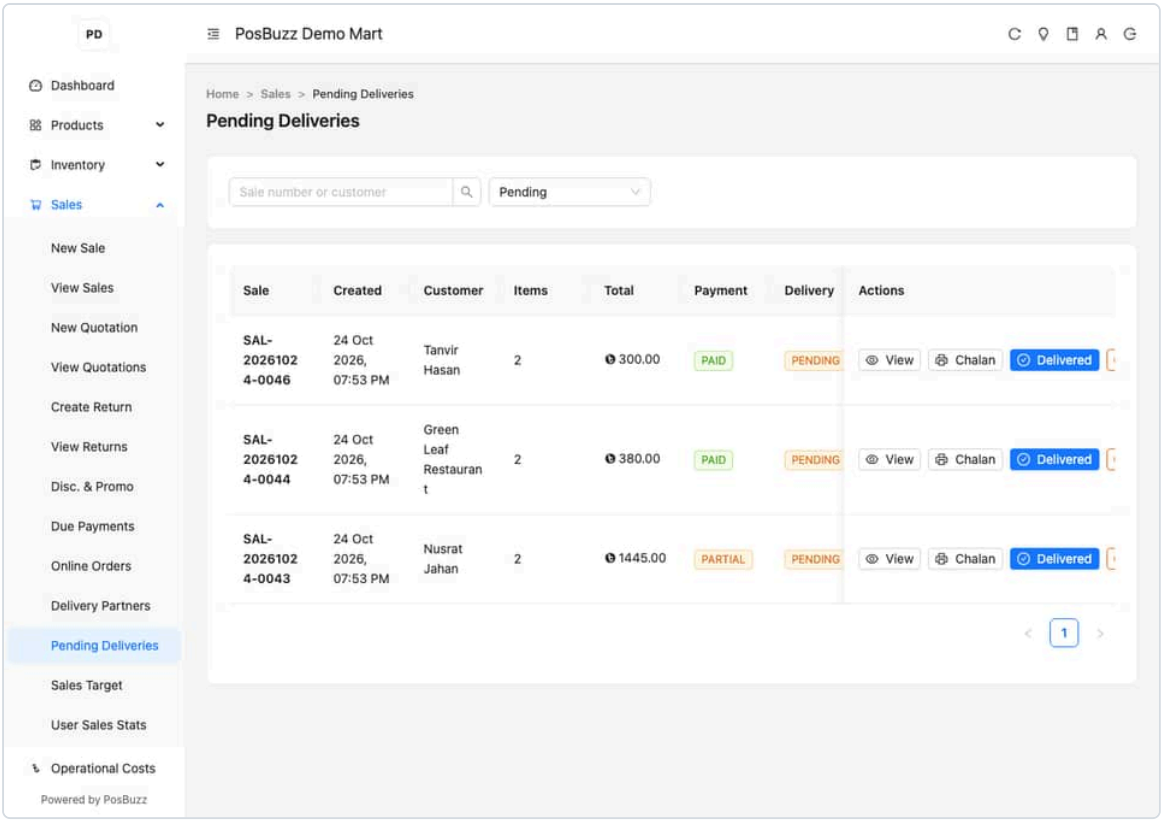

A list of sales where the customer paid now (fully or in part) but will take the goods later. The stock is held back for them until you mark the sale delivered. Then the stock is taken off your inventory. If you cancel, the held stock is released.

Where to find it

Menu: **Sales** > **Pending Deliveries**. You need the **Sales** permission.

A sale comes here when the cashier ticks **Deliver products later (reserve inventory)** on **Sales** > **New Sale** before completing the sale.

What you see

Pending Deliveries with three sales waiting. Each row has View, Chalan, Delivered and Cancel.

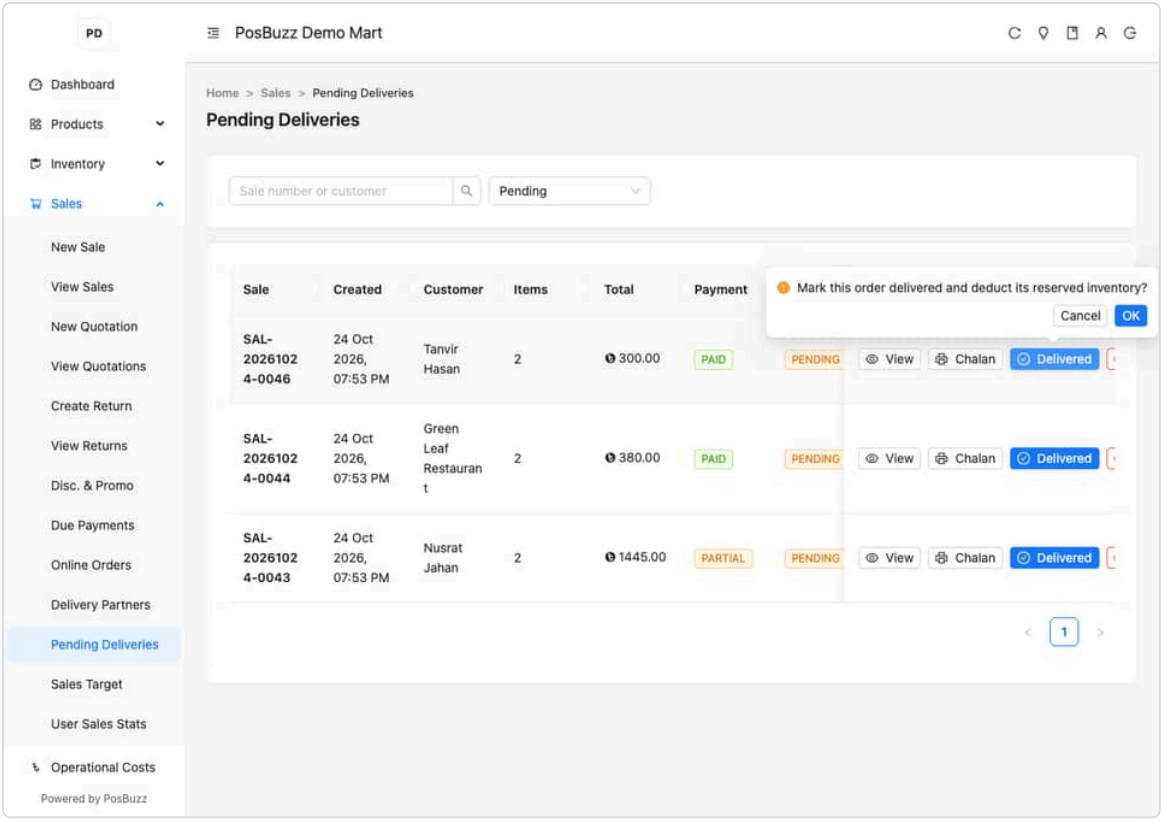

- A search box with the hint "Sale number or customer", and a magnifier button. Press Enter or click the magnifier to search. A small x clears it.
- A status list with **Pending** (chosen at the start), **Delivered** and **Cancelled**.
- A table:

Column	What it shows
Sale	The sale number, in bold.
Created	For example "24 Oct 2026, 02:30 PM".
Customer	The customer name, or "Walk-in".
Items	The total quantity.
Total	The sale total.
Payment	**PAID** (green), **PARTIAL** (orange) or **DUE** (red).
Delivery	**PENDING** (orange), **DELIVERED** (green) or **CANCELLED** (red).
Actions	**View** (eye icon, opens the sale), **Chalan** (printer icon, opens the delivery challan PDF in a new browser tab). For PENDING rows only: **Delivered** (tick icon) and **Cancel** (red stop icon).

The page shows up to 100 rows and has no page buttons.

How to deliver the goods

1. Go to **Sales** > **Pending Deliveries**. The list shows pending sales.
2. Find the sale. Use the search box if needed.
3. If you want a printed challan for the customer to sign, click **Chalan**.
4. Click **Delivered**.
5. The question "Mark this order delivered and deduct its reserved inventory?" appears. Click **OK**. Click **Cancel** to go back.

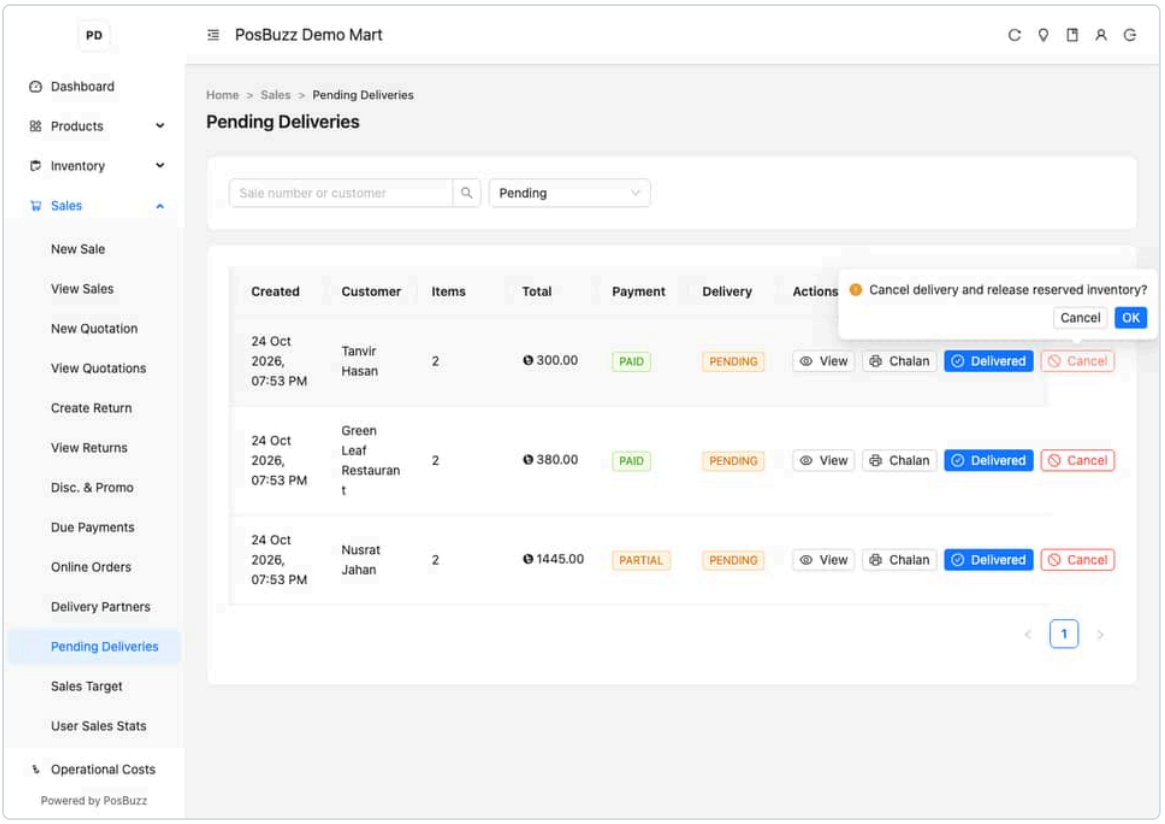

*The delivered question appears above the **Delivered** button.*

What happens next: you see "Delivery completed and inventory updated". The row leaves the Pending list. To see it, change the status list to **Delivered**.

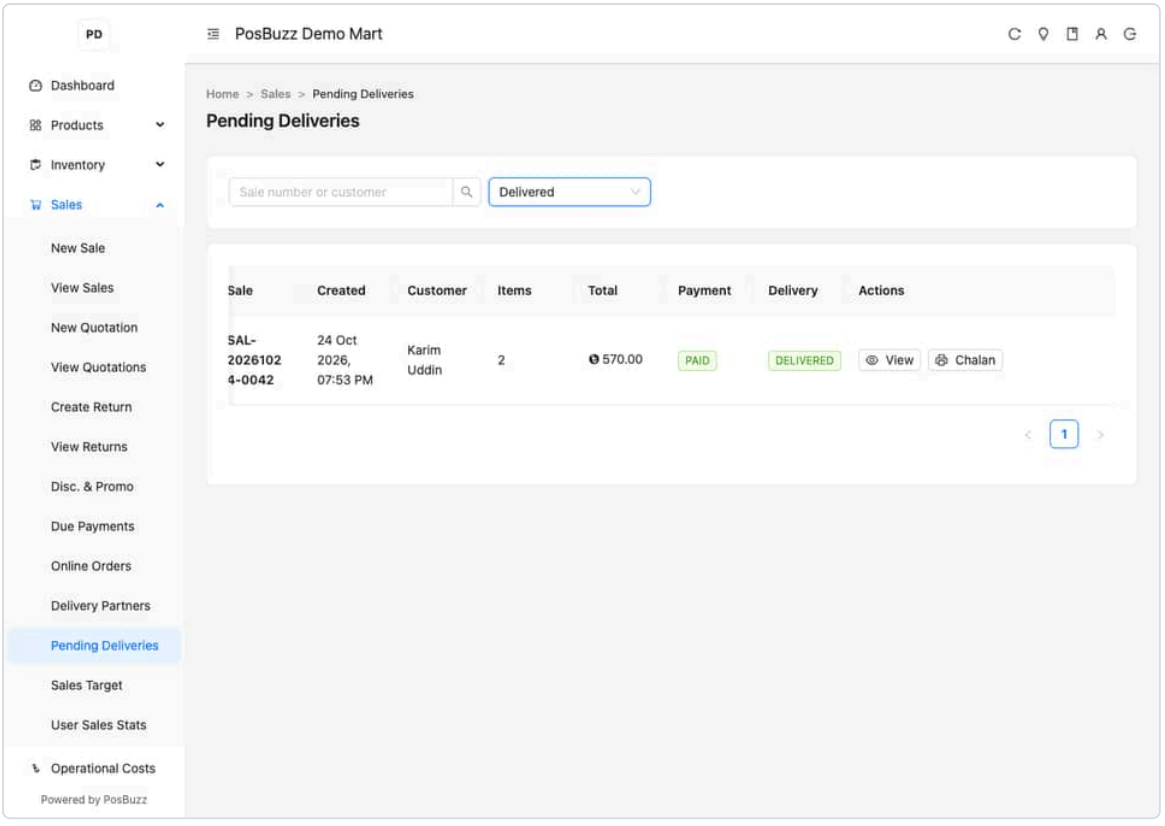

How to cancel a delivery

1. Find the sale and click **Cancel** (red stop icon).
2. The question "Cancel delivery and release reserved inventory?" appears. Confirm it.

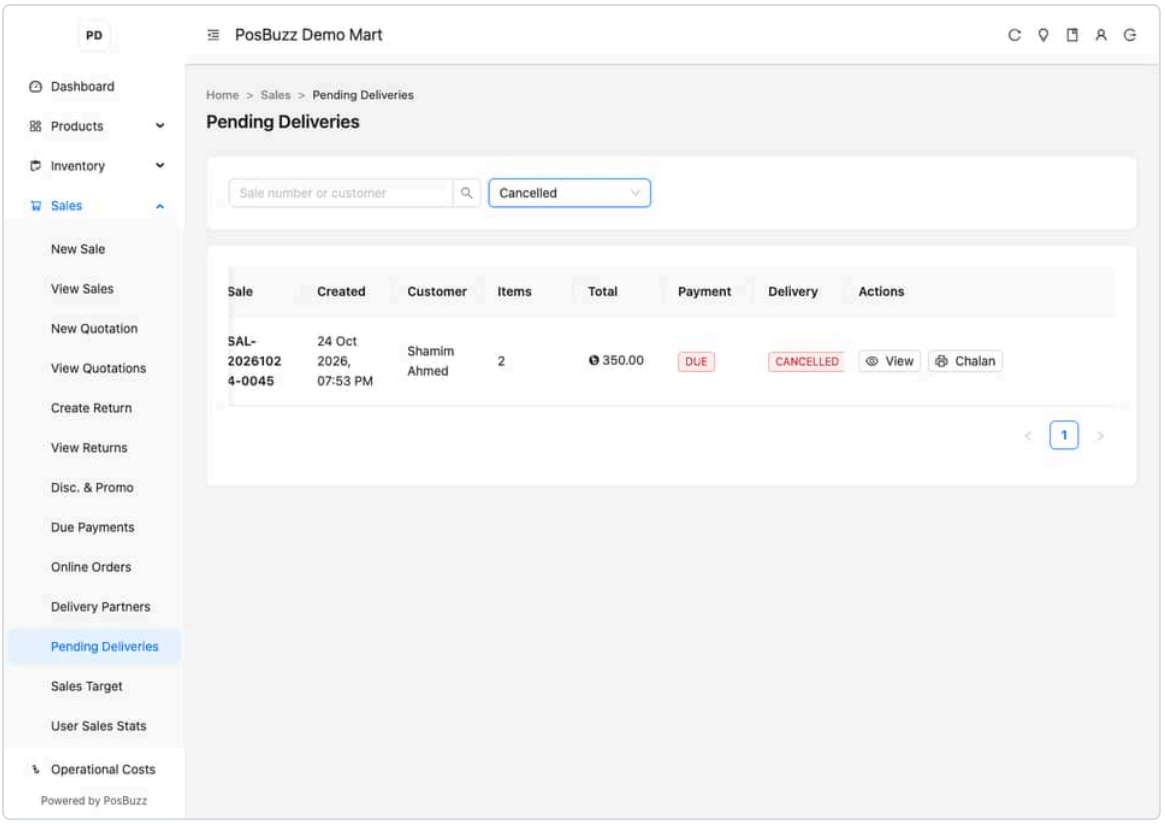

*The cancel question, with **Cancel** and **OK**.*

What happens next: you see "Delivery cancelled and reservation released". The held stock becomes available again. The row moves to the **Cancelled** list.

The status list set to Delivered.

The status list set to Cancelled.

> **Good to know:** Cancelling a delivery does not give money back to the customer. If the customer must be refunded, do it through **Returns**. If a cancel fails, the app does not show a clear error message, so check the list again.

Messages on this screen

Message	What it means	What to do
Delivery completed and inventory updated	The goods are marked delivered and stock is deducted.	Nothing.
Delivery cancelled and reservation released	The delivery is cancelled and the stock is free again.	Handle any refund through Returns.
Could not complete delivery	The delivery could not be marked done. The server may give a reason.	Read the reason, fix it, and try again.

Sales Target

*Menu name: **Sales Target**. Page title: **Daily Sales Target**.*

What it is

A read-only page. For one day and one branch it shows how many units of each product variant were sold against the daily target you set for it, and whether the target was met.

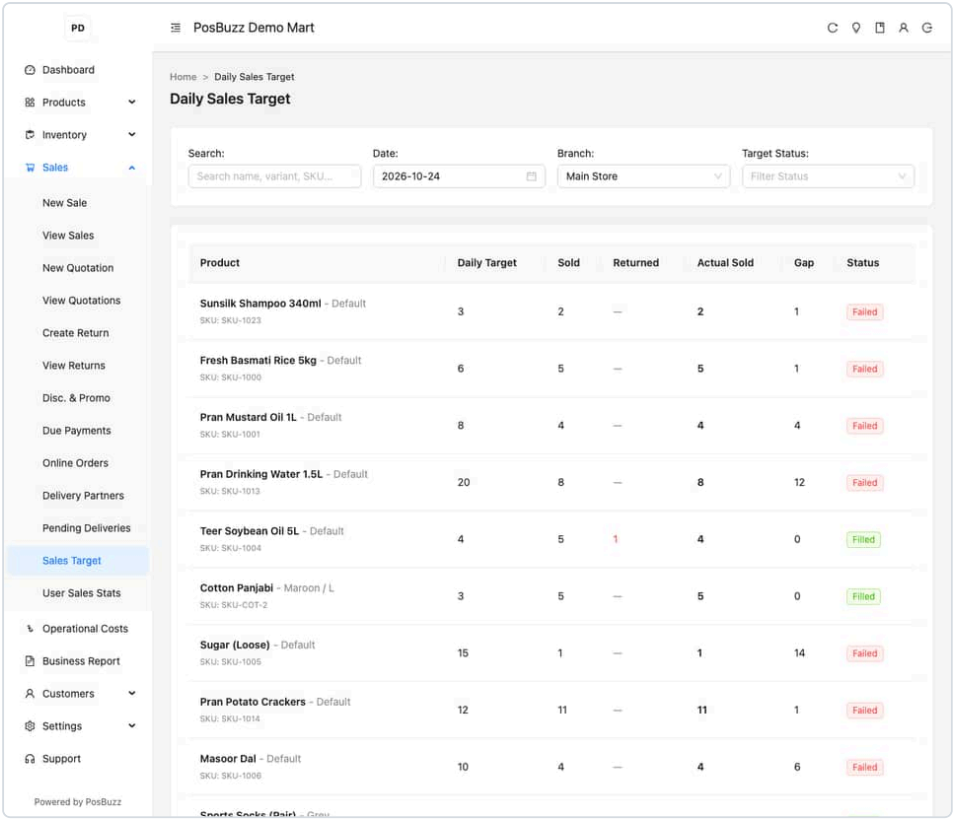

Where to find it

Menu: **Sales** > **Sales Target**. You need the **Business insights** permission.

Where the target is set

On the product's variant form (**Products** > Add Product, or edit a product). The field is **Daily Target**. It takes a whole number, 0 or more. Only variants with a target above 0 appear on this page. Leave it at 0 to keep a variant off the page.

What you see

The Daily Sales Target page for 24 October 2026, Main Store, with Filled and Failed tags.

Four boxes in a row:

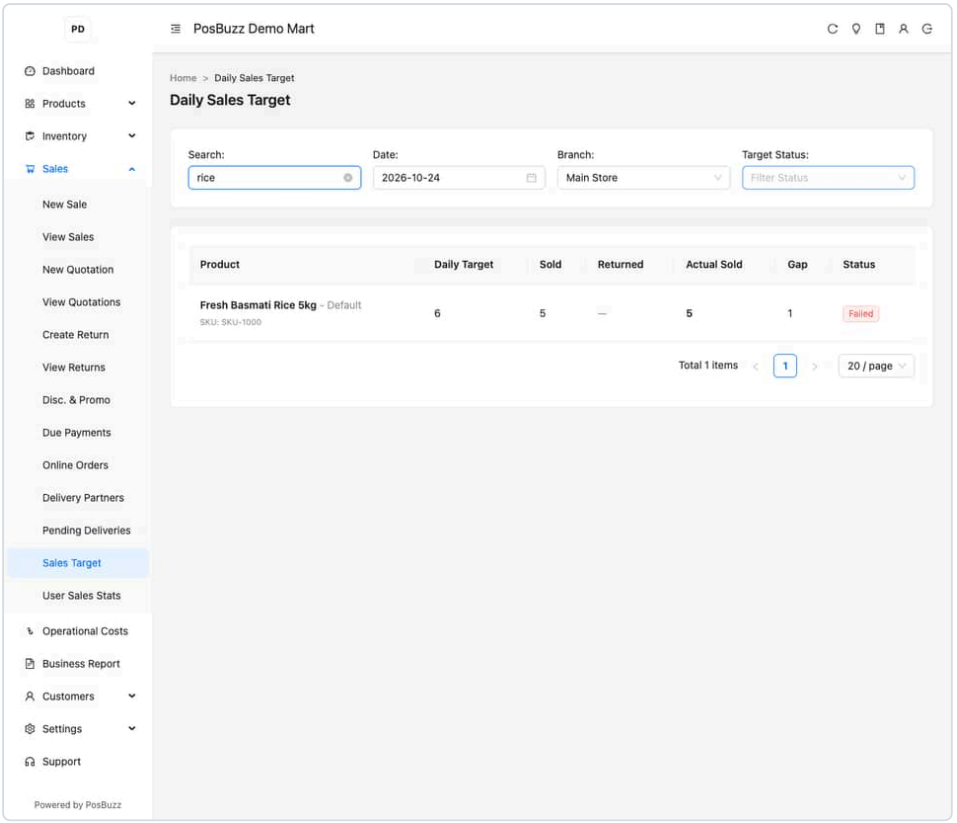

Box	What it does
Search: ("Search name, variant, SKU...")	Narrows the rows by product name, variant name or SKU.
Date:	The day to look at, written like 2026-10-24. Starts as today. You cannot pick a future day and you cannot clear it.

Box	What it does
Branch:	One of your branches. The first branch is chosen for you.
Target Status: ("Filter Status")	**Achieved** (target reached) or **Not Achieved**. You can clear it.

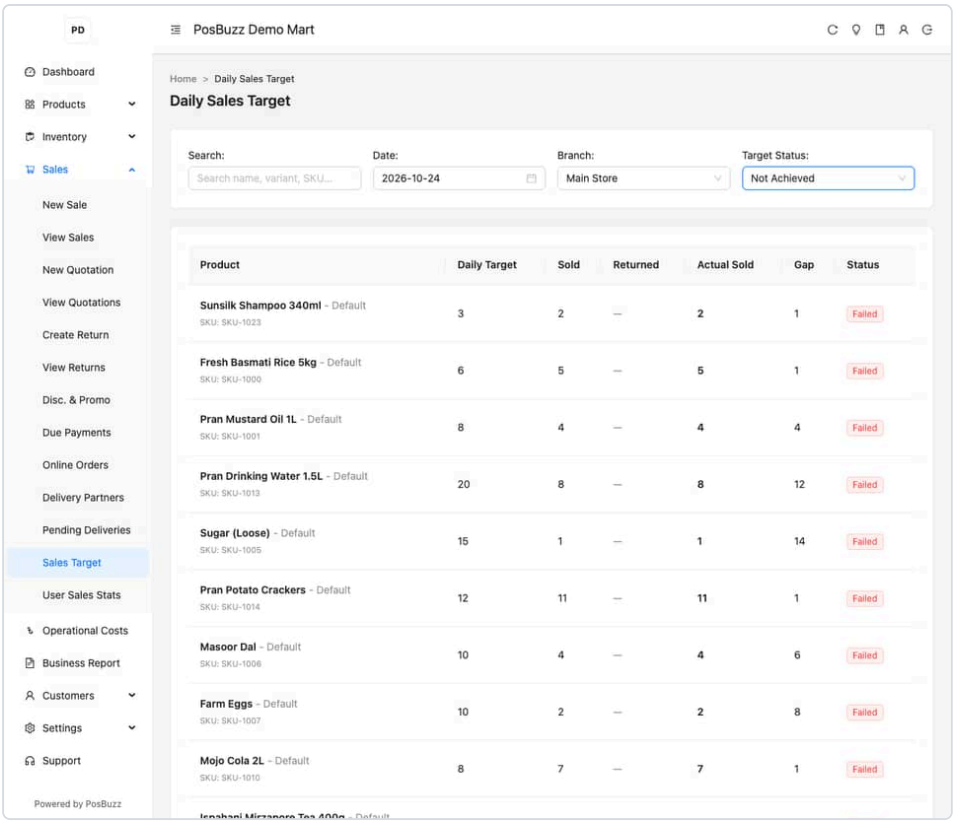

Table columns:

Column	What it shows
Product	The product name in bold, then " - " and the variant name. "SKU:" and the SKU under it, when there is one.
Daily Target	The target quantity.
Sold	Units sold that day.
Returned	Units returned that day, in red. A dash if none.
Actual Sold	Sold minus Returned. Never below 0. Shown in bold.
Gap	How many more units were needed to reach the target. 0 once reached.
Status	A green **Filled** tag when the Gap is 0, a red **Failed** tag when it is not.

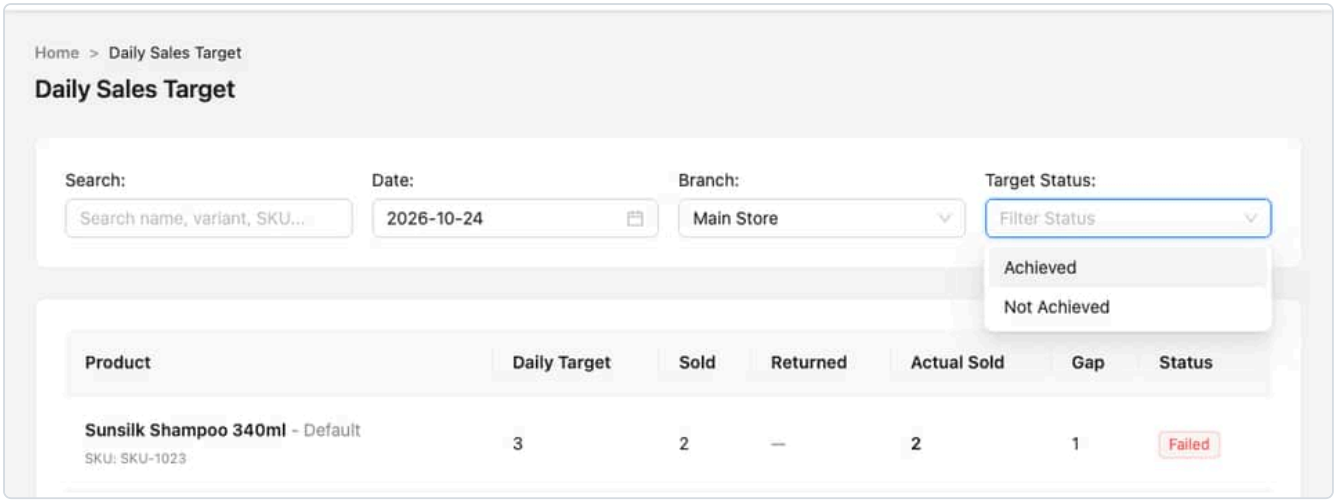

At the bottom: a page-size changer and "Total N items". 20 rows per page.

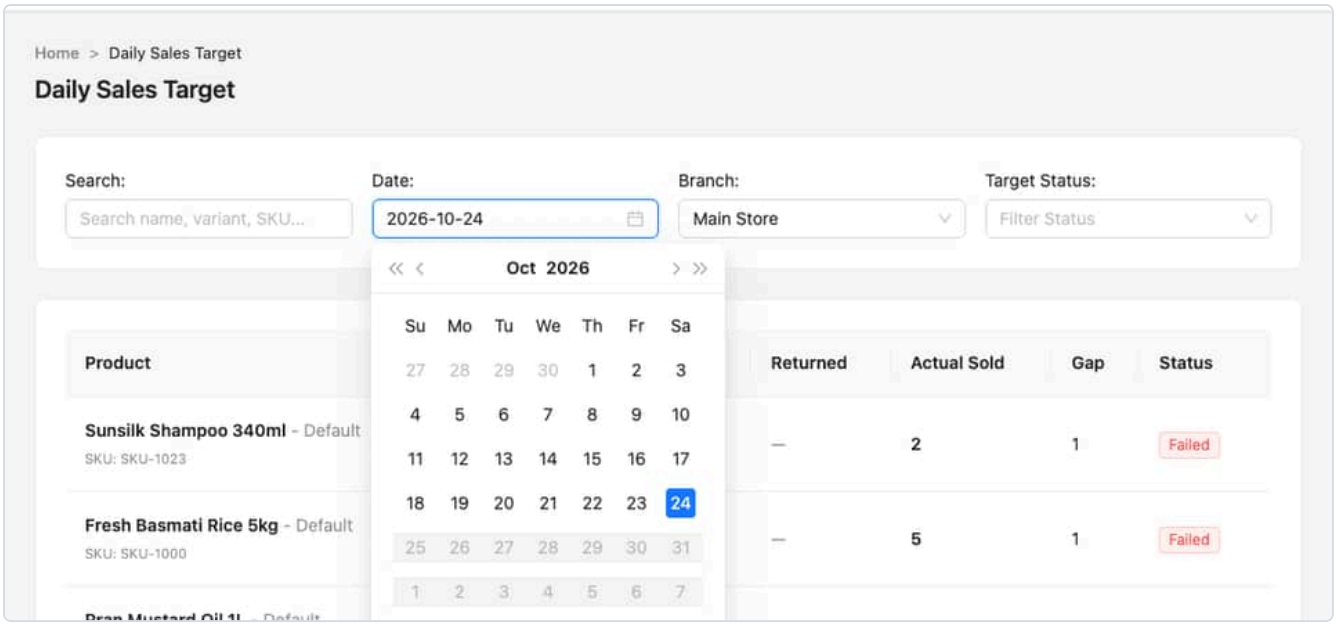

*Typing "rice" in **Search:** leaves one row. The page shows "Total 1 items".*

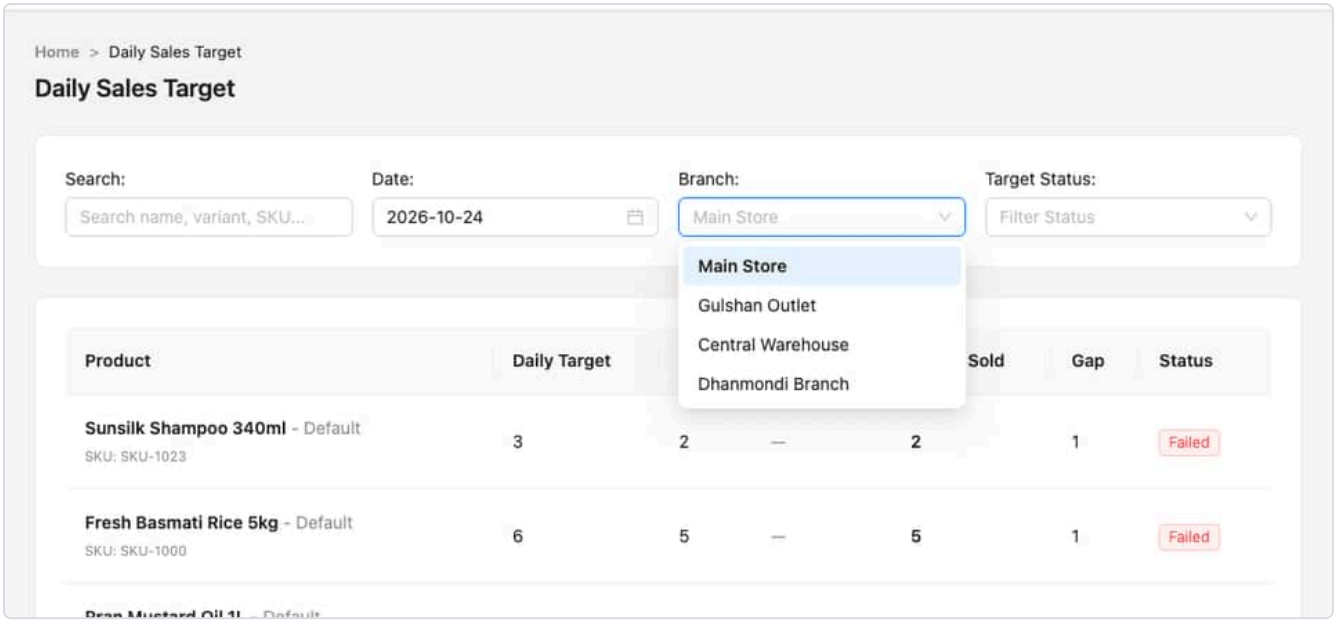

Target Status: *set to* ***Not Achieved****. Only red Failed rows remain.*

The ***Target Status:*** *list with Achieved and Not Achieved.*

*The **Date:** calendar. Future days cannot be picked.*

*The **Branch:** list.*

How to see how a day went

1. Go to **Sales** > **Sales Target**.
2. In **Date:**, pick the day. Today is chosen at the start.
3. In **Branch:**, pick the branch.
4. Read the table. Red **Failed** rows are variants that missed their target.
5. To look at only hits or misses, choose **Achieved** or **Not Achieved** in **Target Status:**.
6. To find one product, type in **Search:**.

What happens next: the table shows the figures for that day and branch. There is nothing to save.

How the figures are worked out

- A day runs from 00:00 to 23:59 Dhaka time.
- **Sold** counts every item sold that day in that branch, on sales that were not deleted.
- **Returned** counts items returned that day in that branch, even when the original sale was on an earlier day.
- **Actual Sold** is Sold minus Returned. **Gap** is Daily Target minus Actual Sold, never below 0.
- Only variants that have stock records in the chosen branch are listed.

> **Good to know: Search:** and **Target Status:** now filter across all pages, not only the page you are looking at. The page also does not show any summary cards. Only the table is shown.

User Sales Stats

*Menu name: **User Sales Stats**. Page title: **User Sales Statistics**. The path at the top reads "Dashboard > Sales > User Stats".*

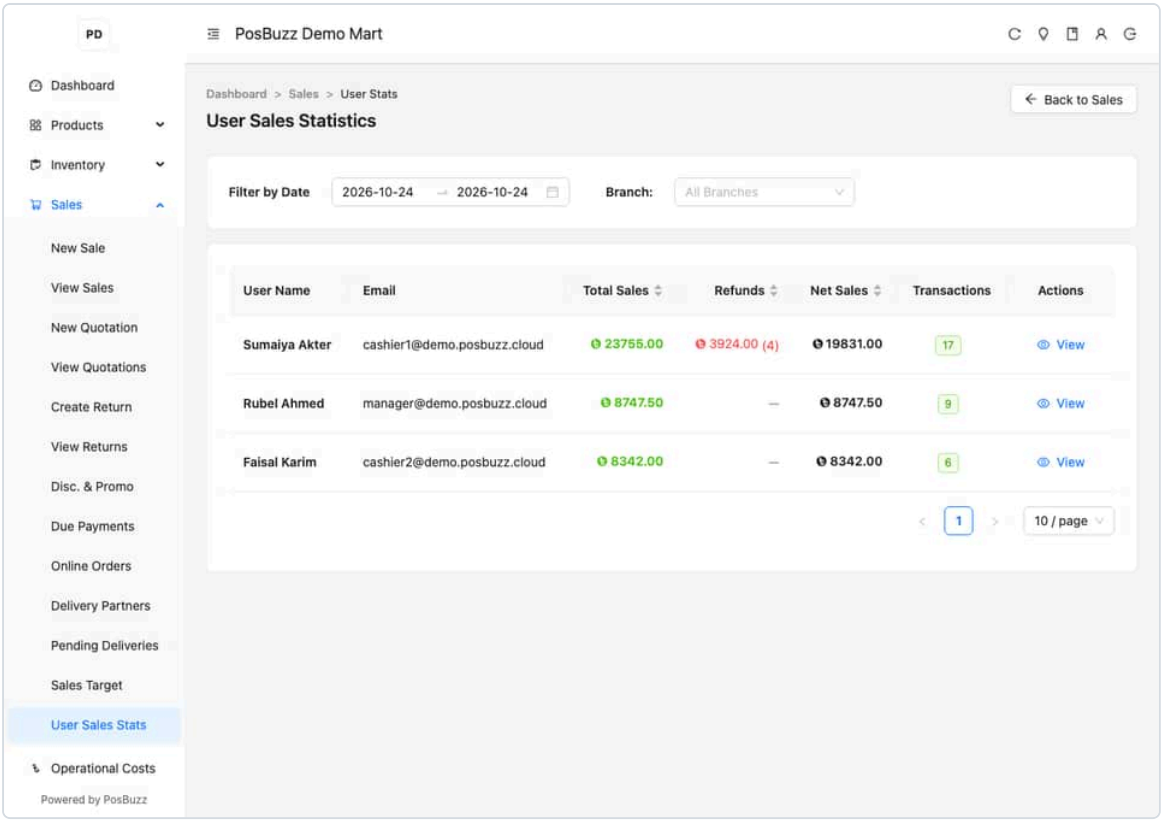

What it is

A comparison of how much each staff member sold over a period. A sale counts for the person recorded as "served by" on the sale.

Where to find it

Menu: **Sales** > **User Sales Stats**. You need the **Business insights** permission.

What you see

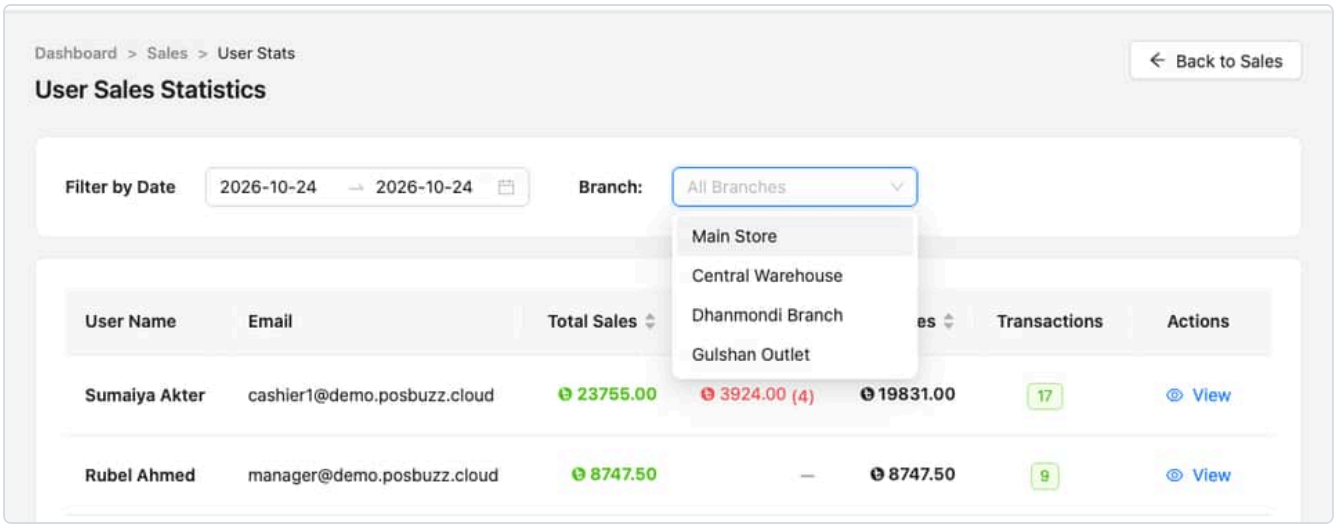

The User Sales Statistics list for one day, with three staff members.

- Top-right button: **Back to Sales** (goes to View Sales).
- **Filter by Date**: two dates, a start and an end, written like 2026-10-24. Starts as today to today. Future dates cannot be picked. You cannot clear it.
- **Branch:** with the hint **All Branches**. You can clear it. With no branch chosen, all branches are included.
- A table:

Column	What it shows
User Name	The staff member, in bold.
Email	Hidden on narrow screens.
Total Sales	The amount sold, in green bold. You can sort by it.
Refunds	Money given back, in red, with the number of returns in brackets, for example "120.00 (2)". A dash if none. You can sort by it.
Net Sales	Total Sales minus Refunds. You can sort by it.
Transactions	The number of sales, in a green tag (grey if 0).
Actions	**View** with an eye icon. It is greyed out when the person has 0 transactions.

10 rows per page, with a page-size changer. Rows are ordered by total sales, highest first.

*The **Branch:** list on User Sales Statistics.*

How the figures are worked out

- Only real sales count. Quotations, deleted sales and cancelled sales do not.
- A refund is credited against whoever served the original sale, for returns of sales in the same period. So a seller does not keep credit for money given back.
- Days are whole days in Dhaka time.

How to compare staff sales

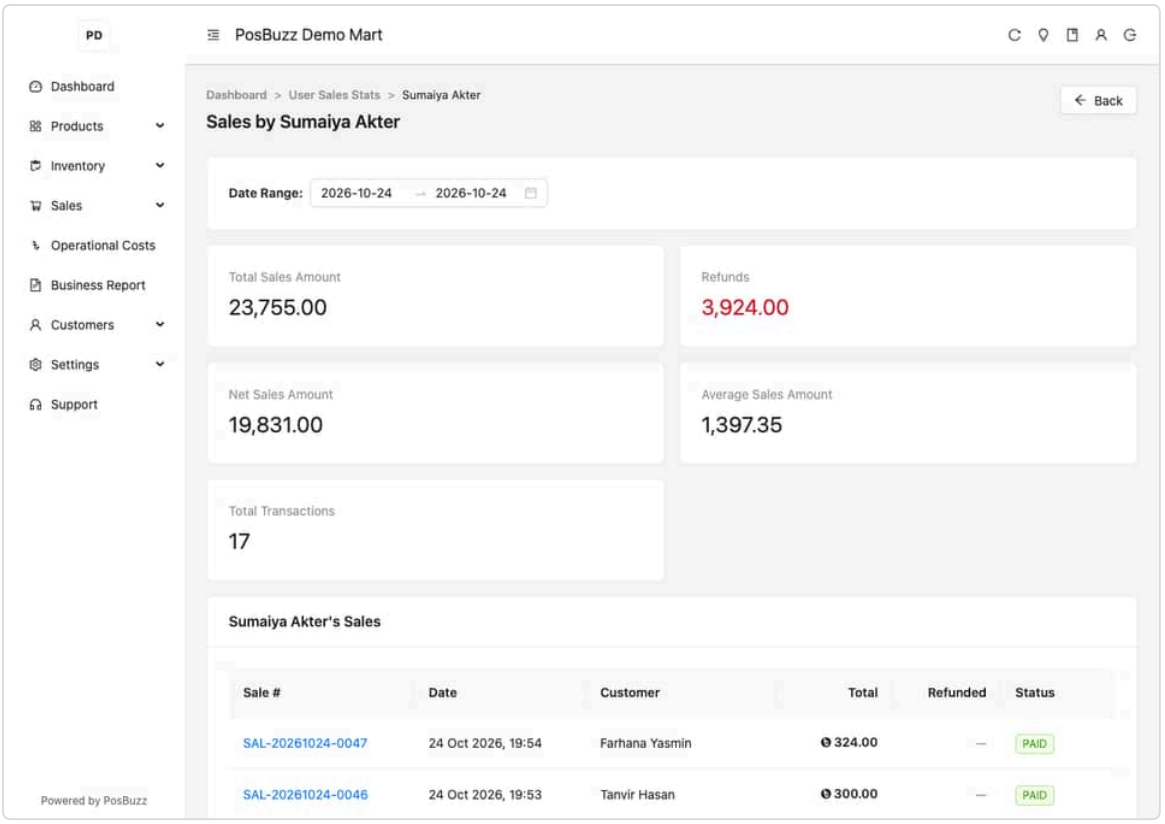

1. Go to **Sales** > **User Sales Stats**.
2. Pick the period in **Filter by Date**.
3. Pick a branch in **Branch:**, or leave it on **All Branches**.
4. Click a column title such as **Total Sales** to sort.

What happens next: the table updates by itself. Nothing is saved.

How to see one person's sales

1. On the list, click **View** on the person's row.

What happens next: the page "Sales by" and the person's name opens. The date range you chose carries over.

The Sales by page for one staff member, with the date range, the five cards and the start of the sales table.

The person's page ("Sales by name")

The browser tab reads "Sales - name". If you open the page from a direct link, the name shows as "User #number".

- Top-right button: **Back**.
- **Date Range**: a start and end date. If you opened the page directly, it starts at the 1st of this month and ends today. Future dates cannot be picked.
- Cards:
  - **Total Sales Amount**.
  - **Refunds** (red when above 0).
  - **Net Sales Amount**.
  - **Average Sales Amount**: total sales amount divided by the number of sales in the period.
  - **Total Transactions**: the number of sales rows on the page you are looking at.
- A table named "name's Sales" with columns **Sale #** (blue link to the sale), **Date**, **Customer** (name or grey "Walk-in"), **Total**, **Refunded** (red, or a dash), and **Status** (**PAID** green, **PARTIAL** orange, **DUE** red, **CANCELLED** grey). 20 rows per page, with a page-size changer.

> **Good to know: Total Transactions** counts only the sales shown on the current page. If the person has more than 20 sales, or you are on page 2, it is not the count for the whole period. Use **Transactions** on the list page for the full count.

Business Report

*Menu name: **Business Report**. Page title: **Business Report**. The tooltip reads "Daily and Monthly Business Report". Staff may still call it "EOD" (end of day).*

What it is

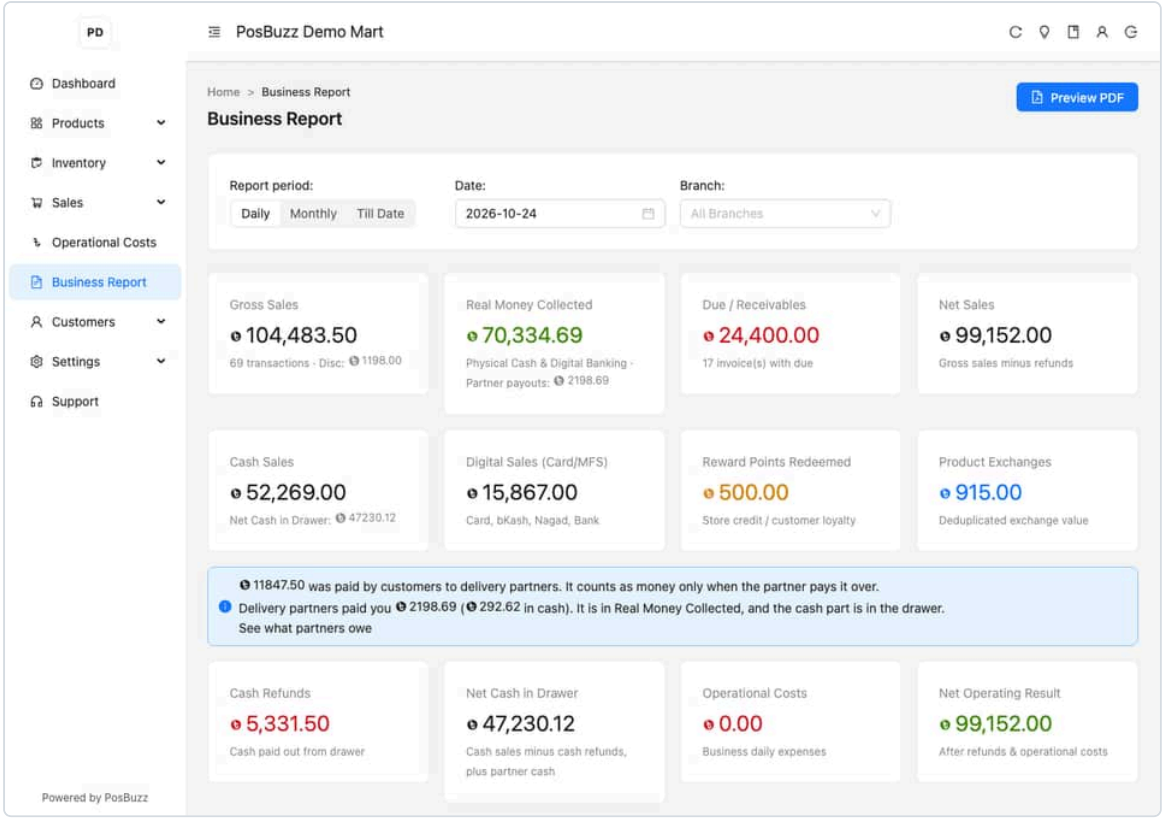

A one-page money summary for a day, a month, or everything up to a date. It shows what was sold, what money really came in, what customers still owe, refunds, shop costs, and a net result. Shops use it to close the till at the end of the day.

Where to find it

Menu: **Business Report** (a top-level item with a document icon). You need the **Business insights** permission.

> **Good to know:** This report has **no profit figure, no cost of goods and no margin**. It is a report of sales and money collected. The card **Net Operating Result** is sales minus refunds minus operational costs only. The buying price of the goods is not taken off, so **Net Operating Result is not profit**.

What you see

The top of the Business Report for one day: the filter box and the first three rows of cards.

- Top-right button: **Preview PDF**.
- **Report period:** a switch with **Daily** (chosen at the start), **Monthly** and **Till Date**.

- A date box whose name changes with the period: **Date:** for Daily, **Month:** for Monthly (a month picker), **Through date:** for Till Date. Written like 2026-10-24. Starts as today. You cannot clear it.
- **Branch:** with the hint **All Branches**. You can clear it.

What each period covers:

Period	Covers
Daily	The chosen day, 00:00 to 23:59 Dhaka time.
Monthly	The 1st to the last day of the chosen month.
Till Date	From the very beginning up to the end of the chosen day.

While loading you see "Loading business report...". If nothing comes back you see "No data available for the selected date and branch."

The cards, in plain words

Row 1: sales and collection

Card	What it means	Small text under it
Gross Sales	The total of all sales made in the period. Each sale total already includes discounts, tax and shipping.	"N transactions", and " · Disc:" with the total discount if there was any.
Real Money Collected (green)	Cash and digital payments actually received in the period, plus money couriers paid over to you. It includes late payments by customers on older invoices.	"Physical Cash & Digital Banking", plus " · Partner payouts:" and " · Due paid:" when above 0.
Due / Receivables (red when above 0)	The unpaid balance on sales made in this period. Old debts from earlier periods are not included.	"N invoice(s) with due".
Net Sales	Gross Sales minus refunds.	"Gross sales minus refunds".

Row 2: how money was paid

Card	What it means	Small text
Cash Sales	Cash payments received.	"Net Cash in Drawer:" and the amount.
Digital Sales (Card/MFS)	Card, bank transfer, cheque, mobile money and MFS payments.	"Card, bKash, Nagad, Bank".
Reward Points Redeemed (amber when above 0)	The value paid with reward points or store credit. This is not money received.	"Store credit / customer loyalty".
Product Exchanges (blue when above 0)	The value of goods exchanged. Each exchange is counted once. This is not money received.	"Deduplicated exchange value".

Delivery partner notice. A blue box appears only when courier money exists in the period. It can show these lines, each only when above 0:

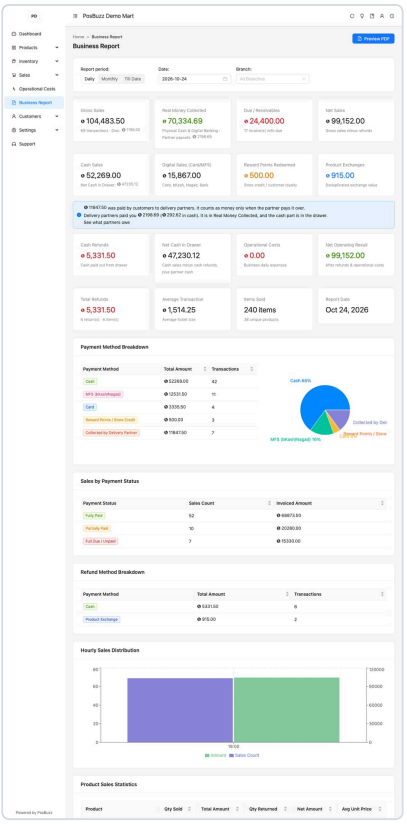

- "(amount) was paid by customers to delivery partners. It counts as money only when the partner pays it over."
- "Delivery partners paid you (amount) ((part) in cash). It is in Real Money Collected, and the cash part is in the drawer."
- "You paid delivery partners (amount) ((part) from the drawer)."
- When one branch is chosen: "Partner payouts belong to no branch, so this branch report leaves them out."
- A link **See what partners owe** that opens Delivery Partners.

Row 3: drawer and costs

Card	What it means	Small text
Cash Refunds (red when above 0)	Cash paid back to customers for returns.	"Cash paid out from drawer".
Net Cash in Drawer	The cash that should be in the drawer for the period: cash received, minus cash refunds, plus cash received from couriers, minus cash paid to couriers. It does not count the starting float.	"Cash sales minus cash refunds", or with courier cash "Cash sales minus cash refunds, plus partner cash".
Operational Costs (red)	The total of costs you declared with a date in the period.	"Business daily expenses".
Net Operating Result (green at 0 or more, red below 0)	Gross Sales minus refunds minus Operational Costs. Not profit.	"After refunds & operational costs".

Row 4

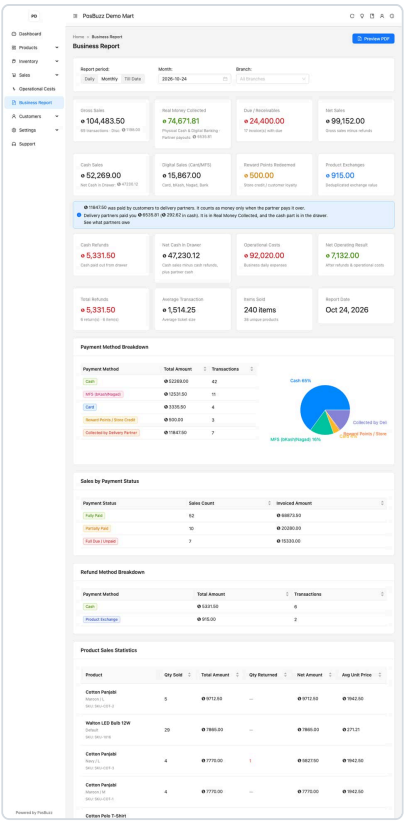

Card	What it means	Small text
Total Refunds (red when above 0)	Money refunded for returns. Refunds count on the day the refund was made, not the day of the original sale.	"N return(s) · M item(s)".
Average Transaction	Gross Sales divided by the number of sales.	"Average ticket size".
Items Sold	The total quantity sold, with the word "items".	"N unique products".
Report Date	The date, for example "Oct 24, 2026".	"Branch:" and the name, when one branch is chosen.

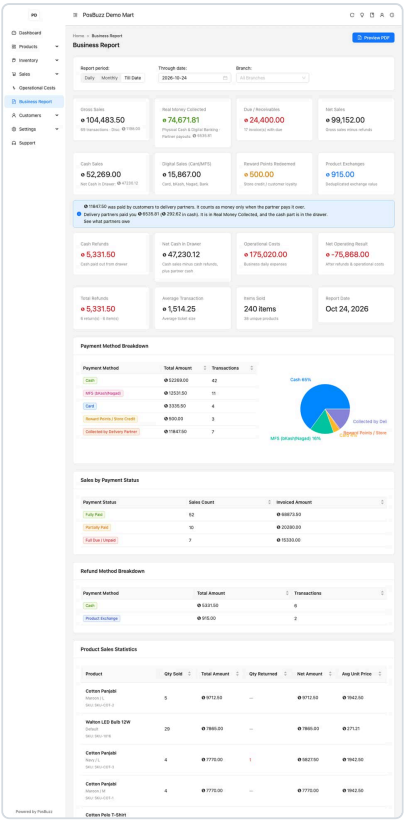

The whole Daily report: all cards, the delivery partner notice, the payment tables, the pie chart and the hourly chart.

The panels below the cards

1. **Payment Method Breakdown**: a table (**Payment Method**, **Total Amount**, **Transactions**, sortable) and a pie chart. Methods are Cash, Card, Bank Transfer, Cheque, Mobile Money, MFS (bKash/Nagad), Reward Points / Store Credit, Product Exchange, and Collected by Delivery Partner.
2. **Sales by Payment Status**: shown when there is data. Columns **Payment Status** (**Fully Paid** green, **Partially Paid** orange, **Full Due / Unpaid** red), **Sales Count** and **Invoiced Amount**.
3. **Refund Method Breakdown**: shown only when there were refunds. Same columns as the payment method table, for money paid back.
4. **Hourly Sales Distribution**: for the Daily period only, when there were sales. A bar chart by hour of the day with two bars: **Sales Count** (left scale) and **Amount** (right scale).
5. **Product Sales Statistics**: columns **Product** (name, variant, SKU), **Qty Sold**, **Total Amount**, **Qty Returned** (red or a dash), **Net Amount** and **Avg Unit Price**. You can sort. 20 rows per page, with a page-size changer, a jump box and the text "1-20 of N products".
6. **Operational Costs**: columns **Date**, **Cost name**, **Branch** ("All business" when not tied to a branch) and **Amount**.
7. **ACCOUNTING DEFINITIONS & REPORT CLOSURE**: a box at the bottom that gives the app's own short definitions of Gross Sales, Real Money Collected, Net Cash in Drawer, Due / Receivables, Product Exchanges and Net Operating Result, and a closing line that it is a computer-generated report.

*The **Monthly** view. The hourly chart is not shown for months.*

*The **Till Date** view.*

How to close the day

1. Click **Business Report** in the menu.

2. Leave the period on **Daily** and the date on today.
3. Choose your branch in **Branch:**.
4. Count the cash in the till. Compare it with **Net Cash in Drawer**.
5. Click **Preview PDF**. A window titled "Business Report" opens. At the bottom it shows "A4" and the file name `business-report-` followed by the date.
6. Click **Print** or **Download**. Click **Close** to leave.

What happens next: the report prints or is saved. If it cannot be made you see "Failed to load the PDF".

How to see a month

1. Click **Monthly** under **Report period:**.
2. In **Month:**, pick the month.

What happens next: the cards and tables show the whole month.

How to see everything since the beginning

1. Click **Till Date**.
2. In **Through date:**, pick the last day to include.

What happens next: the figures run from the very start up to the end of that day.

Things to know about the figures

- A sale made at 11:30 PM belongs to that day. A sale made at 12:05 AM belongs to the next day.
- With one branch chosen, you see only that branch's sales, refunds and costs. Courier payouts are left out because they belong to no branch.
- A cost marked "All business" appears in the all-branches report only. A cost tied to a branch appears in that branch's report and in the all-branches report.
- Reward points, product exchanges and cash that a courier collected are not counted as money received until the courier pays it over.
- **Digital Sales** is every payment that is not cash, reward points, exchange or courier collection.

Operational Costs

*Page title: **Operational Costs**. Menu name: **Operational Costs**.*

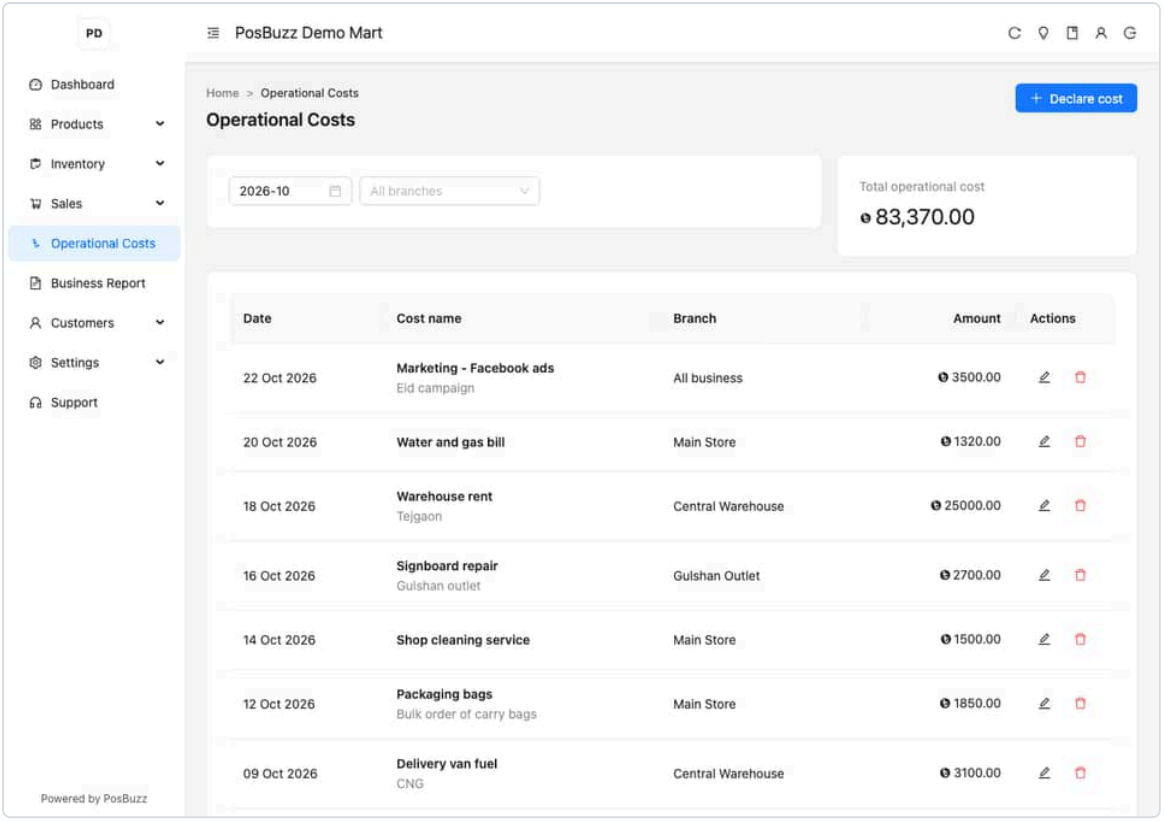

What it is

A place to record everyday shop expenses such as rent, electricity, transport and salaries. They are taken off in the Business Report's **Net Operating Result**.

Where to find it

Menu: **Operational Costs** (a top-level item with a taka sign icon). You need the **Business insights** permission.

What you see

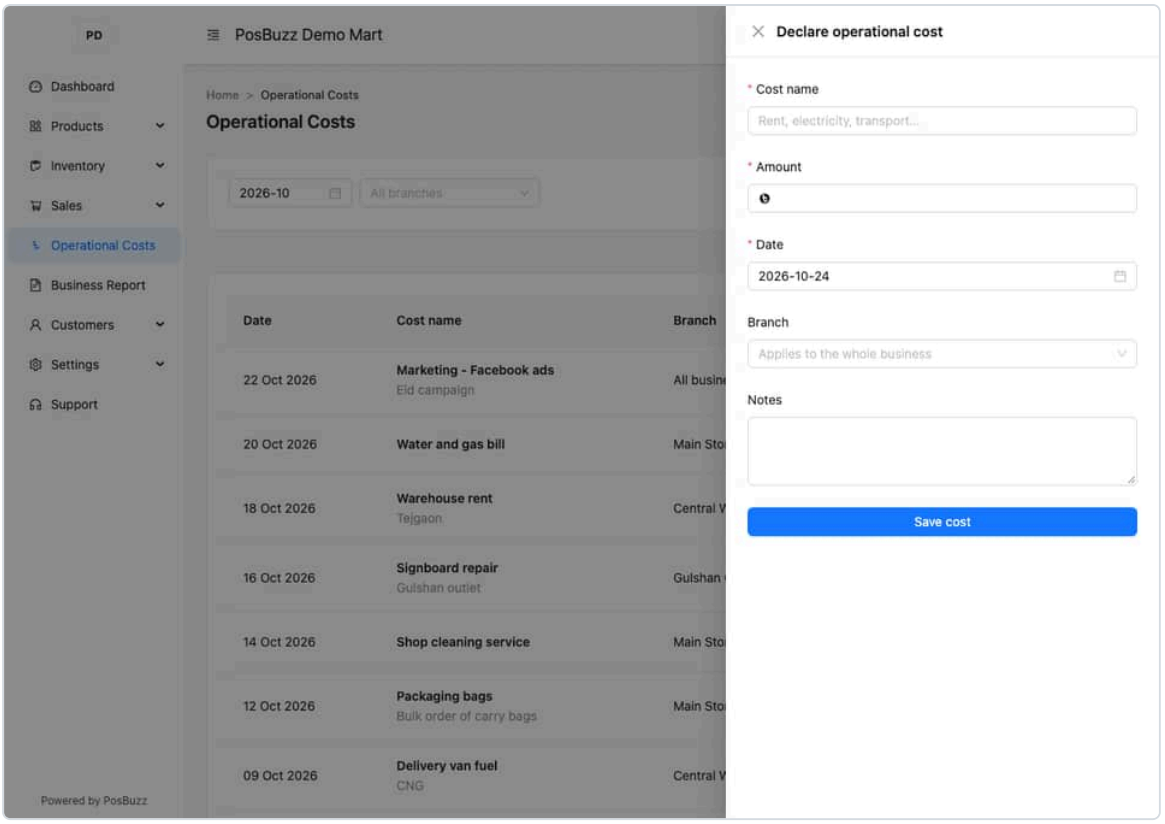

The Operational Costs list for October 2026 with the total cost card.

- Top-right button: **Declare cost**.
- A month picker (the current month at the start, cannot be cleared) and a branch list with the hint **All branches** (you can clear it).
- A card **Total operational cost**: the total of the costs listed for the chosen month and branch.
- A table: **Date**, **Cost name** (bold, with the notes in grey under it), **Branch** (the branch name or "All business"), **Amount**, and **Actions** (a pencil to edit and a red bin to delete). 20 rows per page.

How to declare a cost

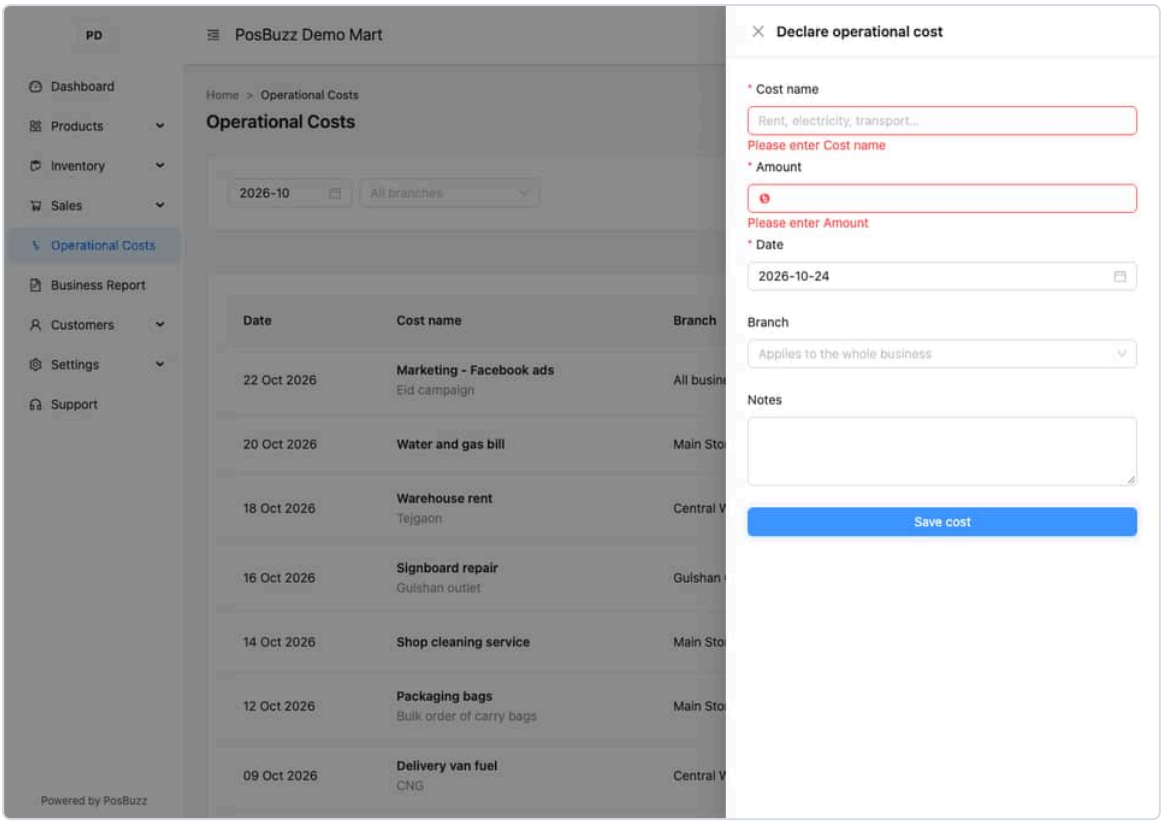

1. Click **Operational Costs** in the menu.
2. Click **Declare cost**. A drawer titled "Declare operational cost" opens.

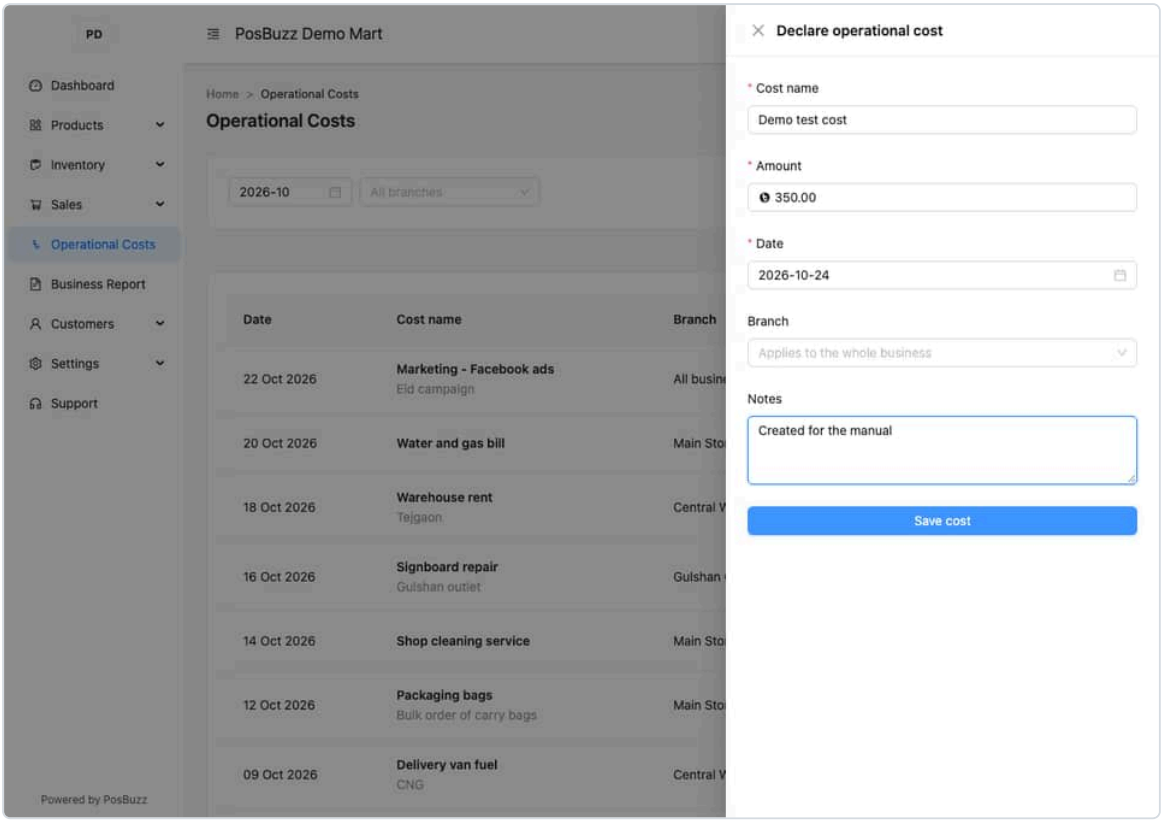

The empty drawer.

3. Fill in the fields in the table below.
4. Click **Save cost**.

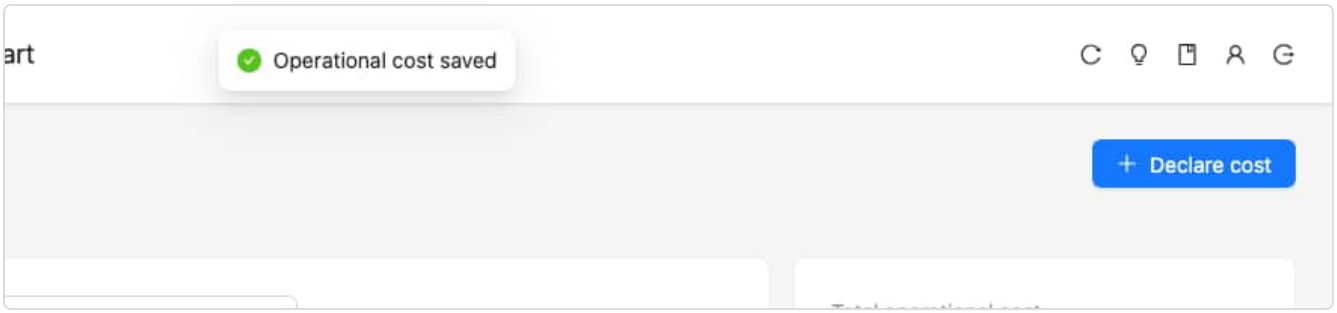

What happens next: the drawer closes and you see "Operational cost saved". The cost appears in the list, and the Business Report includes it for the day of its **Date**, not the day you typed it in.

*Clicking **Save cost** with nothing filled in.*

The drawer filled in.

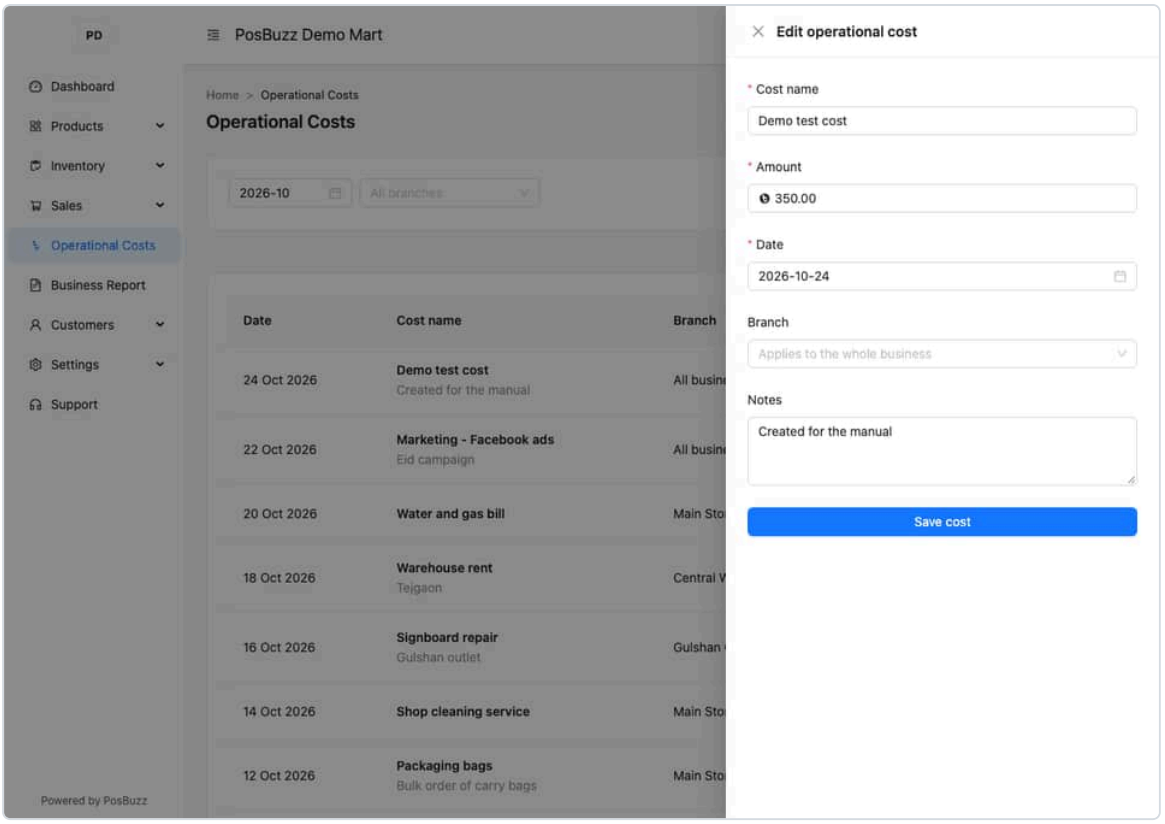

The green "Operational cost saved" message.

Field	Required	Notes
Cost name	Yes	Up to 120 characters. Example shown: "Rent, electricity, transport...". If empty you see "Please enter Cost name".
Amount	Yes	Minimum 0.01, two decimals. If empty you see "Please enter Amount".
Date	Yes	Starts as today. Change it if the cost was on another day.
Branch	No	The hint says "Applies to the whole business". Choose a branch if the cost belongs to one shop only. It is filled in with the branch from the filter, if any. You can clear it.
Notes	No	Up to 500 characters.

How to fix a cost

1. Click the pencil icon on the row. The drawer "Edit operational cost" opens.
2. Change what you need.
3. Click **Save cost**.

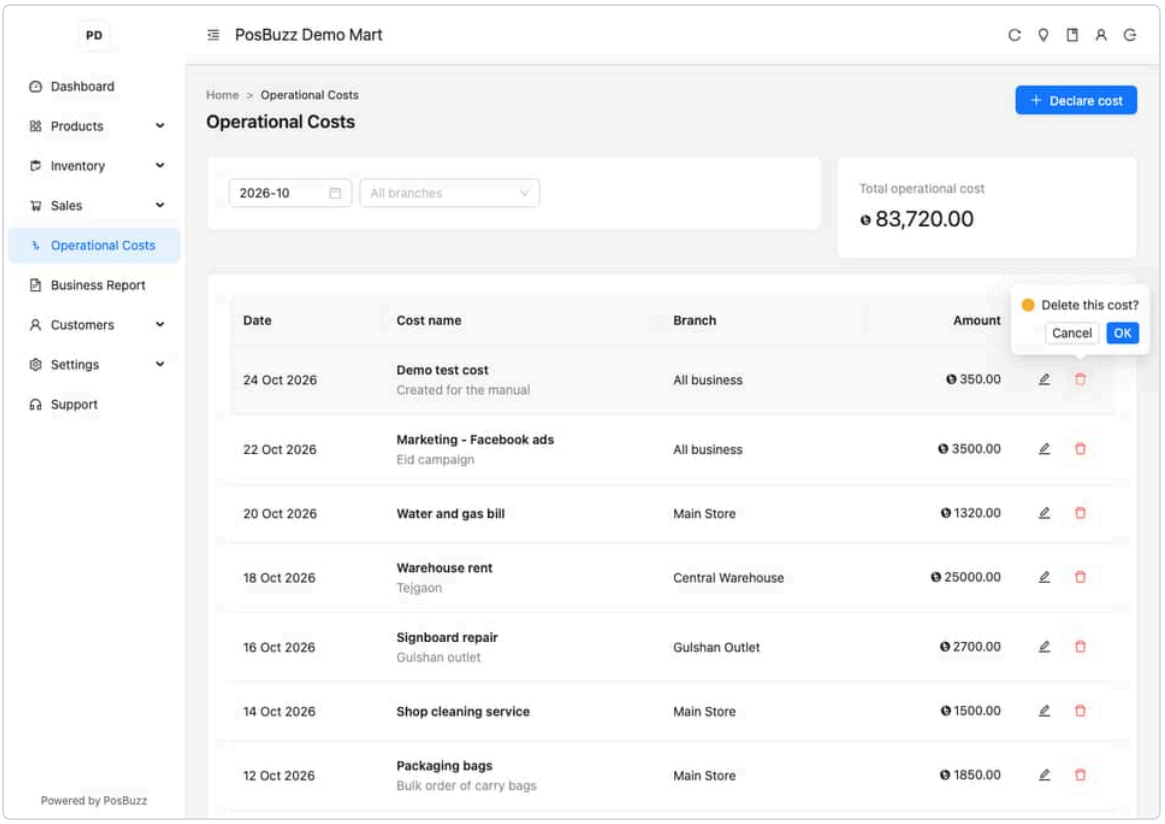

What happens next: you see "Operational cost saved" and the Business Report updates.

The Edit operational cost drawer.

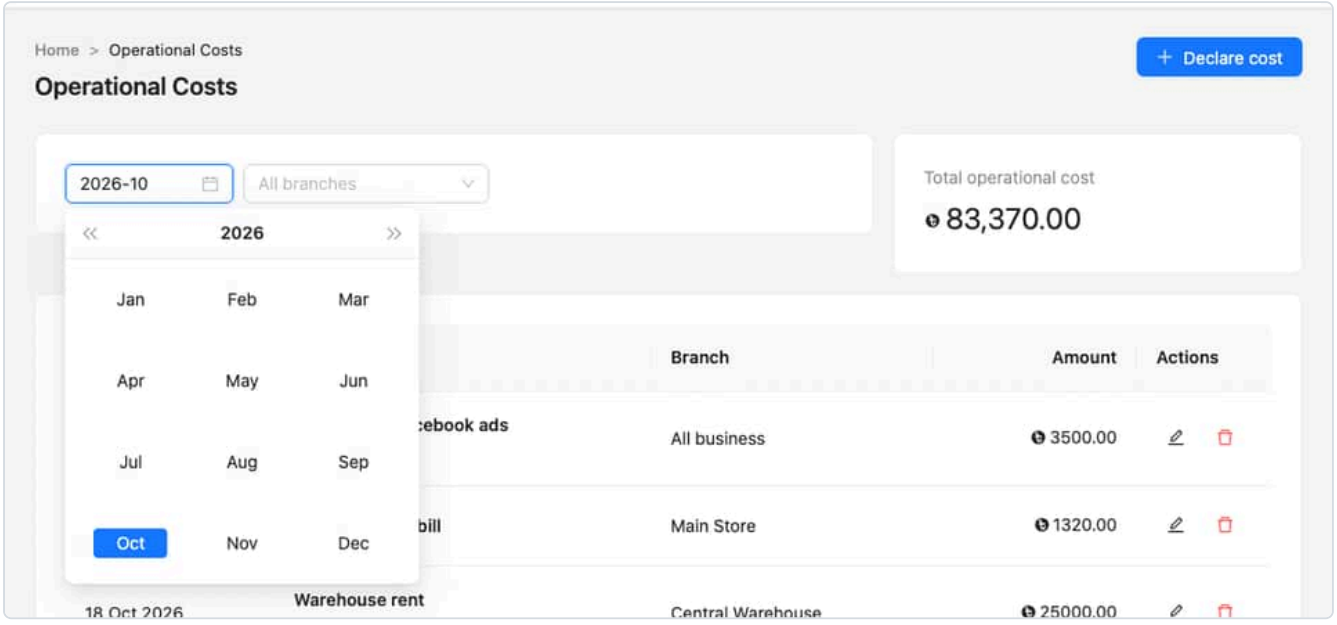

How to remove a cost

1. Click the red bin icon on the row.
2. The question "Delete this cost?" appears. Click **OK**. Click **Cancel** to keep it.

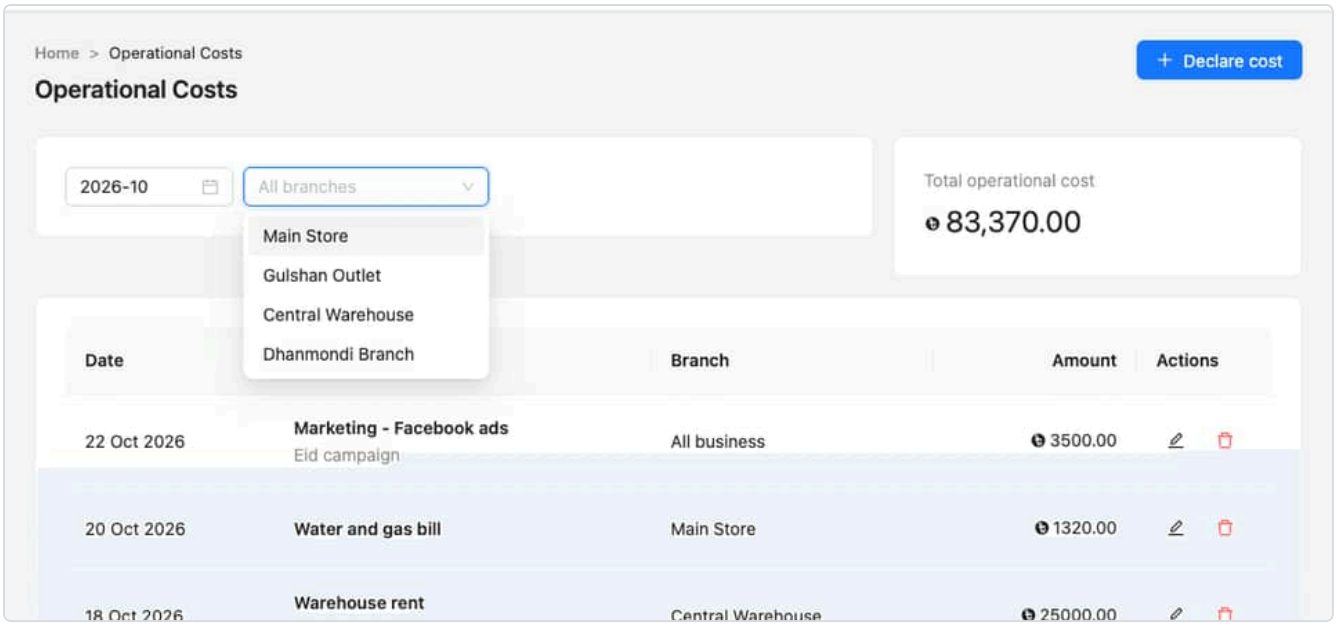

*The delete question, with **Cancel** and **OK**.*

What happens next: you see "Operational cost deleted".

The month calendar.

The branch list.

How to review a month

1. Change the month picker.
2. Optionally choose a branch.
3. Read the **Total operational cost** card.

Messages on this screen

Message	What it means	What to do
Operational cost saved	The cost was saved.	Nothing.
Operational cost deleted	The cost was removed.	Nothing.
Could not save operational cost	The save failed with no reason given.	Try again.
Operational cost not found	The cost was already removed.	Refresh the page.
Branch not found	The chosen branch no longer exists.	Choose another branch.

Customers

*Page title: **Customers**. Menu name: **Customers**.*

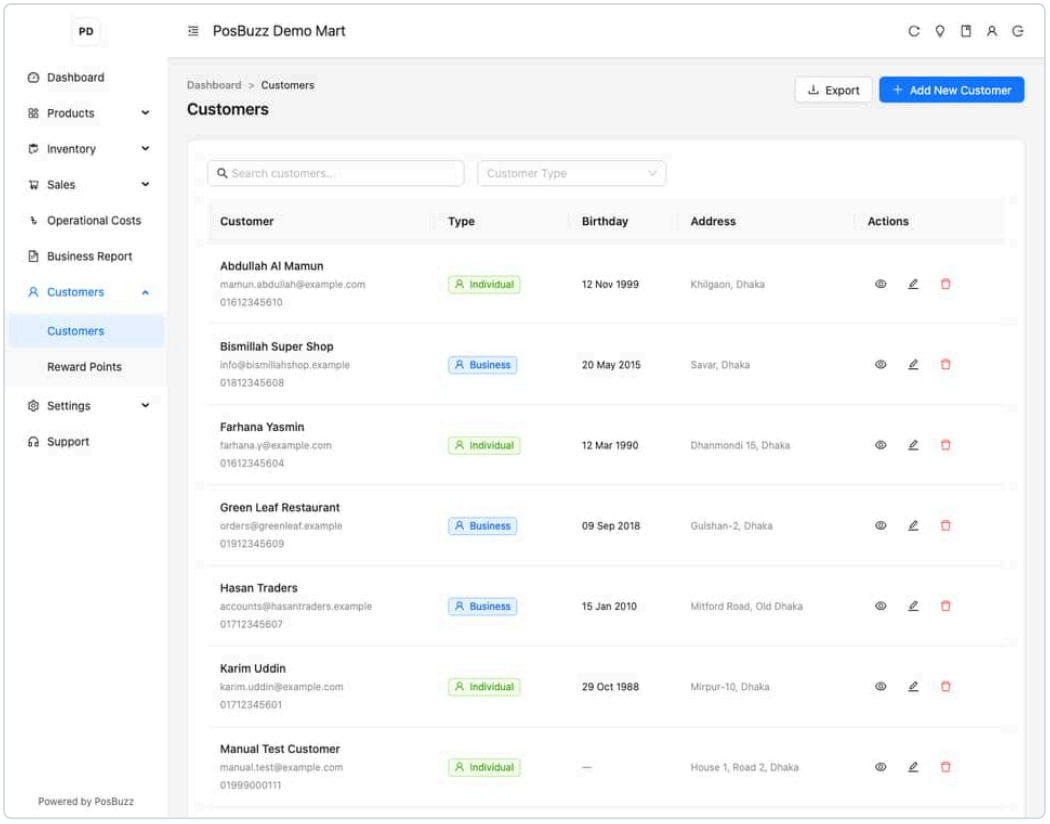

What it is

Your customer list. You add, change and delete customers, find them by name or phone, and open each customer's history. A customer chosen on a sale earns reward points and has their dues tracked.

Where to find it

Menu: **Customers** > **Customers**. You need the **Customers** permission.

What you see

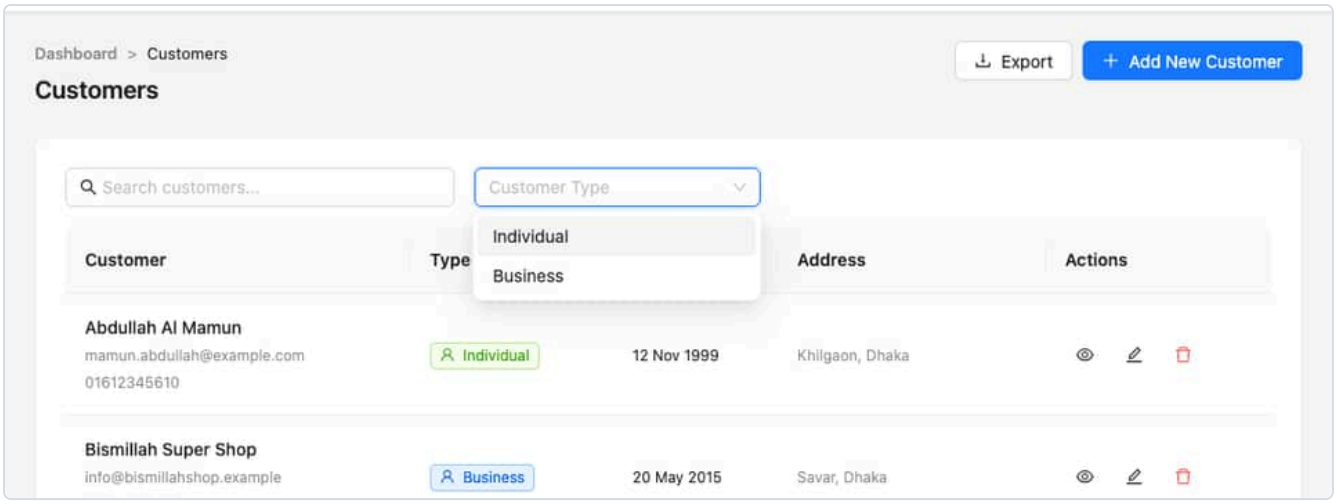

The Customers list with the search box, the type list and the first customers. The birthday column shows the date.

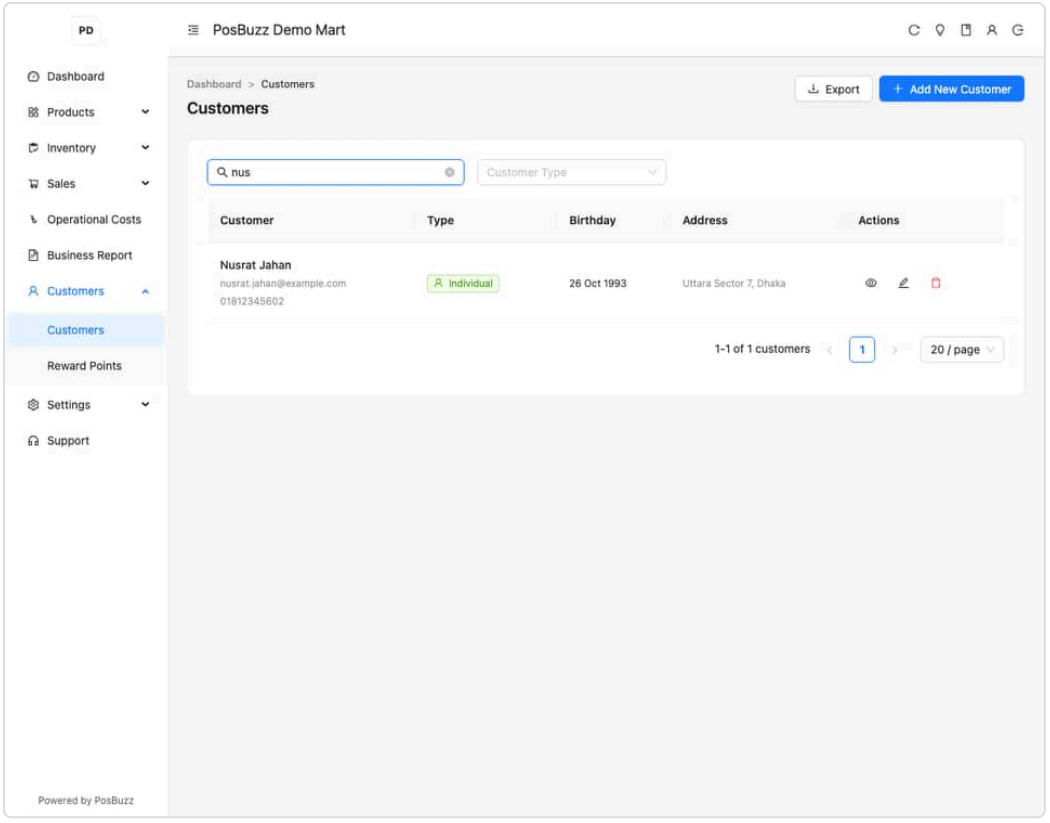

- Top-right buttons: **Export** (a drop-down with one choice, **Export as PDF**, which saves a file named `customers.pdf`) and **Add New Customer**.
- A search box ("Search customers..."). It waits about a third of a second after you stop typing, then searches and goes to page 1. A small x clears it.
- A **Customer Type** list: **Individual** or **Business**. You can clear it.
- A table:

Column	What it shows
Customer	The name, with email and phone in small grey text under it.
Type	A tag: **Business** (blue) or **Individual** (green).
Birthday	The date like "14 Mar 1990", plus a magenta **Today** tag when the birthday is today. A dash if none.
Address	In small grey text.
Actions	Eye icon (**View Customer History**), pencil icon (**Edit Customer**), red bin icon (**Delete Customer**). Hover to see these names.

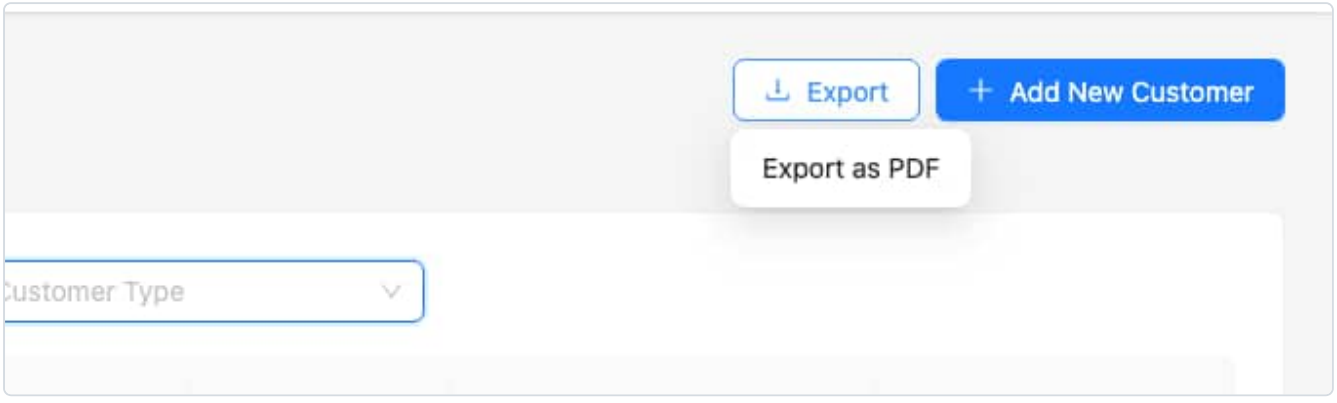

At the bottom: a page-size changer, a jump box and the text "1-20 of N customers". 20 rows per page.

*The **Customer Type** list.*

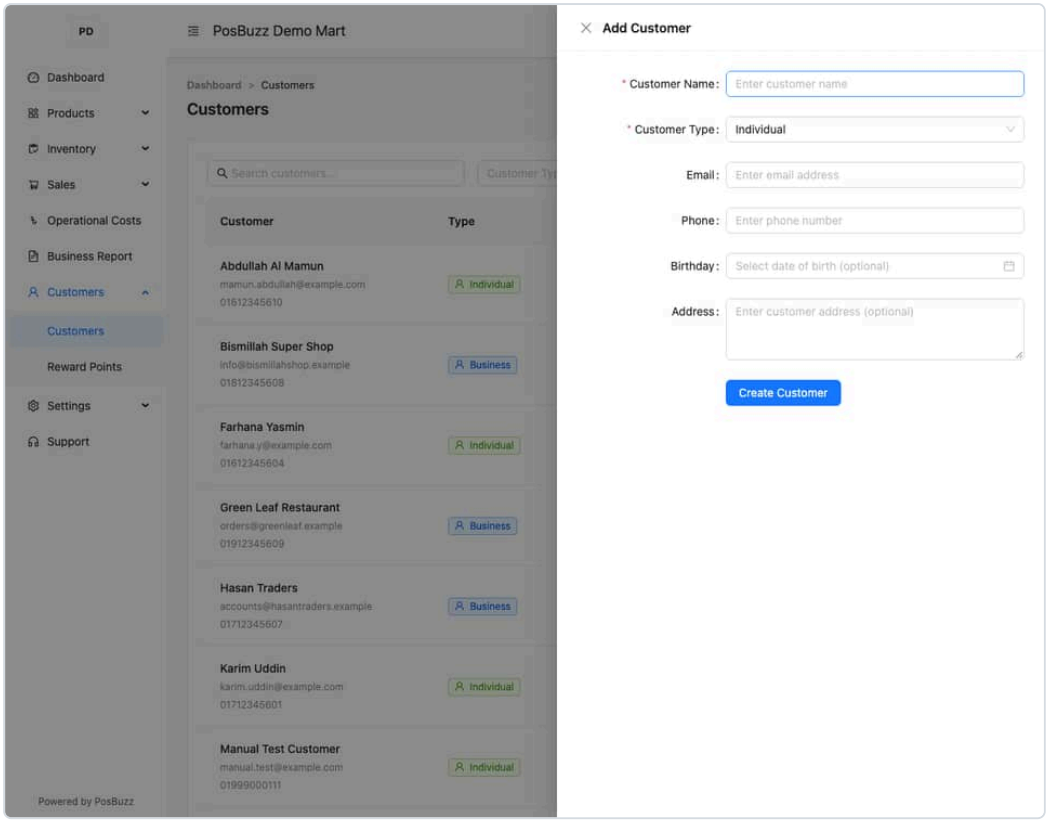

Typing "nus" in the search box.

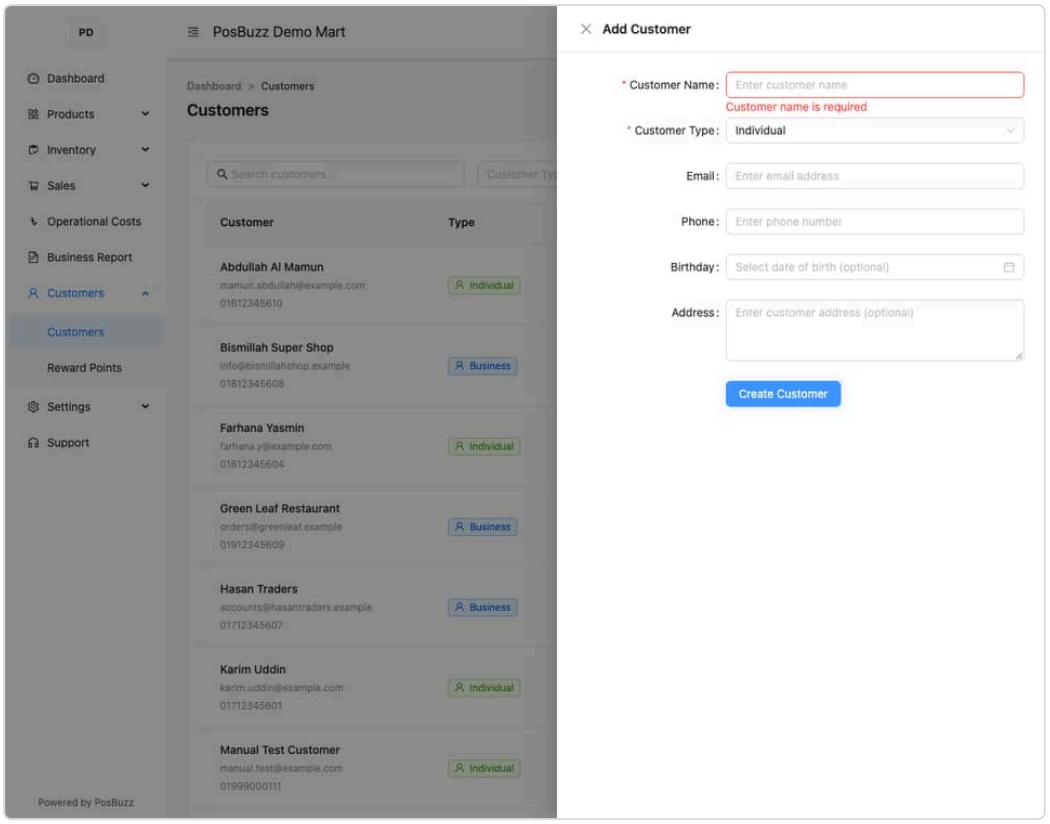

*The **Export** menu with the one choice **Export as PDF**.*

How to add a customer

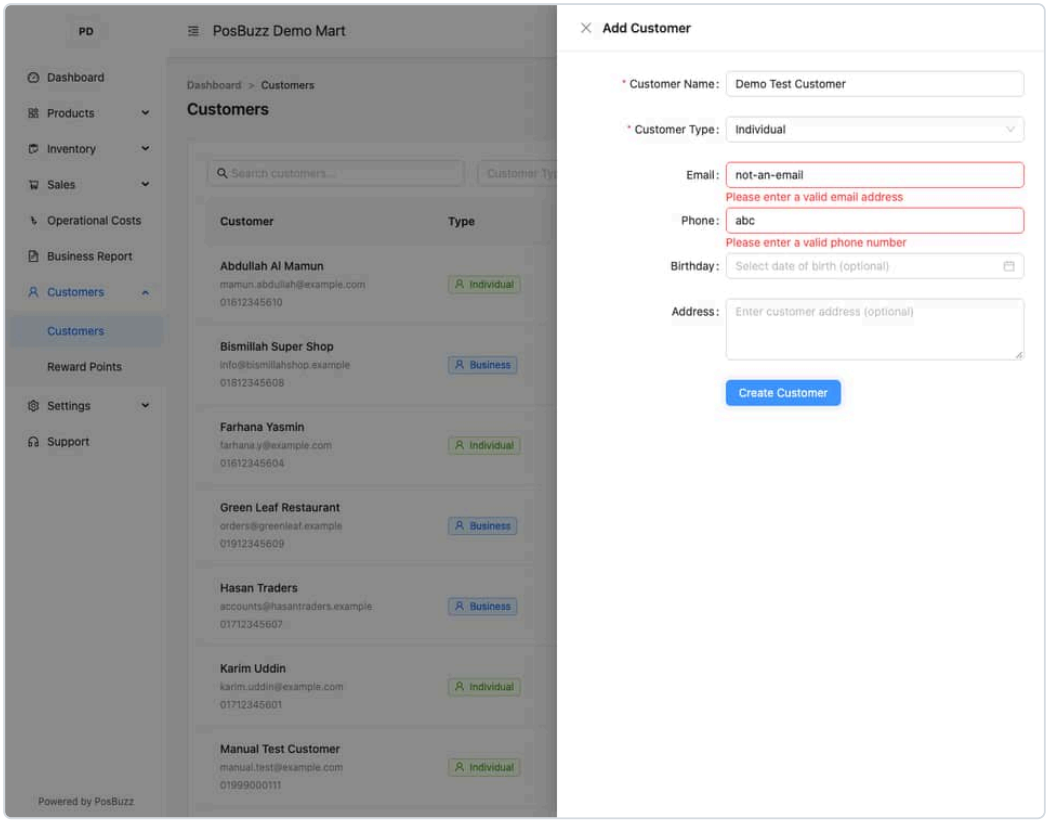

1. Go to **Customers** > **Customers**.
2. Click **Add New Customer**. The drawer "Add Customer" opens.
3. Fill in the fields in the table below.
4. Click **Create Customer**.

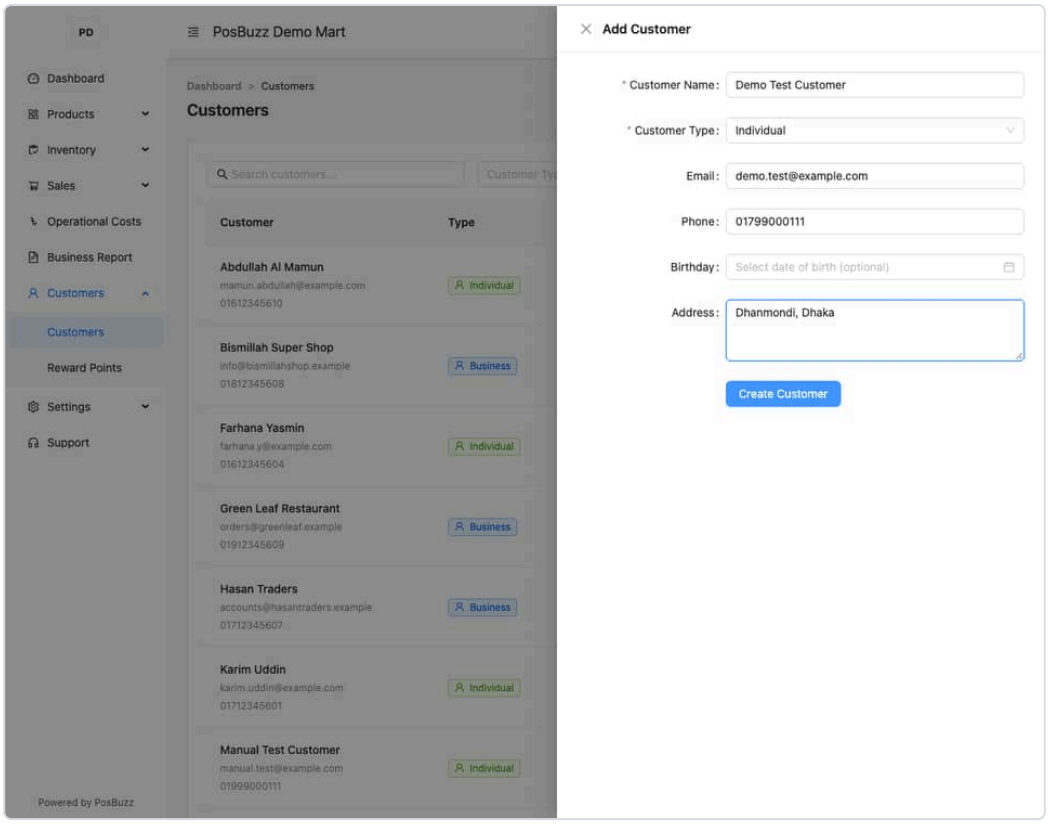

The empty Add Customer drawer.

*Clicking **Create Customer** with the name empty shows "Customer name is required".*

A wrong email and phone number show their messages.

The drawer filled in.

What happens next: the drawer closes and you see "Customer created successfully". The customer appears in the list.

The green "Customer created successfully" message.

You can also add a customer on the New Sale screen while selling.

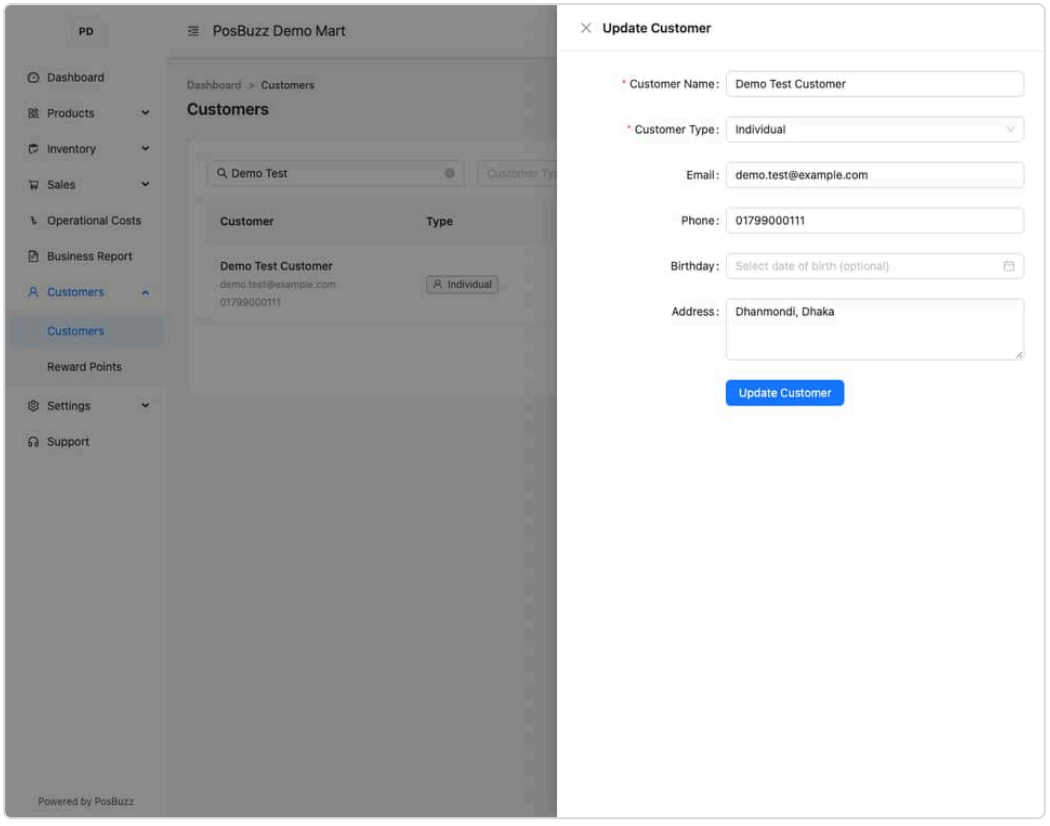

Field	Required	Notes
Customer Name	Yes	Placeholder "Enter customer name". If empty: "Customer name is required".
Customer Type	Yes	**Individual** (chosen at the start) or **Business**. Placeholder "Select customer type". If empty: "Customer type is required".
Email	No	Placeholder "Enter email address". Must be a real email, or you see "Please enter a valid email address".

Field	Required	Notes
Phone	Treat as required	The form does not mark it as required, but the save fails without it. Placeholder "Enter phone number". Only digits, spaces and - + ( ). Otherwise "Please enter a valid phone number".
Birthday	No	Pick a date. Placeholder "Select date of birth (optional)". A future date cannot be picked. When you edit, clearing it removes the saved birthday.
Address	No	Placeholder "Enter customer address (optional)".

How to change a customer

1. Click the pencil icon on the row. The drawer "Update Customer" opens.
2. Change what you need.
3. Click **Update Customer**.

What happens next: you see "Customer updated successfully" and the list refreshes.

The Update Customer drawer with the saved details.

How to find a customer

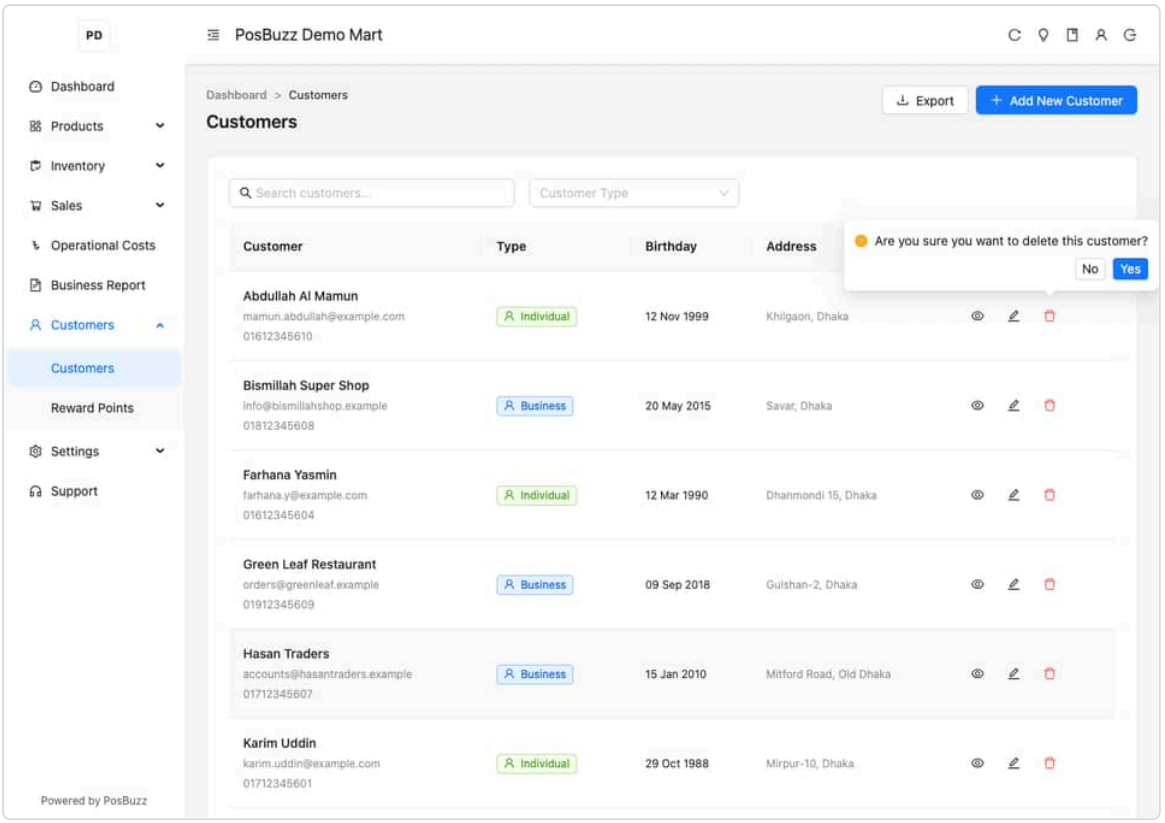

1. Type part of the name, phone or email in the search box.
2. To narrow by kind, choose **Individual** or **Business** in **Customer Type**.

How to find birthdays

Look for the magenta **Today** tag in the **Birthday** column.

How to delete a customer

1. Click the red bin icon on the row.
2. The question "Are you sure you want to delete this customer?" appears. Click **Yes**. Click **No** to keep the customer.

*The delete question, with **No** and **Yes**.*

What happens next: you see "Customer deleted successfully".

How to download the list

1. Click **Export**, then **Export as PDF**.

What happens next: a file named `customers.pdf` is saved. If it fails you see "Failed to export the list".

Messages on this screen

Message	What it means	What to do
Customer created successfully / Customer updated successfully / Customer deleted successfully	The action worked.	Nothing.
Customer name is required	The name is empty.	Type a name.
Customer type is required	No type chosen.	Choose a type.
Please enter a valid email address	The email is not in a proper form.	Correct it or leave it empty.

Message	What it means	What to do
Please enter a valid phone number	The phone has letters or odd characters.	Use digits, spaces and - + ( ) only.
Failed to create customer / Failed to update customer / Failed to delete customer	The action failed. If the server gave a reason, you see it instead.	Read the reason, or try again. A missing phone number is a common cause.
Customer not found	The customer was already removed.	Refresh the page.
Failed to export the list	The PDF could not be made.	Try again.

Customer history

Page title: the customer's name (while loading it reads "Customer history"). The browser tab reads "name - Customer".

What it is

Everything about one customer: totals, what they still owe, returns, their reward balance, and the history of sales, returns and reward movements.

Where to find it

Menu: **Customers** > **Customers**, then click the eye icon on the customer's row. You need the **Customers** permission.

What you see

- Top-right button: **Back to customers**.
- If the link is wrong you see "Invalid customer ID". If the customer cannot be loaded you see "Customer could not be loaded" with the text "The customer may not exist or you may not have access to it." and a **Back to customers** button.
- Four tabs: **Summary**, **Sales (N)**, **Returns (N)** and **Rewards**. The numbers in brackets are counts.

Summary tab

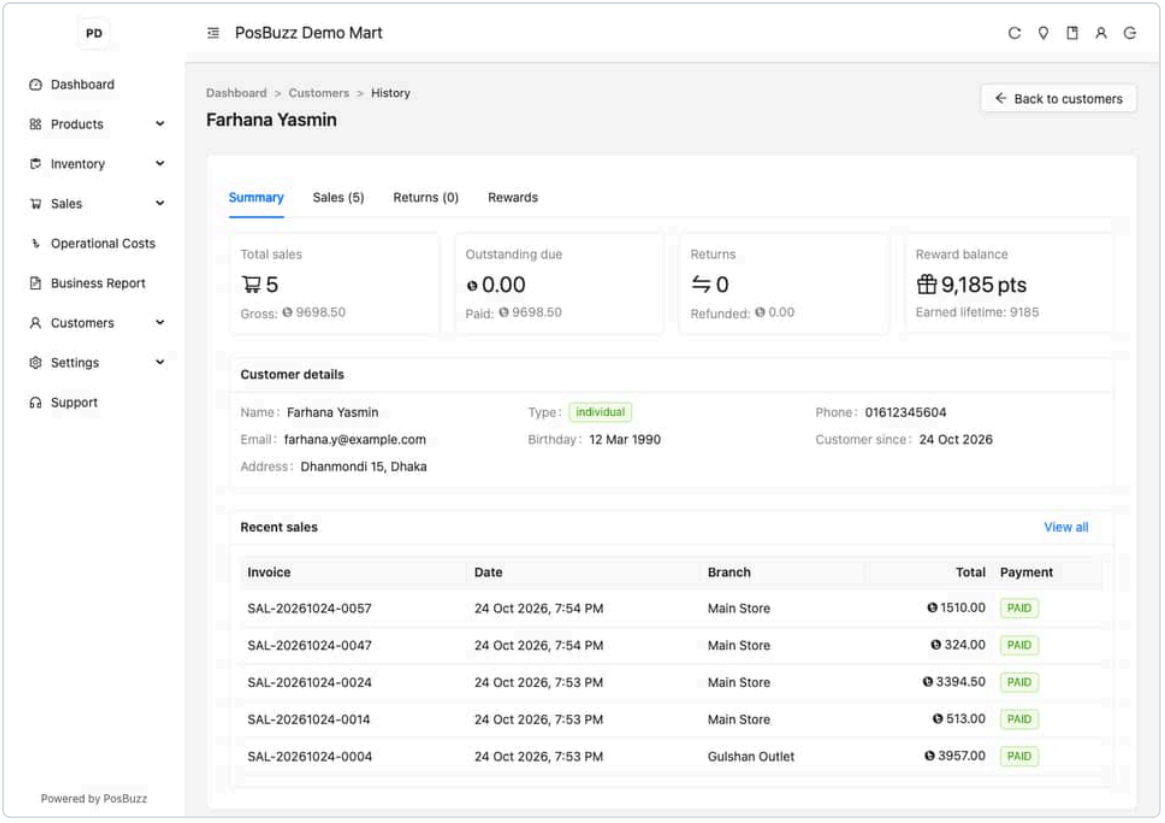

- Four cards:
  - **Total sales**: the number of sales, with "Gross:" and the amount.
  - **Outstanding due** (red when above 0): what the customer still owes, with "Paid:" and the amount.
  - **Returns**: the number of returns, with "Refunded:" and the amount.
  - **Reward balance**: points, with "pts", and "Earned lifetime:" and the number.
- **Customer details**: Name, Type (a tag), Phone, Email, Birthday, Customer since, Address. A dash when empty.
- **Recent sales** with a **View all** link that opens the Sales tab (only when the customer has sales). Columns **Invoice**, **Date**, **Branch**, **Total**, **Payment**. Empty text: "No sales yet".

Sales tab: Invoice (link to the sale), **Date**, **Branch**, **Total**, **Due** (what is still unpaid on that invoice), **Payment** (**PAID** green, **PARTIAL** gold, **DUE** red). 20 per page.

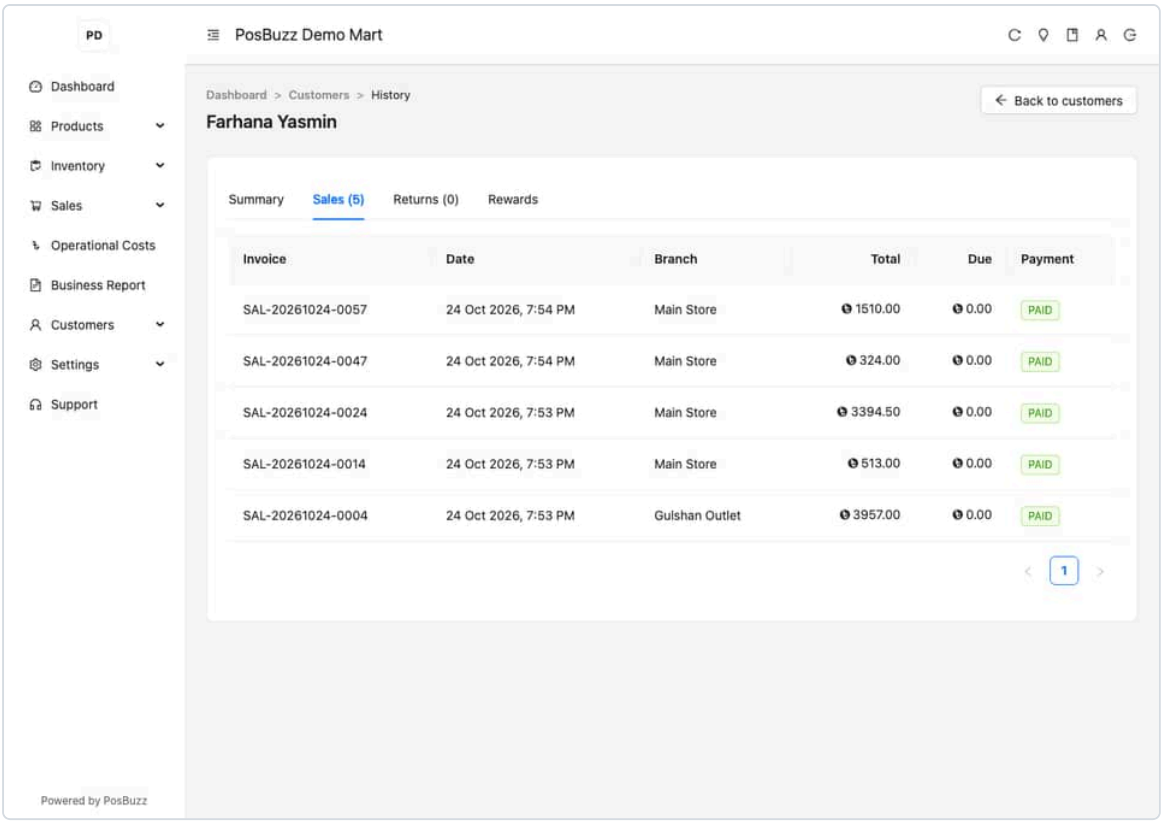

Returns tab: Return (link), **Date**, **Original invoice** (link), **Branch**, **Refund**, **Exchange**, **Reason** (a dash if none). 20 per page.

Rewards tab: Date, **Type** (a tag such as EARN, REDEEM or ADJUSTMENT), **Points** (green "+N" for earned, red "-N" for used), **Balance** (the balance after that line), **Invoice** (a link or a dash), **Details** (a dash if none). 20 per page.

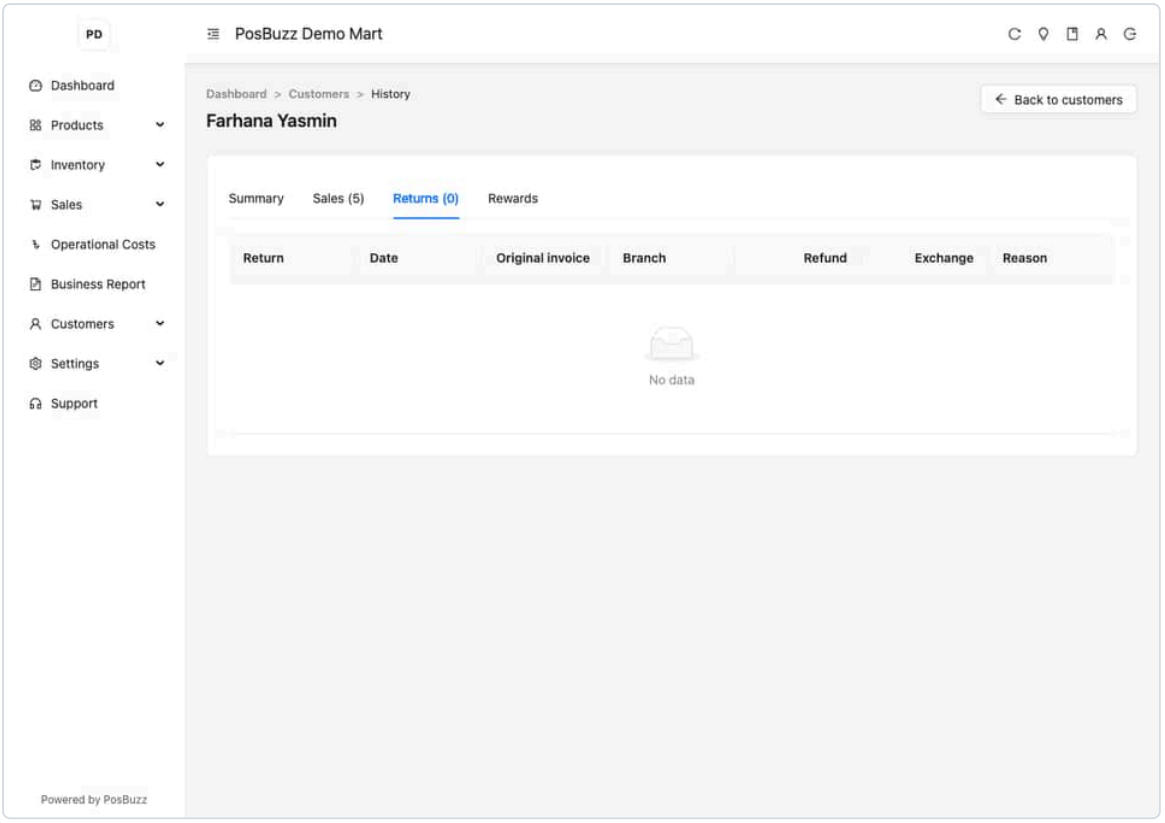

There are no forms here. You can only read, switch tabs and follow links.

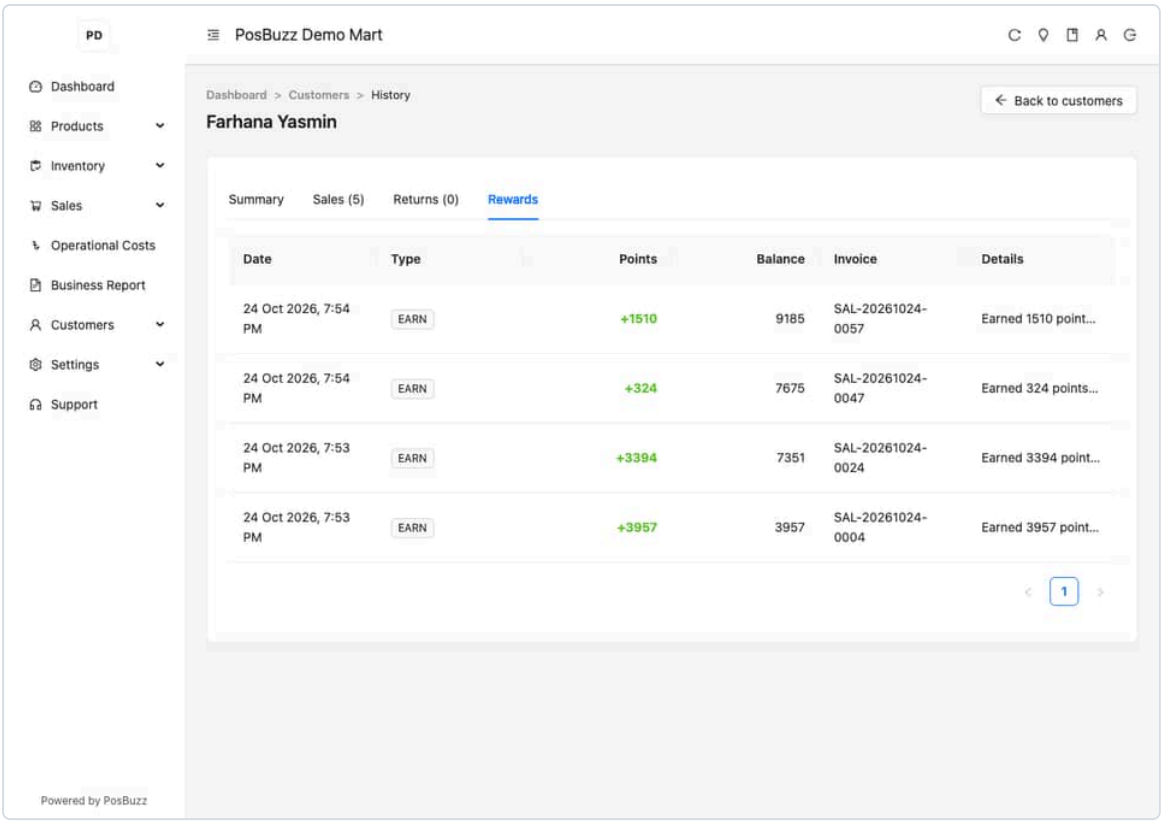

*The **Summary** tab: four cards, the customer details and recent sales.*

*The **Sales** tab.*

*The **Returns** tab. This customer has no returns.*

*The **Rewards** tab, with EARN lines and the balance after each.*

How to see a customer's history

1. Go to **Customers** > **Customers**.
2. Click the eye icon on the customer's row.
3. Click the tabs to see sales, returns and rewards.
4. Click **Back to customers** when done.

What happens next: nothing is changed. Use this page to check what a customer owes before they pay.

Reward Points

*Menu name: **Reward Points**. Page title: **Customer Rewards**.*

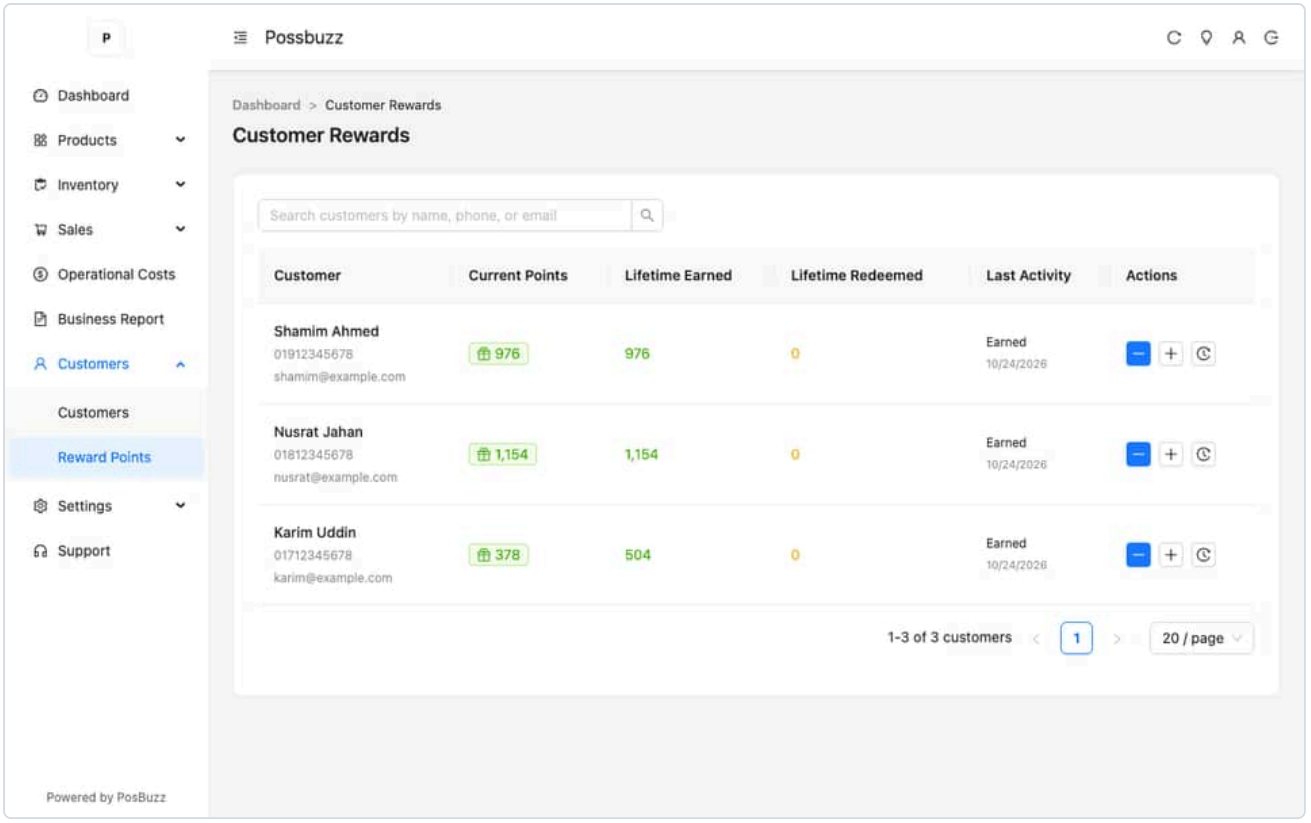

What it is

A list of every customer with a reward-points balance. Staff can take points off (**Redeem Points**), add or remove points (**Adjust Points**), and see each customer's point history.

Where to find it

Menu: **Customers** > **Reward Points**. You need the **Customers** permission. A customer appears here once they have a points record, which happens when they earn points on a sale or when points are adjusted. The rules for earning points are set in **Rewards** (see the next section).

What you see

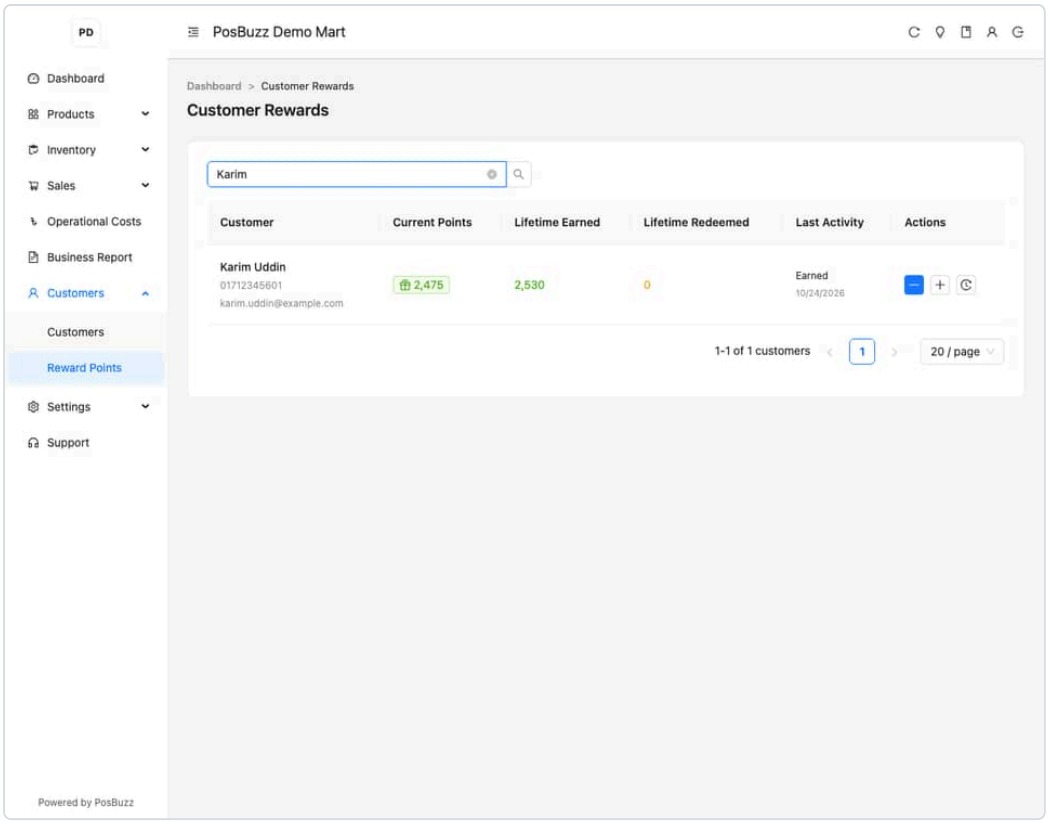

The Customer Rewards page with three customers and the three action buttons on each row.

- A search box with the hint "Search customers by name, phone, or email". Use the magnifier or press Enter. A small x clears it.
- A table, with the highest balance first:

Column	What it shows
Customer	The name, with phone and email in small grey text.
Current Points	A gift-icon tag with the balance (green above 0, grey at 0).
Lifetime Earned	A green number.
Lifetime Redeemed	An amber number.
Last Activity	"Earned" or "Redeemed", whichever is more recent, with the date under it. Or "No activity".
Actions	Three icon buttons: **Redeem Points** (blue minus icon, greyed out when the balance is 0), **Adjust Points** (plus icon), **Transaction History** (clock icon). Hover to see their names.

At the bottom: a page-size changer, a jump box and "1-20 of N customers". 20 rows per page. If the list cannot load you see "Failed to load customer rewards data".

Searching for one customer.

How points are earned and used

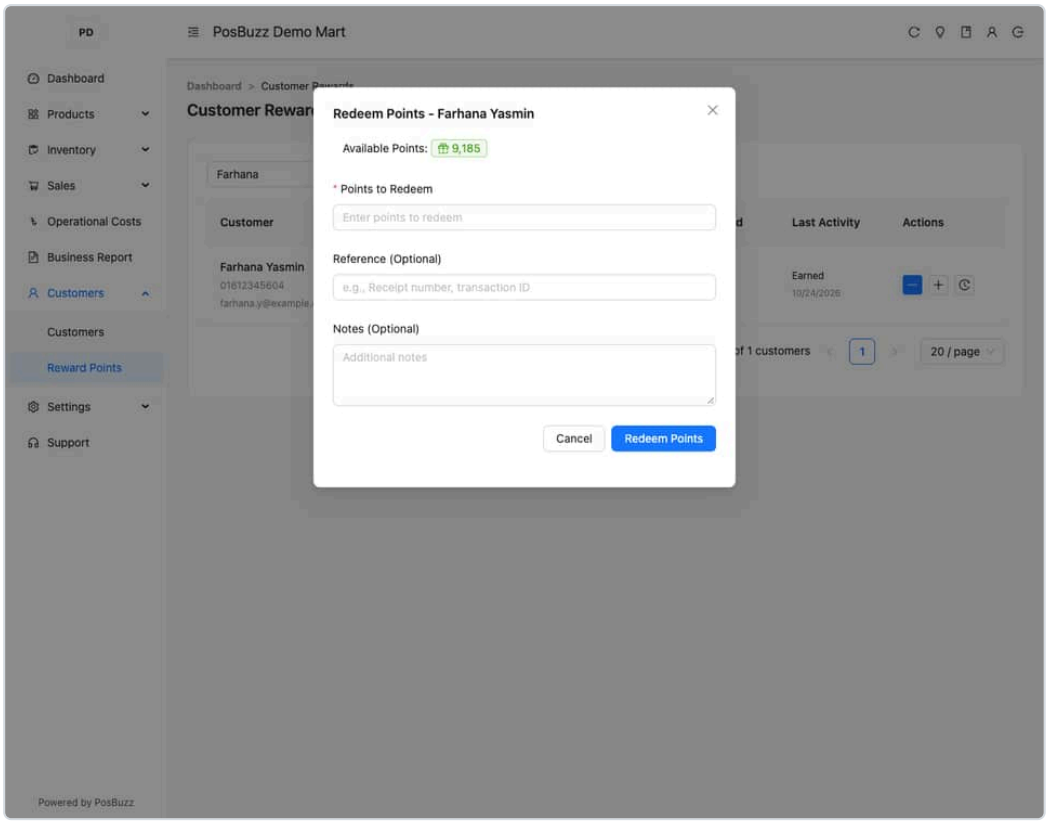

- **Earning:** when a sale with a customer chosen is fully paid, the customer earns points equal to the sale total times **Points per ৳1 Spent**, rounded down to whole points. No points are earned if the sale is below the **Minimum Purchase Amount**, if rewards are switched off, or if the result is 0. **Maximum Points per Sale** caps it if set. The part of a bill paid with reward points does not earn points. A part-paid sale earns nothing at the time of the sale.
- **Value:** each point is worth the **Taka Value per Point**, in taka, when used as payment. With the standard settings you earn 1 point per taka spent, and 100 points are worth 1 taka. You need at least 100 points to redeem.
- **Paying with points at the till:** on the sale screen, choose the payment method **Credit** and enter the amount. The points needed are the amount divided by the value per point, rounded up. The app checks that rewards are on, that the customer has enough points, and that the number of points is within the minimum and maximum. The Business Report counts this under **Reward Points Redeemed**.
- **Return refunded to Credit:** the points come back as an ADJUSTMENT line that reads "Refunded N points for ...".

> **Good to know:** All amounts in messages are in taka, for example "Maximum credit available: ৳250.00". Reward history lines also use the taka sign, for example "Redeemed 34 points for ৳10.00 credit".

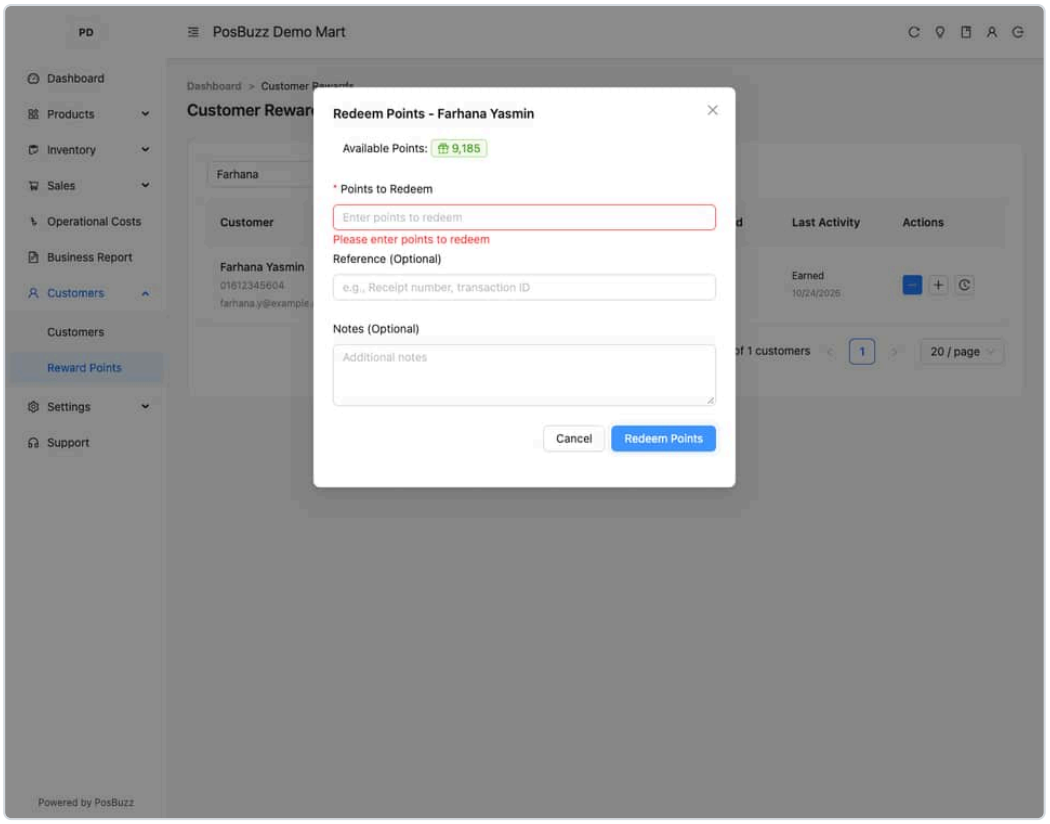

> **Good to know:** If you set **Points Expire After (Days)** in Rewards settings, expired points are removed by the app when the customer list, a customer's points, a redemption or a Credit payment is looked at (at most once a minute). There is no separate screen for it. If points seem to be still there, open the Reward Points page again.

How to redeem points by hand

1. Go to **Customers** > **Reward Points**.
2. Find the customer and click the minus icon (**Redeem Points**). The window "Redeem Points - " and the customer name opens. It shows the tag "Available Points:" and the balance.
3. Enter **Points to Redeem**.
4. If you like, fill in **Reference (Optional)** and **Notes (Optional)**.
5. Click **Redeem Points**. Click **Cancel** to leave.

The Redeem Points window showing the available points.

*Clicking **Redeem Points** with the box empty shows "Please enter points to redeem".*

What happens next: you see "Points redeemed successfully". The points are taken off the balance and added to Lifetime Redeemed.

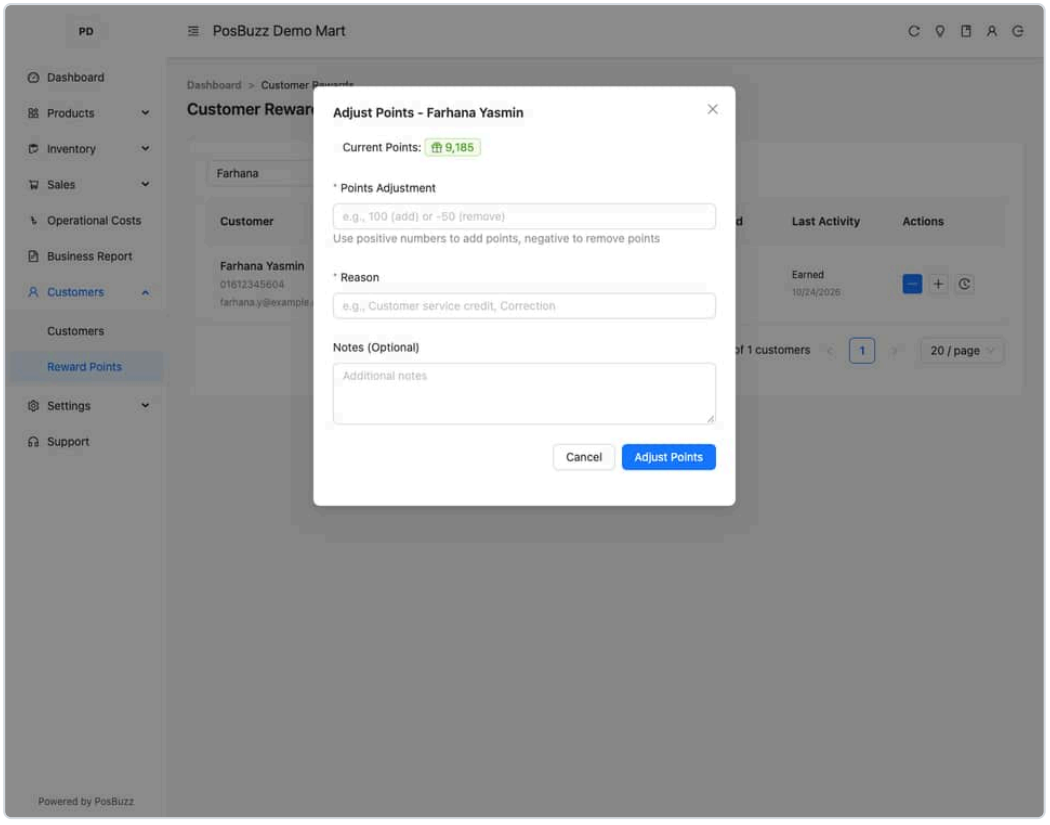

> **Good to know:** In testing, when we typed a number larger than the customer's balance, the box changed it to the full balance, and clicking **Redeem Points** used all the points. Check the number in the box before you click.

> **Good to know:** This button only changes the points. It gives the customer no discount and no money. Use it to record points that were used outside a sale. To pay a bill with points, use the payment method **Credit** on the sale screen.

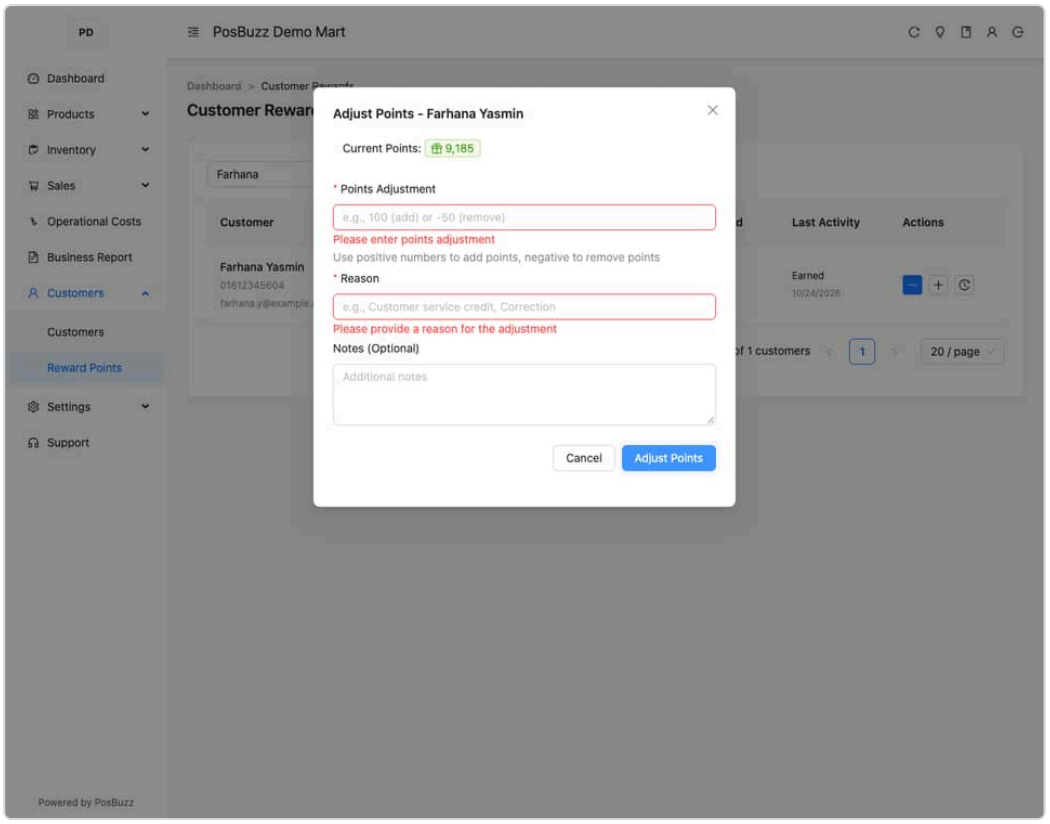

Field	Required	Notes
Points to Redeem	Yes	A whole number from 1 up to the balance. Placeholder "Enter points to redeem". If empty: "Please enter points to redeem". If out of range: "Must be between 1 and (balance)".
Reference (Optional)	No	Placeholder "e.g., Receipt number, transaction ID".
Notes (Optional)	No	Placeholder "Additional notes".

How to add or remove points

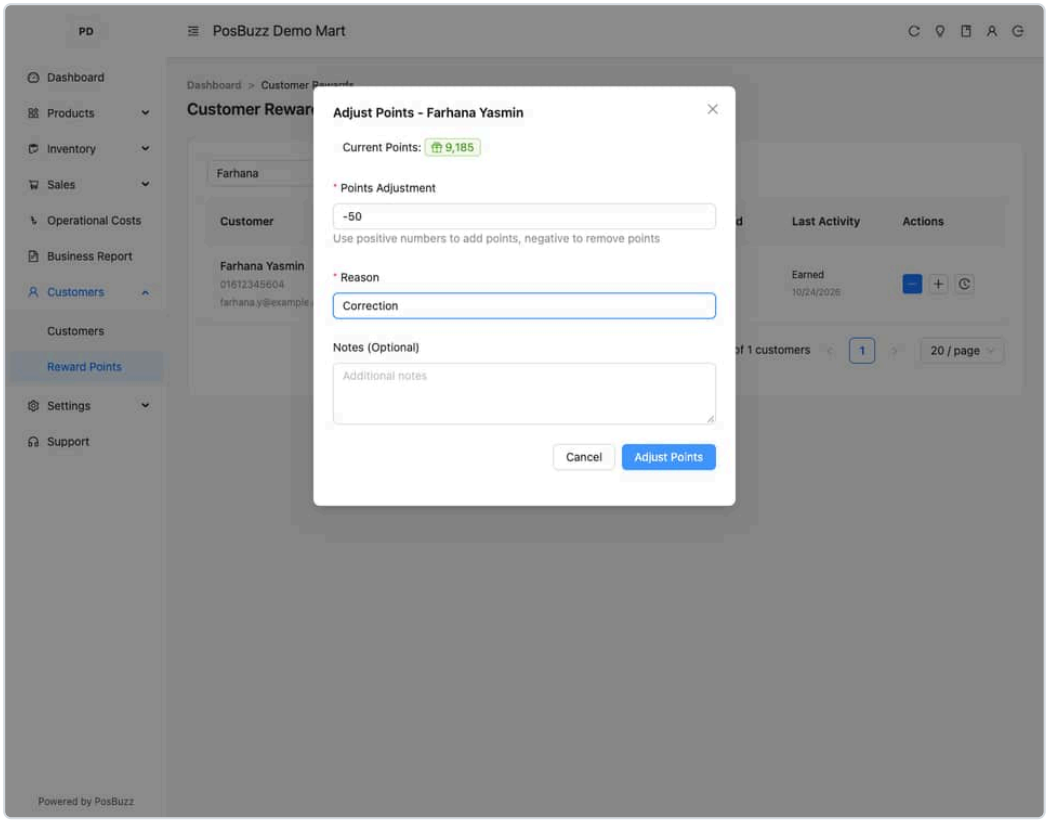

1. Click the plus icon (**Adjust Points**) on the customer's row. The window "Adjust Points - " and the customer name opens. It shows "Current Points:" and the balance.
2. In **Points Adjustment**, type a positive number to add points, or a negative number to remove them. For example 100 adds, -50 removes.
3. Type the **Reason**.
4. If you like, fill in **Notes (Optional)**.
5. Click **Adjust Points**. Click **Cancel** to leave.

The Adjust Points window.

Both required boxes show their messages.

A removal of 50 points with a reason typed.

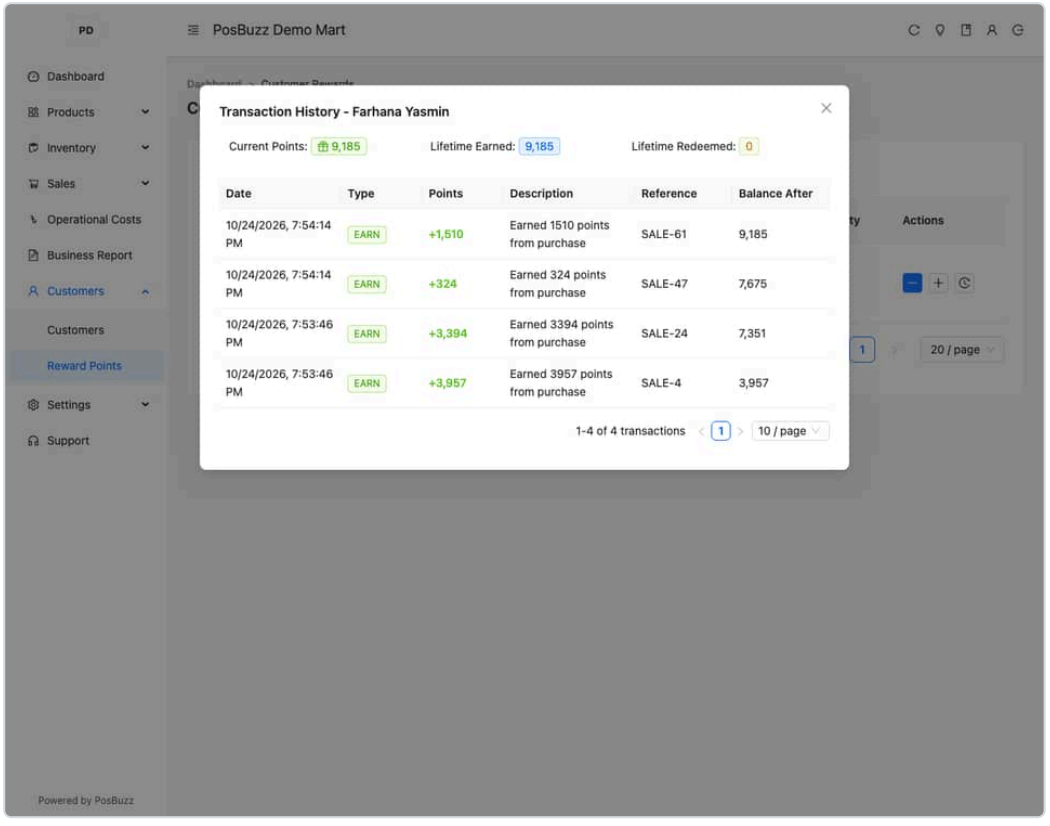

What happens next: you see "Points adjusted successfully". The current balance changes. Lifetime Earned and Lifetime Redeemed do not change.

Field	Required	Notes
Points Adjustment	Yes	A number. Help text: "Use positive numbers to add points, negative to remove points". Placeholder "e.g., 100 (add) or -50 (remove)". If empty: "Please enter points adjustment". If not a number: "Must be a number".
Reason	Yes	Placeholder "e.g., Customer service credit, Correction". If empty: "Please provide a reason for the adjustment".
Notes (Optional)	No	Placeholder "Additional notes".

How to see a customer's point history

1. Click the clock icon (**Transaction History**) on the customer's row.
2. The window "Transaction History - " and the customer name opens.
3. Read the strip at the top: **Current Points** (green), **Lifetime Earned** (blue), **Lifetime Redeemed** (orange).
4. Read the table: **Date**, **Type**, **Points**, **Description**, **Reference** (a "-" if none), **Balance After**. The type tag is **EARN** (green), **REDEEM** (orange), or **ADJUSTMENT** or **EXPIRE** (blue). It shows 10 rows per page (you can choose 10, 20 or 50) and "1-10 of N transactions".

What happens next: nothing is changed. If the list cannot load you see "Failed to load transaction history".

The Transaction History window for one customer.

> **Good to know:** The **Points** column shows EARN as "+N" and REDEEM as "-N". ADJUSTMENT and EXPIRE rows show the number with no sign, even when points were taken away. Read the **Balance After** column to see whether the balance went up or down.

Messages on this screen

Message	What it means	What to do
Points redeemed successfully	The points were taken off.	Nothing.
Points adjusted successfully	The balance was changed.	Nothing.
Please enter points to redeem	The field is empty.	Enter a number.
Must be between 1 and (balance)	The number is too low or more than the balance.	Enter a number in range.
Please enter points adjustment / Must be a number	The field is empty or not a number.	Enter a number such as 100 or -50.
Please provide a reason for the adjustment	The reason is empty.	Type a reason.
Rewards system is disabled	Rewards are switched off in Rewards settings.	Switch **Enable Rewards System** on.
Minimum redemption is N points	You asked for fewer points than the minimum.	Enter at least N.
Maximum redemption is N points	You asked for more points than the maximum.	Enter N or fewer.
Insufficient points balance	The customer does not have that many points.	Enter a smaller number.
Customer not found	The customer was removed.	Refresh the page.
Failed to redeem points / Failed to adjust points	The action failed with no reason given.	Try again.

Rewards

*Menu name: **Rewards**. Page title: **Rewards Settings**.*

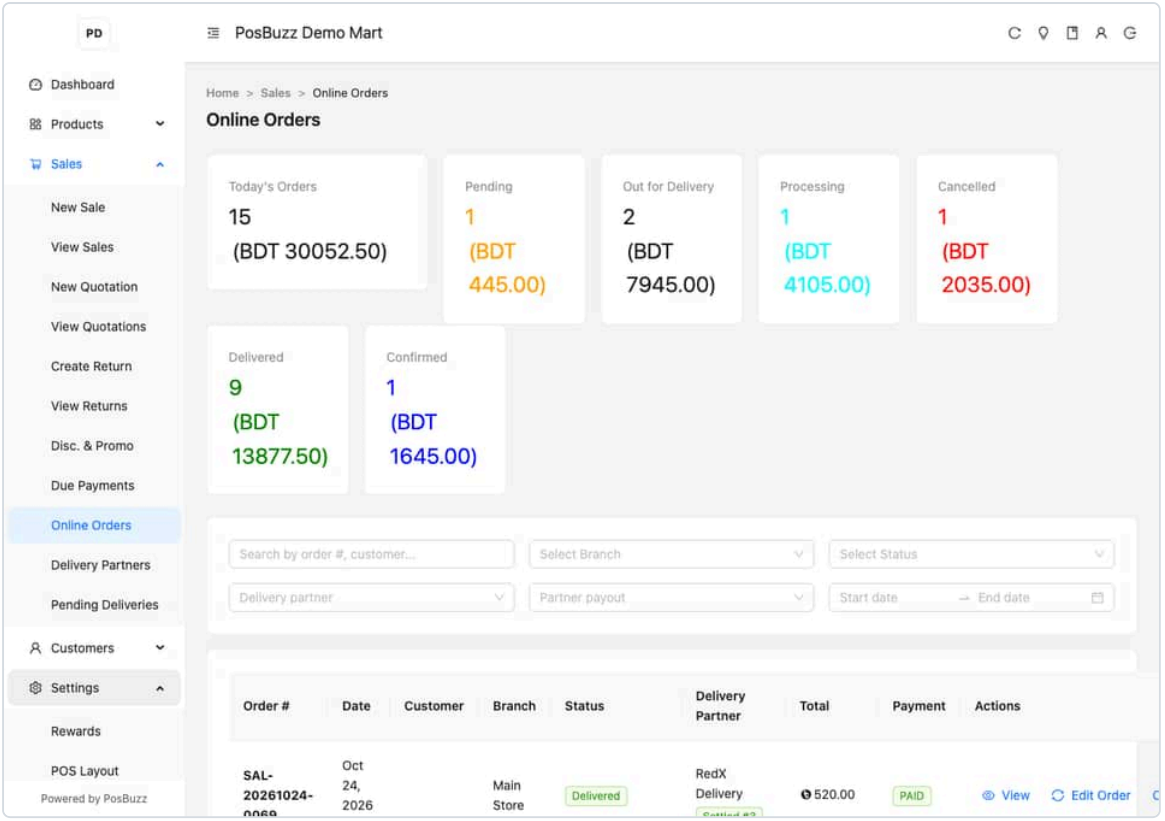

What it is

The page that switches the reward-points programme on or off and sets how points are earned and spent.

Where to find it

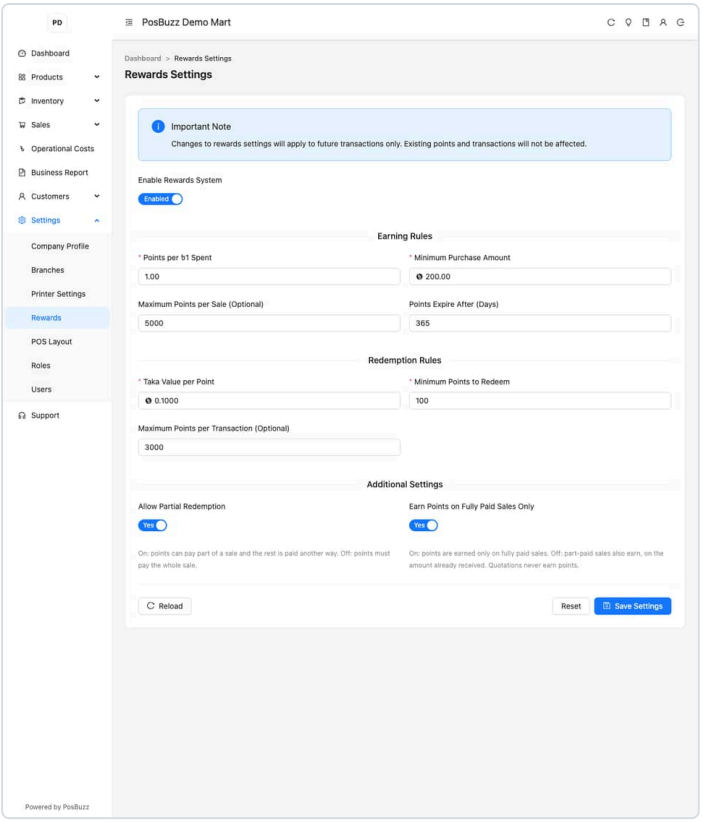

Menu: **Settings** > **Rewards**. You need the **Sales** permission.

Good to know: The **Settings** group appears in the menu for anyone allowed at least one of its pages. What you see inside depends on your role. In our demo shop the Manager sees Company Profile, Branches, Rewards and POS Layout. The Cashier sees only Rewards and POS Layout. Printer Settings, Roles and Users show only to roles that have those permissions. The shop owner (Admin role) holds every permission of the shop's plan.

A Cashier's menu: no Sales Target, User Sales Stats, Operational Costs or Business Report, and only Rewards and POS Layout under Settings.

What you see

The whole Rewards Settings page with the new taka labels and the help text under the two switches.

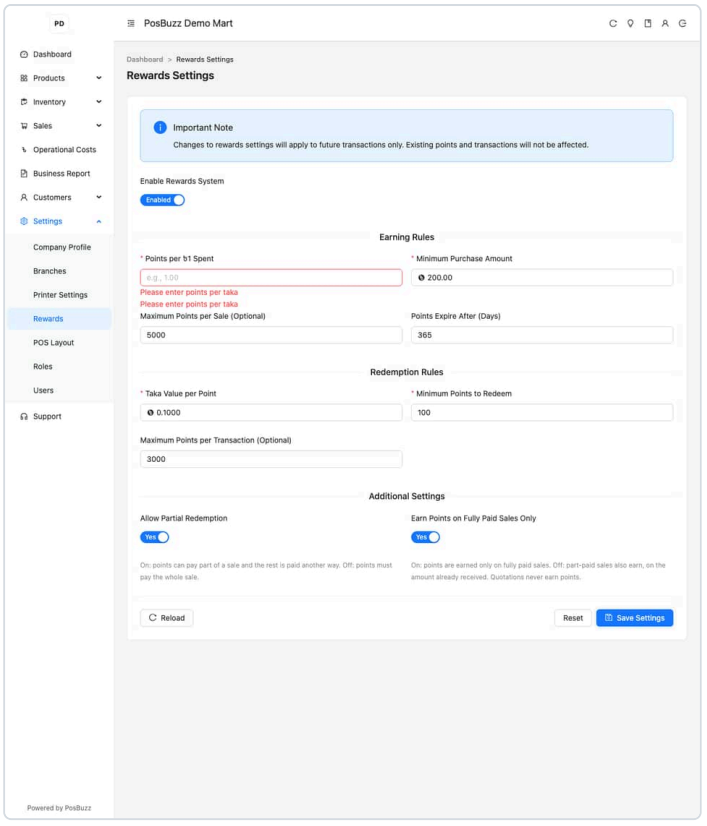

- A blue box **Important Note**: "Changes to rewards settings will apply to future transactions only. Existing points and transactions will not be affected."
- The form. It is greyed out while loading. If your shop never saved settings, these standard values show: enabled, 1 point per taka, minimum purchase 0, no maximum, value per point 0.01, minimum redemption 100, no maximum, no expiry, partial redemption Yes, earn on sales only Yes.
- Buttons: **Reload** (loads the saved values again), **Reset** (throws away what you typed and goes back to the values loaded) and **Save Settings**.

Section	Field	Required	Notes
Top	**Enable Rewards System**	-	A switch showing "Enabled" or "Disabled".
Earning Rules	**Points per ৳1 Spent**	Yes	How many points per taka spent. 0 or more, two decimals. Example "e.g., 1.00". If empty: "Please enter points per taka". If negative: "Must be a positive number".
	Minimum Purchase Amount	Yes	The smallest sale that earns points, in taka. Example "e.g., 10.00". If empty: "Please enter minimum purchase amount".
	Maximum Points per Sale (Optional)	No	A whole number, 1 or more. Hint "Leave empty for no limit".
	Points Expire After (Days)	No	A whole number, 1 or more. Hint "Leave empty for no expiration".

Section	Field	Required	Notes
Redemption Rules	**Taka Value per Point**	Yes	What one point is worth in taka. Minimum 0.0001, four decimals. Example "e.g., 0.01". If empty: "Please enter redemption value". If 0 or less: "Must be greater than 0".
	Minimum Points to Redeem	Yes	A whole number, 1 or more. Example "e.g., 100". If empty: "Please enter minimum redemption". If wrong: "Must be a whole number at least 1".
	Maximum Points per Transaction (Optional)	No	A whole number, 1 or more. Hint "Leave empty for no limit".
Additional Settings	**Allow Partial Redemption**	-	A Yes or No switch. Help text on screen: "On: points can pay part of a sale and the rest is paid another way. Off: points must pay the whole sale."
	Earn Points on Fully Paid Sales Only	-	A Yes or No switch. Help text on screen: "On: points are earned only on fully paid sales. Off: part-paid sales also earn, on the amount already received. Quotations never earn points."

Good to know: Allow Partial Redemption set to No means a sale paid with reward points (payment method **Credit**) must be covered entirely by points. Otherwise the sale is refused with "Partial redemption is turned off: reward points must cover the whole sale". **Earn Points on Fully Paid Sales Only** set to No means part-paid sales also earn points, on the amount already received. Quotations never earn points.

Good to know: Points Expire After (Days) removes expired points when points are looked at or spent (see the note on the Reward Points page).

*Clearing **Points per ৳1 Spent** and clicking **Save Settings** shows "Please enter points per taka". In testing the message showed twice. Nothing was saved.*

How to start a loyalty programme

1. Go to **Settings** > **Rewards**.
2. Switch **Enable Rewards System** on.
3. Set **Points per ৳1 Spent**, for example 1.
4. Set **Taka Value per Point**, for example 0.01 (so 100 points are worth 1 taka).
5. Set **Minimum Points to Redeem**, for example 100.
6. Click **Save Settings**.

What happens next: you see "Rewards settings saved successfully". The new rules apply to future sales only. With these example values, a sale of 2,500 taka earns 2,500 points, worth 25 taka when used.

How to pause the programme

1. Switch **Enable Rewards System** off.
2. Click **Save Settings**.

What happens next: no points are earned or redeemed while it is off. Existing balances stay.

How to undo changes you have not saved

Click **Reset** to go back to the values that were loaded, or **Reload** to fetch the saved values again.

Messages on this screen

Message	What it means	What to do
Rewards settings saved successfully	The settings were saved.	Nothing.
Failed to save rewards settings	The save failed. If the server gave a reason, you see it.	Fix any red field messages and try again.
Failed to load rewards settings	The page could not load the saved values.	Click **Reload**.
The field messages listed in the table above	A required field is empty or wrong.	Correct the field.

POS Layout

*Page title: **POS Layout**. The browser tab reads "POS Layout Settings". Menu name: **POS Layout**.*

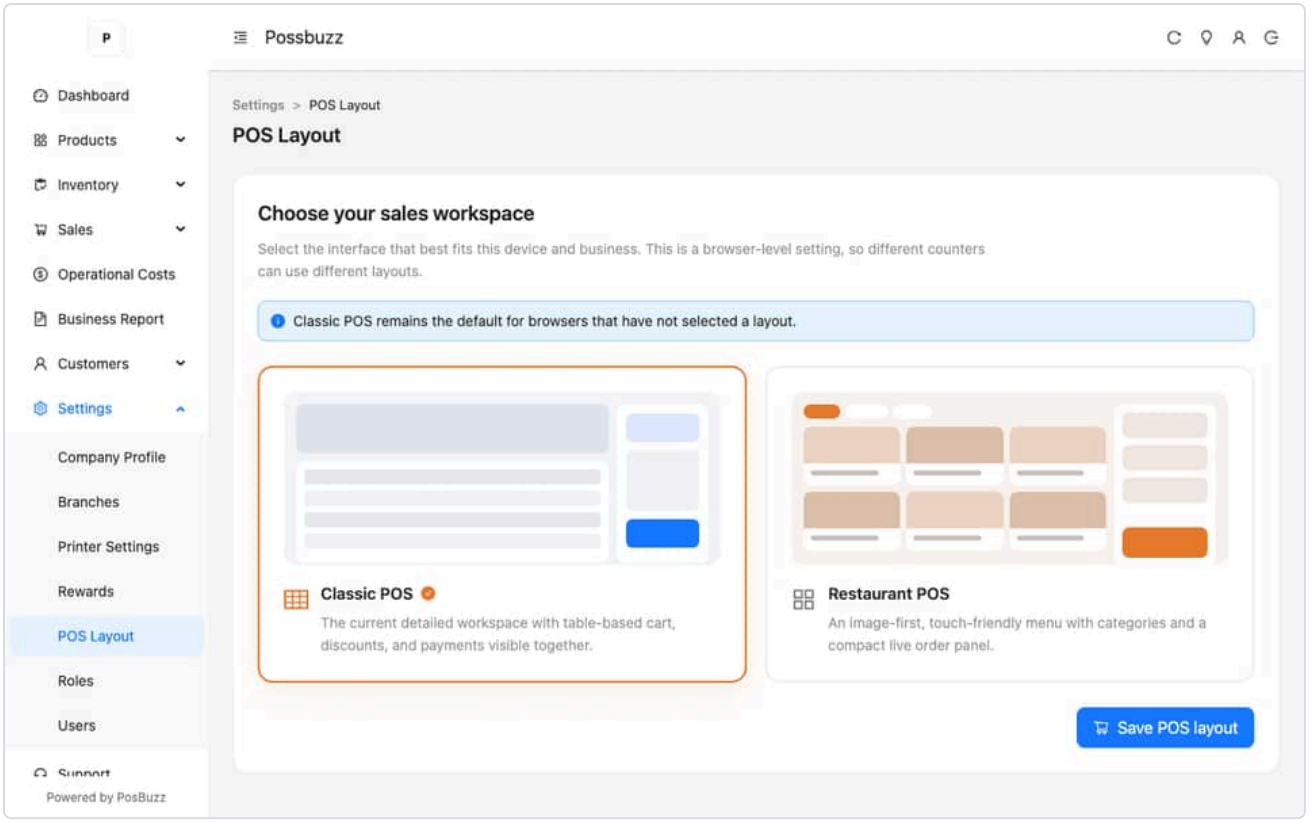

What it is

A page where each counter chooses which sales screen the POS uses. One is the detailed table-style screen. The other is a touch-friendly picture menu, useful for restaurants and cafes.

Where to find it

Menu: **Settings** > **POS Layout**. You need the **Sales** permission. The **Settings** group shows in the menu for anyone allowed at least one of its pages (see the note under Rewards).

What you see

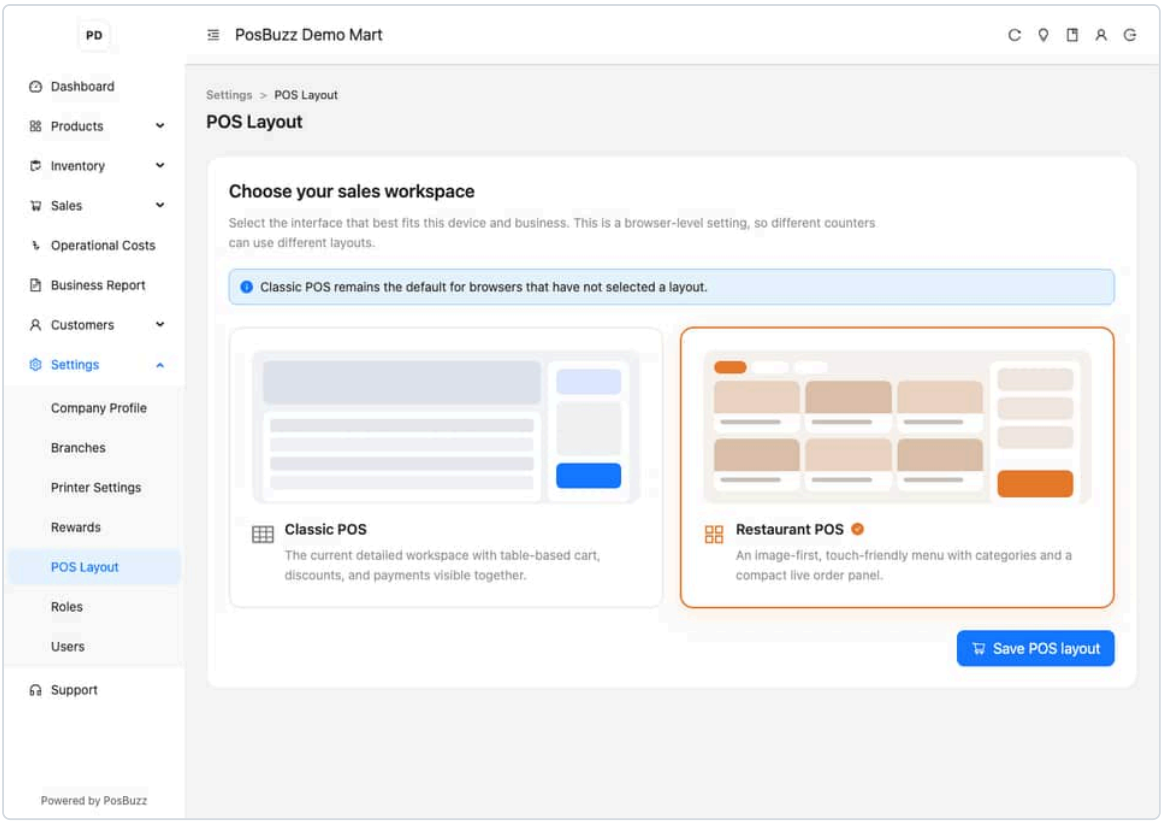

The POS Layout page with Classic POS selected.

- The heading **Choose your sales workspace**, with grey text: "Select the interface that best fits this device and business. This is a browser-level setting, so different counters can use different layouts."
- A blue box: "Classic POS remains the default for browsers that have not selected a layout."
- Two cards. The chosen card has an orange border and an orange tick next to its title.
    1. **Classic POS**: "The current detailed workspace with table-based cart, discounts, and payments visible together."
    2. **Restaurant POS**: "An image-first, touch-friendly menu with categories and a compact live order panel."
- A button **Save POS layout** at the bottom right.

How to change the POS layout

1. Go to **Settings** > **POS Layout**.
2. Click **Classic POS** or **Restaurant POS**. The current choice is already selected.
3. Click **Save POS layout**.
4. Open the POS screen.

What happens next: you see "POS layout saved. It will be used the next time POS opens." The POS screen opens in the layout you chose. Nothing changes until you click **Save POS layout**. There are no error messages on this page.

__Restaurant POS__ selected. It only takes effect after __Save POS layout__.

> **Good to know:** The choice is kept in the web browser on this one computer or tablet. It is not saved for your user name and it is not shared with other counters. Each counter must set its own. If someone clears the browser data, the counter goes back to **Classic POS**.

> **Good to know: Restaurant POS** shows product pictures. Products without pictures will look empty, so add pictures first.

Messages on this screen

Message	What it means	What to do
POS layout saved. It will be used the next time POS opens.	Your choice was stored on this browser.	Open the POS screen.

Printer Settings

Menu name: __Printer Settings__. Page title: __Receipt PDF Settings__. The path at the top reads "Dashboard > Settings > Receipt PDF".

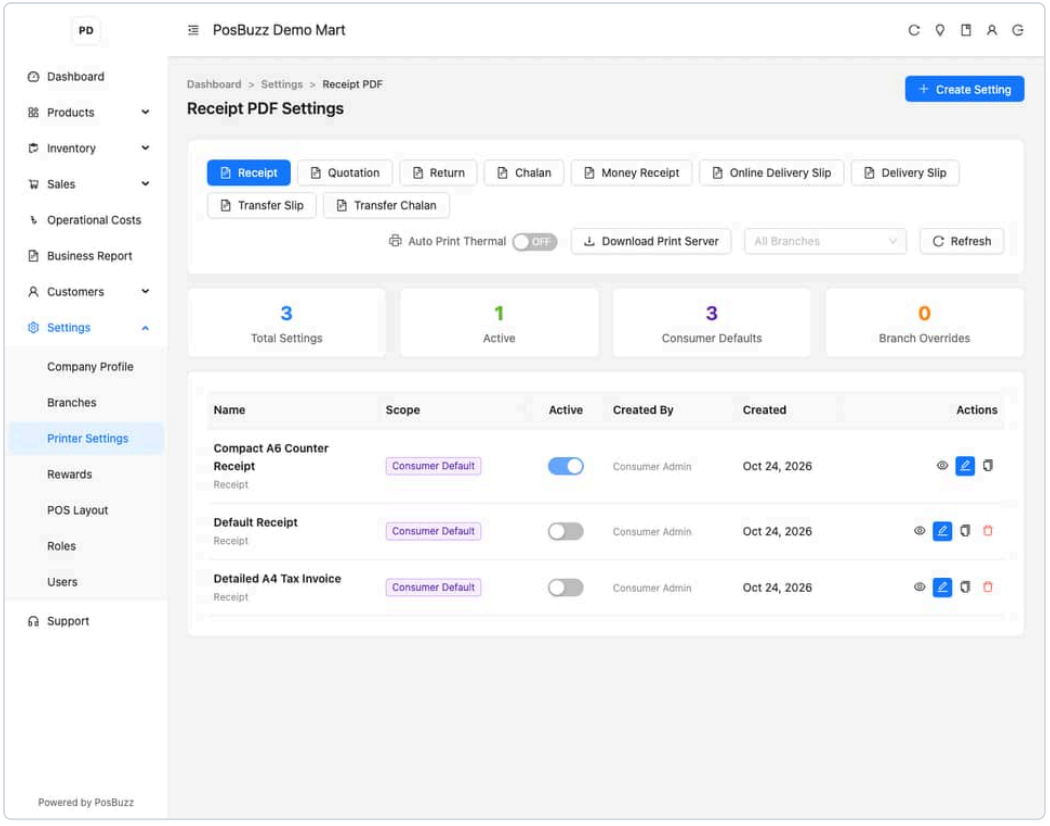

What it is

The page that controls how every printed document looks: receipts, quotations, returns, challans, money receipts, delivery slips and transfer slips. You can set one look for the whole shop and a different look for a branch. The page also holds the switch for automatic small-roll (thermal) receipt printing and the download of the Windows print program.

Where to find it

Menu: **Settings** > **Printer Settings**. You need the **Receipt settings** permission. The **Settings** group shows in the menu for anyone allowed at least one of its pages (see the note under Rewards).

What you see

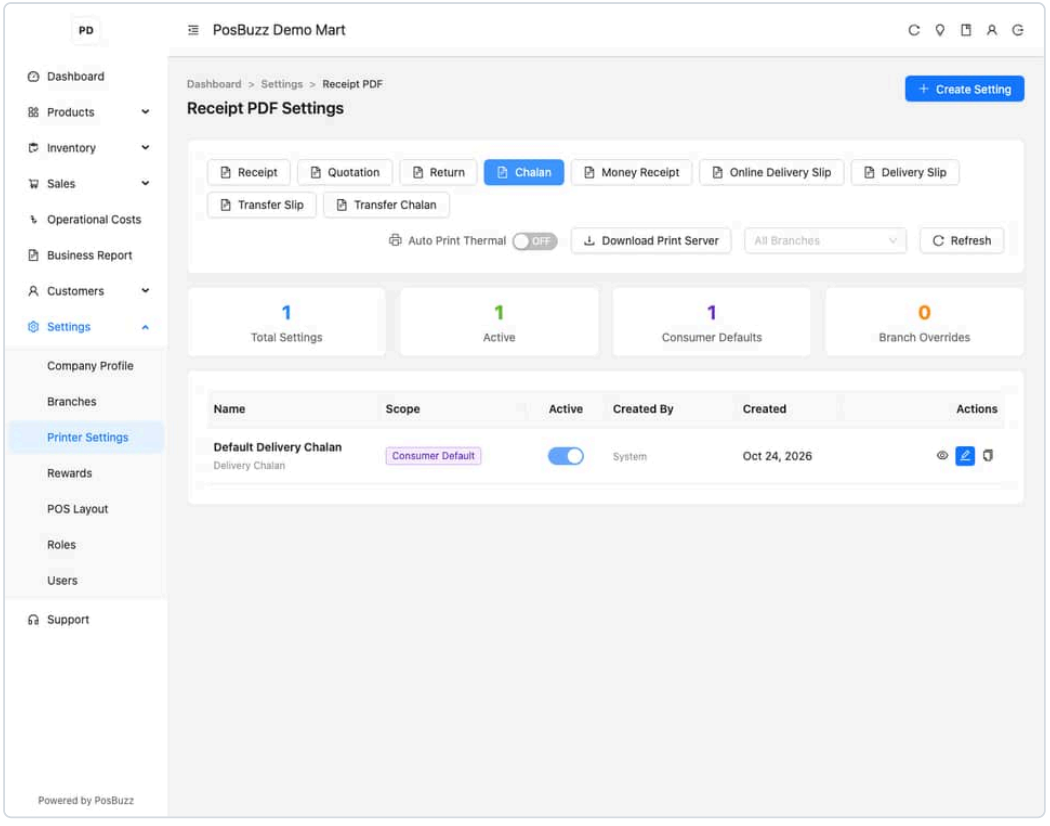

The Receipt PDF Settings page with the Receipt type chosen. Three receipt layouts are listed and one is active. The active one has no bin icon.

- Top-right button: **Create Setting**.
- A box of controls:
  - Document type buttons: **Receipt** (chosen at the start), **Quotation**, **Return**, **Chalan**, **Money Receipt**, **Online Delivery Slip**, **Delivery Slip**, **Transfer Slip**, **Transfer Chalan**. The list below shows only layouts of the chosen type.
  - **Auto Print Thermal**: a switch showing **ON** or **OFF**. It is saved in this browser only.
  - **Download Print Server**: downloads the Windows print program (a file named `PosBuzz-Print-Server.zip`). The hint reads: "Windows app that prints receipts on the thermal printer. Update: quit it, delete the old folder, extract the new zip, run. Your settings are kept."

    - **All Branches**: a branch list. You can clear it. It shows the branch's layouts plus the shop-wide defaults.
    - **Refresh**: reloads the list.
- Four cards: **Total Settings**, **Active**, **Consumer Defaults** (shop-wide layouts, not tied to a branch) and **Branch Overrides** (layouts tied to a branch). They count only the rows now listed, for the chosen type and branch.
- A table:

Column	What it shows
Name	The layout name in bold, with the document type under it (for example "Receipt", "Delivery Chalan", "Delivery Slip / Sticker", "Inventory Transfer Slip", "Online Delivery Slip", "Money Receipt", "Transfer Chalan", "Quotation", "Return").
Scope	A purple tag **Consumer Default** (all branches) or a blue tag with the branch name.
Active	A switch.
Created By	The person's name, or "System".
Created	For example "Oct 24, 2026".
Actions	Eye icon (**Preview PDF**), blue pencil (**Edit**), copy icon (**Copy to Branch**), red bin (**Delete**). The bin is hidden for an active shop-wide default.

There are no page buttons. Active rows are highlighted.

*After clicking **Chalan** the list shows only chalan layouts.*

*The **All Branches** list.*

How layouts work

- Each document type can have several named layouts. Only one is active for a type and scope.
- A branch uses its own active layout if it has one. Otherwise it uses the shop-wide default (**Consumer Default**).
- Copy a layout to a branch to start a branch version, then edit and activate it.
- The small-roll thermal receipt is a different thing. It is printed by the Windows print program, not by these PDF layouts. **Auto Print Thermal** only decides whether the POS sends each new sale to that program.

How to switch a layout on or off

1. Pick the document type button, for example **Receipt**.
2. Click the switch in the **Active** column of the layout.

What happens next:

- Switching on makes it the one in use for that type and scope. Other layouts of the same type and scope switch off. You see "Setting activated successfully".
- Switching off a branch layout makes that branch use the shop default. You see "Setting deactivated. Branch will use consumer default."
- A shop-wide default that is active cannot be switched off. The switch is greyed out. Activate another layout instead.

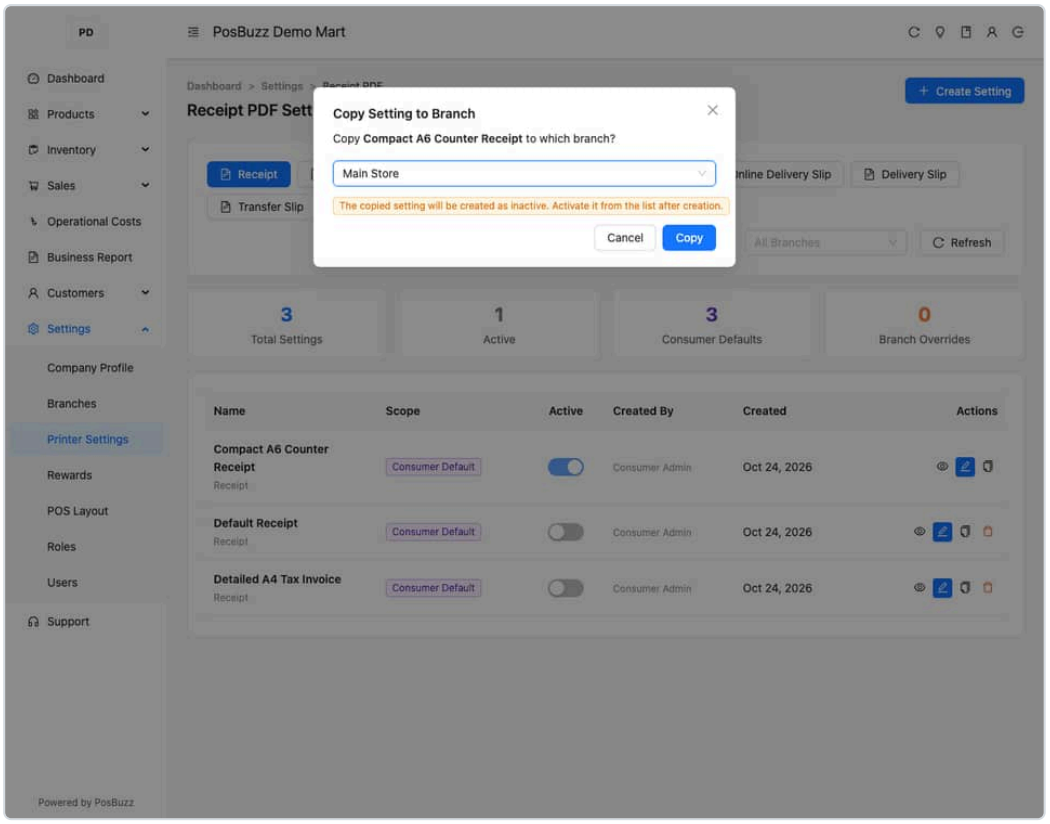

How to preview a layout

1. Click the eye icon (**Preview PDF**) on the row.
2. A wide window "Sample Receipt Preview" opens. It first shows "Generating sample preview..." and "Using fake sample data with this receipt setting".
3. Click **Download PDF** to save `sample-receipt-preview.pdf`, or **Close** to leave.

What happens next: nothing is changed. If it fails you see "Failed to generate preview".

How to copy a layout to a branch

1. Click the copy icon (**Copy to Branch**) on the row. The window "Copy Setting to Branch" opens with the question "Copy (layout name) to which branch?".
2. In the list (hint "Select target branch") choose the branch. You can type to search. The layout's own branch is not listed.
3. An orange note appears: "The copied setting will be created as inactive. Activate it from the list after creation."
4. Click **Copy**. The button is greyed out until you choose a branch. Click **Cancel** to leave.

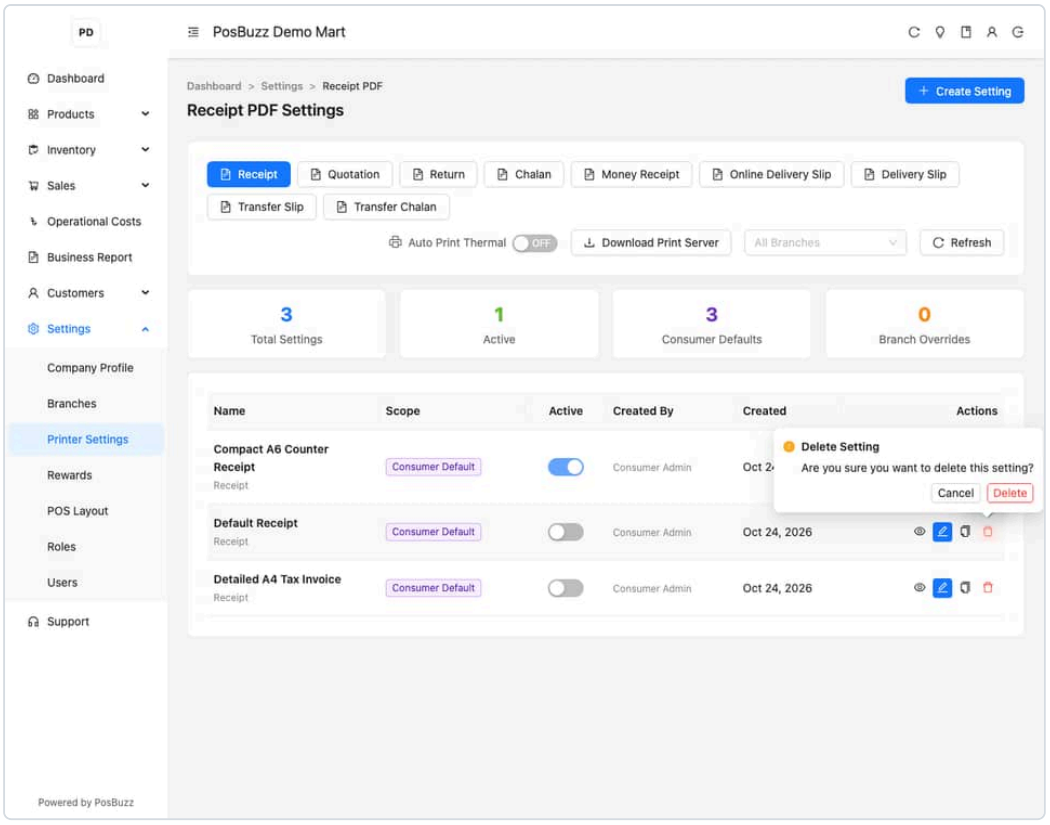

The Copy Setting to Branch window with a branch chosen and the orange note.

5. Back in the list, switch the new copy to **Active**.

What happens next: you see "Setting copied to branch successfully". The copy exists but is not used until you switch it on.

How to delete a layout

1. Click the red bin icon on the row.
2. The window **Delete Setting** asks "Are you sure you want to delete this setting?". Click **Delete**. Click **Cancel** to keep it.

The delete question next to the bin icon.

What happens next: you see "Setting deleted successfully".

How to turn automatic thermal printing on or off

1. Click the **Auto Print Thermal** switch.

What happens next: you see "Auto print thermal receipt enabled" or "Auto print thermal receipt disabled". When it is **ON**, the POS sends each new sale to the thermal printer program right after the sale is made.

> **Good to know: Auto Print Thermal** is saved in the browser on this computer only. Switch it on in the browser of each counter. It needs the print program running (see "Setting up receipt printing" below).

Messages on this screen

Message	What it means	What to do
Setting activated successfully	The layout is now in use.	Nothing.
Setting deactivated. Branch will use consumer default.	The branch layout is off. The shop default is used.	Nothing.

Message	What it means	What to do
Failed to activate setting / Failed to deactivate setting	The switch did not work.	Try again.
Setting copied to branch successfully	The copy was made, switched off.	Switch it on if you want to use it.
Failed to copy setting	The copy failed.	Try again.
Setting deleted successfully	The layout was removed.	Nothing.
Failed to delete setting	The delete failed.	Try again.
Failed to generate preview	The sample could not be made.	Try again.
Auto print thermal receipt enabled / disabled	The switch was changed for this browser.	Nothing.

Create or Edit Receipt Setting

*Page title: **Create Receipt Setting** or **Edit Receipt Setting**.*

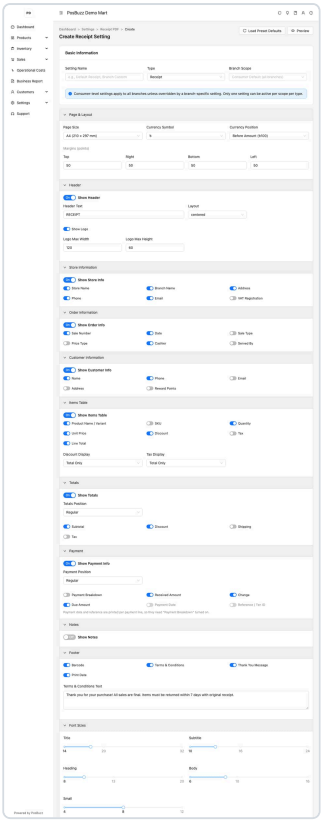

What it is

The form where you design how one printed document looks: which blocks and fields show, the page size, the currency, the font sizes and the footer text. You can see a sample before you save.

Where to find it

Menu: **Settings** > **Printer Settings**, then click **Create Setting** (top right), or click the pencil icon (**Edit**) on a row. You need the **Receipt settings** permission. The path at the top reads "Dashboard > Settings > Receipt PDF > Create" or "... > Edit". Clicking **Settings** in that path takes you back to the list.

What you see

The whole Create Receipt Setting form with every section open.

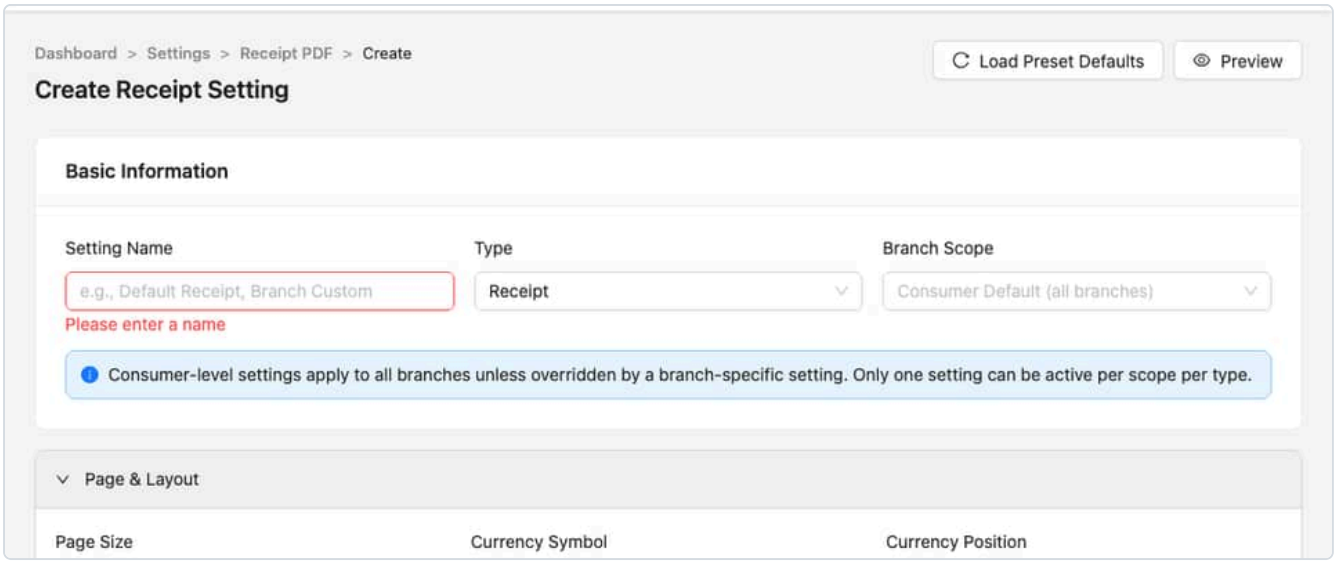

Top-right buttons:

- **Load Preset Defaults** (new settings only): sets every option back to the standard preset for the chosen **Type**. You see "Preset defaults loaded". If no type is chosen you see "Please select a type first". Choosing a different **Type** on a new setting loads that type's preset by itself.
- **Preview**: makes a sample PDF with fake data using the values in the form. If the form has errors you see "Please fix form errors before previewing".

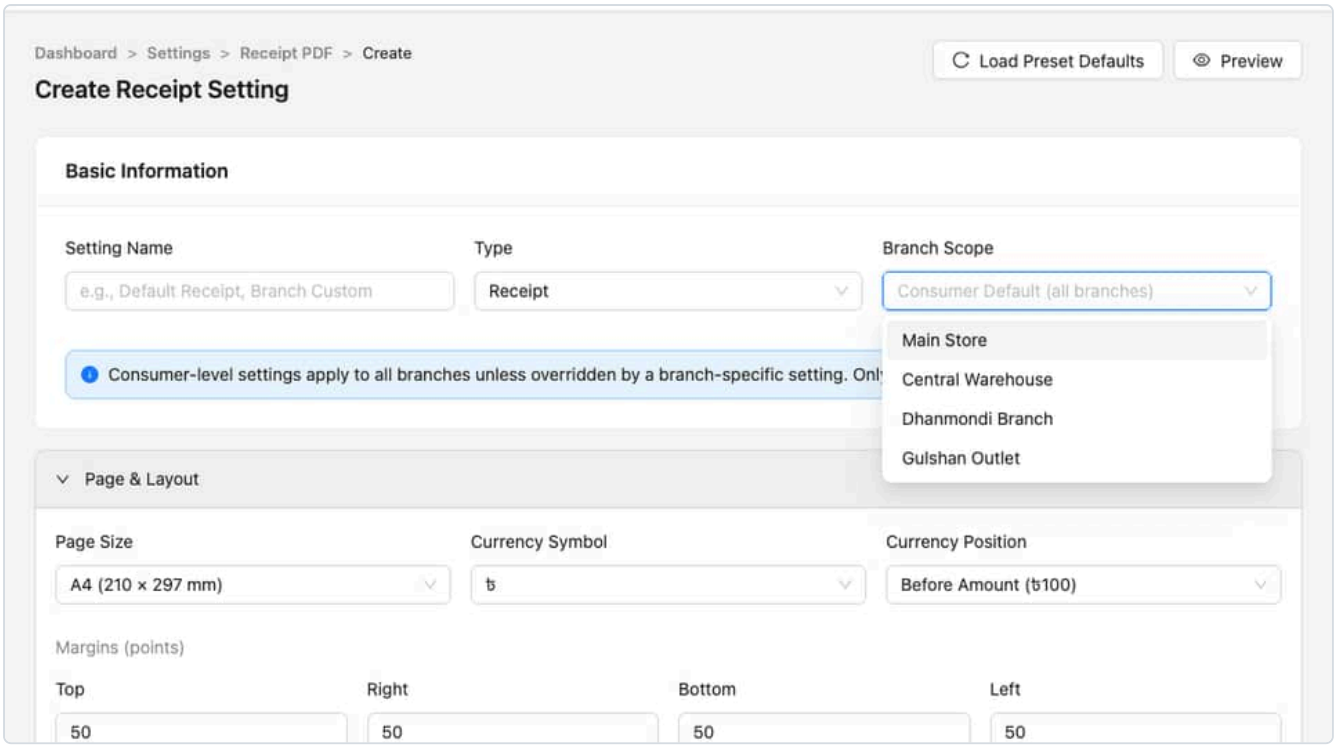

Basic Information

Field	Required	Notes
Setting Name	Yes	Example "e.g., Default Receipt, Branch Custom". If empty: "Please enter a name". The name must be new for that type and scope.
Type	Yes	Receipt (chosen at the start), Quotation, Return Receipt, Delivery Chalan, Money Receipt, Online Delivery Slip, Delivery Slip / Sticker, Inventory Transfer Slip, Transfer Chalan. If empty: "Please select a type". It cannot be changed when editing.
Branch Scope	No	The hint says "Consumer Default (all branches)". Choose a branch for a branch-only layout. You can clear it. It cannot be changed when editing.

A blue note appears on new settings: "Consumer-level settings apply to all branches unless overridden by a branch-specific setting. Only one setting can be active per scope per type."

*Clicking **Create Setting** with the name empty shows "Please enter a name".*

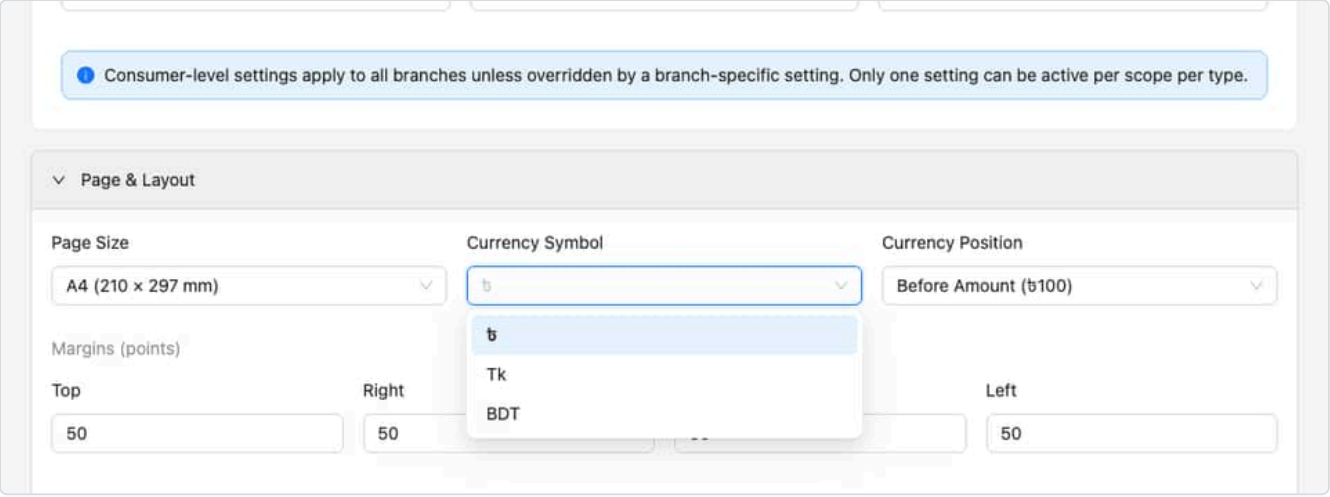

*The **Type** list.*

Sections. All sections are open at the start. You can fold each one. A master On/Off switch turns a whole block on or off. Turning the master off greys out its small options and switches them off. Turning the master on switches them all on again, and then you can change them one by one.

Section	What you can set
Page & Layout	**Page Size**: A4 (210 × 297 mm), A5 (148 × 210 mm), A6 (105 × 148 mm) for labels or stickers, Letter (8.5 × 11 in), Legal (8.5 × 14 in). **Currency Symbol**: ৳, Tk or BDT. **Currency Position**: "Before Amount (৳100)" or "After Amount (100৳)". **Margins (points)**: four boxes **Top**, **Right**, **Bottom**, **Left**, minimum 0.

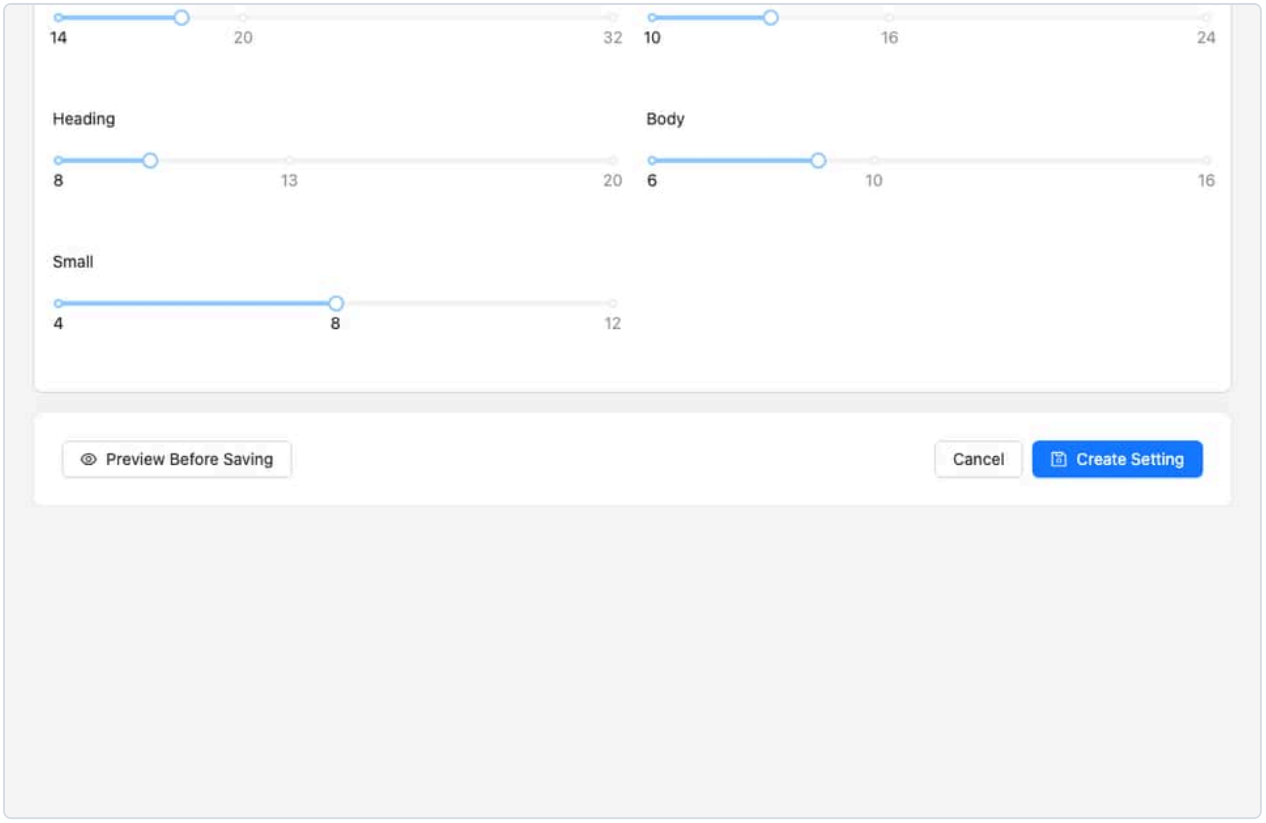

Section	What you can set
Header	**Show Header** (switch). **Header Text** (hint "RECEIPT"). **Layout**: the list shows "centered" at the start, and a Logo Left choice. **Show Logo** (small switch). When the header is on: **Logo Max Width** (20 to 500) and **Logo Max Height** (20 to 300).
Store Information	Master **Show Store Info**. Small switches: **Store Name**, **Branch Name**, **Address**, **Phone**, **Email**, **VAT Registration**.
Order Information	Master **Show Order Info**. Small switches: **Sale Number**, **Date**, **Sale Type**, **Price Type**, **Cashier**, **Served By**.
Customer Information	Master **Show Customer Info**. Small switches: **Name**, **Phone**, **Email**, **Address**, **Reward Points**.
Items Table	Master **Show Items Table**. Small switches: **Product Name / Variant**, **SKU**, **Quantity**, **Unit Price**, **Discount**, **Tax**, **Line Total**. When on: **Discount Display** ("Total Only" or "Breakdown (Special, Promo, Avg)") and **Tax Display** ("Total Only" or "Breakdown (Rate & Method)").
Totals	Master **Show Totals**. **Totals Position**: Regular or Right aligned. Small switches: **Subtotal**, **Discount**, **Shipping**, **Tax**.
Payment	Master **Show Payment Info**. **Payment Position**: Regular or Right aligned. Small switches: **Payment Breakdown**, **Received Amount**, **Change**, **Due Amount**, **Payment Date**, **Reference / Txn ID**. A note shows when Payment Breakdown is off: "Payment date and reference are printed per payment line, so they need "Payment Breakdown" turned on."
Notes	One switch **Show Notes**, which prints the sale notes.
Footer	Switches **Barcode**, **Terms & Conditions**, **Thank You Message**, **Print Date**. A text box **Terms & Conditions Text** (example "e.g., All sales are final. Items must be returned within 7 days...").
Font Sizes	Five sliders: **Title** (14 to 32), **Subtitle** (10 to 24), **Heading** (8 to 20), **Body** (6 to 16), **Small** (4 to 12).

*The **Currency Symbol** list: ৳, Tk and BDT.*

Not every option applies to every document type. For example, a chalan has no payment block. Use **Preview** to see the result.

Bottom buttons: **Preview Before Saving** (left), **Cancel** (back to the list without saving), and **Create Setting** (new) or **Update Setting** (edit).

*The font size sliders and the three bottom buttons: **Preview Before Saving**, **Cancel** and **Create Setting**.*

Preview window. Titled "Sample Receipt Preview". It shows "Generating sample preview..." and "Using fake sample data with your current settings". Buttons: **Close** and **Download PDF** (saves `sample-receipt-preview.pdf`).

How to create a layout

1. Go to **Settings** > **Printer Settings**.
2. Click the document type button, for example **Receipt**.
3. Click **Create Setting**.
4. Type a **Setting Name**.
5. Keep or change **Type**. Choose a **Branch Scope**, or leave it empty for all branches.
6. Change the sections you want. The standard preset for the type is already loaded.
7. Click **Preview Before Saving** and look at the sample. Click **Close**.
8. Click **Create Setting**.
9. Back in the list, switch **Active** on for the new layout.

What happens next: you see "Setting created successfully" and the list opens. The new layout is saved as inactive, so it is not used until you switch **Active** on.

> **Good to know:** A new receipt setting starts inactive. If you forget to switch it on, printing keeps using the old active layout.

How to change a layout

1. In the list, click the pencil icon (**Edit**) on the row.
2. Change the options.
3. Click **Preview Before Saving** to check.
4. Click **Update Setting**.

What happens next: you see "Setting updated successfully" and the list opens. If the layout is active, the change applies right away to new prints. **Type** and **Branch Scope** cannot be changed. To change them, create a new layout.

How to use one layout in another branch

1. In the list, click the copy icon.
2. Choose the branch and click **Copy**.
3. Switch the copy to **Active**.
4. Edit it if the branch needs something different.

Messages on this screen

Message	What it means	What to do
Setting created successfully / Setting updated successfully	The layout was saved.	If it is new, switch it to Active in the list.
Preset defaults loaded	The options went back to the standard preset.	Nothing.
Please select a type first	You clicked **Load Preset Defaults** with no type chosen.	Choose a **Type**.
Please enter a name	**Setting Name** is empty.	Type a name.
Please select a type	**Type** is empty.	Choose a type.
Please fix form errors before previewing	A field has a problem.	Fix the red fields, then click **Preview** again.
Failed to generate preview	The sample could not be made.	Try again.
A setting with the name "name" already exists for this branch/consumer and type "type". Please choose a different name.	The name is already used for that type and scope.	Choose a different name.
A name is required for the receipt setting.	The name is empty.	Type a name.
Failed to create setting / Failed to update setting	The save failed with no reason given.	Try again.

Message	What it means	What to do
Setting not found / Branch not found	The layout or branch was removed.	Go back to the list and refresh.

> **Good to know:** Only one layout can be active for each type and scope. Switching one on switches the previous one off. The shop-wide default cannot be switched off or deleted while it is active.

Setting up receipt printing

Use these steps once on the Windows computer where the receipt printer is connected. This is for the small roll (thermal) receipt that prints right after a sale. The PDF layouts in Printer Settings are a separate thing.

What you need: a Windows computer (Windows 7, 8, 10 or 11) with the receipt printer connected and working. The program needs .NET Framework 4.6.1 or newer, which most Windows computers already have. The program must run on the same computer as the web browser you use for the POS. A different computer on the network cannot print through it unless your technician has set that up.

How to install the print program

1. On that Windows computer, open the app and go to **Settings** > **Printer Settings**.
2. Click **Download Print Server**. The file `PosBuzz-Print-Server.zip` is saved.
3. Extract all the files into a folder, for example `C:\PosBuzz-Print-Server\`.
4. Open the folder and run **Printer.exe**.
5. A green icon appears in the system tray, near the clock.

How to set the program up

1. Right-click the green tray icon and choose **Configure**.
2. Fill in the store name, address, phone and email.
3. Type the **receipt printer name**. It must be exactly the name Windows shows. To check, open Windows Settings > Devices > Printers & scanners.
4. If you want a logo, add a PNG or JPG file.
5. Barcode labels use the browser from **Products > Barcode Printing**; no label printer is configured in the agent.
6. Set the currency symbol.
7. If a cash drawer is connected through the receipt printer, switch on the cash drawer option.
8. Tick the option to start with Windows, so the program opens every time the computer starts.
9. Save.

How to test the printer

1. Right-click the tray icon and choose **Test Receipt**.

2. A test receipt should print. Alternatively, open `http://localhost:8080/print/test-receipt` in the browser on the same computer.

How to turn on automatic printing in the app

1. In the app, go to **Settings** > **Printer Settings**.
2. Switch **Auto Print Thermal** to **ON**. Do this in the browser on each counter.
3. Make a test sale on the POS screen.

What happens next: the receipt prints after the sale. If the sale is paid in cash and a cash drawer is connected, the drawer opens. Keep the tray program running while you sell.

If the program is not running, nothing prints by itself. The app may then show: "Printing agent is not running. Please start the printing agent and try again." Start **Printer.exe** and try again.

How to set the label size

Set label dimensions in **Products > Barcode Printing**, then choose matching paper in the browser print dialog and printer driver. Use 100% scale and disable browser headers and footers.

How to update the print program

1. Quit the tray program.
2. Delete the old program folder.
3. Extract the new zip file.
4. Run **Printer.exe**.

Your settings are kept in your Windows user folder. The first time you run a new major version, enter the configuration once again.

If something goes wrong

Problem	What it means	What to do
"Printer not found"	The printer name in the program is not the same as the name in Windows, or the printer is off or not connected.	Print a Windows test page first. Then type the printer name exactly as Windows shows it.
The program does not start	Another program may be using the same connection (port 8080), or the firewall may be blocking it.	Right-click **Printer.exe** and choose **Run as administrator**. Check the Windows Firewall.
The green icon is missing	The program is not running, or the icon is hidden.	Open Task Manager and look for the program. Check the notification area settings in Windows.
It does not start with Windows	The start-up option did not save.	Run **Printer.exe** as administrator once and switch on **Start with Windows**.
Nothing prints after a sale	The program is not running, or **Auto Print Thermal** is **OFF** in this browser.	Start the program. Switch **Auto Print Thermal** to **ON** on this counter's browser.

Good to know: The Printer Settings page has no test buttons. Test from the tray program as described above.

Part 6 - Everyday problems and word list

Everyday problems

What you see	Likely reason	What to do
A page says the subscription is inactive	Your shop's paid period has ended	Contact PosBuzz support to renew, then click **Retry** on the page. Staff can sign in again as soon as a new period starts.
A page says it cannot be found	The address is mistyped, or the account does not exist	Check the address. It should be your shop name followed by the PosBuzz domain.
You cannot sign in	Wrong email or password, or too many attempts in a minute	Check the details. Wait a minute before trying again. Ask the owner to reset your password if you forgot it.
A menu item described in this manual is missing	Your role does not include that permission, or your plan does not include the feature	Ask the owner or a manager with the *Users & Roles* permission.
A list does not show a change you just made	The screen is showing older data	Click the circular arrow in the top bar (tooltip "Clear Application Cache"). It loads the lists again and does not sign you out. Or reload the page.
You want to read the manual again	Not applicable	Ask the PosBuzz team for the Shop App Manual. Both manuals are available on the Admin Panel's User Manuals page.
After you delete a role, the people who had it are gone from Users	Deleting a role in use also removed those people in our test	Before deleting a role, move its people to another role in Settings > Users.
You open a page and are sent to the sign-in page	Your session ended	Sign in again.
A sale is refused with a message about stock	The batch has fewer items than you tried to sell	Lower the quantity, pick another batch, or add stock. Check **Stock Overview**.
A sale is refused with a message about a price change	A price was edited while the sale was open	Refresh the product list on the screen, add the item again and complete the sale.
The receipt does not print and a warning appears	The print program on the shop computer is not running	The sale is already saved. Start the print program (Part 5, printing section) and reprint from the sale's page.
Something you tried says an item "already exists"	A customer, vendor, brand or similar with that name or phone number is already saved	Search for it and use the existing one.

What you see	Likely reason	What to do
A message says an item is "still used by other records"	You tried to delete something that products, sales or stock still refer to	Keep it, or make it inactive where the screen offers that.
The page looks wrong after an update	Your browser still has the old version	Reload the page. If it still looks wrong, close the app and open it again.

When you need help

1. Open **Support** in the left menu (if you do not see it, you do not have the permission).
2. Raise a ticket and describe what happened. Part 1 explains the form.
3. PosBuzz staff reply inside the ticket. You will see the answer on the same page.

Include the screen name, what you clicked, the exact message you saw and roughly when it happened. A photo of the screen is even better.

Word list

Word	Meaning
Batch	One delivery of one product, with its own quantity, cost, price and optional expiry date.
Branch	A shop, outlet or warehouse of yours. Stock is kept per branch.
Consumer	The word PosBuzz staff use for your shop account.
Due	An amount a customer still owes you, or that you still owe a vendor.
Inventory	The stock you hold, kept as batches.
Permission	One thing a user is allowed to do or see.
Plan	The package your shop subscribes to. It sets which features are available.
Promotion	A discount rule that can apply automatically or be chosen at the till.
Quotation	A price offer for a customer. It does not change your stock until it is turned into a sale.
Return	Items a customer brings back, with a refund or an exchange.
Role	A named set of permissions given to staff.
Subdomain	The first part of your shop's address, for example `myshop` in `myshop.posbuzz.xyz`.
Unit	How a product is counted or sold, for example piece, kilogram or pack.
Variant	One version of a product, such as a size or colour, with its own price and stock.
Vendor	A supplier you buy from.
